These regulations also prescribe ways to coordinate the traditional evidentiary hearing portions of the NPDES procedures with the "hybrid" procedures that will be used to make RCRA, UIC and PSD permit decisions. Briefly, they allow the initial comment proceedings on the draft permit to become formal when that might avoid the need for a subsequent evidentiary hearing, and allow NPDES evidentiary hearings to consider matters relating to RCRA, UIC and PSD permit decisions which are indissolubly linked to the decision on the NPDES permit. They thus provide some limited flexibility to shift the consideration of issues back and forth between the two stages as circumstances dictate. Although stays based on cross-effects are possible under certain limited circumstances under § 124.16, the general pattern will be that RCRA and UIC permits will not be stayed while an evidentiary hearing on an NPDES permit issued to the same source is in progress. However, a stay of contested PSD permit term(s) is unavailable under proposed § 124.16. Review of a PSD permit is uniquely dependent on the resolution of earlier PSD applications because of the first-come, first-served allocation scheme being employed by EPA for these permits. The stay provisions of § 124.16 might seriously impede the ability of EPA to process later PSD applications expeditiously.

Where the new "initial licensing" procedures for NPDES permits can be used, a much greater degree of procedural consolidation should be possible. Here the regulations provide that all permits which have been consolidated with the NPDES permit shall simply be passed through the same procedures as the NPDES permit. EPA explicitly invites comment on whether this approach might "overjudicialize" the process of issuing RCRA, UIC or PSD permits, and on alternative approaches that might be acceptable.

Relationship of Subpart A to the Final NPDES Regulations, Part 124

The final NPDES regulations that were recently promulgated contain a number of requirements that are similar, but not identical, to those required for all three programs in Subpart A. Changes to the Part 124 procedures for the NPDES program are the result of an effort to provide uniform procedures for the issuance of permits that accommodate the programmatic and statutory requirements of all three permit programs. These changes include:

Consolidation of Applications. NPDES permit applications can now be consolidated under § 124.5 with permit applications for other programs, and application deadlines may be delayed for purposes of this consolidation.

Statement of Basis and Fact Sheet. The statement of basis required for

* One pre-proposal comment argued that the reference to "order" in section 3008(b) make a hearing necessary since the granting of an initial license may be an "order" under the APA. However, the term is clearly used in section 3008 as a synonym for the "compliance orders" described in paragraph (a), and nothing more. See, e.g., section 3008(c), which is entitled "Requirements of Compliance Orders" and then immediately uses "order" as a synonym.

NPDES permits under the Consolidated regulations is the same as that required under the final NPDES regulations (§ 124.33). However, the requirements for fact sheets required for major NPDES permits have been changed slightly to enable the establishment of common requirements. The changes were mostly in the nature of providing more general requirements than those applicable to NPDES fact sheets in the final NPDES regulations. Certain additional unique NPDES requirements for fact sheets are provided in Subpart D, and these are identical to those required under the final NPDES regulations.

Public Hearings. The public hearing requirements in § 124.13 of the consolidated regulations are considerably more detailed than those provided under the final NPDES regulations (see § 124.42), and contain additional requirements that are designed to provide procedural safeguards for the issuance of RCRA, UIC and PSD permits, which do not require evidentiary hearings. NPDES permits must nonetheless be subject to subsequent evidentiary hearings under Subpart E of these regulations where NPDES permit provisions are contested. Where related permit provisions are contested under NPDES, RCRA, UIC or PSD permits for the same facility or activity, these provisions may be consolidated in the NPDES evidentiary hearing to facilitate decision-making on the related issues.

Subpart B—Specific Procedures Applicable to RCRA Permits

One additional requirement for RCRA permits is provided in Subpart B. Public notice of the receipt of a permit application for a major hazardous waste management facility is required under § 124.31, in addition to the public notice of the issuance of a draft permit required under § 124.11. This additional notice will provide both States and the general public with early notice of a request to permit a hazardous waste management facility and should facilitate coordination with State programs regarding the issuance of a permit to a facility located in that State. The permitting and siting of these facilities is expected to be controversial in some areas of the country, and this section seeks to ensure full public participation in the permit decision process.

In addition, a summary of significant permit applications may be prepared and will be made available upon request.

Subpart C—Specific Procedures Applicable to PSD Permits

Incorporation of the PSD permit requirements into this Part is not meant to change the structure of the program currently set forth at 40 CFR 52.21. The procedures set forth at 40 CFR 52.21(r), which is the analogous provision of that section, are very similar to the ones in Subpart A.

One specific provision has been included in this Subpart. It provides that PSD applications from small sources shall be processed expeditiously under the existing Part 52 regulations.

In the past, determinations by EPA that a source was required to apply for a PSD permit have been litigated as final agency action. EPA believes that in most cases such litigation represents an avoidable waste of judicial time and conflicts with the principles of administrative primary jurisdiction. Accordingly, the approach implicitly adopted by these regulations is that the determination that a source must apply for a PSD permit is not reviewable when it is made. Instead, the source may challenge that threshold determination during the permit issuance process and a final decision will be made at the time of the final decision of other issues.

In some cases such as those in which the threshold determination raises purely legal issues, this course may not be appropriate. In most cases the Regional Administrator will be able to designate the threshold determination as final action subject to immediate judicial review by publishing it in the **Federal Register**. See section 307(b) of the Clean Air Act.

Subparts D, E and F—Specific Procedures Applicable to NPDES Permits

These Subparts contain a number of additional requirements for NPDES permit processing that are largely unique to the Clean Water Act and the NPDES program, including evidentiary hearing procedures. They incorporate without substantive change requirements contained in the final NPDES regulations that were recently promulgated.

Note.—The final regulations for Parts 122–124 will include a plan to evaluate it within five years of implementation. The plan will describe criteria for assessing the degree of success of the regulations. The sources of data that will be used to evaluate the regulations under these criteria, and the resources anticipated as necessary to gather and analyze the data and conduct the reviews.

The Environmental Protection Agency has determined that this document, except for the UIC and RCRA provisions, does not constitute a major regulation requiring preparation of an economic impact statement under Executive Order 12044.

Analyses of the environmental, economic and regulatory impacts of the entirety of Subtitle C, RCRA, Hazardous Waste Management (including the RCRA programs in Parts 122–124 proposed) and on the UIC program are being or have been performed.

Drafts of the Environmental Impact Statement and the Economic Impact Analysis on the RCRA program are available by contacting:

Ed Cox, Solid Waste Information Office, Environmental Protection Agency, 26 West St. Clair Street, Cincinnati, Ohio 42560 (513–684–8491).

In addition, copies of these RCRA documents are available for review in the EPA Library Reading Room, Room 2404, Waterside Mall, 401 M Street, SW., Washington, D.C., and in the EPA Regional Office libraries. Comments on these documents must be received on or before September 12, 1979. Final versions of these documents will be issued at the time of promulgation of the RCRA Part 250 regulations.

Comments and the following supporting documents on the UIC program will be available for public inspection and copying at a reasonable fee during normal business hours at the Environmental Protection Agency, Public Information Reference Unit, Room 2922, 401 M Street, S.W. Washington, D.C. 20460. Copies of the supporting documents will also be available for inspection and copying in the Library at the ten EPA Regional Offices.

The supporting documents are:

1. "Analysis of Costs Underground Injection Control Regulations, Class I and Class III."
2. "Methods and Costs for Inventory and Assessment of Injection Wells Covered Under Classes IV and V."
3. "Estimated Cost of Compliance, Proposed Underground Injection Control Program Regulations, Class II Wells."
4. "Draft Environmental Impact Statement-State Underground Injection Control Program, Proposed Regulation."
5. "Supplement to Draft EIS, Reproposed Regulations."

Dated: June 4, 1979.

Douglas M. Costle,
Administrator.

1. It is proposed to revise Parts 122, 123 and 124 as follows:

PART 122—PROGRAM DESCRIPTIONS: THE HAZARDOUS WASTE PERMIT PROGRAM; THE UNDERGROUND INJECTION CONTROL PROGRAM; THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM; AND THE 404 DREDGE OR FILL PROGRAM

Subpart A—General Program Requirements

Sec.
122.1 Purpose and scope.
122.3 Definitions.
122.4 State authorities.
122.5 Signatories to permit program forms.
122.6 Application for a permit.
122.7 Permit issuance; effect of a permit.
122.8 Duration of permits; continuation of expiring permits; and transferability of permits.
122.9 Review and modification or revocation and reissuance of permits.
122.10 Termination of permits.
122.11 Conditions applicable to all permits.
122.12 Schedules of compliance.
122.13 Establishing permit terms and conditions.
122.14 Recording and reporting of monitoring results and compliance by permittees.
122.15 Noncompliance reporting.
122.16 Confidentiality of information.

Subpart B—Additional Requirements for Hazardous Waste Programs Under the Resource Conservation and Recovery Act

122.21 Purpose and scope.
122.22 Law authorizing hazardous waste control program.
122.23 Application for a permit.
122.24 Establishing permit terms and conditions.
122.25 Special HWM facility permits.
122.26 Permits by rule.
122.27 Reporting requirements.
122.28 Emergency Authorization.

Subpart C—Additional Requirements for UIC Programs Under the SDWA

122.31 Purpose and scope.
122.32 Law authorizing UIC program.
122.33 Designation of underground drinking water sources.
122.34 Classification of injection wells.
122.35 Authorization of underground injection by rule.
122.36 Authorization of underground injection by permit.
122.37 Area permits.
122.38 Corrective action.
122.39 General Prohibition against movement of fluid into underground sources of drinking water.
122.40 Temporary Authorization.
122.42 Establishing UIC permit terms and conditions.
122.43 Noncompliance reporting.
122.44 Special Requirements for wells managing hazardous wastes.
122.45 Elimination of all class IV wells.
122.46 Inventory of class V wells.

Subpart D—Additional Requirements for National Pollutant Discharge Elimination System Programs Under Clean Water Act

122.61 Purpose and scope.
122.62 Law authorizing NPDES permits.
122.63 Exclusions.
122.64 Application for a permit.
122.65 Effect of an NPDES permit.
122.66 Duration of permits.
122.67 Prohibitions.
122.68 Additional conditions applicable to NPDES permits.
122.69 Applicable limitations, standards, prohibitions and conditions.
122.70 Calculation and specification of effluent limitations and standards.
122.71 NPDES requirements for recording and reporting of monitoring reports.
122.72 NPDES noncompliance reporting requirements.
122.73 Modification or revocation and reissuance of NPDES permits.
122.74 Termination of NPDES permits.
122.75 Disposal of pollutants into wells, into publicly owned treatment works or by land applications.
122.76 Concentrated animal feeding operations.
122.77 Concentrated aquatic animal production facilities.
122.78 Aquaculture projects.
122.79 Separate storm sewers.
122.80 Silvicultural activities.
122.81 New sources and new dischargers.
122.82 NPDES general permit program.
122.83 Special considerations under Federal law.

Appendix A—Point Source Categories and Permit Expiration Dates.

Authority: Resource Conservation and Recovery Act, 42 USC 6901 et seq.; Safe Drinking Water Act, 42 USC 300f et seq.; and Clean Water Act, 33 USC 1251 et seq.

Subpart A—General Program Requirements

§ 122.1 Purpose and scope.

(a) The regulations in this Part define three permit programs administered by EPA. They apply to the permit programs as they are administered by approved States, to the extent incorporated by reference in Part 123. These permit programs are:

(1) The Hazardous Waste Permit Program (the RCRA Program) under section 3005 of the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 (Pub. L. 94–580, as amended by Pub. L. 95–609) (RCRA);

(2) The Underground Injection Control Program (the UIC Program) under section 1421 of the Safe Drinking Water Act (Pub. L. 93–523, as amended by Pub. L. 95–190) (SDWA); and

(3) The National Pollutant Discharge Elimination System (the NPDES Program) under sections 318, 402 and 405(a) of the Clean Water Act (Pub. L. 92–500, as amended by Pub. L. 95–217 and Pub. L. 95–576) (CWA).

(b) These regulations also apply to State section 404 programs under CWA as set out in Part 123.

(c) The consolidation of these permit programs into one set of regulations is authorized by sections 101(f) and 501(a) of the CWA, sections 1006 and 2002 of RCRA, and section 1450 of SDWA.

(d) The regulations in Parts 123, 124, 125, 146 and 250 also apply to the RCRA, UIC, NPDES and section 404 permit programs in the following manner:

(1) Part 123 describes the requirements for State participation in these programs;

(2) Part 124 describes the procedures for issuing permits. These procedures apply in their entirety to EPA and in part to approved States as described in Part 123; and

(3) Subchapter N of this Chapter and Parts 125, 146, and 250 describe technical criteria and standards for determinations under the NPDES, UIC and RCRA programs, respectively. They apply to both EPA and State programs. The technical criteria of 40 CFR Part 230 apply to State section 404 programs.

(e) The regulations in this Part and in Parts 123 and 124 establish the requirements for public participation in the State permit issuance process and in the approval of State RCRA, UIC, NPDES, and 404 programs. These requirements carry out the purposes of the public participation requirements of 40 CFR Part 25, and supercede the requirements of that Part as they apply to actions contained under Parts 122, 123 and 124.

§ 122.3 Definitions.

The following definitions apply to this Part and to Parts 123, 124 and 125. Terms not defined in this Part shall have the meaning given by the appropriate Act.

(a) General definitions

"Administrator" means the Administrator of the United States Environmental Protection Agency, or his/her designee.

"Application" means the EPA standard national forms for applying for a permit, including any subsequent additions, revisions or modifications to the form; or forms approved by EPA for use in approved States, including any approved modifications or revisions.

"Appropriate Act and/or Regulations" means the Clean Water Act (CWA); the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA); the Safe Drinking Water Act (SDWA); the Clean Air Act (CAA); and applicable regulations

promulgated under these laws. This term is used to describe the application of general requirements to specific program activities under one or more of the above laws, as appropriate.

"Approved program" means a State program which has been submitted to and approved by EPA under Part 123 and the appropriate Act. An "approved State" is one administering an "approved program."

"Aquifer" means a geological formation, group of formations, or part of a formation that is capable of yielding useable quantities of groundwater.

"CWA" means the Clean Water Act (formerly referred to as the Federal Water Pollution Control Act) Pub. L. 92–500, as amended by Pub. L. 95–217 and Pub. L. 95–576, 33 U.S.C. 1251 *et seq.*

"Contaminant" means any physical, chemical, biological or radiological substance or matter in water. "Contaminant" includes, but is not limited to or by, the term pollutant, as defined in this Part.

"Director" means the Regional Administrator, or the State Director, as defined in this section, as the particular context may require.

[*Comment:* Where there is no approved State program, the term "director" refers to the Regional Administrator. Where there is an approved State program, the term "director" normally refers to the State director. In some circumstances, however, EPA retains authority to take certain actions even where there is an approved State program; e.g., where EPA issued an NPDES permit prior to the approval of a State program, EPA may retain jurisdiction over that permit after program approval, see § 123.71 and § 123.91. In such cases, the term "director" means the Regional Administrator and not the State Director.]

"Environmental Protection Agency" ("EPA") means the United States Environmental Protection Agency.

"Facility or activity" means any facility or activity (including land or appurtenances thereto) that is subject to regulation under the RCRA, UIC, or NPDES programs.

"Ground water" means water in the saturated zone beneath the land surface.

"Hazardous waste" has the meaning given in section 1004(5) of RCRA as further defined and identified in 40 CFR Part 250, Subpart A, § 250.13 and .14 (proposed at 43 FR 58955–9).

"Interstate agency" means an agency of two or more States established by or under an agreement or compact approved by the Congress, or any other agency of two or more States, having substantial powers or duties pertaining to the control of pollution as determined and approved by the Administrator under the appropriate Act and regulations.

"NPDES" ("National Pollutant discharge Elimination system") means the national program for issuing, modifying, revoking and reissuing, terminating, monitoring, and enforcing permits pursuant to sections 402, 318, and 405 of CWA. The term includes any State or interstate program which has been approved by the Administrator.

"Owner or Operator" means the owner or operator of any facility or activity subject to regulation under the RCRA, UIC, NPDES or 404 programs.

"Permit" means a permit or equivalent control document that complies with all of the requirements and procedures of this part and Parts 123 and 124, issued by EPA or an approved State. In Part 124, references to "permit" may include permit modification, revocation or denial.

"Person" means an individual, corporation, partnership, association, State or municipality or Federal agency. Under RCRA and CWA, "person" also means a commission, political subdivision of a State, or interstate body. Under RCRA only, "person" also means a trust, firm or joint stock campany; and under SDWA only, "person" also means a company or federal agency, and includes officers, employees, and agency of any corporation, company, association, State municipality, or Federal agency.

"Pollutant" means dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt and industrial, municipal, and agricultural waste discharged into water. It does not mean:

(1) Sewage from vessels; or

(2) Water, gas, or other material which is injected into a well to facilitate production of oil or gas, or water derived in association with oil and gas production and disposed of in a well, if the well used either to facilitate production or for disposal purposes is approved by authority of the State in which the well is located, and if such State determines that such injection or disposal will not result in the degradation of ground or surface water resources.

[*Comment:* The legislative history of the CWA indicates that "radioactive materials" as included within the definition of "pollutant" in section 502 of the CWA means only radioactive materials which are not encompassed in the definition of source, byproduct, or special nuclear materials defined by the Atomic energy Act (AEA(of 1954, as amended, and regulated under the AEA. Examples of radioactive materials not covered by the AEA and, therefore, included within the term "pollutant" or radium and accelerator produced isotopes. See *Train* v. *Colorado Public Interest Research Group, Inc.* 426 U.S. 1 (1976).]

"Publicly owned treatment works" or "POTW" means a treatment works as defined in section 212 of the Clean Water Act (CWA), which is owned by a State or municipality (as defined under § 122.3(d)), excluding any sewers or other conveyances not leading to a facility providing treatment.

"Regional Administrator" means the Regional Administrator of the appropriate Regional Office of the Environmental Protection Agency or the delegated representative of the Regional Administrator.

"Regulated activity" or "Activity subject to regulation" means any activity subject to regulation under the RCRA, UIC, or NPDES programs.

"RCRA" means the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 (Pub. L. 94–580, as amended by Pub. L. 95–609).

"SDWA" means the Safe Drinking Water Act (Pub. L. 95–523, as amended by Pub. L. 95–1900).

"Schedule of compliance" means a schedule of remedial measures including an enforceable sequence of interim requirements (e.g., actions, operations, or milestone events) leading to compliance with the appropriate Act and regulations.

"Secretary" means the Secretary of the Army, acting through the Chief of Engineers.

"Site" means the land or water area upon which a facility or activity is physically located or conducted, including but not limited to adjacent land used for utility systems, as repair, storage, shipping or processing areas, or other areas incident to the controlled facility or activity.

"State" means any of the 50 States, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands (except in the case of RCRA), and the Northern Mariana Islands (except in the case of (CWA).

"State Director" means the chief administrative officer of a State agency or interstate agency approved under Part 123 by EPA to administer a State program, or the delegated representative of the State Director. If responsibility is divided within a State agency or among two or more State or interstate agencies,

"State Director" means the administrative officer authorized to perform the particular procedure or function to which reference is made.

"Stratum" means a single sedimentary bed or layer, regardless of thickness, that consists of approximately the same kind of rock material. Strata is the plural of stratum.

"Total dissolved solids" ("TDS") means the total dissolved (filterable) solids as determined by use of the method promulgated at 40 CFR 136.3, Table I. (The method is described in EPA's "Methods for Chemical Analysis of Water and Wastes, 1974," pages 266–267.)

"Underground Drinking Water Source" or "Underground Source of Drinking Water," except as specified in § 146.04 means:

(1) An aquifer or its portion supplying drinking water for human consumption;

(2) An aquifer or its portion in which the groundwater contains less than 10,000 mg/1 total dissolved solids; or

(3) An aquifer or its portion designated as such by the Administrator or the Director;

[*Comment:* Both the RCRA and UIC programs will use this definition of underground source of drinking water (USDW). However, under the UIC program latitude is given to the responsible authority in designating USDW's (see §§ 122.33 and 146.04). As a balance to this latitude, designations under the UIC program must be made after public hearing and are subject to the approval of the Administrator.]

(b) Definitions applicable to RCRA program requirements

"Application, Part A" means that part of the application which a RCRA permit applicant must complete to qualify for interim status under section 3005(e) of RCRA and for consideration for a permit.

[*Comment:* Part A of the application consists of Form 1 (General Information) and Form 3 (Hazardous Waste Information Summary) as proposed in today's Federal Register as "Public Notice of the Consolidated Application Form."]

"Application Part B" means that part of the application which a RCRA permit applicant must complete to be considered for a permit.

[*Comment:* EPA is not proposing a specific form for Part B of the permit application.]

"Authorization" means authorization, or approval by EPA of a State program which has met the applicable requirements of section 3006(b) of RCRA and Part 123, Subparts A and B.

"Close Out" means the point in time at which Hazardous Waste Management facility owners/operators discontinue accepting hazardous waste for treatment, storage or disposal.

[*Comment:* This definition has been changed from the one included in 40 CFR Part 250, Subpart 250.41 (proposed at 43 FR 58006 (December 18, 1978)) so as to clearly indicate that close-out begins when the facility discontinues accepting hazardous wastes. Comments received on this provision, as well as those submitted on the Part 250 definition of "close-out", will be considered together and will be conformed when these regulations are finally promulgated.]

"Closure" means the act of securing a Hazardous Waste Management facility pursuant to the requirements of 40 CFR Part 250, § 250.43–7 (proposed at 43 FR 59004 (December 18, 1978)).

"Delivery Document" means a shipping paper (bill of lading, waybill, dangerous cargo manifest, or other shipping document) used in lieu of the original manifest to fulfill the recordkeeping requirements of 40 CFR Part 250, § 250.33 (proposed at 43 FR 16510 (April 28, 1978)).

"Disposal" means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste or hazardous waste into or on any land or water so that such solid waste or hazardous waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including groundwaters.

A "Disposal facility" means any Hazardous Waste Management facility which disposes of hazardous waste.

"Existing HWM facility" means a Hazardous Waste Management facility which was in operation or under physical construction, on or before the date of promulgation of the regulations under § 3001 of RCRA, 40 CFR 250, Subpart A, (proposed at 43 FR 58954 (December 18, 1978)).

"Generator" means any person or Federal agency whose act or process produces hazardous waste identified or listed under 40 CFR Part 250, § 250.13 and .14 (proposed at 43 FR 58955–9 (December 18, 1978), provided, however, that certain producers may or may not be generators depending on whether they meet the criteria specified in 40 CFR Part 250, § 250.29 (proposed at 43 FR 58979 (December 18, 1978)).

A "Hazardous Waste Management facility" ("HWM facility") means any facility, land and appurtenances thereto used for the treatment, storage, and/or disposal of hazardous waste, except that solid waste disposal facilities which receives hazardous wastes only from persons subject to 40 CFR 250.29 shall not be considered HWM facilities.

[*Comment:* Persons subject to 40 CFR 250.29 are those who produce and dispose of no more than 100 kilograms (approximately 220 pounds) of hazardous wastes in any one month, retailers who dispose of hazardous wastes other than waste oil, and farmers who dispose of pesticides which are hazardous and who follow certain specified operating procedures.]

"In operation" means Hazardous Waste Management facilties that are actively treating, storing, or disposing of hazardous waste.

"Interim authorization" means authorization or approval by EPA of a State program which has met the applicable requirements of section 3006(c) of RCRA and Part 123, Subparts A and B.

The term "Major Hazardous Waste Management facility" means a facility used for the treatment, storage or disposal of hazardous waste at a rate equal to or greater than 5,000 metric tons per year.

[*Comment:* This definition is used in conjunction with the requirements for EPA's review of State issued permits in § 123.38, the issuance of public notices in § 124.11, and the issuance of fact sheets in § 124.8, and shall not be construed to mean that any of the application procedures or public hearing procedures are waived for any facility.]

"New HWM facility" means a Hazadous Waste Management facility which does not meet the definition of an existing facility as defined in this section.

"Off-site" means any site that does not meet the definition of "on-site" as defined in this section.

"On-site" means on the same or geographically contiguous property. Two or more pieces of property which are geographically contiguous and are divided by public or private right(s)-of-way are considered a single site.

"Physical construction" means excavation, movement of earth, erection of forms or structures, the purchase of equipment or any other activity involving the actual preparation of the Hazardous Waste Management facility.

"Storage" means the containment of hazardous waste, either on a temporary basis or for a period of years, in such a manner as not to constitute disposal of such hazardous wastes.

"Storage facility" means Hazardous Waste Management facility which stores hazardous waste, except for generators who store their own wastes on-site for less than 90 days for subsequent transport off-site, in accordance with regulations in 40 CFR Part 250, § 250.20(c)(2) (proposed at 43 FR 58978 (December 18, 1978)).

"Transporter" means a person or Federal Agency engaged in the transportation of hazardous waste by air, rail, highway or water.

"Treatment" means any method, technique, or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste or so as to render such waste nonhazardous, safer for transport, amenable for recovery, amenable for storage or reduced in volume. Such term includes any activity or processing designed to change the physical form or chemical composition of hazardous waste so as to render it nonhazardous.

"Treatment facility" means any Hazardous Waste Management facility which treats hazardous waste.

(c) Definitions applicable to UIC program requirements

"Approval in part" means action by the Administrator which authorizes a State to administer a UIC program covering less than all types of injection wells within the State. In order to be approved in part, the State program must meet all the requirements of Part 123 for those injection wells for which authorization is given.

[*Comment:* States which have not received full approval are not eligible to receive program grants under section 1443 of SDWA.]

"Area of review" means the area surrounding an injection well which is described according to the criteria set forth in § 146.06.

"Effective date of a UIC program" means the date that a State UIC program is approved or the date that a UIC program is established by the Administrator.

"Existing injection wells" means all injection wells other than new injection wells as defined in this section.

"Fluid" means material or substance which flows or moves whether semisolid, liquid, sludge or any other form or state.

"Injection well" means a well into which injection occurs, including the following types of injection wells (which are divided into the classes in § 122.34):

(1) "Air conditioning return flow well" means a well used to return to the supply aquifer the water used for heating or cooling in a heat pump.

(2) "Cesspool" means an underground device with an open bottom and often with perforated sides that receives wastes.

[*Comment:* The UIC requirements will *not* apply to single family residential cesspools.]

(3) "Cooling water return flow well" means a well used to inject water previously used for cooling.

(4) "Disposal well" means a well used for the disposal of waste into a subsurface stratum.

(5) "Drainage well" means a well used to drain surface fluid, primarily storm runoff, into a subsurface stratum.

(6) "Dry well" means a well that is used for the injection of wastes into the unsaturated zone above an underground drinking water source.

(7) "Enhanced recovery injection well" means a well used to inject fluids for the purpose of facilitating recovery of oil or natural gas.

(8) "Frasch process well" means a well used for the production of sulfur by the Frasch process.

(9) "Geothermal well" means a well used to inject fluids to extract heat from the earth's interior.

(10) "Hydrocarbon storage well" means: (i) a well used to inject hydrocarbons into an underground formation or reservoir for the purpose of storage or (ii) a well for the injection of fluids for the purpose of recovery of stored hydrocarbons.

(11) "In situ gasification well" means a well used for the injection of air and/or fuels to gasify by partial combustion fossil fuel such as coal, tar sands and oil shale.

(12) "Industrial waste disposal well" means a well used for the disposal of waste fluids from an industrial facility into a subsurface stratum.

(13) "Municipal disposal well" means a well used for the disposal of effluent or sludge from a municipal wastewater collection, storage or treatment facility into a subsurface stratum.

(14) "Nuclear disposal or storage well" means a well used for the injection of nuclear materials or wastes into a subsurface stratum, whether for temporary storage or ultimate disposal.

(15) "Produced fluid disposal well" means a well used for the injection of water or other fluids which are brought to the surface in connection with oil or natural gas production into a subsurface stratum other than the oil producing formation.

(16) "Recharge well" means a well used to artificially replenish the water in an aquifer.

(17) "Salt water intrusion barrier well" means a well used to inject water into a fresh water aquifer to prevent the intrusion of salt water into the fresh water.

(18) "Sand backfill well" means a well used to inject a mixture of water and sand, mill tailings or other solids into mined out portions of subsurface mines.

(19) "Septic system well" means (i) a well used to inject the waste or effluent from a multiple dwelling, community or regional septic tank; or (ii) a multiple dwelling, community or regional cesspool; or (iii) a septic tank system well used to dispose of hazardous wastes; but does not mean individual residential waste disposal systems.

(20) "Solution mining well" means (i) a well used to inject fluid containing leaching chemicals to effectuate in-situ leaching and subsequent recover of metals such as copper and uranium, or (ii) a well used for the injection of water or other fluids for the purpose of recovering minerals such as sodium chloride, potash and phosphate.

(21) "Subsidence control well (not for the purpose of oil and gas recovery)" means a well used to inject fluids into a non-oil gas producing zone to reduce or eliminate subsidence associated with the overdraft of fresh water.

"Listed State" means a State listed by the Administrator under section 1422 of the SDWA as needing a State UIC program.

"New injection wells" means those wells which begin injection after a UIC program applicable to such wells becomes effective in the State.

"Underground injection" means the subsurface emplacement of fluids by well injection.

"Well injection" means the subsurface emplacement of fluids (except drilling muds, cement and similar construction materials) through a bored, drilled or driven well; or through a dug well, where the depth of the dug well is greater then the largest surface dimension.

(d) Definitions applicable to NPDES program requirements

"Applicable standards and limitations" means all State, interstate and Federal standards and limitations to which a discharge or a related activity is subject under the CWA, including, but not limited to, effluent limitations, water quality standards, standards of performance, toxic effluent standards for prohibitions, best management practices, and pretreatment standards under sections 301, 302, 303, 304, 306, 307, 308, 403 and 405 of CWA.

"Best management practices" ("BMPs") include treatment requirements, operating and maintenance procedures, schedules of activities, prohibitions of activities, and other management practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. BMPs may be imposed in addition to or in the absence

of effluent limitations, standards, or prohibitions.

"Contiguous zone" means the entire zone established by the United States under article 24 of the Convention on the Territorial Sea and the Contigous Zone.

"Direct discharge" means the discharge of a pollutant or the discharge of pollutants.

"Discharge" when used without qualification includes a discharge of a pollutant and a discharge of pollutants.

"Discharge of a pollutant" and "discharge of pollutants" each means: (i) Any addition of any pollutant or combination of pollutants to navigable waters from any point source, or

(ii) Any addition of any pollutant or combination of pollutants to the waters of the contiguous zone or the ocean from any point source other than a vessel or other floating craft when being used as a means of transportation.

This definition includes discharges into waters of the United States from: surface runoff which is collected or channelled by man; discharges through pipes, sewers, or other conveyances owned by a State, municipality, or other party which do not lead to treatment systems; and discharges through pipes, sewers, or other conveyances, leading into treatment systems owned in whole or in part by a third party other than a State or a municipality.

"Discharge Monitoring Report" ("DMR") means the EPA uniform national form, including any subsequent additions, revisions or modifications, for the reporting of self-monitoring results by permittees. DMRs must be used by approved States as well as by EPA.

[*Comment:* EPA will supply DMRs to any approved State upon request. The EPA national forms may be modified to substitute the State Agency name, address, logo and other similar information, as appropriate, in place of EPA's.]

"Effluent limitation" means any restriction imposed by the Director on quantities, rates, and concentrations of pollutants which are discharged from point sources into navigable waters, the waters of the contiguous zone or the ocean.

"Indirect discharger" means a non-municipal, non-domestic discharger introducing pollutants to a publicly owned treatment works which introduction does not constitute a "discharge of pollutants."

"Municipality" means a city, town, borough, county, parish, district, association or other public body created by or pursuant to State law and having jurisdiction over disposal of sewage, industrial wastes, or other wastes, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of CWA.

"Navigable waters" means "waters of the United States, including the territorial seas". This term includes:

(1) All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;

(2) Interstate waters, including interstate wetlands;

(3) All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, natural ponds, the use, degradation or destruction of which would affect or could affect interstate or foreign commerce including any such waters:

(i) Which are or could be used by interstate of foreign travelers for recreational or other purposes;

(ii) From which fish or shellfish are or could be taken and sold in interstate or foreign commerce;

(iii) Which are used or could be used for industrial purposes by industries in interstate commerce;

(4) All impoundments of waters otherwise defined as navigable waters under this paragraph;

(5) Tributaries of waters indentified in paragraphs (1)–(4) of this section, including adjacent wetlands; and

(6) Wetlands adjacent to waters identified in paragraphs (1)–(5) of this section; ("Wetlands" means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalance of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas.

(7) *Provided,* That treatment ponds or lagoons designed to meet the requirements of the CWA (other than cooling ponds meeting the criteria of this paragraph) are not waters of the United States.

[*Comment:* For purposes of clarity the term "waters of the United States" is primarily used throughout the regulations rather than "navigable water."]

"New discharger" means any building, structure, facility or installation (1) which on October 18, 1972, had never discharged pollutants and (2) which has never received a finally effective NPDES permits and (3) from which there is or may be a new or additional discharge of pollutants and (4) which does not fall within the definition of "new sources".

"New source" means any building, structure, facility or installation from which there is or may be a discharge of pollutants, the construction of which commenced:

(i) After promulgation of standards of performance under section 306 of the CWA which are applicable to such source, or

(ii) After proposal of standards of performance under section 306 of the CWA which are applicable to such source, but only if the standards are promulgated within 120 days of their proposal.

[*Comment:* See § 122.81 for the criteria and standards to be used in determining whether a source has begun construction within the meaning of this definitions, for the types of construction activities which result in new sources or new discharges, and for the effect of a new source determination.]

"Point source" means any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

"Process waste water means any water which, during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, byproduct, or waste product.

"Sewage from vessels" means human body wastes and the wastes from toilets and other receptacles intended to receive or retain body wastes that are discharged from vessels and regulated under section 312 of the CWA, except that with respect to commercial vessels on the Great Lakes this term includes graywater. For the purposes of this definition, "graywater" means galley, bath, and shower water.

"Sewage sludge" means the solids, residues, and precipitate separated from or created in sewage by the unit processes of a publicly owned treatment works. "Sewage" as used in this definition means any wastes, including wastes from humans, households, commercial establishments, industries, and storm water runoff, that are discharged to or otherwise enter a publicly owned treatment works.

"Variance" means any mechanism or provision under section 301 or 316 of CWA and Part 125, or in the applicable effluent limitation guidelines which

allow modification to or waivers of the effluent limitation requirements of CWA. This includes provisions which allow the establishment of alternative limitations based on fundamentally different factors and sections 301(c), 301(g), 301(h), and 316(a) of CWA, where appropriate.

"Waters of the United States"means navigable waters, as defined in this section.

(e) Definitions applicable to section 404 program requirements

"Best Management Practices" ("BMPs") means methods, measures, practices or design and performance standards to prevent or reduce the pollution of waters of the United States. BMPs include but are not limited to schedules of activities, prohibitions of practices, and maintenance procedures. BMPs developed by State section 404 Agencies must insure compliance with the section 404(b)(1) environmental guidelines, (40 CFR 230), and effluent limitations and prohibitions under section 307(a), and water quality standards.

"Cultivating" means physical means of soil treatment employed within established agricultural and silvicultural lands upon planted farm or forest crops to aid and improve their growth, quality and yield.

"Discharge of dredged material" means any addition of dredged material into waters of the United States. The term includes, without limitation, the addition of dredged material into waters of the United States and the runoff or overflow from a contained land or water disposal area. Discharges of pollutants into waters of the United States resulting from the subsequent onshore processing of dredged material that is extracted for any commercial use (other than fill) are not included within this term and are subject to section 402 of the Clean Water Act even though the extraction and deposit of such material may also require a permit from the Corps of Engineers.

"Discharge of fill material" means the addition of fill material into waters of the United States. The term generally includes without limitation, the following activities in waters of the United States: placement of fill that is necessary for the construction of any structure; the building of any structure or impoundment requiring rock, sand, dirt, or other materials for its construction; site-development fills for recreational, industrial, commercial, residential, and other uses; causeways or road fills; dams and dikes; artificial islands; property protection and/or reclamation devices such as riprap, groins, seawalls, breakwaters, and revetments; beach nourishment; levees; fill for structures such as sewage treatment facilities, intake and outfall pipes associated with power plants and subaqueous utility lines; and artificial reefs.

"Disposal site" means that portion of the waters of the United States enclosed within fixed boundaries consisting of a water surface area (when present), a volume of water (when present), and a substrate area. In the case of wetlands on which water is not present, the disposal site consists of the wetlands surface area. Fixed boundaries may consist of fixed geographic point(s) and associated dimensions, or of a discharge point and specific associated dimensions.

"Dredged material means material that is excavated or dredged from waters of the United States.

"Fill material" means any material used for the primary purpose of replacing any water of the United States with dry land or of changing the bottom elevation of a waterbody. The term does not include any pollutant discharged into the water primarily to dispose of waste, as that activity is regulated under section 402 of CWA. The Director, in consultation with the section 402 permitting authority, will make determinations as to the primary purpose of proposed activities.

[*Comment:* In some instances the proposed activity will require both a section 402 and a section 404 permit. (e.g., diking an area of waters of the United States to fill it with municipal wastes.) Where this is the case, every attempt should be made to jointly process the permit application, including joint public notices and public hearings if necessary. Consideration is presently being given to changing the primary purpose test. Should this occur the above comment will no longer be applicable.]

"General permit" means either a State permit or a Corps of Engineers Army permit that is issued under section 404 of CWA after notice and opportunity for public hearing, on a local State, Regional or nationwide basis to authorize any discharges of dredged or fill material from clearly described categories of activities involving discharges of dredged or fill material that are similar in nature, will cause only minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse effects on the environment.

"Harvesting" means physical measures employed directly upon farm, or forest crops to bring about their removal from farm lands or forest land, but does not include the construction of farm or forest roads.

"Impoundment" means a standing body of open water created by artificially blocking or restricting the flow or circulation of a water of the United States. As used in this regulation, the term does not include artificial lakes or ponds created by excavating and/or diking dry land areas to collect and retain water for such purposes as stock watering, irrigation, settling basins, cooling, or rice growing, and actually used for such purposes.

"Minor drainage" means construction and maintenance of facilities for the removal of excess soil moisture from drylands (uplands). It includes ditching and tiling incidental to the planting, cultivating, protecting, or harvesting of crops. The connection of such drainage ways from uplands to the waters of the United States is considered to be minor drainage. The discharge of dredged or fill material incidental to connecting an upland drainageway to water of the United States, adequate to the purpose of removing excess soil moisture incidental to the above activities is minor drainage. The term does not include discharges incidental to the construction of ditches or other drainage features which converts any water of the United States to farming, ranching, or silvicultural uses, nor does it include discharges incidental to the drainage of a forested wetland to convert it to any type of nonwetland forest.

"Navigable waters" and "Wetlands" are defined under the NPDES program definitions.

"Plowing" means all forms of primary tillage, including moldboard, chisel, or wide-blade, plowing, discing, harrowing; and similar physical means utilized on established farm land for the breaking up, cutting, turning over, or stirring of soil to prepare it for the planting of crops. The term does not include the redistribution of spoil, rock sand, or other superficial materials in a manner which changes any area of the waters of the United States to dryland. For example, the redistribution of surface materials by blading, grading, or other means to fill in wetland areas will require a permit whenever the affected areas lie within the waters of the U.S.

"Seeding" means the manual or mechanical sowing of seed and placement of seedlings for the production of farm or forest crops and includes the placement of soil beds for seeds or seedlings on established farm lands and forest lands.

"State regulated waters" means those waters of the United States in which the Corps of Engineers will suspend the

issuance of section 404 permits upon approval of a State's section 404 permit program by the Administrator under section 404(h). These waters shall be identified in the Memorandum of Agreement between the State and the Secretary as required by § 122.93.

[*Comment:* CWA section 404(g)(1) requires that the Secretary retain jurisdiction, for purposes of section 404 over the following waters:

(1) Waters which are subject to the ebb and flow of the tide;

(2) Those waters which are presently used, or are susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce shoreward to their ordinary high water mark; and

(3) Wetlands adjacent to waters in (1) and (2).]

§ 122.4 State authorities.

Nothing in Parts 122–124 precludes more stringent State regulation of any activity covered by these Parts, except as provided for the RCRA program in § 123.33(c).

§ 122.5 Signatories to permit program forms.

(a) All permit applications, except for those submitted for Class II wells for the UIC program (see paragraph (b) below), shall be signed as follows:

(1) For a corporation, by a principal executive officer of at least the level of vice president;

(2) For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or

(3) For a municipality, State, Federal or other public agency, by either a principal executive officer or ranking elected official.

(b) All reports required by permits or otherwise required by the Director, other requests for information made by the Director, and all permit applications submitted for Class II wells under § 122.36 for the UIC program shall be signed by a person designated in paragraph (a), or by a duly authorized representative of such person; if:

(1) The representative so authorized is responsible for the overall operation of the facility from which the regulated activity originates, e.g., a plant manager, superintendent or person of equivalent responsibility;

(2) The authorization is made in writing by the person designated under paragraph (a); and

(3) The written authorization is submitted to the Director.

(c) Any changes in the written authorization submitted to the permitting authority under paragraph (b) which occur after the issuance of a permit shall be reported to the Director by submitting a copy of a new written authorization which meets the requirements of paragraph (b) (1) and (2).

(d) Any person signing a document under paragraph (a) or (b) of this section shall make the following certification: "I certify under penalty of law that I have personally examined and am familiar with the information submitted in the attached document, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment."

[*Comment:* Permit applications are being revised to incorporate this statement. Where a program document does not contain the statement, the certification must accompany the appropriate document.]

(e) This section is applicable to approved State programs (see § 123.8). States may adopt language that is equivalent to but not identical to, the certification statement in paragraph (d), if such equivalent language is approved by the Regional Administrator.

§ 122.6 Application for a permit.

(a) Any person who conducts or who proposes to conduct an activity for which a permit is required under this Part shall complete, sign, and submit an application to the Director as described in § 122.23, 122.36 and 122.64.

§ 122.7 Permit issuance; effect of a permit.

(a) The permit issuance process is initiated by the receipt of a complete application by the Director.

(b) The issuance of a permit does not: (1) convey any property rights of any sort, or any exclusive privileges; (2) authorize any injury to private property or invasion of other private rights, or any infringement of Federal, State, or local law or regulations, or (3) preempt any duty to obtain State or local assent required by law for the authorized activity.

(c) Any permittee who wishes to continue a regulated activity after the expiration date of a permit must apply for a new permit under the applicable sections of this Part, Part 124, and in the case of section 404 permits, Part 123, Subpart E.

§ 122.8 Duration of permits; continuation of expiring permits; transferability of permits.

(a) NPDES and section 404 permits shall be issued for a term not to exceed five years. Permits of less than five (5) years duration may be issued in appropriate circumstances (for example, see § 122.60). Except as provided in paragraph (c), the term of an NPDES permit shall not be extended beyond five years from its original date of effectiveness by modification, extension or other means.

(b) RCRA and UIC permits shall be issued for a period not to exceed the designed operating life of the facility (in the case of new facility) or the remainder of the designed operating life of the facility (in the case of an existing facility), except as provided in § 122.25(b) (RCRA Experimental Special Permits).

(c) *Continuation of expiring permits.* (1) Where EPA is the permit issuing authority, the terms and conditions of an expired permit are automatically continued under 5 U.S.C. § 558(c) pending issuance of a new permit if:

(i) The permittee has submitted a timely and sufficient application for a new permit under § 122.23, § 122.36, or § 122.64; and

(ii) The Regional Administrator is unable, through no fault of the permittee, to issue a new permit before the expiration date of the previous permit (e.g., where it is impracticable due to time and/or resource constraints).

(2) Permits continued under this paragraph remain fully effective and enforceable.

(3) Where the permittee is not in compliance with the terms and conditions of the expiring permit:

(i) The permit may be continued under this section pending a final determination by the Regional Administrator on the application for a new permit and enforcement action may be taken based upon the continued permit; or

(ii) The Regional Administrator may make a determination to deny the application for a new permit in accordance with the procedures specified in Part 124. The owner or operator would then be required to cease the activities authorized by the permit or be subject to enforcement action for operating without a permit.

(d) States authorized to administer the RCRA, UIC or NPDES programs may continue permits in a similar manner if so authorized by State law. However, a permit is not continued under Federal law where EPA originally issued the permit, but the State is the permitting

authority at the time the permit expired. In such case, the activity or facility is operating without a permit from the time the EPA-issued permit expires to the time that the State-issued permit is effective.

(e) *Transferability of permits.* A permit may be transferred to another person by a permittee if:

(1) The permittee notifies the Director of the proposed transfer;

(2) A written agreement containing a specific date for transfer of permit responsibility and coverage between the current and new permittees (including acknowledgement that the existing permittee is liable for violations up to that date, and that the new permittee is liable for violations from that date on) is submitted to the Director; and

(3) The Director within 30 days does not notify the current permittee and the new permittee, of his or her intent to modify, revoke and reissue or terminate the permit and to require that a new application be filed rather than agreeing to the transfer of the permit.

[*Comment:* A new application could be required under this paragraph where the change of ownership is accompanied by a change or proposed change in process, wastewater, or hazardous waste characteristics or a change or potential change in any circumstances that the permitting authority believes will affect the conditions or restrictions in the permit.]

§ 122.9 Review and modification or revocation and reissuance of permits.

(a) The Director shall review each issued UIC or RCRA permit at least once every five years to determine whether the permit should be modified or revoked and reissued for one or more of the causes listed in paragraph (e) of this section.

[*Comment:* The purpose of paragraph (a) is to ensure that RCRA and UIC permits are subject to comprehensive review at specified times and modification or revocation and reissuance as may be desirable to better carry out the statutory purpose(s). Accordingly, the Director is as free to propose and adopt permit modifications for a life-term permit as the result of such a review as he would be to propose and adopt new permit terms as the result of the expiration and reissuance of a fixed term permit. Permit modifications for cause during the term of a permit are also possible where cause exists under paragraph (e).]

(b) Where permits under two or more programs under this Part are issued for a single facility or activity, the Director shall review all the permits issued for that facility or activity whenever any one of the permits is reviewed pursuant to paragraph (a), or any one of the permits expires pursuant to § 122.8 or is terminated under § 122.10. The purpose of this review shall be to determine whether the permit should be modified or revoked and reissued for one or more of the causes listed in paragraph (e) of this section. The permit shall specify a date for review under this section whenever the date of expiration of another permit for the same facility or activity is available.

(c) The Director may review an issued permit at any time and shall review an issued permit on the request of any person who presents information which, if valid, would constitute cause for a modification or revocation and reissuance under paragraph (e) of this section.

(d) The Director may base his/her review on any or all of the following:

(1) Information submitted by the permittee in periodic reports;

(2) Information collected by the Director in inspections of the permitted facility;

(3) Information requested of the permittee, including all or part of the information which the Director might otherwise request in an application for the issuance or reissuance of a permit; or

(4) Any other pertinent information that the Director may obtain.

(e) Cause for modification or revocation and reissuance exists:

(1) Where there are material and substantial alterations or additions to the permitted operation which are not covered by the effective permit; provided that for NPDES permits, such alterations or additions do not constitute a replacement of the process or production equipment of an existing source, converting it to a new source under § 122.61.

[*Comment:* Such alterations or additions include but are not limited to material or substantial changes in the quantity (increase or decrease) or composition of the wastes, fluids or pollutants injected, discharged, treated, disposed or stored; changes in the injection, discharge, treatment, disposal or storage methods or other operational methods employed, production changes, relocation or combination of discharge points, changes in the nature or mix of products produced.

Certain reconstruction activities may cause the new source provisions for NPDES permits under § 122.61 to become applicable to the permittee. In such cases, the new source permit issuance procedures of § 122.64 and § 124.61 shall be followed instead of the modification or revocation and reissuance process and an EIS may be required for an EPA-issued new source permit.]

(2) Where the existence of any factor(s) which, if properly and timely brought to the attention of the Director, would have justified the application of different permit terms and conditions, but only if the requester show that such factors arose after the final permit was issued.

(3) Where the standards and/or regulations on which the permit was based have been changed by promulgation of amended standards and/or regulations or judicial decision after the permit was issued, except that NPDES permits may be modified during their terms for such reasons only to the extent set forth in § 122.73;

(4) Where an existing permittee proposed a change of ownership or control of the permitted activity or facility, and the Director determines under § 122.8 that modification or revocation and reissuance is appropriate;

(5) Where modification, revocation and reissuance or termination of another permit issued to the same facility or activity requires a modification or revocation and reissuance of the permit;

(6) Where the permit fails to apply any applicable requirements under the appropriate Act or regulations, which are in effect prior to the effective date of permit issuance; and

(7) For NPDES and section 404 permits only, where cause exists for termination under § 122.10 or § 122.74.

[*Comment:* The Director will generally base his/her decision on whether to modify, instead of revoking and reissuing a permit, where cause exists under paragraph (e) of this section, on the extent of the anticipated changes and on the length of the remaining term of the permit. For instance, where the remaining permit term is only two years, it may be desirable to revoke the existing permit and issue another permit incorporating the changes. See also § 122.60 for certain circumstances when NPDES permits will be revoked and reissued.]

(f) Except as provided for minor modifications under paragraph (g) of this section the modification or revocation and reissuance of permits under this section shall comply with § 124.5 and § 124.7.

(g) The following minor permit modifications shall not require public notice and opportunity for hearing under § 124.5 or § 124.7, unless they would render the permit less stringent, or unless contested by the permittee:

(1) Correction of typographical errors;

(2) A change requiring more frequent monitoring or reporting by the permittee;

(3) A change in an interim compliance date, provided the change would not exceed 120 days or would not interfere with attainment of a final compliance date; and

(4) A change in ownership or operational control of a facility where the Director determines that no major change of the permit is necessary under § 122.8(d).

(5) To the extent authorized under § 122.24, changes in quantities or types of wastes treated, disposed or stored which are within the capacity of the facility as permitted and, in the judgment of the Director, would not interfere with the operation of the facility or its capacity to meet conditions prescribed in the permit.

(6) To the extent authorized under § 122.24, changes in treatment, disposal or storage methods or operations which, in th judgement of the Director, are equivalent to or better than those on which their permit is based.

(7) Extension of the term of a State section 404 permit so long as the extension does not conflict with § 122.8(a).

(h) Minor modifications as defined in paragraph (g) of this section shall become immediately effective or effective on a date specified by the Director.

§ 122.10 Termination of permits.

(a) An issued permit may be terminated, in whole or in part, during its term for cause as specified in this section.

(b) Cause for termination includes:

(1) Violation of any term or condition of the permit or requirement of the appropriate Act by the permittee;

(2) Failure of the permittee to disclose fully all relevant facts or misrepresentation of any relevent facts by the permittee in the application or during the permit issuance process;

(3) Information indicating that the permitted activity poses a threat to human health or the environment;

(4) A change in ownership or control of a source which has a permit where required by the Director in accordance with § 122.8(e); or

(5) Other good cause.

[*Comment:* Termination under this section includes the suspension or revocation of a permit under section 3008 of RCRA. Procedures for termination or suspension and revocation of RCRA permits are provided in 40 CFR Part 22 (proposed at 43 FR 34739 (August 4, 1978).]

§ 122.11 Conditions applicable to all permits.

The following conditions apply to all permits and shall be incorporated into all permits either expressly or by reference.

[*Comment:* If not incorporated by reference, the inclusion of the requirements of this section into permits may require some wording changes. Where this is the case, the permit conditions should be worded substantially similar to the requirements of this section, and should be of equivalent force.]

(a) The permittee must comply with all terms and conditions of the permit whether they are directly stated or incorporated by reference.

[*Comment:* Any failure in compliance constitutes a violation of the appropriate Act and constitutes grounds for an enforcement action.]

(b) The permit shall be reviewed at times specified in § 122.9(a), (b) and (c), and may be modified, revoked and reissued or terminated during its term for cause as described in § 122.9(e) and § 122.10.

(c) Any permittee who knows or has any reason to believe that any activity has occurred or will occur which would constitute cause for modification or revocation and reissuance under § 122.9(e) must report his/her plans or such information to the Director so that the Director can decide whether action to modify or revoke and reissue a permit under § 122.9 will be required. The Director may require submission of a new application.

(d) Unless and until a permit is modified or revoked and reissued, a permittee must comply with the terms and conditions of the existing permit whether or not that existing permit would allow the permittee to begin the activity described in paragraph (c) of this section.

(e) The permittee shall allow the Director or an authorized representative, upon the presentation of credentials and such other document as may be required by law:

(1) Enter upon the permittee's premises where a regulated facility or activity is conducted or located, or where records must be kept under the terms and conditions of the permit;

(2) Have access to and copy, at reasonable times, any records or labels that must be kept under the terms and conditions of the permit;

(3) Inspect at reasonable times any facilities, equipment (including monitoring equipment) or operations regulated under the permit; and

(4) Sample at reasonable times any substances which the permittee is required to monitor under the permit, including any discharge of pollutants, hazardous wastes, and injected fluids.

(5) Sample at reasonable times any substances at any monitoring point which the permittee is required to monitor under the permit.

[*Comment:* This subparagraph includes both the sampling of pollutants, wastes and fluids which are discharged, treated, stored, disposed or injected and also the monitoring of surrounding environment, e.g., the sampling of adjacent parts of aquifers by use of monitoring wells.]

(f) The permittee shall furnish to the Director copies of records required to be kept under the terms and conditions of the permit upon request within a reasonable time, as specified in § 122.14.

(g) The permittee shall at all times maintain in good working order and operate efficiently all facilities and systems of treatment or control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the terms and conditions of the permit. Proper operation and maintenance includes but is not limited to effective performance based on designed facility removals, adequate funding, effective management, adequate operator staffing and training, and adequate laboratory and process controls, including appropriate quality assurance procedures.

(h)(1) If, for any reason, the permittee does not comply with or will be unable to comply with any terms or conditions of a RCRA, UIC, or 404 permit, or the maximum daily or average weekly discharge limitations or standards of an NPDES permit, the permittee shall provide the Director with the following information:

(i) A description of the noncompliance and cause of noncompliance;

(ii) The period of noncompliance, including exact dates and times; and/or, if not corrected, the anticipated time the noncompliance is expected to continue;

(iii) Steps taken and/or planned to reduce, eliminate and prevent recurrence of the noncompliance; and

(2) The information required under subparagraph (1) shall be provided as follows:

(i) In the case of noncomplying activities which could constitute a threat to human health, welfare or the environment, the Director may require that the information required by subparagraph (1) be provided within 24 hours or five days from the time the permittee becomes aware of the circumstances. Where the Director requires 24 hour notice, if the information is provided orally, a written submission covering the information must be provided within five days of the time the permittee becomes aware of the circumstances covered by this paragraph. This requirement shall not apply to NPDES discharges subject to subparagraph (2)(ii).

[*Comment:* The Director may require a permittee to report noncompliance within 24 hours under paragraph (h)(2)(i) when the noncompliance involves CWA section 311 pollutants, toxic pollutants or pollutants which could cause a threat to public drinking water supplies; or, in the event of a release or discharge of hazardous waste, a fire or an explosion from a HWM facility that has the potential for damaging human health or the environment, the permittee shall report such an incident immediately after discovering it as required in 40 CFR Part 250, § 250.43–3(c).]

(ii) In the case of any discharges from an NPDES-permitted facility subject to any applicable toxic pollutant effluent standard under section 307(a), the information required by subparagraph (1) regarding a violation of such standard shall be provided within 24 hours from the time the permittee becomes aware of the circumstances. If this information is provided orally, a written submission covering these points shall be provided within five days of the time the NPDES permittee becomes aware of the circumstances covered by this paragraph.

(3) Where a permittee orally reports a violation within 24 hours in accordance with paragraphs (h)(2)(i) or (ii), the Director may waive, on a case-by-case basis, the requirement that a written submission be provided within five days of the time the permittee becomes aware of the violation.

(4) In all cases not covered by subparagraph (2), information required under subparagraph (1) shall be provided in accordance with the requirements of § 122.15.

(i) The permittee shall take all reasonable steps to minimize any adverse impact on the environment resulting from noncompliance with the permit.

(j) The permittee shall halt or reduce its business activities whenever and to the extent necessary to maintain compliance with the terms of a permit.

(k) The permittee shall at all times comply with the requirements for testing, monitoring, recordkeeping, and reporting as specified in the permit and in applicable regulations. The permittee shall not falsify, tamper with or knowingly render inaccurate any monitoring device or method referred by the permit or regulations; or knowingly make a false statement, representations, or certification, in any document or record required under the permit or by regulations.

§ 122.12 Schedules of compliance.

(a) The permit shall specify a schedule of compliance leading to expeditious compliance, where appropriate.

[*Comment:* For NPDES permits, schedules of compliance are required where necessary to achieve compliance with applicable standards and limitations and other requirements. NPDES new dischargers, sources which recommence discharging after terminating operations and those sources which had been indirect dischargers which commence discharging into navigable waters do not qualify for compliance schedules under this section and are subject to § 122.61(d)(4). Schedules of compliance shall require compliance as soon as possible, but in no case later than the applicable statutory deadline under the CWA.]

(1) Except as provided in paragraph (b) and (d), if a permit establishes a schedule of compliance which exceeds 9 months from the date of permit issuance, the schedule of compliance in the permit shall set forth interim requirements and the dates for their achievement.

(i) In no event shall more than 9 months elapse between interim dates.

(ii) If the time necessary for completion of any interim requirements (such as the construction of a control facility) is more than 9 months and is not readily divisible into stages for completion, the permit shall specify interim dates for the submission of reports of progress toward completion of the interim requirements and indicate a projected completion date.

[*Comment:* Examples of interim requirements include: 1) let a contract for construction of required facilities; 2) commence construction of required facilities; 3) complete construction of required facilities; and 4) submit a complete Step 1 construction grant (for POTW's).]

(2) Except as provided in paragraph (d), no later than 14 days following each interim date and the final date of compliance, the permettee shall provide the Director with written notice of the permittee's compliance or noncompliance with the interim or final requirements.

(3)(i) The Director, upon request of the permittee, may modify, in accordance with § 122.9, a schedule of compliance in an issued permit if he/she determines good and valid cause exists for such revision, such as an act of God, strike, flood, or materials shortage or other events over which the permittee has little or no control or remedy. However, in no case shall an NPDES compliance schedule be modified to extend beyond an applicable CWA statutory treatment deadline.

(ii) In the case of a POTW which has received a grant under section 202(a)(3) of CWA, to fund 100% of the costs to modify or replace facilities constructed with a grant for innovative and alternative wastewater technology under section 202(a)(2), the schedule of compliance for an NPDES permit may be modified to reflect the amount of time lost during construction of the innovative and alternative facility. In no case shall the compliance schedule be modified to extend beyond an applicable CWA statutory deadline for compliance.

(b) Where an applicant for an EPA-issued UIC or RCRA permit chooses to cease conducting regulated activities rather than taking steps to meet permit control requirements, the Director may establish two alternative schedules of compliance in the permit:

(1) A schedule leading to termination and/or proper closure in accordance with regulations under the appropriate Act or regulations by the predicted termination or closure date. If at any time the permittee chooses *not* to terminate his/her regulated activities and cease conducting regulated activities according to this schedule, the steps required under subparagraph (2) below shall be met; and

(2) A schedule which would result in compliance with the appropriate Act and regulations. In no event shall a permittee be authorized to operate without complying with this schedule, even where the permittee actually terminates his/her operations and later resumes these or other operations.

(c) A permittee may terminate its direct discharge by cessation of operation or discharge to a POTW rather than achieve applicable standards and limitations by the final date for compliance established in its permit or in CWA under the following circumstances:

(1) If the decision to terminate a direct discharge is made after issuance of a permit:

(i) The permit shall be modified or revoked and reissued to contain a schedule of compliance leading to termination of the direct discharge by a date which is no later than the statutory deadline; or

(ii) The permittee shall terminate direct discharge before noncompliance with any interim requirement specified in the schedule of compliance in the permit.

(2) If the decision to terminate a direct discharge is made before issuance of the permit, the permit shall contain a schedule leading to termination of the direct discharge by a date which is no later than the statutory deadline.

(3) If the permittee contemplates but has not made a final decision to terminate the direct discharge before the issuance of the permit, the permit shall contain alternative schedules leading to compliance as follows:

(i) The schedule shall contain an interim requirement requiring such a final decision no later than a date which allows sufficient time to comply with applicable limitations and standards in accordance with paragraph (iii), (i.e., a milestone event for commencement of construction of control equipment); and

(ii) A subsequent schedule leading to termination of the divide discharge by a date which is no later than the statutory deadline;

(iii) A subsequent alternative schedule leading to compliance with applicable standards and limitations, no later than the statutory date; and

(iv) A requirement that after the permittee has made a decision pursuant to paragraph (3)(i), it shall:

(A) Follow the schedule required by paragraph (3)(ii) if the decision is to terminate its discharge; or

(B) Follow the schedule required by paragraph (3)(iii) if the decision is not to terminate its discharger; and

(4) If the permittee has made a decision to terminate its direct discharge in accordance with this section, it shall not post a bond within 30 days of permit issuance, or the date of the decision, in the amount of the cost of compliance with applicable limitations and standards, payable to the permit issuing authority in the event that termination or compliance with applicable limitations and standards is not achieved by the statutory deadline or the date set forth in the permit, if earlier.

(5) In all cases, the permittee's decision to terminate his/her direct discharge of pollutants shall be evidenced by a Board of Director's resolution which has been made public or by such other means as EPA determines evidence a firm public commitment.

[Comment: A permittee may evidence a firm public commitment: (1) by a resolution of the Board of Directors signed by the Chairman of the Board and the Chief Executive Officer; (2) in the case of a public facility, by appropriate action by either the principal executive officer or elected official or (3) as otherwise appropriate for partnerships, sole proprietorship, etc.]

(6) Where a source recommences discharge after terminating operations, or where an indirect source commences direct discharge to navigable waters, any permit issued to such source shall require the source to meet all applicable standards and limitations as specified in § 122.61(d)(4).

(d)(1) Where agreed to in the Memorandum of Agreement, an approved State program may use intervals of up to one year (rather than 9 months) for establishing interim requirements under subparagraph (a)(1).

(2) State programs may provide for up to 30 days (rather than 14 days) for reporting compliance or non-compliance with interim or final requirements under subparagraph (a)(2).

§ 122.13 Establishing permit terms and conditions.

Permit terms and conditions shall be established in permits as set out in Subpart B through D, as appropriate.

§ 122.14 Recording and reporting of monitoring results and compliance by permittees.

(a) All permits shall include:

(1) Requirements concerning the proper use, maintenance, and installation, where appropriate, of monitoring equipment or methods (including biological monitoring methods where appropriate), and

[Comment: Generally installation of monitoring equipment is not required under the UIC program.*]*

(2) Required monitoring frequency, type and intervals sufficiently frequent to yield data which are representative of the monitored activity, including, where appropriate, continuous monitoring.

(b) Samples and measurements taken for the purposes of this Part shall be representative of the volume, weight, pressure or nature of the monitored activity.

(c) The permittee shall maintain records of all such monitoring information (including all original strip chart recordings for continuous monitoring instrumentation and calibration and maintenance records). Such records shall be retained by the permittee for three years. This period of retention shall be extended automatically during the course of any unresolved litigation regarding the regulated activity or regarding control standards applicable to the permittee; or as requested by the Director. Such records shall include:

(1) The date, exact place and time of sampling, or measurements;

(2) The person(s) who performed the sampling or measurements;

(3) The date(s) analyses were performed;

(4) The person(s) who performed the analyses;

(5) The analytical techniques or methods used; and

(6) The results of such analyses.

(d) Permittees shall report the results of any monitoring specified in the permit to the Director on an EPA-approved form as often as required by the permit, but in no case less than once per year. Reporting frequency requirements will be based upon the minimum intervals specified in Subparts B–D, and, in addition, upon the impact of the regulated activity.

[Comment: NPDES permittees must report monitoring results on a Discharge Monitoring Report (DMR). NPDES permittees need not submit data on internal process of waste streams, or data collected by third parties unless it indicates a violation, but shall be identified as a supplement to the DMR.*]*

(e) The permittee shall provide the Director with written notice of the permittee's compliance or noncompliance with the interim and final compliance schedule requirements in accordance with § 122.12(a)(2) and (b)(2).

§ 122.15 Noncompliance reporting.

Reports shall be prepared and submitted by the Director as detailed below and in §§ 122.27, 122.43, 122.72 and 123.113.

(a) *Quarterly Report.* Narrative reports of noncompliance by major RCRA, UIC, NPDES and section 404 permittees shall be submitted using the following format:

(1) Name, location, and permit number of each noncomplying permittee;

(2) A brief description and date of each instance of noncompliance. Instances of noncompliance may include one or more of the following:

(i) Failure to complete construction elements;

(ii) Failure to complete or provide compliance schedule reports;

(iii) Noncompliance with applicable standards and limitations;

(iv) Failure to provide effluent, or other monitoring reports as required by the permit; and

(v) Deficient reports.

(3) A brief description and date(s) of action(s) taken by the Director to ensure compliance;

(4) Status of the instance of noncompliance with the date of the action or resolution; and

(5) Any information which tends to explain or mitigate an instance of noncompliance or to explain actions by the Director.

(b) *Annual Reports.* (1) Statistical reports shall be submitted on minor RCRA, UIC and NPDES permittees, where compliance has been reviewed by the Director, indicating number of noncomplying minor permittees, number of enforcement actions, and number of changes in permit status.

(2) Additional information for RCRA, UIC, NPDES and section 404 programs is detailed in §§ 122.27, 122.43, 122.72 and 123.113.

[*Comment:* For the distinction between "major" and "minor" permittees under RCRA see § 122.3(b) (definition of "major HWM facility"). The distinction between "major" and "minor" permittees for NPDES, UIC and section 404 is established in EPA's annual operating guidance for the EPA Regional Offices and the States.]

(c) Reports required under this section from the State Director shall be submitted to the Regional Administrator, and reports from the Regional Administrator shall be submitted to EPA Headquarters.

§ 122.16 Confidentiality of information.

(a) Except as provided in paragraph (b), any information submitted to EPA pusuant to these regulations may be claimed as entitled to confidential treatment by the submitter. Any such claim must be asserted at the time of submission in the manner prescribed on the application form or instructions or, in the case of other submissions, by stamping the words "confidential business information" on each page containing such information. If no claim is made at the time of submission, EPA may make the information available to the public without further notice. If a claim is asserted, the information will be disclosed only in accordance with the procedures in Part 2 of this title.

(b) The following information may not be accorded confidential treatment:

(1) The name and address of any permittee;

(2) Permits, draft permits, fact sheets, comments received by the permit issuing authority with respect to draft or proposed permits and statements of basis;

(3) In the case of section 402 and 404 permits under CWA, permit applications and effluent data; and

(4) In the case of UIC permits, any information applications and effluent data.

Subpart B—Additional Requirements for Hazardous Waste Programs Under the Resource Conservation and Recovery Act

§ 122.21 Purpose and scope.

(a) The requirements in this Subpart contain the specific elements and permit conditions for the RCRA hazardous waste permit program. They apply to EPA, and to approved States to the extent set forth in part 123. In case of inconsistencies between this Subpart and Subpart A of this Part, this Subpart is controlling.

(b) Six months after the date of promulgation of regulations under section 3001 of RCRA, 40 CFR 250, Subpart A (proposed at 43 FR 58954 (December 18, 1978)), the storage, treatment and disposal of hazardous waste is unlawful unless owners/operators of existing Hazardous Waste Management facilities have notified EPA under 40 CFR 250 Subpart G § 250.800 (proposed at 43 FR 2991 (July 11, 1978)), and have submitted a permit application in accordance with this Subpart and Part 124.

(c)(1) Any hazardous waste storage pits, ponds, or lagoons and/or storage tanks and any distribution systems which are associated with an underground injection well that receives hazardous waste(s) must obtain a RCRA permit.

(2) Any one/shore hazardous waste treatment or storage facilities associated with an ocean disposal operation must obtain a RCRA permit.

(3) Any surface impoundment associated with a wastewater treatment plant, other than a POTW, that treats and/or stores hazardous waste must obtain a RCRA permit for that part of the facility up to the point of discharge.

[*Comment:* See 40 CFR Part 250.45–3 (proposed at 43 FR 59011 (December 18, 1978)).]

(4) Any on-site treatment, storage, or disposal facilities for managing hazardous wastes resulting from treatment or control of wastewaters by a wastewater treatment plant, other than a POTW, must obtain a RCRA permit.

§ 122.22 Law authorizing hazardous waste control program.

Sections 3001 through 3005 of RCRA authorize EPA to promulgate regulations establishing a Federal hazardous waste management program. Section 3006 of RCRA authorizes EPA to promulgate guidelines for State assumption and operation of the hazardous waste management program (with EPA approval) in lieu of a Federal program.

[*Comment:* Regulations under Sections 3001, 3002, and 3004 are published at 40 CFR 250, Subparts A, B, and D, (proposed at 43 FR 58946 (December 18, 1978)). Regulations under Section 3003 are published at 40 CFR 250, Subpart C, (proposed at 43 FR 18506 (April 28, 1978)). Regulations under Section 3010 are published at 40 CFR 250, Subpart G, (proposed at 43 FR 29906 (July 11, 1978)).]

§ 122.23 Application for a permit.

(a) Any person who owns or operates an "existing HWM facility" as defined in § 122.3 of this Part, shall:

(1) Notify as required by 40 CFR Part 250, Subpart G (proposed at 43 FR 29911 (July 11, 1978)); and

(2) Submit Part A of the permit application within six months after the date the regulations under 40 CFR Part 250, Subpart A (proposed at 43 FR 58946 (December 18, 1978)) are promulgated, in order to qualify for interim status under RCRA. To satisfy the application deadline of this subsection, and to qualify for interim status under RCRA, an applicant shall submit only the information required in Part A of the application, or in the case of an application for a special HWM facility permit under § 122.25, the application shall contain the requirements specified in the appropriate subsection of § 122.25. The Director shall advise the applicant of the receipt of Part A of the application. This advisement shall signify the beginning of interim status if the application was timely submitted. A date for submission of Part B of the application shall be established by the Director at a later date. The Director shall provide at least six months notice for the submission of Part B of the application. Failure to submit an adequate Part B of the application by the date established by the Director shall result in automatic loss of interim status on such date.

[*Comment:* Owners or operators of existing HWM facilities under interim status who elect to modify these facilities must nevertheless meet the requirements of 40 CFR Part 250, Subpart D (proposed at 43 FR 58894 (December 18, 1978)) at the time that a permit is issued for the facility. Any modification made during interim status is therefore subject to the review of the Director at the time of permit issuance and is undertaken at the risk that additional changes to the facility will be required in order to meet the requirements of 40 CFR Part 250, Subpart D.]

(b) Owners/operators of new HWM facilities shall submit both a Part A and a Part B application at least 180 days before physical construction is expected to commence. No physical construction shall commence until a final permit is issued. In the case of an application for a special HWM facility permit under § 122.25, the application shall contain the requirements specified in the appropriate subsection of § 122.25.

(c) Part A of the Application shall include the following as a minimum:

(1) Name, title and address of the applicant; name and address of the facility;

(2) A description of the boundaries of the HWM facility, including a topographic map of the area for a distance of one mile (1.6km) beyond the boundaries of the HWM facility as required in the permit application forms. This map shall correspond to a 7½ minute series map published by the U.S. Geological Survey. If a 7½ minute series

map is not available, a 15 minute series map may be substituted.

(3) A detailed description of the hazardous waste to be handled at the HWM facility (name and common code) by its Department of Transportation (DOT) proper shipping name (49 CFR Part 172), § 172.101 (proposed at 43 FR 22631 (May 25, 1978)). If the DOT proper shipping name "NOT OTHERWISE SPECIFIED" (NOS) is used, the EPA name (as identified in 40 CFR Part 250, § 250.14 (proposed at 43 FR 58957–9 (December 18, 1978)) must be included after the DOT proper shipping name NOS. If no EPA name exists, then only the DOT proper shipping name NOS shall be used;

(4) The hazard class of each waste as identified or listed under DOT hazard class (49 CFR Part 172), § 172.101 (proposed at 43 FR 22631 (May 25, 1978)) or by the EPA characteristics (as identified in 40 CFR Part 250, § 250.13 (proposed at 43 FR 58955–7 (December 18, 1978)) if the DOT hazard class is not applicable. If the DOT hazard class "OTHER REGULATED MATERIAL" (ORM) is used, the EPA characteristic or property, as identified in 40 CFR Part 250, § 250.13 (proposed at 43 FR 58955–7 (December 18, 1978)) must be used after the DOT hazard class ORM;

(5) The annual quantity of each hazardous waste to be treated, stored or disposed by volume or weight, in either the metric or the English system;

(6) A brief description of how the hazardous waste is to be treated, stored or disposed of at the HWM facility; and

(7) For an existing HWM facility, copies of all available drawings and specifications for the HWM facility, its processes and equipment.

(d) Part B of the Application shall include the following as a minimum:

(1) A master plan for the HWM facility, including a topographic map with a scale of one inch (2.5 cm) equal to not more than 200 feet (60.8 m) and a contour interval not greater than five feet (1.5 m) for the area within one thousand feet (304 m) of the boundaries of the HWM facility and indicating any five-hundred-year flood prone areas. The master plan shall include a detailed description of:

(i) For a new HWM facility, or for modification to an existing facility, any structures, buildings, equipment and machinery to be used at the HWM facility including site preparation plans, design plans and specifications for treatment, storage or disposal facilities;

(ii) A detailed plan of operation and maintenance, including operating conditions, projected hours of operation, security and access control, plans for covering and compaction, plans for controlling odor, air, surface water and/or groundwater pollution, plans for controlling leachate production, plans for vector control and control of burrowing animals, and other related items;

(iii) The planned life of the HWM facility based on projected use and the expansion potential and plans for the use or disposition of the HWM facility after closure;

(iv) The contingency plan for emergency situations, including the procedures, equipment and facilities to be used, a listing of the fire departments, ambulance services, hospitals, and other emergency services that will serve the facility and the response time, the person responsible for implementing the contingency plan, the on-site plan for fire control, spill prevention control and countermeasure plans under section 311 of CWA, best management practices under sections 304(e) and 402(a)(1) of CWA (see 40 CFR Parts 125 and 151), and 40 CFR Part 250, § 250.43–3 (proposed at 43 FR 58001–2 (December 18, 1978));

(v) The plan for closure of the HWM facility, including the estimated cost of closure, post closure expenses, proposals for controlling access, steps that are planned to control leachate production, and the plan for maintenance of the HWM facility after final closure for disposal operations;

(vi) The plan for visual inspections of the HWM facility conditions and for monitoring air, surface water, and groundwater pollution, including the period after closure;

(vii) The plan for segregation of incompatible wastes and how wastes will be placed or located within the treatment, storage, or disposal facility; and

(viii) The plan for conducting trial burns at incinerator facilities as required under 40 CFR Part 250, § 250.45–1 (proposed at 43 FR 59006 (December 18, 1978)).

(2) A detailed description of site geology of the area within one thousand feet (304 m) of the boundaries of the HWM facility, including a description of physiography, soil depth and types including chemical and physical properties; and a detailed description of the geologic column including intrusive bodies, fluids, fractures, faults, joints, and fracture traces. Where access to adjacent properties for obtaining geological data is not reasonably available, data available from public sources may be substituted.

(3) For HWM disposal facilities and HWM surface impoundment facilities, a detailed description of the site hydrology and the hydrology of the area within one thousand feet (304 m) of the boundaries of the facility, including known or recorded springs, depth to ground water, thickness, extent, characteristics of aquifers, perched water zones, porosity and permeability of soils, directions and rate of flow of groundwater, recharge and discharge areas, drainage patterns and divides, distance to surface water, location of public, livestock, and private water supplies, background quality of groundwater as specified in 40 CFR Part 250, § 250.43–6(c)(1) (proposed at 43 FR 59005 (December 18, 1978)) and other related items. Where access to adjacent properties for obtaining hydrological data is not reasonably available, data available from public sources may be substituted.

(4) A description of the climate in the area, including average annual rainfall, average annual evapotranspiration rates, average annual wind speed, prevailing wind direction, and other factors that may affect water or air pollution.

(5) Position or job descriptions covering the persons responsible for the operation of the HWM facility, including education, training, and work experience requirements and a description of the training program to be used to prepare persons to operate and maintain the facility in a safe and environmentally adequate manner.

(6) A listing of the applicant's performance bonds, insurance carriers and policies, trust instruments, escrow accounts or other instruments which constitute continued financial responsibility in accordance with standards in 40 CFR Part 250, § 250.43–6 (proposed at 43 FR 59006–7 (December 18, 1978)).

(7) The Director, upon the written request of the applicant, may waive certain of the application requirements in Part B of the Application if he/she determines that the information is not applicable to the facility and is not needed to establish compliance with the standards in 40 CFR 250.42 and 250.43 (proposed at 43 FR 58999 (December 18, 1978)). A request for a waiver of certain Part B application information shall be submitted in writing by the applicant and shall state why the specified information is not needed to determine compliance with the standards in 40 CFR 250.42 and 250.43 (proposed at 43 FR 58999 (December 18, 1979)). The Director shall grant or deny the waiver request in writing, including a statement of the reasons for the decisions.

[*Comment:* Examples of where such waivers may be granted include the waiver of site geological information for facilities that only incinerate hazardous waste and dispose of any residues off-site, and site geological information for above-ground storage tanks that are not associated with any other treatment, storage, or disposal HWM facilities.]

(8) The Director shall determine whether or not an application of permit is complete and shall notify the applicant in writing of such determination within 30 days of receipt of such application. The application shall not be considered as submitted to the Director until it is in complete form.

(9) Where an approved State is the permit-issuing authority, the application must contain at least the information required under this section, paragraph (c), and paragraph (d) unless waived under § 122.23(d)(7).

§ 122.24 Establishing permit terms and conditions.

In addition to the terms and conditions specified in Subpart A of this Part, any RCRA permit shall include the following terms and conditions:

(a) Each of the applicable requirements specified in 40 CFR 250.43, 250.44, 250.45 and 250.46 (proposed at 43 FR 58999–59016 (December 18, 1978)), except where an alternative requirement is established and included in the permit in accordance with 40 CFR 250.43, 250.44, 250.45 and 250.46;

(b) Such additional requirements as the Director deems necessary to comply with the human health and environmental standards in 40 CFR 250.42 (proposed at 43 FR 58999 (December 18, 1978)) .

(c) Requirements alternative to those established in the regulations in accordance with the variance criteria incorporated in the notes in 40 CFR 250.43–45 (proposed at 43 FR 58999–59016 (December 18, 1978)).

(d) Provisions for minor modification to a permit under § 122.9(g) (5) and (6), where appropriate. The Director shall issue a public notice in accordance with § 124.11 prior to or at the time that he/she approves such minor modification.

(1) Minor modifications may be made under this paragraph only where the Director determines that a particular HWM facility has the capacity and equipment necessary to handle a variety of different types of hazardous waste without violating any other permit terms and conditions or the requirements specified in 40 CFR 250.43, 250.44, 250.45 and 250.46 (proposed at 43 FR 58999–59016 (December 18, 1978)), and where the facility can demonstrate that it will receive different quantities and/or types of hazardous wastes on an unpredictable basis.

(2) In modifying the permit under this paragraph, the Director may limit the types and/or quantities of hazardous wastes that can be the subject of minor modifications under § 122.9(g) (5) and (6).

[*Comment:* Provisions for minor modifications under this paragraph and § 122.9(g) (5) and (6) are not intended to be generally included in RCRA permits, but are appropriate only under certain limited circumstances as specified in this paragraph, and at the discretion of the Director. This paragraph does not apply where the types or quantities of wastes can be anticipated through contract provisions or by other means, making it possible to include provisions covering such wastes in the initial permit. Modifications not covered by this paragraph must comply with the applicable requirements of §§ 122.9, 124.5 and 124.7.]

(e) No HWM facility shall commence treatment, storage or disposal of hazardous waste in a modified or newly constructed facility until such construction or modification is complete; and

(1) The permittee has submitted to the Director a certified letter signed by the permittee and a registered professional engineer in the State where the facility is located, stating clearly that construction or modification of the facility has compiled with the permit, and in the case of incinerator facilities, a trial burn and result analysis has been completed and is submitted to the Director; and

(2) The Director has inspected the modified or newly constructed facility and finds that the facility is in compliance with all terms of the permit; provided that, the Director has notified the permittee, within *ten (10)* days of receipt of such letter, of his/her intent to inspect; and

(3) The Director authorizes commencement of treatment, storage, or disposal of hazardous waste.

(f) Where an approved State is the permit-issuing authority, the permit must establish such terms and conditions as are necessary to provide a degree of control and protection of human health and the environment equivalent to that required under this section.

§ 122.25 Special HWM facility permits.

(a) *Health Care Facility Special Permit.* (1) A person who owns or operates a health care facility which treats or stores hazardous waste may apply for a health care facility special permit if the following conditions are satisfied:

(i) The Health care facility is licensed under a State licensing law and such license requires compliance with requirements for the storage, sterilization, incineration, or treatment of all hazardous waste generated;

(ii) The State licensing law and control program provides for the adequate enforcement of the program by withholding or withdrawing the license of the health care facility where compliance with license requirements is not being achieved;

(iii) If incineration is used, the incinerator is operated under the terms and conditions of a license issued under applicable State law; and

(iv) The person owning or operating the health care facility submits a certification of compliance with an issued license signed by the appropriate State licensing official.

(2) An applicant for a health care facility special permit shall submit the following information:

(i) The name and address of the facility;

(ii) Certification signed by the appropriate State licensing authority specifying that the facility has an effective license and is in compliance with such license; and

(iii) A list of the hazardous wastes covered by the State license.

(3) The licensing law requirements of a State shall be judged against the applicable RCRA 3004 standards, 40 CFR 250, Subpart D (proposed at 43 FR 58982 (December 18, 1978)) to determine if an equivalent degree of control is provided.

(4) Whenever the conditions of subparagraph (1) are not being met, the health care facility loses eligibility for a special permit under this section.

[*Comments:* (1) Health care facilities include hospitals as defined by SIC Codes 8062 and 8069 and veterinary hospitals as defined by SIC Codes 0741 and 0742. See 40 CFR 250.14(b)(1)(i) (proposed at 43 FR 58958 (December 18, 1978)).

(2) Under § 123.29, States are authorized, but not required, to issue special facility permits in the same manner and covering the same facilities as those covered by EPA under this section.]

(b) *Experimental Special Permit.* (1) The Director may grant an experimental special permit to a person for the treatment, storage, or disposal of hazardous waste using advanced technology where the Director determines that such technology will significantly improve the state-of-the-art for hazardous waste treatment, storage or disposal.

(2) An applicant for an experimental special permit shall submit all of the

applicable information specified in § 122.23(c) and (d) and such other information as the Director may require including plans for the immediate termination of all acitvities if intended results are not achieved.

(3) In granting an experimental special permit, the Director shall require the submission of an evaluation of test results and shall set a specific date for its termination which shall not exceed one (1) year. An extension of no more than one additional year may be granted by the Director upon written request from the permittee, including the submission of such information as the Director may require, including a full evaluation of any test results from the facility for the period of operation.

[*Comment:* Under § 123.30, States are authorized, but not required, to issue experimental special permits in the same manner and covering the same facilities as those covered by EPA under this section.]

§ 122.26 Permits by rule.

(a) *Permit by Rule for HWM Facility Accepting Special Waste.* A facility which treats, stores, or disposes only special wastes and does not comingle different types of special wastes, as listed in 40 CFR 250.46 (proposed at 43 FR 59015 (December 18, 1978)), shall be considered as having a permit for the treatment, storage or disposal of such wastes if the owner/operator of the facility complies with all the applicable requirements for control of special wastes, as specified in 40 CFR 250.46, including the notes thereunder, (proposed at 43 FR 59015 (December 18, 1978)), and notifies EPA in accordance with 40 CFR Part 250, Subpart G (proposed at 43 FR 29906 (July 11, 1978)).

[*Comment:* Special wastes are: Cement Kiln Dust; Utility Waste (fly ash, bottom ash, scrubber sludge); Phosphate Rock Mining, Beneficiation, and Processing Waste; Uranium Mining Waste; Other Mining Waste; and Gas and Oil Drilling Muds and Oil Production Brines. These wastes, typically, are generated in large volumes and some portions are expected to be classified as hazardous under the Section 3001 standards. The Agency, however, has very little information on the composition, characteristics, and the degree of hazards posed by these wastes. Therefore, the Agency is proposing to remove the provision requiring facilities to obtain site-specific permits. Moreover, EPA requests comments on alternate approaches, such as the use of either a general permit (applicable to many sites, rather than only one site), or of special site-specific permits of the type proposed in § 122.25 of this Subpart. Finally, the Agency requests comments on the applicability of these approaches to assessing equivalency of State programs as required under Part 123].

[*Comment:* Under § 123.30, States are authorized, but not required, to issue permits by rule in the same manner and covering the same facilities or circumstances as those covered by EPA under this section.]

(b) *Permit by Rule for Ocean Disposal Barges or Vessels.* A barge or other vessel which accepts hazardous waste for ocean disposal shall be deemed to have an HWM facility permit if the following conditions are met:

(1) The owner or operator of the barge or vessel is authorized to ocean dump such waste under an ocean dumping permit issued to him or her under 40 CFR Subchapter H;

(2) The owner or operator of the barge or vessel complies with the terms of his or her ocean dumping permit; and

(3) The owner or operator of the barge or vessel complies with the following hazardous waste treatment, storage and disposal facility regulations, as applicable:

(i) 40 CFR Part 250, Subpart G (notification);

(ii) 40 CFR 250.43–5(a), (manifest system);

(iii) 40 CFR 250.43–5(b)(6)(recordkeeping); and

(iv) 40 CFR 250.43–5(c)(5)(i)–(iii)(A)–(F), (H); and (c)(6) (reporting).

[*Comments:* (1) Shoreside facilities of ocean disposal operations which handle hazardous wastes will require regular RCRA permits. However, disposal vessels which dump wastes into the ocean are adequately regulated by the Marine Protection, Research and Sanctuaries Act, as amended, 33 U.S.C. 1420 *et seq.* Even so, to assure the smooth operation of the manifest system, such facilities will have to comply with manifest, recordkeeping and reporting requirements.

(2) Under 123.30, States are authorized, but not required, to issue permits by rule in the same manner and covering the same facilities or circumstances as those covered by EPA under this section.]

(c) *Permit by Rule for Publicly Owned Treatments Works (POTWs).* A publicly owned treatment works (POTW) which accepts for treatment hazardous waste shall be deemed to have a HWM facility permit if the following conditions are met:

(1) The POTW has an NPDES permit;

(2) The POTW complies with the terms of its NPDES permit;

(3) The waste meets all Federal, State and local pretreatment requirements which would be applicable to such waste if it was being discharged into the POTW through a sewer, pipe or similar conveyances; and

(4) The owner/operator of the POTW complies with the following hazardous waste treatment, storage and disposal facility regulations, as applicable:

(i) 40 CFR Part 250, Subpart G (notification);

(ii) 40 CFR 250.43–5(a) (manifest systems);

(iii) 40 CFR 250.43–5(b)(6) (recordkeeping); and

(iv) 40 CFR 250.43–5(c)(5) (i)–(iii) (A)–(F), (H); and (c)(6) (reporting).

[*Comments:* (1) General pretreatment regulations are found at Part 403 of this Chapter and specific pretreatment requirements for industrial categories are found generally in Subchapter N of this Chapter (Effluent Guidelines and Standards). An industry generating hazardous waste and shipping waste to a POTW must provide all the treatment which would be required if the industry were discharging the waste directly into the treatment system. POTWs which receive wastes that may be classified as "hazardous" but which are solid or dissolved materials in domestic sewage do not come under these regulations because sections 1004(5) and 1004(27) of RCRA exclude these materials from the definition of "hazardous wastes." These POTWs are controlled under the NPDES system of the Clean Water Act. However, for those POTWs which receive hazardous waste for which a manifest or other delivery document is required, compliance with the manifest system, recordkeeping and reporting requirements is necessary to assure the smooth operation of the manifest system.

(2) Under § 123.30, States are authorized, but not required, to issue permits by rule in the same manner and covering the same facilities or circumstances as those covered by EPA under this section.]

§ 122.27 Reporting requirements.

In addition to the reporting requirements of § 122.15, the Director shall prepare the following reports:

(a) *Quarterly international shipment reports.* The Director shall submit two copies of a report within four weeks of the last day of March, June, September and December. The report shall contain a compilation of shipments which originated during the reporting quarter and were sent from generators and owners and operators of treatment, storage, and disposal facilities within the State to a location outside the jurisdiction of the United States. Such reports shall contain the generator or HWM facility identification code, name, address, and the information required by 40 CFR 250.23(c) (2)–(7) (proposed at 43 FR 58978 (December 18, 1978)).

(b) *Annual program reports.* The Director shall prepare two copies of a program report within four weeks of the last day of September. The report shall contain information (in a manner and form prescribed by the Administrator) on generators, transporters, the permit status of regulated facilities, and summary information on the quantities and types of hazardous wastes

generated, transported, stored, treated and disposed during the preceding year.

(c) Reports required under this section from the State Director shall be submitted to the Regional Administrator, and reports from the Regional Administrator shall be submitted to EPA Headquarters.

§ 122.28 Emergency authorization.

Notwithstanding any other provision of this Part or Part 124, in the event of an immediate hazard to human health or the environment (as determined by EPA, other Federal agencies or State or local authorized officials) the Director may issue temporary authorization to a permitted HWM facility to allow treatment, storage or disposal of hazardous waste not covered by a permit. Such authorization:

(a) May be oral or written. If oral, it shall be followed within 5 days by written authorization;

(b) Shall not exceed 90 days in duration;

(c) Shall clearly specify wastes to be received, and the manner and location of their treatment, storage or disposal;

(d) May be revoked by the Director at any time if he/she determines that revocation is appropriate to protect human health and the environment; and

(e) Shall be accompanied by a public notice published according to methods provided in § 124.11(a)(2) and specifying the:

(1) Name and address of the office granting the emergency authorization;

(2) Name and location of the permitted HWM facility;

(3) Brief description of the wastes involved;

(4) Brief description of the action authorized and reasons for authorizing it; and

(5) Duration of the authorization.

[*Comment:* Under § 123.39, States are authorized, but not required, to grant temporary authorization in the same manner and covering the same facilities or circumstances as those covered by EPA under this section.]

Subpart C—Additional Requirements for UIC Program Under the SDWA

§ 122.31 Purpose and scope.

(a) The regulations in this Subpart set forth the specific requirements for the UIC program. Additional general requirements have been set forth in Subpart A. In case of inconsistencies between this Subpart and Subpart A, this Subpart is controlling.

(b) SDWA provides for authorization of underground injections in listed States by permit or, where provided for by these regulations, by rule. This Subpart defines the types of activities subject to authorization by permit or rule, and sets forth the specific elements applicable to either type of authorization.

[*Comment:* References to Part 146, the technical regulations for the UIC program, appear frequently in this Subpart. These technical regulations were proposed on April 20, 1978 (44 FR 23738).]

§ 122.32 Law authorizing UIC program.

(a) Section 1421 of SDWA requires the Administrator to propose and promulgate regulations establishing (1) minimum requirements for UIC programs and (2) a procedural mechanism whereby States may obtain EPA approval to operate such programs.

(b) Section 1422 of SDWA requires the Administrator to list in the Federal Register "each State for which in his judgment a State underground injection control program may be necessary to assure that underground injection will not endanger drinking water sources" and to establish by regulation a program for EPA administration of UIC programs in the absence of a State program in a listed State.

(c) Section 1423 of SDWA provides procedures for EPA enforcement of UIC requirements where the State fails to enforce those requirements.

(d) Section 1445 of SDWA authorizes (1) such recordkeeping, reporting, and monitoring requirements "as the Administrator may reasonably require by regulation to assist him in establishing regulations under this title," and (2) a "right of entry and inspection to determine compliance with this title, including for this purpose, inspection, at reasonable times, of records, files, papers, processes, controls, and facilities * * *."

(e) Section 1450 of the SDWA authorizes the Administrator "to prescribe such regulations as are necessary or appropriate to carry out his functions" under SDWA.

§ 122.33 Designation of underground drinking water sources.

(a) The Director shall identify (by narrative description, illustrations, maps or other means) all aquifers or parts of aquifers which are not underground sources of drinking water, in accordance with the criteria contained in § 146.04. The Director shall propose this designation and provide opportunity for comment and a public hearing on it. All aquifers not so identified shall be designated underground sources of drinking water.

(b) Aquifers identified under paragraph (a) shall be described in geographic and/or geometric terms (such as vertical and lateral limits and gradient) which are clear and definite.

[*Comment:* Aquifers not identified under paragraph (a) of this section may be described by use of maps, where such information is available, or by narrative description. Identifications of aquifers in accordance with paragraph (a) should be accompanied by narrative descriptions of why those aquifers do not qualify for designation as underground sources of drinking water.]

(c) Where a UIC program is administered by a State, designation and identification by the State Director under this section shall be subject to the approval of the Administrator at the time of program approval under Part 123.

[*Comment:* Designation and identification subsequent to program approval shall be treated as program modifications under § 123.6(b)(8).]

§ 122.34 Classification of injection wells.

The Director shall classify injection wells as follows:

(a) Class I: Industrial and municipal disposal wells and nuclear storage and disposal wells which inject beneath the lowermost stratum containing an underground source of drinking water.

(b) Class II: Well injection of produced water or other fluids which are brought to the surface in connection with oil or natural gas production, well injection of fluids for enhanced recovery of oil or natural gas and well injection of fluids for storage of hydrocarbons.

(c) Class III: Well injection of fluids for special processes such as mining of sulfur by the Frasch process, well injection for solution mining of uranium, salt, potash, copper and other minerals, and well injection for in situ gasification of oil shale, coal, lignite, tar sands and other similar fuel sources, and well injection to recover gas thermal energy.

(d) Class IV: Wells used by generators of hazardous wastes and owners or operators of hazardous waste management facilities (as defined in § 122.3(b)) to inject into or above strata containing underground drinking water sources.

(e) Class V: Injection wells not included in Classes I, II, III or IV (examples are recharge wells such as subsidence control wells, air conditioning or cooling water return flow wells, and drainage wells; and waste disposal wells such as sand backfill wells, non-residential septic system wells, dry wells, and industrial and municipal waste disposal wells).

§ 122.35 Authorization of underground injection by rule.

(a) *Types of underground injections which may be authorized by rule.* The Director may authorize underground injections by rule in the following instances:

(1) Underground injection into all existing class I, II (except existing enhanced recovery and hydrocarbon storage) and III wells may be authorized by rule for a period up to 5 years from the effective date of the UIC program. All class I, II and III wells except enhanced recovery and hydrocarbon storage wells must be issued permits within five years in accordance with the permitting schedule established by the Director. All such authorizations by rule shall require compliance with the applicable monitoring, reporting and abandonment requirements of Part 146 as soon as possible but no later than one year after the authorization by rule.

(2) Underground injections into existing enhanced recovery and hydrocarbon storage wells may be authorized by rule, rather than by permit, for the life of the well. All such authorizations by rule shall require compliance with the applicable construction, abandonment, operating, monitoring, reporting, and financial responsibility requirements of Part 146 as soon as possible but no later than one year after the authorization by rule.

(3) Underground injections into existing class IV wells which have submitted the information required under § 146.42 shall be authorized by rule ending at the time of their closure under § 146.43(a). Such authorization shall require monitoring and reporting as set forth in § 146.44 within 90 days of the authorization.

[*Comment:* The operation of *new* Class IV wells shall be prohibited by rule. See § 122.45.]

(4) Underground injections into class V wells which have submitted the information required under §146.52 may be authorized by rule for a period ending at the time when new requirements promulgated by EPA became applicable.

(b) Owners or operators of underground injection facilities who have not complied with applicable rules are subject to enforcement action by the State or, where appropriate, EPA.

§ 122.36 Authorization of underground injection by permit.

(a) *Who must apply.* All underground injections into Class I, II (except existing enhanced recovery and hydrocarbon storage) or III wells in listed States must be authorized by permit.

(b) *Time to apply.* Any person who performs or proposes an underground injection for which a permit is required shall submit an application to the Director in accordance with the State UIC program (including the State permit plan under part 123) as follows:

(1) For existing injection wells, as expeditiously as practicable and in accordance with the schedule contained in State permit plan, but no later than four years from the effective date of the State UIC program.

(2) For new injection wells, a reasonable time before injection is expected to begin. Injection may not begin until the owner or operator has received a permit.

(c) *Contents of UIC application.* Applicants for UIC permits shall submit the following information to the Director:

(1) All applicants must submit the identity of the owner or operator of the injection operation, the location or proposed location of the injection well, and the purpose or function of the well.

(2) Applicants for State-issued permits for existing injection wells shall submit, in addition to the information required by subparagraph (1), such other information as the Director requires.

[*Comment:* In many States, most or all of the information which the Director must consider in writing permit conditions is already contained in State files. Part 146 Subparts B–D list the information which the Director must consider for various classes of wells. The Director may review the State files upon receipt of an application and then require the applicant to submit any applicable information which either is not contained in the State file or is in need of correction or updating. Only new information submitted by the applicant that is not already contained in State files is subject to the signatory requirements of §122.5.]

(3) Applicants for State-issued permits for new injection wells shall submit, in addition to the information required by subparagraph (1), all additional information which the Director will be required under Part 146 to consider for the applicable class of well. Certain maps, sections, and tabulations of wells within the area of review (see §§ 146.15, 146.25 and 146.36), may be included in the application by reference provided they are available to the Director and sufficiently identified to be retrieved.

(4) Applicants for EPA-issued permits shall submit, in addition to the information required by subparagraph (1), all additional information which the Director will be required under Part 146 to consider for the applicable class of well.

(d) *Mechanical integrity.* The Director shall issue no permits to wells which lack mechanical integrity as determined under § 146.08.

§ 122.37 Area permits.

(a) The Director may issue permits on a well-by-well basis or an area basis, provided that all injection wells covered by an area permit are:

(1) Within a single well field project, or site in a single State;

(2) Covered by the application for the permit;

(3) Of the same type as determined under § 122.34;

(4) Injecting into the same aquifer or zone; and

(5) Controlled by a single person.

(b) Area permits shall specify the boundary within which underground injections are authorized and shall identify by location each injection well covered by the area permit.

(c) A permittee may obtain administrative authorization from the Director for additional new injection wells within the permitted area without public notice and hearing:

(1) If the permittee notifies the Director of his/her intent to place an additional injection well within the permitted area and provides information on the location of the proposed well;

(2) If the permittee demonstrates to the satisfaction of the Director that the additional underground injection well is similar in construction to wells already covered by the area permits and will meet the operation requirements of Part 146; and

(3) Where authorization under this paragraph is obtained orally, the information in (1) and (2) must be provided in writing within 30 days.

[*Comment:* Such authorization of additional injection wells does not constitute a permit modification subject to § 122.9.]

§ 122.38 Corrective action.

(a) Where the Director's review of an application for a class I, II (other than existing) or III well indicates that the proposed injection well's area of review contains wells which are improperly completed and/or plugged or that the remedial actions proposed by the applicant are inadequate, he/she shall prescribe such steps or modifications as are necessary to prevent fluid migration ("corrective action"). In determining such steps or modifications, the Director shall consider the factors set forth in § 146.07.

(b) In the case of a new or existing class II injection well in an existing

injection field, the Director shall by rule (or by permit) require that where a source of leaking fluids may cause a significant risk to public health, the leak shall be corrected in the shortest reasonabale period of time or the operator shall cease injecting.

(c) In the case of an existing injection well which must be authorized by permit, the Director shall issue the permit with a condition that if any required corrective action is not accomplished within the shortest reasonable time, the permit shall be revoked.

(d) In the case of a new injection well authorized by permit, the operation shall not begin unless all required corrective action has been taken.

(e) In the case of a class I, II or III well which is authorized by rule, if any monitoring indicates the migration of injection or formation fluids into underground sources of drinking water, the Director shall prescribe such additional requirements for construction, corrective action, operation, monitoring or reporting (including closure of the injection well) as are necessary to prevent such migration.

[*Comment:* In the case of wells authorized by permit, such additional requirements may be imposed by modifying the permit in accordance with § 122.9.]

(f) If at any time the Director gains knowledge of a Class V well which presents a significant risk to the health of persons, he/she shall prescribe such action as necessary (including the immediate closure of the injection well) to remove such hazard.

§ 122.39 General prohibition against movement of fluid into underground sources of drinking water.

No class I, II or III well shall cause or allow movement of fluid into underground sources of drinking water.

§ 122.40 Temporary authorization.

(a) Notwithstanding any other provision of this Part, the Director may, in the following circumstances, temporarily authorize a specific underground injection which has not otherwise been authorized by rule or permit:

(1) An imminent and substantial hazard to human health or the environment will result unless temporary authorization is granted; or

(2) If a substantial and irretrievable loss of oil or gas resources will occur unless temporary authorization is granted to a Class II well; and

(i) Timely application for a permit could not have practicably been made; and

(ii) The temporary authorization will not result in the movement of fluids into underground sources of drinking water.

(b)(1) Any authorization under paragraph (a)(1) shall be for no longer than required to prevent the hazard or loss of such resources.

(2) An authorization under paragraph (a)(2) shall be for no longer than 90 days, except that if a permit application has been submitted prior to the expiration of the 90-day period, the Director may extend the authorization until the permit is granted or denied.

(c) Notice of any authorization under this paragraph shall be published in accordance with § 124.11 within 10 days of the authorization.

§ 122.42 Establishing UIC permit terms and conditions.

(a) Permit terms and conditions shall at a minimum establish, in addition to terms and conditions required under §§ 122.9 and 122.11, the following:

(1) Construction requirements as set forth in Part 146;

(2) Corrective action as set forth in § 122.38 and § 146.7;

(3) Operation requirements as set forth in Part 146;

(4) Monitoring and reporting requirements as set forth in § 122.12 and Part 146;

(5) Schedules of compliance. Schedules shall set forth dates which are as early as possible but no later than three years after the dates of permit issuance. No later than 30 days following each interim or final date, the permittee shall provide the Director with written notice of compliance or noncompliance with the interm of final requirements;

(6) Plugging and abandonment of injection wells. Where a permittee intends to cease underground injection, the permittee shall immediately notify the director and follow the procedures prescribed by the director for plugging and abandonment of the well; and

(7) Fiscal responsibility of permittees. The permittee shall maintain fiscal responsibility and resources, in the form of performance bonds or other appropriate form, to close, plug and abandon the underground injection operation in a manner prescribed by the Director.

[*Comment:* To assure that the well is constructed and operated in accordance with the requirements of Part 146, the permit should set forth the specific data on which the permit is based. For example, the permit should establish injection volumes and pressures which will assure compliance with the Part 146 operating requirements.

(b) The director may impose additional terms and conditions on a case-by-case basis if necessary to prevent the migration of fluids into underground sources of drinking water.

§ 122.43 Noncompliance reporting.

(a) The Director shall submit, as part of the quarterly report required under § 122.15(a), information concerning noncompliance by major underground injectors with permit requirements or the requirements of any applicable rule.

(b) The following shall be contained in the noncompliance report:

(1) *Failure to Complete Construction Elements.* Noncompliance shall be reported in the following circumstances:

(i) When an injector has failed to complete, by the date specified in the permit or rule, an element of the compliance schedule involving planning for construction (e.g., award of contract, preliminary plans, etc.) or a construction step (e.g., begin construction, attain operation level); and

(ii) The injector has not returned to compliance within 30 days from the date a report is due under Part 146.

(2) *Failure to Complete/Provide Compliance Schedule Reports.* Noncompliance shall be reported in the following circumstances:

(i) When an injector has failed to complete or provide a report required in the compliance schedule (e.g., progress reports, notification or compliance/noncompliance etc.); and

(ii) The injector has not submitted a complete report within 30 days from the date the report is due.

(3) *Noncompliance with Operational Requirements.* Noncompliance shall be reported in the following circumstances:

(i) When a permittee or an injector authorized by rule has violated an operational requirement and has not returned to compliance with applicable requirements within 45 days from the date notification of noncompliance under Part 146 was due; or

(ii) When the Director determines that a pattern of noncompliance with applicable operational requirements exists for any injector over a period of 12 months prior to the end of the current reporting period. This includes but is not limited to:

(A) Any violation of the same requirement in two consecutive quarters; and

(B) Any violation of one or more requirements in each of the four quarters comprising the 12-month period.

(4) *Failure to Report Data.* The State shall include in its report instances

where reports are received or the reports provided by the injector are so deficient as to cause misunderstanding on the part of the Director and impede the review of the status of compliance.

[*Comment:* Noncompliance reported under this paragraph shall be reported in successive reports until the noncompliance is resolved. This resolution of noncompliance shall also be reported. Once the noncompliance is reported as resolved, it need not appear in subsequent reports.]

(d) Where the State is the permit-issuing authority, the State Director shall submit any reports required under this section to the Regional Administrator. Where EPA is the permit-issuing authority, the Regional Administrator shall submit any reports required under this section to EPA Headquarters.

§ 122.44 Special Requirements for wells managing hazardous wastes.

(a) The owner or operator of any well that is used to inject hazardous wastes accompanied by a manifest or delivery document shall obtain authorization to inject as specified in §§ 122.35 and 122.36.

(b) In addition to the applicable requirements of this Part and Part 146 Subparts B-F, the Director shall, for each facility meeting the requirements of paragraph (a), require that the owner or operator comply with:

(1) The notification requirements of Part 250, Subpart G (proposed at 43 FR 29911 (July 11, 1978)); and

(2) The manifest system record-keeping, and reporting requirement of § 250.43–5(a), (b)(6), (c)(5)(i), (c)(5)(ii), (c)(5)(iii), (c)(5)(iii)(A)–(F) and (c)(5)(iii)(H), and (c)(6) (proposed at 43 FR 59003 (December 18, 1978)).

[*Comment:* Wells which inject hazardous wastes qualify as hazardous waste management facilities under the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6901 *et. seq.* This section is designed to integrate regulatory coverage of these wells under RCRA and SDWA to avoid imposing inconsistent requirements.]

§ 122.45 Elimination of all class IV wells.

(a) *Existing class IV wells.* Existing class IV wells shall be inventoried and closed by the Director as described in §§ 146.42 and 146.43.

(b) *New class IV wells.* The Director shall by rule prohibit all new class IV wells immediately upon the effective date of the UIC program.

§ 122.46 Inventory of class V wells.

(a) The Director shall by rule require the owner/operator of any class V well to submit the information required in § 146.52.

(b) The Director shall, within two years of the effective date of the State program:

(1) Conduct an assessment of the contamination potential of class V wells;

(2) Conduct an assessment of the available corrective alternatives where appropriate and their environmental and economic consequences; and

(3) Submit a report to EPA containing items (1) and (2) as well as recommendations for appropriate regulatory approaches and remedial actions.

Any underground injection for which the required information is not submitted will not be authorized by either rule or permit and will thus be subject to appropriate enforcement action.

[*Comment:* Based on the submitted information, States shall develop reports and recommendations, which the Agency will use as a basis for promulgating minimum national requirements to bring class V wells under regulatory control.

The assessment mandated for class V wells represents solely the recognition that insufficient information is available to the Agency at this time. EPA has every intention of continuing to seek the necessary environmental and economic data.]

Subpart D—Additional Requirements for National Pollutant Discharge Elimination System Programs Under the Clean Water Act

§ 122.61 Purpose and scope.

(a) This Subpart sets forth additional requirements for the National Pollutant Discharge Elimination System (NPDES) program including permit programs under sections 402, 318 and 405 of the Act; it applies to the program as administered by EPA and, to the extent incorporated by reference in Part 123, by approved NPDES States.

(b) Section 402 of the Clean Water Act (CWA, formerly referred to as the Federal Water Pollution Control Act), (Pub. L. 92–500, as amended by Pub. L. 95–217 and Pub. L. 95–576) establishes the NPDES program. The NPDES program also includes permit program requirements under sections 318 and 405 of the Act. This program regulates the discharge of pollutants from point sources and related activities into the waters of the United States. All such discharges or activities are unlawful absent an NPDES permit. After a permit is obtained, a discharge not in compliance with all permit terms and conditions is unlawful.

§ 122.62 Law authorizing NPDES permits.

(a) Section 301(a) of CWA provides that "Except as in compliance with this section and sections 302, 306, 307, 318, 402, and 404 of this Act, the discharge of any pollutant by any person shall be unlawful."

(b) Section 402(a)(1) of CWA provides in part that "the Administrator may, after opportunity for public hearing, issue a permit for the discharge of any pollutant, or combination of pollutants, . . . upon condition that such discharge will meet either all applicable requirements under sections 301, 302, 306, 307, 308, and 403 of [the] Act, or prior to the taking of necessary implementing actions relating to all such requirements, such conditions as the Administrator determines are necessary to carry out the provisions of [the] Act."

(c) Section 318(a) of CWA provides that "The Administrator is authorized, after public hearings, to permit the discharge of a specific pollutant or pollutants under controlled conditions associated with an approved aquaculture project under Federal or State supervision pursuant to section 402 of this Act."

(d) Section 405 of CWA provides, in part, that "where the disposal of sewage sludge resulting from the operation of a treatment works as defined in section 212 of this Act (including the removal of in-place sewage sludge from one location and its deposit at another location) would result in any pollutant from such sludge entering the navigable waters, such disposal is prohibited except in accordance with a permit issued by the Administrator under section 402 of this Act."

(e) Sections 402(b), 318(b) and (c), and 405(c) of CWA authorize EPA approval of State permit programs for discharges from point sources, discharges to aquaculture projects, and disposal of sewage sludge.

(f) Section 404 authorizes EPA approval of State permit programs for the discharge of dredged or fill material.

(g) Section 304(i) of CWA provides that the Administrator shall promulgate guidelines establishing uniform application forms and other minimum requirements for the acquisitions of information from dischargers in approved States and establishing minimum procedural and other elements of approved State NPDES program.

(h) Section 501(a) of CWA provides that "The Administrator is authorized to prescribe such regulations as are necessary to carry out his functions under this Act."

(i) Section 101(e) of the Act provides that "Public participation in the

development, revision, and enforcement of any regulation, standard, effluent limitation, plan or program established by the Administrator or any State under this Act shall be provided for, encouraged, and assisted by the Administrator and the States. The Administrator, in cooperation with the States, shall develop and publish regulations specifying minimum guidelines for public participation in such processes."

§ 122.63 Exclusions.

(a) The following discharges do not require an NPDES permit:

(1) Any discharge of sewage from vessels, effluent from properly functioning marine engines, laundry, shower, and galley sink wastes, or any other discharge incidental to the normal operation of a vessel. This exclusion does not apply to rubbish, trash, garbage, or other such materials discharged overboard; nor to other discharges when the vessel is operating in a capacity other than as a means of transportation such as when a vessel is being used as an energy or mining facility, a storage facility, or a seafood processing facility, or is secured to storage facility, or a seafood processing facility, or is secured to the bed of the ocean, contiguous zone, or waters of the United States for the purpose of mineral or oil exploration or development;

(2) Discharges of dredged or fill material into waters of the United States and regulated under section 404 of CWA.

(3) The introduction of sewage, industrial wastes or other pollutants into publicly owned treatment works by indirect dischargers.

[*Comment:* This exclusion applies only to the introduction of pollutants into publicly owned treatment works. Plans or agreements to switch to this method of disposal in the future do not relieve dischargers of the obligation to apply for and receive permits until all discharges of pollutants to waters of the United States are eliminated. All applicable pretreatment standards promulgated under section 307(b) of CWA must also be complied with, and may be included in the permit to the publicly owned treatment works.

This exclusion does not apply to the introduction of pollutants to privately owned treatment works or to other discharges through pipes, sewers of other conveyances owned by a State, municipality or other party not leading to treatment works. (See § 122.3(d)).]

(4) Any introduction of pollutants from agricultural and silvicultural activities, including runoff from orchards, cultivated crops, pastures, range lands, and forest lands, except that this exclusion shall not apply to:

(i) Discharges from concentrated animal feeding operations as defined in § 122.76;

(ii) Discharges from concentrated aquatic animal production facilities as defined in § 122.77;

(iii) Discharges to aquaculture projects as defined in § 122.78; and

(iv) Discharges from silvicultural point sources as defined in § 122.80.

(b) The exemption of a discharge from NPDES requirements in paragraph (a) of this section does not preclude State regulation of the exempted discharge under State authority, in accordance with section 510 of the CWA.

§ 122.64 Application for a permit.

(a) Any person who discharges or proposes to discharge pollutants, except persons covered by general permits under § 122.82 or excluded under § 122.63, shall complete, sign, and submit an application (which includes a BMP program if necessary under § 125.102) to the Director in accordance with Part 124.

(b) Persons currently discharging who have:

(1) Existing permits shall submit a new application under paragraph (c) of this section where facility expansions, production increases, or process modifications will:

(i) Results in new or substantially increased discharges of pollutants or a change in the nature of the discharge of pollutants, or

(ii) Violate the terms and conditions of the existing permit.

(2) Have expiring permits shall submit new applications at least 180 days before the expiration date of the existing permit, unless permission for a later date has been granted by the Director.

(c) A person proposing a new discharge shall submit an application at least 180 days before the date on which the discharge is to commence, unless permission for a later date has been granted by the regional Administrator.

[*Comment:* Persons proposing a new discharge are encouraged to submit their applications well in advance of the 180 day requirement to avoid delay.]

(d) *Special provisions for applications from new sources.* (1) The owner or operator of any facility which may be a new source as defined in § 122.3(d) and which is located in a State without an approved NPDES program must comply with the provisions of this paragraph.

(2)(i) Before beginning any on-site construction as defined in § 122.81, the owner or operator of any facility which may be a new source must submit information to the Regional Administrator so that he or she can determine if the facility is a new source. The Regional Administrator may request any additional information needed to determine whether the facility is a new source.

(ii) The Regional Administrator shall make an initial determination whether the facility is a new source within 30 days of receiving all necessary information under subparagraph (2)(i) of this paragraph.

(3) The Regional Administrator shall issue a public notice in accordance with § 124.11 of the new source determination under subparagraph (2)(1) of this paragraph. The notice shall state that the applicant, if determined to be a new source must comply with the environmental review requirements of 40 CFR Part 6.900 *et seq.*

(4) Any interested person may challenge the Regional Administrator's initial new source determination by requesting an evidentiary hearing under Subpart E of Part 124 within 30 days of issuance of the public notice of the initial determination. The Regional Administrator may defer the evidentiary hearing on the determination until after a final permit decision is made, and consolidate the hearing on the determination with any hearing on the permit.

(e) *Applications for variances from and modifications of effluent limitations by non-POTWs.* A discharger which is not a publicly owned treatment works may request a variance from or modification of otherwise applicable effluent limitations under any of the following statutory or regulatory provisions within the times specified in this paragraph:

(1) A request for a variance based on the presence of "fundamentally different factors" from those on which the effluent limitations guideline was based, shall be made by the close of the public comment period under § 124.12. The request shall explain how the requirements of § 124.15 and 40 CFR Part 125, Subpart D have been met.

(2) A request for a variance from the BAT requirements for CWA section 301(b)(2)(F) pollutants (commonly called "non-conventional" pollutants) pursuant to section 301(c) of CWA because of the economic capability of the owner or operator; or pursuant to section 301(g) of CWA because of certain environmental considerations, where those requirements were based on effluent limitation guidelines, must be made by:

(i) Submitting an initial application to the Regional Administrator and the

State Director stating the name of the applicant, the permit number, the outfall number(s), the applicable effluent guideline, and whether the applicant is applying for a section 301(c) or section 301(g) modification or both. This application must have been filed not later than:

(A) September 25, 1978, for a pollutant which is controlled by a BAT effluent limitation guideline promulgated before December 27, 1977; or

(B) 270 days after promulgation of an applicable effluent limitation guideline for guidelines promulgated after December 27, 1977;

(ii) Submitting a completed request demonstrating that the requirements of § 124.15 and the applicable requirements of Part 125 have been met no later than the close of the public comment period under § 124.12.

(iii) Requests for variance of effluent limitations based on other than effluent limitation guidelines, shall comply only with paragraph (ii) and need not submit an initial application under paragraph (i).

(3) An extension under CWA section 301(i)(2) of the statutory deadlines in sections 301(b)(1)(A) or (b)(1)(C) of CWA based on delay in completion of a publicly owned treatment work into which the source is to discharge must have been requested on or before June 26, 1978, or 180 days after the relevant publicly owned treatment works requests an extension under paragraph (f)(2) of this section, whichever is later. The request shall explain how the requirements of 40 CFR Part 125, Subpart J have been met.

(4) An extension under CWA section 301(k) from the statutory deadline of section 301(b)(2)(A) for best available control technology based on the use of innovative technology may be requested no later than the close of the public comment period under § 124.12 for the discharger's initial permit requiring compliance with the best available technology economically achievable. The request shall demonstrate that the requirements of § 124.15 and Part 125, Subpart C have been met.

(5) A modification under section 302(b)(2) of requirements under section 302(a) for achieving water quality related effluent limitations may be requested no later than the close of the public comment period under § 124.12 on the permit from which the variance is sought. The request shall demonstrate that the requirements of that section have been met.

(6) A variance under CWA section 316(a) for the thermal component of any discharge must be filed with a timely application for a permit under this section. If thermal effluent limitations are established under CWA section 402(a)(1) or are based on water quality standards the application shall be filed by the close of the public period under § 124.12. A copy of the application as required under 40 CFR Part 125, Subpart H shall be sent simultaneously to the appropriate State or interstate certifying agency. (See § 124.67 for special procedures for section 316(a) thermal variances.)

(f) *Applications for variances from and modifications of effluent limitations by POTW's.* A discharger which is a publicly owned treatment works (POTW) may request a modification of otherwise applicable effluent limitations under any of the following statutory provisions as specified in this paragraph:

(1) A preliminary application for a modification under CWA section 301(h) from requirements of CWA section 301(b)(1)(B) for discharges into marine waters must have been submitted to the Agency no later than September 25, 1978. A final application must be submitted in accordance with the filing requirements of 40 CFR Part 125, Subpart G, after that Subpart is promulgated, and shall demonstrate on its face that all the requirements of 40 CFR Part 125, Subpart G have been met. (See § 124.66 for special rules for CWA section 301(h) modifications.)

(2) An extension under CWA section 301(i)(1) from the statutory deadlines in CWA sections 301 (b)(1)(B) or (b)(1)(C) based on delay in the construction of POTWs must have been requested on or before June 26, 1978.

(3) A modification under CWA section 302(b)(2) of the requirements under section 302(a) for achieving water quality based effluent limitations may be requested no later than the close of the public comment period under § 124.12 on the permit from which the modification is sought.

(g)(1) Notwithstanding the time requirements in paragraphs (e) and (f), the Director may notify the applicant before a draft permit is published pursuant to § 124.6 that the draft permit will likely contain limitations which are eligible for variances or modifications. In such notice the Director may require the applicant as a condition of consideration of any potential variance request to submit an application explaining how the requirements of 40 CFR Part 125 applicable to the variance have been met and to require its submission within a specified reasonable time before the draft permit is formulated. This notice can be sent before the application under this section has been submitted.

[*Comment:* This paragraph is intended to reduce the time for permit issuance, especially in those cases where it is clear that a CWA variance or modification will be applied for.]

(2) A discharger who cannot file a complete request required under paragraphs (e)(2)(ii), (e)(2)(iii), (e)(3)(ii) or (e)(3)(iii) may request an extension to apply. Extensions shall be limited to the time the Director determines is necessary to satisfy the requirements of the appropriate regulations, but shall be no more than 6 months in duration. The request may be granted or denied in the discretion of the Director.

§ 122.65 Effect of an NPDES permit.

Compliance with a permit during its term constitutes compliance, for purposes of sections 309 and 505, with applicable standards and limitations of CWA, except for any standard imposed under section 307 for a toxic pollutant injurious to human health. However, a permit may be modified, revoked and reissued, or terminated during its term for cause as described in §§ 122.9 and 122.73.

§ 122.66 Duration of permits.

No NPDES permit issued to a discharger within an industrial category listed in Appendix A of this Part, prior to the applicable permit expiration date listed in Appendix A, may be issued to expire after that date, unless:

(a) The permit incorporates effluent limitations and standards applicable to the discharger which are promulgated or approved under sections 301(b)(2) (C) and (D), 304(b)(2), and 307(a)(2) of CWA; or

[*Comment:* EPA is presently reviewing and revising effluent limitations for industries listed in Appendix A. In some cases, EPA may approve existing effluent limitations or choose not to develop new limitations. If EPA decides not to develop new effluent limitations it will publish notice in the Federal Register that the limitations are "approved" for the purpose of this regulation.]

(b) The permit incorporates:

(1) The "reopener clause" required by § 122.69(b)(1);

(2) Effluent limitations to meet the requirements of sections 301(b)(2) (A), (C), (D), (E) and (F) of CWA.

[*Comments:* (1) NPDES States are urged to issue short term permits expiring on or before the dates listed in Appendix A. This will ensure that all appropriate provisions of CWA, including compliance with the effluent limitations by the statutory deadlines, are met in permits issued after the promulgation

of effluent guidelines under sections 301(b)(2)(C) and (D), 304(b)(2) and 307(a)(2). Even if States issue long term permits with later expiration dates (in accordance with paragraph (b)(2), dischargers are legally required to meet all applicable statutory deadlines and requirements, including compliance with any promulgated EPA effluent guidelines defining "best conventional pollutant control technology" (BCT) and "best available control technology economically achievable" (BAT).

(2) A determination that a particular discharger falls within a given industrial category for purposes of setting a permit expiration date under paragraph (b) is not conclusive as to the discharger's inclusion in that industrial category for any other purposes, and does not prejudice any rights to challenge or change that inclusion at the time that a new permit based on that determination is formulated.]

§ 122.67 Prohibitions.

No NPDES permit shall be issued in the following circumstances:

(a) Where the terms or conditions of the permit do not comply with the applicable guidelines requirements of CWA, or regulations.

(b) Where the applicant is required to obtain a State or other appropriate certification under section 401 of CWA and § 124.53 and that certification has not been obtained or waived.

(c) By the State Director where the Regional Administrator has objected to issuance of the permit under § 123.90.

(d) Where the imposition of conditions cannot ensure compliance with the applicable water quality requirements of all affected States as required by section 401(a)(2) of CWA.

(e) Where, in the judgment of the Secretary, anchorage and navigation in or on any of the waters of the United States would be substantially impaired by the discharge.

(f) For the discharge of any radiological, chemical, or biological warfare agent or high-level radioactive waste.

(g) For any discharge from a point source inconsistent with a plan or plan amendment approved under section 208(b) of CWA.

(h) For any discharge to the territorial sea, the waters of the contiguous zone, or the oceans in the following circumstances:

(1) Prior to the promulgation of the guidelines under section 403(c) of CWA, unless the Director determines permit issuance to be in the public interest; or

(2) After promulgation of guidelines under section 403(c) of CWA, where insufficient information exists to make a reasonable judgment as to whether the discharge complies with any such guidelines.

(i) To a facility which is a new source or a new discharger, if the discharge from the construction or operation of the facility will:

(A) Cause or contribute to the violation of water quality standards if the point of discharge is located in a segment that was an effluent limitation segment (as defined in 40 CFR § 130.2(o)(2)) prior to the introduction of the discharge from the new source or new discharger; or

(B) Exceed the total pollutant load allocation if the discharge is into a water quality segment as defined in 40 CFR § 130.2(o)(1).

The owner or operator of a facility which is a new source or new discharger into a water quality segment must also demonstrate, at the time of applying for a permit that there are sufficient remaining pollutant load allocations to allow the discharge and that the facility is entitled to these allocations.

§ 122.68 Additional conditions applicable to NPDES permits.

The following conditions, in addition to those set forth in § 122.11, are applicable to all NPDES permits. They shall be either expressly incorporated into the permit or incorporated by reference.

(a) [Reserved]

[*Comment:* This paragraph is reserviced pending publication of a revised NPDES application form. This form, and accompanying regulations, are being proposed in today's Federal Register, as a separate part of the Permit Consolidation package. When finally promulgated, the regulations appearing with the revised NPDES form will be incorporated into the text of this section. The existing NPDES application forms should be utilized until the revised application form is available, except as otherwise provided in these regulations. See § 122.5.]

(b) If any applicable toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standard or prohibition) is established under section 307(a) of CWA for a toxic pollutant and that standard or prohibition is more stringent than any limitation upon such pollutant in the permit, the Director shall institute proceedings under these regulations to modify or revoke and reissue the permit to conform to the toxic effluent standard or prohibition.

[*Comment:* Effluent standards or prohibitions esablished under CWA section 307(a) for toxic pollutants injurious to human health are effective within the time provided in the implementing regulations, even absent permit modification.]

(c) *Bypass.* (1) *Definitions.*

(i) "Bypass" means the intentional diversion of wastes from any portion of a treatment facility.

(ii) " Severe property damage" means substantial damage to property damage to the treatment facilities which would cause them to become inoperable or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. severe property damage does not mean economic loss caused by delays in production.

(2) *Conditions necessary for bypass.* Bypass is prohibited unless the following three conditions are met:

(i) Bypass is unavoidable to prevent loss of life, personal injury or severe property damage;

(ii) There are no feasible alternatives to bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment down-time;

(iii) The permittee submits notice of an unanticipated bypass to the Director within 24 hours of becoming aware of the bypass (if this information is provided orally, a written submission must be provided within five days). Where the permittee knows or should have known in advance of the need for a bypass, this prior notification shall be submitted for approval to the Director, if possible, at least ten days before the date of the bypass.

[*Comment:* Fully efficient operation of treatment systems is required at all times. Although this generally requires the use of all portions of an existing treatment system, in some cases, maintenance necessary to ensure efficient operation may require bypassing portions of a system. Where such a bypass will not cause applicable effluent limitations or standards to be exceeded, it may be done without notification of the permitting authority. Where, however, a bypass is undertaken for reasons other than essential maintenance or where a bypass would cause effluent limitations or standards to be exceeded, it may be undertaken only in accordance with the provisions of this section.]

(3) *Prohibition of bypass.* The Director may prohibit bypass in consideration of the adverse effect of the bypass and the conditions set forth in paragraph (c)(2) of this section should have been provided by the treatment facility the bypass will not be allowed. If there is any doubt as to the necessity of the bypass or the availability of methods to reduce or eliminate the discharge, appropriate enforcement action may be taken.

(d) *Upset.* (1) *Definition.* "Upset" means an exceptional incident in which there is unintentional and temporary

noncompliance with technology-based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

(2) *Effect of an upset.* An upset shall constitute an affirmative defense to an action brought for noncompliance with such technology-based permit effluent limitations if the requirements of paragarph (d)(3) are met.

(3) *Conditions necessary for a demonstration of upset.* A permittee who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:

(i) An upset occurred and that the permittee can identify the specific cause(s) of the upset;

(ii) The permitted facility was at the time being operated in a prudent and workman-like manner and in compliance with applicable operation and maintenance procedures;

(iii) The permittee submitted information within 24 hours of becoming aware of the upset (if this information is provided orally, a written submission must be provided within five days); and

(iv) The permittee complied with any remedial measures required under § 122.11(i).

(4) *Burden of proof.* In any enforcement proceeding the permittee seeking to establish the occurrence of an upset shall have the burden of proof.

[*Comment:* Although in the usual exercise of prosecutorial discretion, Agency enforcement personnel should review any claims that noncompliance was caused by an upset, no determinations made in the course of the review constitute final Agency action subject to judicial review. Permittees will have the opportunity for a judicial determination on any claim of upset only in an enforcement action brought for noncompliance with technology-based permit effluent limitations.]

(e) The permittee, in order to maintain compliance with its permit, shall control production and all discharges upon reduction, loss, or failure of the treatment facility until the facility is restored or an alternative method of treatment is provided. This requirement applies in the situation where, among other things, the primary source of power of the treatment facility is reduced, lost or fails.

§122.69 Applicable limitations, standards, prohibitions, and conditions.

Each NPDES permit shall provide for and ensure compliance with all applicable requirements of CWA and regulations promulgated under CWA. For the purposes of this section, an applicable requirement is a statutory or regulatory requirement which takes effect prior to final administrative disposition of a permit issued by a State with an approved NPDES program, or, in the case of a permit issued by EPA, which takes effect prior to the issuance of the permit except as provided in § 124.86(c). Permits shall ensure compliance with the following as applicable:

(a) Effluent limitations and standards under sections 301, 302, 303, 304, 307, 318 and 405 of CWA, including any interim final limitations and standards.

(b) For a discharger within any industrial category listed in Appendix A requirements under section 307(a)(2) of CWA, as follows:

(1) Prior to the applicable permit expiration date listed in Appendix A:

(i) If applicable standards or limitations have not yet been issued:

(A) The permit shall include conditions stating that, if an applicable standard or limitation is issued or approved under sections 301(b)(2) (C) and (D), 304(b)(2) and 307(a)(2) and such effluent standard or limitation is more stringent than any effluent limitation in the permit or controls a pollutant not limited in the permit, the permit shall be promptly modified or, alternatively, revoked and reissued in accordance with such effluent standard or limitation and any other requirements of CWA then applicable.

[*Comment:* The following language is an acceptable permit condition for the purposes of this section:

"This permit shall be modified, or alternatively, revoked and reissued, to comply with any applicable standard or limitation promulgated or approved under sections 301(b)(2) (C) and (D), 304(b)(2), and 307(a)(2) of the Clean Water Act, if the effluent standard or limitation so issued or approved:

(i) Contains different conditions or is otherwise more stringent than any effluent limitation in the permit; or

(ii) Controls any pollutant not limited in the permit.

The permit as modified or reissued under this paragraph shall also contain any other requirements of the Clean Water Act then applicable."]

(B) The Director shall promptly modify, or alternatively revoke and reissue, the permit to incorporate an applicable effluent standard or limitation under sections 301(b)(2) (C) and (D), 304(b)(2), and 307(a)(2) is issued or approved if such effluent standard or limitation is more stringent than any effluent limitation in the permit, or controls a pollutant not limited in the permit.

[*Comment:* The requirements of this section are intended to assure compliance with the 1984 statutory deadline for the achievement of best available technology economically achievable for pollutants now listed under section 307(a)(1) of CWA. When a permit is modified or revoked and reissued pursuant to subparagraph (B), additional limitations may be included in the permit to assure achievement of applicable statutory requirements (e.g., best conventional pollutant control technology for "conventional" pollutants and best available technology economically achievable for "non-conventional" pollutants) by appropriate statutory deadlines.]

(ii) If applicable standards or limitations have been issued, the permit shall include those standards or limitations.

(2) Any permit issued after the applicable permit expiration date listed in Appendix A, the permit shall include effluent limitations and a compliance schedule to meet the requirements of sections 301(b)(2)(A), (C), (D), (E) and (F) of CWA, whether or not applicable effluent limitations guidelines have been promulgated or approved. Such permits need not incorporate the clause required by subparagraph (A) of this paragraph.

(c) Standards of performance for new sources under section 306 of CWA, including any promulgated interim final effluent limitations and standards.

(d) If the permit is for a discharge from a publicly owned treatment works, a condition requiring the permittee to:

(1) Provide adequate notice to the Director of the following:

(i) Any new introduction of pollutants into that POTW from an indirect discharger which would be subject to sections 301 or 306 of CWA if it were directly discharging those pollutants; and

(ii) Any substantial change in the volume or character of pollutants being introduced into that POTW by a source introducing pollutants into the POTW at the time of issuance of the permit.

[*Comment:* For purposes of this paragraph, adequate notice shall include information on (1) the quality and quantity of effluent to be introduced into such POTW, and (2) any anticipated impact of such change in the quantity or quality of effluent to be discharged from such POTW.]

(2) Identify, in terms of character and volume of pollutants, any significant indirect dischargers into the POTW subject to pretreatment standards under

section 307(b) of CWA and 40 CFR Part 403.

(3) Establish a local program when required by and in accordance with 40 CFR Part 403 to assure compliance with pretreatment standards to the extent applicable under section 307(b). The local program shall be incorporated into the permit as described in 40 CFR Part 403.

(4) Require any indirect discharger to such POTW to comply with the reporting requirements of sections 204(b), 307, and 308 of CWA, including any requirements established under 40 CFR Part 403.

(e) Any conditions imposed in grants made by the Administrator to POTWs under sections 201 and 204 of CWA which are reasonably necessary for the achievement of effluent limitations under section 301 of CWA.

[*Comment:* Among other things, this paragraph contemplates permit conditions embodying measures to protect the POTW against overloading and schedules of compliance which are consistent with, and determined from, construction grant award dates.]

(f) Any requirements in addition to or more stringent than promulgated effluent limitations guidelines or standards under sections 301, 304, 306, 307, 318 and 405 where necessary to:

(1) Achieve water quality standards established under section 303 of CWA;

(2) Attain or maintain a specified water quality through water quality related effluent limits established under section 302 of CWA;

(3) Conform to the conditions of a State certification under section 401 of CWA where EPA is the permit issuing authority;

(4) Conform to applicable water quality requirements under section 402(a)(2) of CWA when the discharge affects a State other than the certifying State;

(5) Incorporate any more stringent limitations, treatment standards or schedules of compliance requirements established under Federal or State law or regulations in accordance with section 301 (b)(1)(C) of CWA;

(6) Ensure consistency with the requirements of a Water Quality management plan approved by EPA under section 208(b) of CWA;

(7) Incorporate section 403(c) criteria under Part 125, Subpart M for ocean discharges;

(8) Incorporate alternative effluent limitations or standards where warranted by "fundamentally different factors," under 40 CFR Part 125 Subpart D;

(9) Incorporate other requirements, or conditions, or limitations into a new source permit under the National Environmental Policy Act, 42 U.S.C. 4321 *et seq.* and section 511 of CWA, where EPA is the permit issuing authority.

(10) Establish on a case-by-case basis technology-based limitations controlling a pollutant not included in promulgated effluent limitations guidelines or standards in accordance with 40 CFR 125.2.

[*Comment:* Subparagraph (10) applies to all dischargers including new sources and new dischargers, even where covered by the protection period in § 122.81.]

(g) Best management practices to control or abate the discharge of pollutants where:

(1) Authorized under section 304(e) of the CWA for the control of toxic and hazardous pollutants from ancillary industrial activities;

(2) Numeric effluent limitations are infeasible, or

(3) The practices are reasonably necessary to achieve effluent limitations and standards or to carry out the purposes and intents of CWA.

[*Comment:* Examples of best management practices which may be imposed under subparagraph (g)(2) include: (a) proper operator qualifications of treatment facility personnel (see Decision of the General Counsel No. 19), and (b) sludge-handling requirements (see Decision of General Counsel No. 33). Examples of best management practices which may be imposed under subparagraph (g)(3) include: (a) coal mining operation's diversion of water from an active coal mining area to prevent contact between water and iron pyrites which could react to form sulfuric acid and wastewaters with low pH values; (b) the construction of sheds over material storage piles to prevent rainfall from leaching materials from these piles and creating a source of pollution; (c) ditching and diversion of rainfall runoff for treatment prior to discharge; and (d) the use of solid, absorbent materials for cleaning up leaks and drips as opposed to washing these materials down a floor drain creating additional sources of pollution. Although these best management practices under subsections (2) and (3) would be required under the authority of *NRDC* v. *Costle*, (Runoff Point Sources) 568 F.2d 1369 (D.C. Cir. 1977) they are similar to those in subparagraph (g)(1) and Subpart K of 40 CFR Part 125 imposed for toxic and hazardous materials under section 304(e).]

(h) Requirements under section 405 of CWA governing the disposal of sewage sludge from publicly owned treatment works, in accordance with any applicable regulations.

(i) Where a permit is renewed or reissued, interim limitations, standards or conditions which are at least as stringent as the final limitations, standards or conditions in the previous permit (unless the circumstances on which the previous permit was based have materially and substantially changed since the time the permit was issued and would constitute cause for permit modification or revocation and reissuance under §§ 122.9 or 122.73.)

Where effluent limitations were imposed under section 402(a)(1) of CWA in a previously issued permit and these limitations are more stringent than the subsequently promulgated effluent guidelines, this paragraph shall apply unless:

(1) The discharger has installed the treatment facilities required to meet the effluent limitations in the previous permit and has properly operated and maintained the facilities but has nevertheless been unable to achieve the previous effluent limitations. In this case the limitations in the reissued permit may reflect the level of pollutant control actually achieved (but shall not be less stringent than required by the subsequently promulgated effluent guidelines);

(2) In the case of an approved State, State law prohibits permit conditions more stringent than an applicable effluent guideline; or

(3) The subsequently promulgated effluent guidelines are based on best conventional pollutant control technology (section 301(b)(2)(E) of CWA).

(j) In the case of a permit issued to a facility that may operate at certain times as a means of transportation over water, a general condition that the discharge shall comply with any applicable regulations promulgated by the Secretary of the Department in which the Coast Guard is operating, establishing specifications for safe transportation, handling, carriage, and storage of pollutants.

(k) Any conditions that the Secretary of the Army considers necessary to ensure that navigation and anchorage will not be substantially impaired.

§ 122.70 Calculation and specification of effluent limitations and standards.

(a)(1) All NPDES permits shall impose final, and where necessary, interim effluent limitations, standards and prohibitions under §§ 122.11, 122.66 and 122.69 for each outfall or discharge point of the permitted facility, except as otherwise provided under § 122.69(g)(2) and paragraph (i) of this section.

(2) Except in the case of POTWs, permit limitations, standards or prohibitions shall be calculated based on the actual production and not the designed production capacity of the

facility where the promulgated effluent guideline limitations and standards are based on production.

[*Comment:* Where design capacity is not representative of actual production, permit limitations will be calculated to reflect a reasonable measure of actual production, such as the high month during the previous year, or the monthly average for the highest year of the previous five years, for facilities where such data is available. For new sources, or new discharges, actual production generally will be projected production based on market data, and permit limitations may require modification once actual production figures are available.]

(3) In the case of POTWs, permit limitations, standards or prohibitions shall be calculated based on design flow.

(b) All interim and final permit effluent limitations, standards or prohibitions established under §§ 122.11, 122.66 and 122.69 for a metal shall be expressed in terms of the total metal (i.e., the sum of the dissolved and suspended fractions of the metal) unless:

(1) The promulgated effluent limitation and standard under CWA specifies the limitation for the metal in the dissolved or valent form; or

(2) In establishing permit limitations on a case-by-case basis under § 122.69(1), it is necessary to express the limitation on the metal in the dissolved or valent form in order to carry out the provisions of CWA.

(c) For continuous discharges all interim and final permit effluent limitations, standards and prohibitions established under § 122.11, § 122.66 and § 122.69, including those necessary to achieve water quality standards, shall be stated as:

(1) Maximum daily and average monthly discharge limitations for all dischargers other than publicly owned treatment works; and

(2) Average weekly and average monthly discharge limitations for POTWs.

A "continuous discharge" means a discharge which occurs without interruption, except for infrequent shutdowns for maintenance, process changes or other similar activities throughout the operating hours of the facility.

The "Maximum daily discharge" is the total mass of a pollutant discharged during the calendar day or, in the case of a pollutant limited in terms other than mass pursuant to paragraph (d), the average concentration or other measurement of the pollutant specified during the calendar day or any 24-hour period that reasonably represents the calendar day for the purposes of sampling. The maximum daily discharge limitation may not be violated during any calendar day.

The "average monthly discharge limitation" is the total mass, and concentration in the case of POTWs, of all daily discharges sampled and/or measured during a calendar month on which daily discharges are sampled and measured, divided by the number of daily discharges sampled and/or measured during such month. The average monthly discharge limitation may not be violated during any calendar month.

The "average weekly discharge limitation" is the total mass and concentration of all daily POTW discharges during any calendar week on which daily discharges are sampled and/or measured, divided by the number of daily discharges sampled and/or measured during such calendar week. The average weekly discharge limitation may not be violated during any calendar week.

[*Comment:* Calculations for all such limitations which require averaging of measurements or of daily discharges, shall utilize an arithmetic mean average, unless otherwise specified or approved by the Director.]

(d) Paragraph (c) is not applicable:

(1) For pH, temperature, radiation or other pollutants which cannot be appropriately expressed by mass; or

(2) Where applicable promulgated effluent guideline limitations, standards or prohibitions are expressed in other terms than mass, e.g., as concentration levels.

(e) Except as provided in paragraph (g), effluent limitations imposed in permits shall not be adjusted for pollutants in the intake water.

(f)(1) Upon request of the discharger, effluent limitations or standards imposed in a permit will be calculated on a "net" basis, i.e., adjusted to reflect credit for pollutants in the discharger's intake water, if the discharger demonstrates that its intake water is drawn from the same body of water into which the discharge is made and if:

(i)(A) The applicable effluent limitations and standards contained in Subchapter N of this Chapter specifically provide that they shall be applied on a net basis; or

(B) The discharger demonstrates that pollutants present in the intake water will not be entirely removed by the treatment systems operated by the discharger; and

(ii) The permit contains conditions requiring the permittee to conduct additional monitoring (i.e., for flow and concentration of pollutants) as necessary to determined continued eligibility for and compliance with any such adjustments.

The discharger shall notify the Director if this monitoring indicates that eligibility for an adjustment under this section has been altered or no longer exists. In such case, the permit shall be modified or revoked and reissued under §§ 122.9 or 122.73.

(2) Permit effluent limitations or standards adjusted under this paragraph shall be calculated on the basis of the amount of pollutants present any treatment steps have been performed on the intake water by or for the discharger. Adjustments under this paragraph shall be given only to the extent that pollutants in the intake water which are limited in the permit are not removed by the treatment technology employed by the discharger. In addition, effluent limitations or standards shall not be adjusted when the pollutants in the intake water very physically, chemically or biologically from the pollutants limited by the permit. Nor shall effluent limitations or standards by adjusted when the discharger significantly increases concentrations of pollutants in the intake water, even though the total amount of pollutants might remain the same.

(h) Discharges which are not continuous, as defined in paragraph (c), shall be particularly described and limited, considering the following factors, as appropriate:

(1) Frequency (e.g., a batch discharge shall not occur more than once every 3 weeks);

(2) Total mass (e.g., not to exceed 100 kilograms of zinc and 200 kilograms of chromium per batch discharge);

(3) Maximum rate of discharge of pollutants during the discharge (e.g., not to exceed 2 kilograms of zinc per minute); and

(4) Prohibition or limitation of specified pollutants by mass, concentration, or other appropriate measure (e.g., shall not contain at any time more than 0.1 mg/l zinc or more than 250 grams (¼ kilogram) of zinc in any discharge).

(i) Where permit effluent limitations or standards imposed at the point of discharge are impractical or infeasible, effluent limitations or standards of discharges of pollutants may be imposed on internal waste streams prior to mixing with other streams or cooling water streams. In such instances, the monitoring required by Subpart C shall also be applied to the internal waste streams.

[*Comment:* Limits on internal waste streams will only be imposed in exceptional circumstances, such as where the final discharge point is inaccessible (e.g., under 10 meters of water), where the wastes at the point of discharge are so diluted as to make monitoring impracticable, or where the interferences among pollutants at the point of discharge would make detection and/or analysis impracticable.]

§ 122.71 NPDES requirements for recording and reporting of monitoring reports.

(a) To assure compliance with permit terms and conditions, all NPDES permittees shall monitor as specified in the permit:

(1) The amount, concentration or other measurement specified in § 122.70 for each pollutant specified in the permit;

(2) The volume of effluent discharged from each point source; and

(3) According to test procedures for the analysis of pollutants meeting the requirements of paragraph (b);

(4) As otherwise specifically required in the permit, e.g., as required under § 122.70(g)(2).

(b)(1) Test procedures identified in 40 CFR Part 136 shall be utilized for pollutants or parameters listed in that Part, unless and alternative test procedure has been approved under the Part.

(2) Where no test procedure under 40 CFR Part 136 has been approved, the Director shall specifiy a test method in the permit.

(3) Notwithstanding paragraph (1), the Director may specify in a permit the test procedure used in developing the date on which an effluent limitations guideline was based, or specified by the standards and guidelines.

(4) Where a method approved under 40 CFR Part 136 for any pollutant or parameter was used in developing the applicable standards and limitations or is specified by the standards and limitations, the same method shall be specified in the permit.

(c) The sampling frequency and other monitoring requirements specified by the director under paragraph (b) shall, to the extent applicable, be consistent with monitoring requirements specified in a standard or effluent guideline on which the effluent limitations in the permit are based.

(d) If the permittee believes that the monitoring requirements specified by the director under paragraph (b) in any draft permit under § 124.31, are not sufficient to yield data representative of the volume of effluent flow and the quantity of pollutants discharged, it should request that additional monitoring requirements sufficient to yield such data be included in the final permit. Compliance with effluent limitations contained in the permit will be determined in accordance with the monitoring requirements specified in the permit which, when finally effective, are deemed to yield data representative of the volume of effluent flow and the quantity of pollutants discharged.

(e) The CWA provides that any person who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this section shall, upon conviction, be punished by a fine of not more than $10,000 per violation, or by imprisonment for not more than 6 months per violation, or by both.

(f) The CWA provides that any person who knowingly makes any false statement, representation, or certification in any record or other document required to be maintained under this section or § 122.14 shall, upon conviction, be punished by a fine of not more than $10,000 per violation, or by imprisonment for not more than six months per violation, or by both.

(g) If the permittee monitors any pollutant more frequently than required by the permit, using approved analytical methods, the results of this monitoring shall be reported and included in the calculation and reporting of the data submitted in the DMR. For purposes of this paragraph, "approved analytical methods" are those test procedures for the analysis of pollutants which conform to 40 CFR 136 or as specified in the permit.

(h) The CWA provides that any person who knowingly makes any false statement, representation, or certification in the monitoring report or notice of compliance shall, upon conviction, be punished by a fine of not more than $10,000 per violation, or by imprisonment for not more than six months per violation, or by both.

§ 122.72 NPDES noncompliance reporting requirements.

(a) On the last working day of February, May, August, and November, the State director shall submit to the Regional Administrator information concerning noncompliance with NPDES permit requirements by major dischargers in the State in accordance with the reporting schedule contained in paragraph (g). The Regional Administrator shall submit such information and shall also prepare and submit information for EPA-issued permits to EPA Headquarters in accordance with paragraph (g).

(b) *Quarterly Reports.* The reports required by paragraph (a) shall include the following information:

(1) *Failure to complete construction elements.* Noncompliance shall be reported:

(i) When the permittee has failed to complete by the date specified in the permit, an element of the compliance schedule (e.g., award of contract, preliminary plans (e.g., begin construction or attain operational level)); and

(ii) The permittee has not returned to compliance by accomplishing the requirements of the permit within 30 days from the date a report is due under § 122.12(a)(2).

(2) *Failure to complete or provide compliance schedule reports.* Noncompliance shall be reported in the following circumstances:

(i) When the permittee fails to complete or provide a report required in the permit compliance schedule or under § 122.14 (e.g., progress reports or notification of compliance or noncompliance); and

(ii) The permittee has not returned to compliance by submitting the report within 30 day from the date it is due under § 122.12(a)(2).

(3) *Noncompliance with applicable standards and limitations.* Noncompliance shall be reported:

(i) When the permittee has violated an applicable standard or limitation and has not returned to compliance with the NPDES permit requirements within 45 days from the date that the DMR or notification of noncompliance under § 122.11(h) was due;

(iii) When a pattern of noncompliance with applicable standards or limitations as determined by the Director exists for any major discharger over a period of 12 months prior to the end of the current reporting period. This pattern of noncompliance is based on violation of monthly averages and excludes parameters where there is continuous monitoring. A pattern of noncompliance shall be reported whenever there is:

(A) Any violation of the same permit or limitation or standard in two consecutive quarters; and

(B) Any violation of one or more permit limitations or standards in each of four consecutive quarters; or

(iii) When, as determined by the Director, a significant discharge of a pollutant occurs, such as a discharge of a toxic or hazardous substance.

(4) *Failure to report effluent data.* Noncompliance shall be reported where the permittee has failed to provide a DMR within 30 days of the date it is due or where the permittee has exceeded

effluent limitations and has failed to report this noncompliance.

(5) *Deficient reports.* Noncompliance shall be reported where the required reports provided by the permittee are so deficient as to cause misunderstanding by the permit issuing authority and thus impede the review of the status of compliance.

(6) *Modifications to schedules of compliance under § 122.12(a)(3).* Noncompliance resulting from or constituting the basis for a modification under § 122.12(a)(3) shall be reported.

[*Comment:* Noncompliance reported under this paragraph shall be reported in successive reports until the noncompliance is resolved. The resolution of noncompliance shall be reported, and when the noncompliance is reported as resolved, it will not appear in subsequent reports.]

(c) The narrative information required under paragraph (b) shall:

(1) Include the information required under § 122.15(a);

(2) Provide separate lists for non-POTWs, POTWs and Federal permittees;

(3) Combine information concerning schedule and effluent noncompliance in a single entry for each permittee; and

(4) Alphabetize all narrative listings by permittee name. Where two or more permittees have the same name, the lowest permit number shall govern the order of entry, i.e., the lowest number shall be entered first.

(d) Statistical information shall be reported quarterly on all other instances of noncompliance with permit requirements by major dischargers not set forth in paragraph (b).

(e) *Annual reports.* For minor dischargers whose compliance has been reviewed by the permitting authority, statistical information on the types of noncompliance listed under paragraph (b) shall be reported annually. In additional, a separate list of minor dischargers which are one or more years behind in construction phases of the compliance schedule shall be submitted annually in alphabetical order by name and permit number.

(f) *Reporting schedules.* (1) The schedule for reporting of noncompliance by major dischargers under paragraphs (b), (c), and (d) shall be as follows:

Quarters covered by reports on noncompliance by major dischargers:	Dates for completion of reports
January	May 31*.
February	
March	
April	August 31*.
May	
June	
July	November 30*.
August	
September	
October	February 28*.
November	
December	

* Report made available to the public on this date.

(2) The annual reporting period for noncompliance by minor dischargers under paragraph (e) shall end at the end of the Federal fiscal year (currently September 30), with reports completed and available to the public no more than 60 days later.

(g) All reports prepared under this section shall be made available to the public for inspection and copying.

[*Comment:* The distinction between "major and minor" dischargers is established in EPA's annual operating guidance for the EPA Regional offices and the States.]

§ 122.73 Modifications or revocation and reissuance of NPDES permits.

In addition to the causes set forth in § 122.9(e), NPDES permit may be modified, or revoked and reissued for the following causes:

(a) Where water quality standards or EPA promulgated effluent limitations guidelines (including interim final effluent guidelines) are revised, withdrawn or modified, *but only when:*

(1) The permit term or condition requested to be modified or revoked was based on a promulgated effluent limitation guideline or a EPA approved or promulgated water quality standard;

(2)(i) EPA has revised, withdrawn or modified that portion of the effluent limitation guideline on which the permit term or condition was based; or

(ii) EPA has approved a State action with regard to a water quality standard on which the permit term or condition was based; and

(3) A request for modification or revocation and reissuance is filed in accordance with § 124.5 (or applicable State procedures meeting the requirements of § 124.5) within ninety (90) days after Federal Register notice of:

(i) Revision, withdrawal or modification of that portion of the effluent limitation guideline; or

(ii) EPA approval of a State action regarding a water quality standard.

(b) Judicial remand of EPA promulgated effluent limitations guidelines, if the remand concerns that portion of the guidelines on which the permit term or condition was based and the request is filed within 90 days of the judicial remand;

(c) Where any modification or revocation and reissuance of permits is specifically authorized by CWA, e.g., sections 301(c), (g), (h), (i) or (k).

(d) As necessary under §§ 122.66(b), 122.69(b) and 122.12(a)(3)(i) and (ii).

(e) Failure of an approved State to notify another State whose waters may be affected by the discharge from the approved State, as required by section 402(b)(3) of CWA.

(f) The following additional minor permit modifications for NPDES permits shall not require public notice and opportunity for hearing under § 124.5 or § 124.7 unless they would render the permit less stringent, or unless contested by the permittee:

(1) A change in the construction schedule for a discharger which is a new source. No such change shall affect a dischargers obligation to have all pollution control equipment installed and in operation prior to discharge under § 122.81; and

(2) Deletion of a point source outfall, where the discharge from that outfall is terminated and does not result in discharge of pollutants from other outfalls except in accordance with permit limits.

§ 122.74 Termination of NPDES permits.

In addition to the causes for termination set forth in § 122.10, NPDES permits may be terminated where there is a change in any condition that requires either a temporary or a permanent reduction or elimination of any discharge controlled by the permit (e.g., plant closure, termination of discharge by connection to a POTW, the promulgation of any applicable effluent standard or prohibition under section 307 of the Act, any change in State law that requires the reduction or elimination of the discharge, etc.

§ 122.75 Disposal of pollutants into wells, into publicly owned treatment works or by land applications.

(a) Where part of a discharger's process waste water is not being discharged into waters of the United States or contiguous zone because it is disposed into a well, into a POTW, or by land application thereby reducing the flow or level of pollutants being discharged into waters of the United States, applicable effluent limitations and standards for the discharge in an NPDES permit shall be adjusted to reflect the reduced raw waste resulting from such disposal. Effluent limitations and standards in the permit shall be calculated by one of the following methods:

(1) If none of the waste from a particular process is discharged into waters of the United States, and effluent limitations guidelines provide separate allocation for wastes from that process, all allocations for the process shall be

eliminated from calculation of permit effluent limitations or standards;

(2) In all cases other than those described in paragraph (1), effluent limitations shall be adjusted by multiplying the effluent limitation derived by applying effluent limitation guidelines to the total waste stream by the amount of wastewater flow to be treated and discharged into waters of the United States, and dividing the result by the total wastewater flow. Effluent limitations and standards so calculated may be further adjusted under Part 125, Subpart D to make them more stringent if discharges to wells, publicly owned treatment works, or by land application change the character or treatability of the pollutants being discharged to receiving waters.

[*Comment:* This method may be algebraically expressed as:

$P = E \times N / T$

where P is the permit effluent limitation, E is the limitation derived by applying effluent guidelines to the total waste stream, N is the wastewater flow to be treated and discharged to waters of the United States, and T is the total wastewater flow.]

(b) Paragraph (a) shall not apply where promulgated effluent limitations guidelines:

(1) Control concentrations of pollutants discharged but not mass; or

(2) Specify a different specific technique for adjusting effluent limitations to account for well injection.

(c) Paragraph (a) does not alter a discharger's obligation to meet any more stringent requirements established under §§ 122.11, 122.68 and 122.69.

§ 122.76 Concentrated animal feeding operations.

(a) Concentrated animal feeding operations are point sources subject to the NPDES permit program.

(b) *Definitions.* (1) "Animal feeding operation" means a lot or facility (other than an aquatic animal production facility) where the following conditions are met:

(i) Animals (other than aquatic animals) have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period, and

(ii) Crops, vegetation, forage growth or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.

Two or more animal feeding operations under common ownership are considered, for the purposes of these regulations, to be a single animal feeding operation if they adjoin each other or if they use a common area or system for the disposal of wastes.

(2) "Concentrated animal feeding operation" means an animal feeding operation which meets the criteria set forth in (b)(2) (i), (ii) or (iii) below:

(i) More than the numbers of animals specified in any of the following categories are confined:

(A) 1,000 slaughter and feeder cattle,

(B) 700 mature dairy cattle (whether milked or dry cows),

(C) 2,500 swine each weighing over 25 kilograms (approximately 55 pounds),

(D) 500 horses,

(E) 10,000 sheep or lambs,

(F) 55,000 turkeys,

(G) 100,000 laying hens or broilers (if the facility has a continuous overflow watering),

(H) 30,000 laying hens or broilers (if the facility has a liquid manure system),

(I) 5,000 ducks, or

(J) 1,000 animal units; or

(ii) More than the following numbers and types of animals are confined:

(A) 300 slaughter or feeder cattle,

(B) 200 mature dairy cattle (whether milked or dry cows),

(C) 750 swine each weighing over 25 kilograms (approximately 55 pounds),

(D) 150 horses,

(E) 3,000 sheep or lambs,

(F) 16,500 turkeys,

(G) 30,000 laying hens or broilers (if the facility has continuous overflow watering),

(H) 9,000 laying hens or broilers (if the facility has a liquid manure handling system),

(I) 1,500 ducks, or

(J) 300 animal units;

and either one of the following conditions are met: pollutants are discharged into waters of the United States through a man-made ditch, flushing system or other similar man-made device; or pollutants are discharged directly into navigable waters which originate outside of and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation.

Provided, however, that no animal feeding operation is a concentrated animal feeding operation as defined above if such animal feeding operation discharges only in the event of a 25 year, 24 hour storm event.

(iii) The Director determines that the operation is a significant contributor of pollution to waters of the United States, in accordance with paragraph (c).

(3) The term "animal unit" means a unit of measurement for any animal feeding operation calculated by adding the following numbers: the number of slaughter and feeder cattle multiplied by 1.0, plus the number of mature dairy cattle multiplied by 1.4, plus the number of swine weighing over 25 kilograms (approximately 55 pounds) multiplied by 0.4, plus the number of sheep multiplied by 0.1, plus the number of horses multiplied by 2.0.

(4) The term "man-made" means constructed by man and used for the purpose of transporting wastes.

(c) *Case-by-case designation of concentrated animal feeding operations.* (1) Notwithstanding any other provision of this section, any animal feeding operation may be designated as a concentrated animal feeding operation where it is determined to be a significant contributor of pollution to the waters of the United States. In making this designation the Director shall consider the following factors:

(i) The size of the animal feeding operation and the amount of wastes reaching waters of the United States;

(ii) The location of the animal feeding operation relative to waters of the United States;

(iii) The means of conveyance of animal wastes and process waste waters into waters of the United States;

(iv) The slope, vegetation, rainfall, and other factors affecting the likelihood or frequency of discharge of animal wastes and process waste waters into waters of the United States; and

(v) Other such factors relative to the significance of the pollution problem sought to be regulated.

(2) No animal feeding operation with less than the numbers of animals set forth in subparagraphs (b)(2) (i) and (ii) above shall be designated as a concentrated animal feeding operation unless:

(i) Pollutants are discharged into waters of the United States through a man-made ditch, flushing system or other similar man-made device; or

(ii) Pollutants are discharged directly into waters of the United States which originate outside of the facility and passover, across, through the facility or otherwise come into direct contact with the animals confined in the operation.

(3) In no case shall a permit application be required from a concentrated animal feeding operation designated under this paragraph until there has been an onsite inspection of the operation and a determination that the operation should and could be regulated under the permit program.

§ 122.77 Concentrated aquatic animal production facilities.

(a) Concentrated aquatic animal production facilities, as defined in this

section, are point sources subject to the NPDES permit program.

(b) *Definitions.* (1) "Concentrated aquatic animal production facility" means a hatchery, fish farm, or other facility which contains, grows or holds:

(i) Cold water fish species or other cold water aquatic animals in ponds, raceways or other similar structures which discharge at least 30 days per year but does not include:

(A) Facilities which produce less than 9,090 harvest weight kilograms (approximately 20,000 pounds) of aquatic animals per year; and

(B) Facilities which feed less than 2,272 kilograms (approximately 5,000 pounds) of food during the calendar month of maximum feeding.

(ii) Warm water fish species or other warm water aquatic animals in ponds, raceways or other similar structures which discharge at least 30 days per year, but does not include:

(A) Closed ponds which discharge only during periods of excess runoff; or

(B) Facilities which produce less than 45,454 harvest weight kilograms (approximately 100,000 pounds) of aquatic animals per year.

(2) "Cold water aquatic animals" include, but are not limited to, the *Salmonidae* family of fish, e.g., trout and salmon.

(3) "Warm water aquatic animals" include, but are not limited to the *Ameiuride, Centrarchidae* and *Cyprinidae* families of fish, e.g., respectively, catfish, sunfish and minnows.

(c) *Case-by-case designation of concentrated aquatic animal production facilities.* Any warm or cold water aquatic animal production facility not otherwise falling within the definitions provided in paragraph (b) may be designated as a concentrated aquatic animal production facility where the facility is determined to be a significant contributor of pollution to waters of the United States. In making this designation the Director shall consider the following factors:

(1) The location and quality of the receiving waters of the United States;

(2) The holding, feeding and production capacities of the facility;.

(3) The quantity and nature of the pollutants reaching waters of the United States; and

(4) Other such factors relating to the significance of the pollution problem sought to be regulated.

In no case shall a permit application be required from a concentrated aquatic animal production facility designated under this subparagraph until there has been an on-site inspection of the facility and a determination that the facility should and could be regulated under the permit program.

§ 122.78 Aquaculture projects.

(a) Discharges into aquaculture projects, as defined in this section, are subject to the NPDES permit program through section 318 of CWA, and in accordance with 40 CFR Part 125, Subpart B.

(b) *Definitions.* (1) "Aquaculture project" means a defined managed water area which uses discharges of pollutants into that designated area for the maintenance or production of harvestable freshwater, estuarine, or marine plants or animals.

(2) "Designated project area" means the portions of the waters of the United States within which the applicant for a permit plans to confine the cultivated species, using a method or plan or operation (including, but not limited to, physical confinement) which, on the basis of reliable scientific evidence, is expected to ensure that specific individual organisms comprising an aquaculture crop will enjoy increased growth attributable to the discharge of pollutants permitted under this part, and be harvested within a defined geographic area.

§ 122.79 Separate storm sewers.

(a) Separate storm sewers, as defined in this section, are point sources subject to the NPDES permit program. Separate storm sewers may be covered either under individual NPDES permits or under the general permit program (see § 122.82).

(b) *Definition.* "Separate storm sewer" means a conveyance or system of conveyances (including but not limited to pipes, conduits, ditches, and channels) primarily used for collecting and conveying storm water runoff and either:

(1) Located in an urbanized area as designed by the Bureau of Census according to the criteria in 39 FR 15202 (May 1, 1974); or

(2) Not located in an urbanized area but designated as a significant contributor of pollution under paragraph (c).

"Separate storm sewer" does not include any conveyance which discharges process wastewater or storm water runoff contaminated by contact with wastes, raw materials, or pollutant-contaminated soil, from lands or facilities used for industrial or commercial activities, into waters of the United States or into separate storm sewers. Such discharges are subject to the general provisions of this Part.

[Comment: Whether or not a system of conveyances is or is not a separate storm sewer for purposes of this Part shall have no bearing on whether or not the system is eligible for funding under Title II of CWA, see 40 CFR 35.925-21.]

(c) *Case-by-case designation of separate storm sewers.* The Director may designate a storm sewer not located in an urbanized area as a separate storm sewer. This designation may be made to the extent allowed or required by EPA promulgated effluent guidelines for point sources in the separate storm sewer category; or when:

(1) A Water Quality Management plan under section 208 of CWA, which contains requirements applicable to such point sources is approved; or

(2) A storm sewer is determined to be a significant contributor of pollution to the waters of the United States. In making this determination the following factors shall be considered:

(i) The location of the storm sewer with respect to waters of the United States;

(ii) The size of the storm sewer;

(iii) The quantity and nature of the pollutants reaching waters of the United States; and

(iv) Other such factors relating to the significance of the pollution problems sought to be regulated.

[*Comment:* An NPDES permit for discharges into waters of the United States from a separate storm sewer covers all conveyances which are a part of that separate storm sewer system, even though there may be several owners-operators of such conveyances. However, discharges into separate storm sewers from point sources which are not part of the separate storm sewer systems may also require a permit.]

§ 122.80 Silvicultural activities.

(a) Silvicultural point sources, as defined in this section, are point sources subject to the NPDES permit program.

(b) *Definitions.* (1) "Silvicultural point source" means any discernible, confined and discrete conveyance related to rock crushing, gravel washing, log sorting or log storage facilities which are operated in connection with silvicultural activities and from which pollutants are discharged into waters of the United States.

[*Comment:* The term does not include non-point source silvicultural activities such as nursery operations, site preparation, reforestation and subsequent cultural treatment, thinning, prescribed burning, pest and fire control, harvesting operations, surface drainage, and road construction and maintenance from which there is runoff during precipitation events. However, some of these activities (such as stream crossing for roads) may involve point source

discharges of dredged or fill material which may require a CWA section 404 permit (see 33 CFR 209.120).]

(2) "Rock crushing and gravel washing facilities" means facilities which process crushed and broken stone, gravel and riprap (see 40 CFR Part 436, Subpart B, and the effluent limitations guidelines pursuant thereto).

(3) "Log sorting and log storage facilities" means facilities whose discharges result from the holding of unprocessed wood, i.e. logs or roundwood with bark or after removal of bark in self-contained bodies of water (mill ponds or log ponds) or stored on land where water is applied intentionally on the logs (wet decking). (See 40 CFR Part 429, Subpart J, and the effluent limitations guidelines pursuant thereto.)

§ 122.81 New sources and new dischargers.

(a) *Definitions.* (1) "New source" and "new discharger" are defined in § 122.3(d).

(2) "Source" means any building, structure, facility or installation from which there is or may be a discharge of pollutants;

(3) "Existing source" means any source which is not a new source or a new discharger;

(4) "Site" means the land or water area upon which a source and its water pollution control facilities are physically located, including but not limited to adjacent land used for utility systems, repair, storage, shipping or processing areas, or other areas incident to the industrial, manufacturing or water pollution treatment processes;

(5) "Facilities or equipment" means buildings, structures, process or production equipment or machinery which form a permanent part of the new source and which will be used in its operation, provided that such facilities or equipment are of such value as to represent a substantial commitment to construct. It does not include facilities or equipment used in connection with feasibility, engineering and design studies regarding the source or water pollution treatment for the source.

(b) *Criteria and standards for new source determination.* (1) The following construction activities result in a new source as defined in § 122.3(d):

(i) Construction of a source on a site where another source(s) is not located, or

(ii) construction of a source on a site where another source is located, provided that the process or production equipment which causes the discharge of pollutants from the other source is totally replaced by this construction or the construction results in a new or additional discharge.

[*Comment:* The fact that a source is constructed on a site so that it shares or uses common land or water areas of another source for utility systems, repair, storage, or shipping does not prevent that source from being considered a new source.]

(2) The modification of an existing source by changing existing process or production equipment, replacing existing process or production equipment (except as provided in paragraph (b)(1)) or by the addition of such equipment on the site of the existing source which results in a change in the nature or quantity of pollutants discharged is not a new source under this section. Modifications of this nature are subject to the provisions of § 122.9(e)(1).

(3) Construction of a new source as defined under § 122.3(d) has commenced if the owner or operator has:

(i) Begun, or caused to begin as part of a continuous on-site construction program:

(A) Any placement, assembly, or installation of facilities or equipment;

(B) Significant site preparation work including clearing, excavation or removal of existing buildings, structures or facilities which is necessary for the placement, assembly, or installation of new source facilities or equipment; or

(ii) Entered a binding contractual obligation for the purchase of facilities or equipment which are intended to be used in its operation within a reasonable time. Options to purchase or contracts which can be terminated or modified without substantial loss, and contracts for feasibility, engineering and design studies do not constitute a contractual obligation under this paragraph.

(c) *Requirement of an Environmental Impact Statement.* (1) The issuance of an NPDES permit to a new source:

(i) By EPA may be a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 33 U.S.C. 4321 *et seq.* and is subject to the environmental review provisions of NEPA as set out in 40 CFR 6, Subpart I. EPA will determine whether an Environmental Impact Statement (EIS) is required under § 124.64(d) and 40 CFR 6, Subpart I;

(ii) By an NPDES approved State is not a Federal action and therefore does not require EPA to conduct an environmental review.

(2) The EIS shall include a recommendation on whether the permit is to be issued or denied.

(i) If the recommendation is to deny the permit, the final EIS shall contain the reasons for the recommendation and list those measures, if any, which the applicant could take to cause the recommendation to be changed;

(ii) If the recommendation is to issue the permit, the final EIS shall recommend the actions which the permittee should take to prevent or minimize any adverse environmental impacts;

(3) The Regional Administrator shall issue or deny the new source NPDES permit following a complete evaluation of any significant beneficial and adverse environmental impacts and a review of the recommendations contained in the EIS.

(4)(i) No on-site construction of a new source for which an EIS is required shall commence before issuance of a final permit incorporating appropriate EIS-related requirements, or before execution by the applicant of a legally binding written agreement which requires compliance with all such requirements, unless such construction is determined by the Regional Administrator not to cause significant adverse environmental impact.

(ii) No on-site construction of a new source for which no EIS is required shall commence before 15 days following issuance of a negative declaration, unless such construction is determined by the Regional Administrator to not cause significant adverse environmental impacts.

(5) The permit applicant must notify the Regional Administrator of any on-site construction which begins before the times specified in subparagraph (4). If on-site construction begins in violation of this paragraph, the Regional Administrator shall advise the owner or operator that it is proceeding with construction at its own risk, and that such construction activities constitute grounds for denial of a permit. The Regional Administrator may seek a court order to enjoin construction in violation of this paragraph.

(d) *Effect of compliance with new source performance standards.* (1) Except as provided in paragraph (d)(2), any new discharger which commenced construction after October 18, 1972, or any new source which meets the applicable promulgated new source performance standards before the commencement of discharge, shall not be subject to any more stringent new source performance standards or to any more stringent technology-based

standards under section 301(b)(2) of CWA for the shortest of the following periods:

(i) Ten years from the date that construction is completed;

(ii) Ten years from the date the source begins to discharge process or other non-construction related wastewater; or

(iii) The period of depreciation or amortization of the facility for the purposes of section 167 or 169 (or both) of the Internal Revenue Code of 1954.

[*Comment:* The provisions of this paragraph do not apply to existing sources which modify their pollution control facilities or construct new pollution control facilities and achieve performance standards, but which are neither new sources or new dischargers or otherwise do not meet the requirements of this paragraph.]

(2) The protection from more stringent standards of performance afforded by paragraph (d)(1) of this section does not apply to:

(i) Additional or more stringent permit conditions which are not technology based, e.g., conditions based on water quality standards, or effluent standards or prohibitions under section 307(a); and

(ii) Additional permit conditions controlling pollutants not listed as toxic under section 307(a) of CWA or as hazardous under section 311 of CWA and which are not controlled by new source performance standards. This includes permit conditions controlling pollutants other than those identified as toxic or hazardous where control of those other pollutants has been specifically identified as the method to control the toxic or hazardous pollutant.

(3) Where an NPDES permit-issued to a source enjoying a "protection period" under paragraph (d)(1) will expire on or before the expiration of the protection period, such permit shall require the owner or operator of the source to be in compliance with the requirements of section 301 and any other then applicable requirements of CWA immediately upon the expiration of the protection period. No additional period for achieving compliance with these requirements shall be allowed.

(4) The owner or operator of a new source, a new discharger, a source recommencing discharge after terminating operations, or a source which had been an indirect discharger which commences discharging into navigable waters shall install and have in operating condition, and shall "start-up" all pollution control equipment required to meet the terms and conditions of its permits before beginning to discharge. Within the shortest feasible time (not to exceed 90 days), the owner or operator must meet all permit terms and conditions.

(5) After the effective date of new source performance standards, in accordance with section 306(e) of CWA, it shall be unlawful for any owner or operator of any new source to operate such source in violation of those standards applicable to such source.

§ 122.82 NPDES general permit program.

(a) *Definitions.* (1) The term "separate storm sewer" is defined in § 122.79.

(2) The term "general permit program area" ("GPPA") means any area so designated under paragraph (c) of this section in which all owners or operators of separate storm sewers or other categories of point sources are subject to the same general NPDES permit, other than owners or operators of such sources to whom individual NPDES permits have been issued.

[*Comment:* All draft general permits for point sources other than separate storm sewers must be sent to the EPA Deputy Assistant Administrator for Water Enforcement during the public comment period for 90-day review. If the draft general permit does not meet the criteria of § 122.82(b)(2), the EPA Deputy Assistant Administrator may object to the issuance of the general permit within those 90 days. See §§ 123.79(g) and 124.7(a)(2).]

(3) The term "general permit" means an authorization to discharge which:

(i) Where issued by EPA, is published in the Federal Register;

(ii) Where issued by a State, is published in accordance with applicable State procedures; and

(iii) Is applicable to all owners and operators of separate storm sewers or other categories of point sources in a designated GPPA, other than owners and operators of such sources to whom individual NPDES permits have been issued.

(b) The Director may regulate the following discharges under general permits

(1) Separate storm sewers; and

(2) Such categories of point sources if there are a number of minor point sources operating in a geographical area that:

(i) Involve the same or substantially similar types of operations;

(ii) Discharge the same types of wastes;

(iii) Would require the same effluent limitations or operating conditions;

(iv) Would require the same monitoring requirements and

(v) In the opinion of the Director would be more appropriately controlled under a general permit than under an indivdual NPDES permit.

(c) Each general permit shall be applicable to a class or category of dischargers meeting the criteria of paragraph (b) within a GPPA designated by the Director.

(1) The GPPA shall correspond with existing geogrpahic or political boundaries such as:

(i) Designated planning areas under sections 208 and 303 of the Act;

(ii) Sewer districts or sewer authorities;

(iii) City, county or State political boundaries;

(iv) State highway systems;

(v) Standard metropolitan statistical areas as defined by the Office of Management and Budget;

(vi) Urbanized areas as defined by the Bureau of Census (see § 122.79(b)(1)); or

(vii) Any other appropriate divisions or combinations of the above boundaries which will encompass the sources subject to the same general permit.

(2) Any designation of any GPPA is subject to review by the Director at the expiration of the general permit for the GPPA, or if individual permits have been issued to all the owners and operators of the classes of point sources within the GPPA, or as necessary to address water quality problems effectively.

(3) NPDES General permits shall be issued in accordance with the applicable requirements of Part 124.

[*Comments:* The permit issuing authority is encouraged to provide as much actual notice of the draft general permit to the permittees as possible. This notice would be in addition to the public notice requirements in § 124.11(f) and could include notice in trade associations' journals and newsletters.]

(d) *Scope of NDPES General Permits.* (1) Each NDPES general permit shall cover all owners and operators of separate storm sewers or other designated categories of point sources in the GPPA for which the general permit is issued, except:

(i) As provided in paragraph (e); and

(ii) For owners and operators of separate storm sewers or other categories of point sources who are already subject to individual NPDES permits prior to the effective date of the general permit;

(2)(i) All sources not excluded from general permit coverage for these reasons are permittees subject to the terms and conditions of the general permit.

(ii) Sources excluded from NDPES general permit coverage solely because they already have an individual NPDES permit may request that the individual permit be revoked, and that they be

covered by the general permit. upon revocation of the individual NPDES permit, the general permit shall apply to such point sources.

(e) *Case-by-case designation.* (1) Under § 124.70, the Director may revoke a general permit as it applies to any person and require such person to apply for and obtain an individual NPDES permit. Interested persons may petition the Director to take action under this paragraph if one of the six cases listed below occurs. Cases where individual NPDES permits may be required include the following:

(i) The covered discharge(s) is a significant contributor of pollution;

(ii) The discharger is not in compliance with the terms and conditions of the general NDPES permit;

(iii) A change has occurred in the availability of demonstrated technology or practices for the control or abatement of pollutants from the covered point source;

(iv) Effluent limitation guidelines are subsequently promulgated for point sources covered by the general NPDES permit;

(v) A Water Quality Management plan containing requirements applicable to such point sources is approved; or

(iv) The requirements of paragraph (b)(2)(i) through (iv) are not met.

(2) Where EPA is the permit issuing authority, the Regional Administrator may revoke a general permit as it applies to any person and require such person to apply for an individual NPDES permit if:

(i) There has been an on-site inspection of the facility and a determination that the point source should and could be regulated under an individual permit: and

(ii) The owner or operator has been notified in writing of the revocation of the general permit and that a permit application is required. This notice shall include an application form, a statement that the owner or operator has sixty days from receipt of notice to file the application, and a statement that the general permit no longer authorizes the owner or operator to discharge pollutants.

(3) Any owner or operator subject to a general permit may request to be excluded from the coverage of the general permit by applying for an individual permit. The owner or operator shall submit such application, with reasons supporting the request, to the Director no later than ninety days after the publication by EPA of the general permit in the Federal Register or the publication by a State in accordance with applicable State law. All such requests shall be granted by issuance of any individual permit if the reasons cited by the owner or operator are adequate to support the request.

(4) Where an individual NPDES permit is issued to an owner or operator otherwise subject to a general NPDES permit, the general permit as it applies to the individual NPDES permittee is automatically revoked on the effective date of the individual permit.

(5) Any owner or operator applying for an individual NPDES permit under this paragraph is subject to the procedures set forth in Part 124.

§ 122.63 Special considerations under Federal law.

Under section 301(b)(1)(C) of CWA, permits shall be consistent with and reflect requirements under applicable Federal laws other than CWA and to the extent authorized by law, requirements under Executive Orders. For permits issued by the Regional Administrator such Federal requirements include but are not limited to the following:

(a) *Executive Order 11990 (Protection of Wetlands).*

(b) *Executive Order 11988 (Preservation of Floodplains).*

(c) Sections 3, 4, and 5 of the *Wild and Scenic Rivers Act*, 16 U.S.C. 1273 *et seq.*

(d) The *National Historic Preservation Act of 1966*, 42 U.S.C. 4321 *et seq.* (and the related Executive Order 11593).

(e) The *Land and Water Conservation Act*, 16 U.S.C. 460, *et seq.*

(f) Section 7 of the *Endangered Species Act.* 16 U.S.C. 1531 *et seq.*

(g) Section 307 of the *Coastal Zone Management Act*, 16 U.S.C. 1451 *et seq.*

[*Comment:* NPDES permits must be consistent with approved coastal zone management plans by virtue of sections 307(c)(3)(A) (Federally issued permits) and 307(c)(1) (approval and oversight of State permit programs).]

(h) The *Solid Waste Disposal Act*, as amended by the *Resource Conservation and Recovery Act of 1976*, 42 U.S.C. 6901 *et seq.*

(i) The *Safe Drinking Water Act*, 42 U.S.C. 300f *et seq.*

(j) The *Marine Protection, Research, and Sanctuaries Act* (the *Ocean Dumping Act*), 33 U.S.C. 1401 *et seq.*

(k) The *Surface Mining Control and Reclamation Act of 1977*, 30 U.S.C. 1201 *et seq.*

(l) The *Fish and Wildlife Coordination Act*, 16 U.S.C. 661 *et seq.*

Appendix A.—*Point Source Categories and Permit Expiration Dates*

Point source category	Permit expiration dates
Adhesives	June 30, 1981
Aluminum Forming	June 30, 1981
Auto and Other Laundries	June 30, 1981
Battery Manufacturing	June 30, 1981
Coal Mining	December 31, 1980
Coil Coating	June 30, 1981
Copper Forming	June 30, 1981
Electric and Electronic Components	June 30, 1981
Electroplating	June 30, 1981
Explosives Manufacturing	June 30, 1981
Foundries	June 30, 1981
Gum and Wood Chemicals	June 30, 1981
Inorganic Chemicals	March 31, 1981
Iron and Steel	September 30, 1980
Leather Tanning and Finishing	September 30, 1980
Mechanical Products	June 30, 1981
Nonferrous Metals	December 31, 1980
Ore Mining	December 31, 1980
Organic Chemicals	March 31, 1981
Paint and Ink	December 31, 1980
Pesticides	June 30, 1981
Petroleum Refining	September 30, 1980
Pharmaceuticals	June 30, 1981
Photographic Supplies	June 30, 1981
Plastics Processing	June 30, 1981
Plastic and Synthetic materials	March 31, 1981
Porcelain Enamel	June 30, 1981
Printing and Publishing	December 31, 1981
Pulp and Paper	March 31, 1981
Rubber	March 31, 1981
Soaps and Detergents	June 30, 1981
Steam Electric	September 30, 1980
Textile Mills	March 31, 1981
Timber	September 30, 1980

PART 123—STATE PROGRAM REQUIREMENTS

Subpart A—General Program Requirements

Sec.
123.1 Purpose and scope.
123.2 Definitions.
123.3 Elements of a program submission.
123.4 Program description.
123.5 Attorney General's Statement.
123.6 Memorandum of Agreement with the Regional Administrator.
123.7 Requirement to obtain a permit.
123.8 Operational requirements.
123.9 Compliance evaluation programs.
123.10 Enforcement authority.
123.11 Progress reports.
123.12 Approval process.
123.13 Procedure for revision of State programs.
123.14 Criteria for withdrawal of State programs.
123.15 Procedures for withdrawal of State programs.
123.16 Sharing of information.
123.17 Coordination with other programs.

Subpart B—Additional Requirements for State Hazardous Waste Programs

123.31 Purpose and scope.
123.32 Interim authorization.
123.33 Authorization.
123.34 Program description.
123.35 Attorney General's statement for interim authorization.
123.36 Progress reports.
123.37 Memorandum of Agreement.
123.38 EPA review of State permits.
123.39 Operational requirements.
123.40 Approval process.
123.41 Criteria for withdrawal.

Subpart C—Additional Requirements for State Underground Injection Control Programs

Sec.
123.51 Purpose and scope.
123.52 Program description.
123.53 Attroney General's Statement.
123.54 Requirement to obtain a permit.
123.55 Progress reports.
123.56 Annual report.
123.57 Operational requirements.
123.58 Program approval process.
123.59 Withdrawal process.
123.60 State UIC program revisions.

Subpart D—Additional Requirements for State Programs Under the National Pollutant Discharge Elimination System

123.71 Purpose and scope.
123.72 Memorandum of Agreement.
123.73 Operational requirements.
123.74 Control of disposal of pollutants into wells.
123.75 Inspections, monitoring, entry and reporting.
123.76 Receipt and use of Federal information.
123.77 Transmission of information to EPA.
123.78 Objections to proposed permits.
123.79 Prohibition.
123.80 Compliance evaluation programs.
123.81 Continuing planning process.
123.82 Agency board membership.
123.83 Approval process.

Subpart E—Additional Requirements for State Programs Under Section 404 of the Clean Water Act

123.91 Purpose and scope.
123.92 Memorandum of Agreement.
123.93 Memorandum of Agreement with the Secretary.
123.94 Attorney General's Statement.
123.95 Program description.
123.96 Inspections, monitoring, entry and reporting.
123.97 Receipt and use of Federal information.
123.98 Transmission of information to EPA.
123.99 Objections to permits.
123.100 Prohibitions.
123.101 Enforcement authority.
123.102 Continuing planning process.
123.103 Agency board membership.
123.104 Approval process.
123.105 Applicable conditions and requirements.
123.106 General permits.
123.107 Activities not requiring permits.
123.108 Permit application.
123.109 [Reserved]
123.110 Coordination requirements.
123.111 Emergency procedures.
123.112 Reporting.

Authority: Resource Conservation and Recovery Act, 42 U.S.C. 6901 et seq.; Safe Drinking Water Act, 42 U.S.C. 300f et seq.; Clean Water Act, 33 U.S.C. 1251.

Subpart A—General Program Requirements

§ 123.1 Purpose and scope.

(a) This part specifies procedural and other requirements which must be present in State programs in order to obtain approval of the Administrator under:

(1) Section 3006 (hazardous waste) of the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976, (Pub. L. 94–580, as amended by Pub. L. 95–609, hereinafter called RCRA);

(2) Section 1422 (underground injection control—UIC) of the Safe Drinking Water Act (Pub. L. 93–523, as amended by Pub. L. 95–190, hereinafter called SDWA);

(3) The National Pollutant Discharge Elimination System (NPDES) (sections 318, 402 and 405 of the Clean Water Act, Pub. L. 92–500, as amended by Pub. L. 95–217 and Pub. L. 95–576, hereinafter called CWA); and

(4) Section 404 (dredge and fill) of CWA.

[*Comment:* This Part should be read in conjunction with Parts 122 and 124 which provide general requirements of the Federal program and, by the references contained in this Part, to State programs.]

(b) A State program which conforms to the applicable requirements of this Part shall be approved by the Administrator.

(c) Upon approval of a State program the Administrator or the Secretary (in the case of section 404 programs) shall suspend the issuance of Federal permits for those activities subject to the approved State program.

(d) Any State program approved by the Administrator shall at all times be conducted in accordance with the requirements of this Part.

(e) In many cases States will lack authority to regulate activities on Indian lands. This lack of authority to regulate acitivities on Indian lands. This lack of authority does not impair a State's ability to obtain full program approval in accordance with this Part. However, States are required to exercise jurisdiction over Indian lands to the extent they are authorized to do so.

[*Comment:* Partial State programs are not allowed under RCRA, NPDES and section 404. However, failure of a State to regulate activities on Indian lands does not constitute a partial program. Similarly, a State can assume primary enforcement responsibility for the UIC program, notwithstanding § 123.51(e), where the State program is unable to regulate activities on Indian lands within the State. States are advised to contact the United States Department of Interior concerning authority over Indian lands. EPA or the Secretary, in the case of section 404 programs, will administer the program on Indian lands whenever the State lacks authority.]

(f) Except as provided in § 123.33(c), nothing in this Part precludes a State from:

(1) Adopting or enforcing requirements which are more stringent or more extensive than those required under this Part;

(2) Operating a program with a greater scope of coverage than that required under this Part.

[*Comment:* Where an approved State program has greater scope of coverage than required by Federal law the additional coverage is not part of the Federally approved program. For example, where a State requires permits for discharges into publicly owned treatment works, these permits are not NPDES permits.]

§ 123.2 Definitions.

The definitions in Part 122 apply to this Part.

§ 123.3 Elements of a program submission.

(a) EPA will not begin formal review of a proposed State program until it receives three copies of a complete program submission. EPA will notify the State within 30 days whether its submission is complete. If a submission made by a State is found to be incomplete, the statutory review period (i.e., the period of time allotted for EPA review under the appropriate Act) shall not begin until all the requested information is filed with EPA.

(b) If the State's submission is materially changed during the statutory review period, the review period shall recommence.

(c) The State and EPA may extend the review period by agreement.

(d) The submission shall contain the following elements:

(1) A letter from the Governor of the State requesting program approval;

(2) An Attorney General's Statement as required by § 123.5;

(3) A Memorandum of Agreement with the Regional Administrator as required by § 123.6;

(4) A complete program description, as required by § 123.4, describing how the State intends to carry out its responsibilities under this Part;

(5) Copies of the following forms the State intends to employ in its program: the permit form(s); the application form(s); standard reporting form(s) and the manifest form. Except as provided in Part 122, forms used by States need not be identical to the forms used by EPA or

the Secretary but should require the same basic information. The State need not provide copies of uniform national forms it intends to use but should note its intention to use such forms.

[*Comment:* States are encouaged to use uniform national forms established by the Administrator or the Secretary (in the case of section 404 programs). Uniform national forms may be modified to include the State Agency's name, address, logo and other similar information, as appropriate, in place of EPA's. NPDES States are required to use standard Discharge Monitoring Reports (DMR).]

(6) Copies of all applicable State statutes and regulations, including those governing State administrative procedures;

(7) In the case of section 404 programs a Memorandum of Agreement with the Secretary as required by § 123.93; and

(8) The showing required by § 123.40(d) (RCRA) and § 123.56(b) (UIC).

§ 123.4 Program description.

Any State that wishes to administer a program shall submit to the Administrator a complete description of the program it proposes to establish and administer under State law or under an interstate compact. The program description shall include the information below. Additional requirements for State program descriptions are detailed in §§ 123.34 (RCRA), 123.52 (UIC), and 123.95 (404).

(a) A description in narrative form of the scope, structure, coverage and processes of the State program.

(b) A description (including organization charts) of the organization and structure of the State agency or agencies which will have responsibility for administering the program including the information listed below. If more than one agency is responsible for administration of a program, their responsibilities must be delineated, their procedures for coordination set forth, and one of the agenices may be designated a "lead agency" to facilitate communications between EPA and the State agencies having program responsibility. Where the State proposes to administer a program of greater scope of coverage than is required by Federal law, the information provided under this paragraph shall indicate the resources dedicated to administering the Federally required portion of the program.

(1) A description of the State agency staff who will be engaged in carrying out the State program, including the number and occupations of the employees;

[*Comment:* The State need not submit complete job descriptions for every employee engaged in carrying out the State program.]

(2) An itemization of the proposed or actual costs of establishing and administering the program for the first two years after approval, including cost of the personnel listed in subparagraph (1), cost of administrative support, and cost of technical support.

(3) An itemization of the sources and amounts of funding, including Federal grant money, available to the State Director for the first two years after approval to meet the costs listed in subparagraph (2) identifying any restrictions or limitations upon this funding.

(4) Information on the number, size and character of the activities that will be regulated under the approved State program. (See §§ 123.34 (RCRA), 123.52 (UIC), and 123.95 (404)).

(c) A description of applicable State procedures, including permitting procedures and any State appellate review procedures;

(d) A general description of the State's priorities for issuance of permits and for enforcement, including a complete description of the State's compliance tracking and enforcement program.

[*Comment:* It is anticipated that a more specific identification of priorities will be contained in subsidiary State/EPA agreements such as annual grant agreements.]

§ 123.5 Attorney General's Statement.

(a) Any State desiring to administer a program covered by this Part shall submit a statement from the State Attorney General (or the attorney for those State or interstate agencies which have independent legal counsel), that the laws of the State, or the interstate compact, provide adequate authority to carry out the program described under § 123.4 and to meet the requirements of this Part. This statement shall include citations to specific statutes, administrative regulations, and, where appropriate, judicial decisions to support the analysis. The authorities cited by the State Attorney General or other legal officer shall be in the form of lawfully adopted State statutes and regulations which shall be in full force and effect at the time the statement is signed.

[*Comment:* To qualify as "independent legal counsel" the attorney signing the statement required by this section must have full authority to independently represent the State agency in court on all matters pertaining to the State program.]

(b) Where jurisdiction can be exercised over activities on Indian lands, the statement shall contain an appropriate analysis of the State's authority.

§ 123.6 Memorandum of Agreement with the Regional Administrator.

(a) Before the Administrator approves any State program, the State Director and the Regional Administrator shall execute a Memorandum of Agreement (MOA), which the Administrator shall approve before or at the time of program approval. In addition to the requirements of paragraph (b), the Memorandum of Agreement may include other terms, conditions, or agreements relevant to the administration and enforcement of the State's regulatory program which are not inconsistent with this Part. No Memorandum of Agreement shall be approved which contains provisions which restrict EPA's statutory oversight responsibility.

[*Comment:* The Administrator may delegate his or her authority to approve modifications of MOA's. In such cases, however, the Regional Administrator's decision would be subject to review by EPA Headquarters.]

(b) The Memorandum of Agreement shall include the following:

(1) Provisions for the prompt transfer of any pending permit applications or any other relevant information not already in the possession of the State Director (e.g., support files for permit issuance, compliance reports, etc.) from EPA to the State. Where existing permits are transferred to the State for administration, the Memorandum of Agreement shall contain provisions specifying a procedure for transferring responsibility for these permits.

[*Comment:* In many instances States will lack the authority to directly administer permits issued by the Federal government. However, a procedure may be established to transfer responsibility for these permits. For example, a State could issue permits identical to the outstanding Federal permits which could be simultaneously revoked.]

(2) Provisions specifying classes and categories of permit applications and permits that the Regional Administrator will receive from the State for review, comment and, where applicable, objection;

[*Comment:* The nature and basis of EPA review of State permits and permit applications differs between the programs governed by this Part. See §§ 123.26 (RCRA), 123.76 (NPDES) and 123.90 (404). In addition, EPA will issue guidance on the significant types of permits that will be subject to EPA review pursuant to these Memoranda of Agreement.]

(3) Provisions specifying the frequency and content of reports (e.g., see § 123.11), documents and other information which the State must submit to EPA; and provisions on program evaluations. The State shall allow EPA to routinely review State records, reports and files relevant to the administration and enforcement of the State program. State reports may be combined with grant reports where appropriate;

(4) Provisions on the State's enforcement program, including:

(i) Compliance monitoring by the State and by EPA. These may specify the basis on which the Regional Administrator may select facilities or activities within the State for EPA inspection. The Regional Administrator will normally notify the State at least seven (7) days before any such inspection;

(ii) Fiscal arragnements for effective litigation support for the State attorney general or other appropriate legal officers;

(5) Where appropriate, provisions for joint processing of permits by the State and EPA, for facilities or activities which require permits from both EPA and the State under different programs.

[*Comment:* To promote efficiency and to avoid duplication and inconsistency, States are encouraged to enter into joint processing agreements with EPA for permit issuance. Likewise, States are encouraged to consider steps to coordinate or consolidate their own permit programs and activities.]

(6) Provisions for modification of the Memorandum of Agreement.

(c) The Memorandum of Agreement and the State/EPA Agreement should be consistent. If the State/EPA Agreement indicates that a change is needed in the Memorandum of Agreement, the Memorandum of Agreement may be amended in accordance with the procedures set forth in this Part. The State/EPA Agreement may not override the Memorandum of Agreement.

[*Comment:* Detailed program priorities and specific arrangements for EPA support of the State program will change and are therefore more appropriately negotiated in the context of annual agreements rather than in the MOA. Where this is the case it may still be appropriate to specify in the MOA the basis for such detailed agreements, e.g., a provision in the MOA specifying that EPA will select facilities in the State for inspection annually as part of the State/EPA agreement.]

§ 123.7 Requirement to obtain a permit.

Except where an activity may be authorized by rule as provided in §§ 122.35, 123.54 (UIC) and 123.39 (RCRA), State permit programs must have a statute or regulation, enforceable in State courts, which prohibits the activity requiring a permit under the appropriate Act, except as authorized by a permit in effect under the State program. Where an activity may be authorized by rule there must be a similar statutory prohibition against such activities except as authorized by a rule in effect under the State program.

§ 123.8 Operational requirements.

State programs must have legal authority to implement each of the following provisions and must be administered in conformance with each of the following provisions:

(a) § 122.5—(Signatories);
(b) § 122.7—(Permit issuance);
(c) § 122.8 (a) and (b)—(Duration);
(d) § 122.9—(Permit review and modification);
(e) § 122.10—(Permit termination);
(f) § 122.11—(Permit conditions);
(g) § 122.12 (a) and (d)—(Schedules of compliance);
(h) § 122.14—(Recordkeeping/Reporting);
(i) § 122.15—(Noncompliance reporting);
(j) § 122.16(b)—(Confidential information);
(k) § 124.6 (a) and (b)—(Draft permit) except as provided in § 123.98(c)(2) for State section 404 programs;
(l) § 124.8—(Statement of basis), except as provided in § 123.98(c)(2) for State section 404 programs;
(m) § 124.9—(Fact sheets), except as provided in § 123.98(c)(2) for State section 404 programs;
(n) § 124.11—(Public notice);
(o) § 124.12—(Public comments and requests for hearings);
(p) § 124.19 (a) and (c)—(Response to comments);
(q) Such other provisions as are specified in §§ 123.39 (RCRA), 123.57 (UIC) and 123.73 (NPDES).

§ 123.9 Compliance evaluation programs.

(a) State programs shall have procedures for receipt, evaluation, recordkeeping and investigation for possible enforcement of all notices and reports required of permittees (or failure to submit such notices and reports).

(b) State programs shall have inspection and surveillance procedures to determine, independent of information supplied by operators and permittees, compliance or noncompliance with applicable program requirements, standards and limitations, filing requirements and permit terms or conditions, including the following:

(1) A program which is capable of making comprehensive surveys of all waters and/or activities subject to the State Director's authority in order to identify persons subject to regulation who have failed to comply with permit application or other filing requirements. Any compilation, index, or inventory of such activities shall be made available to the Regional Administrator upon request;

(2) A program for periodic inspections of the activities subject to regulation. These inspections shall:

(i) Determine compliance or noncompliance with issued permit terms and conditions and other program requirements;

(ii) Verify the accuracy of information submitted by permittees in reporting forms and other forms supplying monitoring data; and

(iii) Verify the adequacy of sampling, monitoring and other methods used by permittees to develop that information;

(3) A program for investigating evidence of violations of applicable program and/or permit requirements, which shall apply whether the evidence is indicated in the reports and notifications evaluated under paragraph (a) or by the survey, inspection, and surveillance activities provided in paragraph (b); and

(4) The State's enforcement program shall include procedures for receiving and ensuring proper consideration of evidence submitted by the public about violations. Public effort in reporting violations shall be encouraged, and the State Director shall make available information on reporting procedures.

(c) The State officers engaged in compliance evaluation activities shall have authority to enter any site or premises subject to regulation or in which records are kept in order to inspect, monitor or otherwise investigate suspected violations of the State program including suspected violations of permit terms and conditions;

[*Comment:* State programs which require a search warrant for entry conform with this requirement.]

(d) Investigatory inspections shall be conducted, samples shall be taken and other information shall be gathered in a manner (e.g., using proper "chain of custody" procedures) that will produce evidence admissible in an enforcement proceeding or in court.

§ 123.10 Enforcement authority.

(a) Any State agency administering a program shall have available the following remedies for violations of the appropriate Act:

(1) To restrain immediately and effectively any person by order or by

suit in State court from engaging in any unauthorized activity which is threatening or causing actual damage to public health or the environment, or, where EPA is authorized to take immediate action, to immediately notify the Regional Administrator by telephone of any unauthorized activity which is threatening or causing actual damage to public health or the environment;

(2) To sue in courts of competent jurisdiction to enjoin any threatened or continuing violation of any program requirement, including permit terms and conditions, without the necessity of a prior revocation of the permit;

[*Comment:* Subparagraph (a)(1) requires that States have a mechanism (e.g., an administrative order or a temporary restraining order) to stop any unauthorized activity endangering public health or the environment, or, alternatively, to notify EPA of the situation so it may act. Where EPA cannot act immediately, e.g., in a State with a fully approved UIC program, the second alternative is not acceptable. Subparagraph (a)(2) merely requires that states have authority to permanently enjoin unauthorized activities.]

(3) To assess or to sue to recover in court civil penalties for the violation by any person of any of the following:

(i) Any applicable permit term or condition;

(ii) Any notice or reporting requirement;

(iii) Any duty to allow inspection, entry, or other monitoring activites; or

(iv) Any rule, regulation, or order issued by the state.

(4) To seek criminal remedies, including fines, for the violation by any person of any applicable program requirement, including violations of permit terms or conditions.

(5) To seek criminal remedies, including fines, against any person who knowingly makes any false statement, representation or certification in any program form or any notice or report, including those required by the terms and conditions of any issued permit or who knowingly renders inaccurate any monitoring device or method required to be maintained by the State Director;

[*Comment:* In many States the State Director will be represented in State courts by the State Attorney General or other appropriate legal officer. While the State Director need not appear in court actions under this Subpart, he/she should have power to request that any of the above actions be brought.]

(b)(1) The maximum civil penalties and criminal fines that can be sought by the state under subparagraphs (a)(3), (4) and (5) of this section shall be at least the same as the maximum amounts that can be sought by the EPA under the appropriate Act. The maximum civil penalty or criminal fine shall be assessable for each instance of violation and, if the violation is continuous, shall be assessable up to the maximum amount for each day of violation.

[*Comment:* The Agency welcomes comments on this requirement. In particular, EPA is interested in determining whether there are any State statutes which meet all the requirements of the Part except the above subparagraph. Any State which believes this to be the case should, in addition, notify EPA of what, if any, criminal remedies are provided for under State law.]

(2) The burden of proof and degree of knowledge or intent required under state law for establishing violations under subparagraphs (a)(3), (4) and (5) shall be no greater than the burden of proof or degree of knowledge or intent EPA must provide when it brings an action under the appropriate Act;

[*Comments:* (1) For example, this requirement is not met if State law includes mental state as an element of proof for civil violations.

(2) Under CWA the Agency must establish that a violation was negligent or willful to maintain a criminal action. Under RCRA the degree of criminal intent for EPA prosecution is "knowingly" and under UIC "willful." Criminal prosecution under the State program shall require no greater burden of proof than that for EPA prosecution.]

(c) Any civil penalty assessed, sought or agreed upon by the State Director under subparagraph (a)(3) of this section shall be appropriate to the violation. A civil penalty agreed upon by the State Director in settlement of administrative or judicial litigation may be adjusted by a percentage which represents the likelihood of success in establishing the underlying violation(s) in such litigation. In the event that such a civil penalty, together with the costs of expeditious compliance, would be so severely disproportionate to the resources of the violator as to jeopardize continuance in business, the payment of the penalty may be deferred or the penalty may be forgiven in whole or part, as circumstances may warrant.

For a violation resulting from failure to meet a statutory or final permit compliance deadline, "appropriate to the violation" as used in this paragraph, means a penalty which is equal to:

(1) An amount appropriate to redress the harm or risk to public health or the environment; plus

(2) An amount appropriate to remove the economic benefit gained or to be gained from delayed compliance; plus

(3) An amount appropriate as a penalty for the violator's degree of recalcitrance, defiance, or indifference to requirements of the law; plus

(4) An amount appropriate to recover unusual or extraordinary enforcement costs thrust upon the public; minus

(5) An amount, if any, appropriate to reflect any part of the noncompliance attributable to the government itself; and minus

(6) An amount appropriate to reflect any part of the noncompliance caused by factors completely beyond the violator's control (e.g., floods, fires).

[*Comment:* In addition to the above, the State may have other enforcement remedies. The following enforcement options, while not mandatory, are highly recommended:

(i) Procedures for assessment by the State for the costs of an investigation, inspection, or monitoring survey which led to the establishment of the violation;

(ii) Procedures which enable the State to assess or to sue any persons responsible for the unauthorized activities for any expenses incurred by the State in removing, correcting, or terminating any adverse effects upon the human health and the environment resulting from the unauthorized activity, whether or not accidental;

(iii) Procedures which enable the State to sue for compensation for any loss or destruction of wildlife, fish or aquatic life, and for any other damages caused by unauthorized activity, either for the State for any residents of the State who are directly aggrieved by the unauthorized activity, or both; and

(iv) Procedures for the administrative assessment of penalties by the Director.]

§ 123.11 Progress reports.

States with interim authorization under RCRA (see § 123.32) and States listed as needing a UIC program (see § 123.51) shall submit information every six months in accordance with § 123.36 (RCRA) and § 123.55 (UIC) on the status and progress of State efforts to obtain approval.

§ 123.12 Approval process.

The process for EPA approval of State programs is set out in §§ 123.40 (RCRA), 123.58 (UIC), 123.83 (NPDES) and 123.104 (404).

§ 123.13 Procedure for revision of State programs.

(a) Program revision may be initiated at the request of either EPA or the State. Program revision may be necessary when the controlling Federal or State statutory or regulatory authority is modified or supplemented. The State shall keep EPA fully informed of any proposed modifications to its basic statutory or regulatory authority, its forms, procedures or priorities.

(b) Revision of a State program shall be accomplished as follows:

(1) The State shall submit a modified program description, Attorney General's Statement, Memorandum of Agreement, or such other documents as are necessary under the circumstances.

(2) Whenever EPA determines that the proposed program modification(s) is substantial, the Agency shall issue public notice and provide an opportunity to comment for a period of at least 30 days. The public notice shall be mailed to interested persons and shall be published in enough of the largest newspapers in the State to provide Statewide coverage. The public notice shall summarize the proposed modifications and provide for the opportunity to request a public hearing. Such a hearing will be held if there is significant public interest.

(3) The program modification shall become effective upon the approval of the Administrator. Notice of any substantial modification shall be published in the Federal Register. Non-substantial program modifications may be approved by a lettter from the Agency.

[*Comment:* The Administrator is expected to delegate his or her authority in this regard to the Regional Administrator. The Regional Administrator's action would, however, be subject to review by EPA Headquarters.]

(c) Approved State programs shall notify EPA whenever the State proposes to transfer all or part of any program from the approved State agency to any other agency, and shall identify any new division of responsibilities among the agencies involved. If such change affects the State's ability to meet the requirements of this Part, the new agency is not authorized to administer the program until approved by the Administrator. Organizational charts required under § 123.4(b) shall be revised and resubmitted.

(d) Whenever the Administrator has reason to believe that circumstances may have changed with respect to a State program, he may request, and the State shall provide a supplemental Attorney General's Statement, program description, other document or information as necessary.

§ 123.14 Criteria for withdrawal of State programs.

(a) The Administrator may withdraw program approval where a State program no longer complies with the requirements of this Part and the State fails to take corrective action. Such circumstances include the following:

(1) Where the State's legal authority no longer meets the requirements of this Part, including:

(i) Failure of the State to promulgate or enact new authorities when necessary; and

(ii) Action by a State legislature or appellate level court striking down or limiting State authorities.

(2) Where the operation of the State program fails to comply with the requirements of this Part, including:

(i) Failure to exercise control over activities required to be regulated under this Part, including failure to issue permits;

(ii) Repeated issuance of permits which do not conform to the requirements of this Part; and

(iii) Failure to comply with the public participation requirements of this Part.

(3) Where the State's enforcement program fails to comply with the requirements of this Part, including:

(i) Failure to act on violations of permits or other program requirements;

(ii) Failure to seek and collect adequate enforcement penalties; and

(iii) Failure to inspect and monitor activities subject to regulation.

(4) Failure to comply with the terms of the Memorandum of Agreement required under § 123.5; and

(5) Such other criteria as provided in the applicable provisions of Subparts B–D.

§ 123.15 Procedures for withdrawal of State programs.

(a) A State with a program approved under this Part may voluntarily transfer program responsibilities required by Federal law to EPA (or to the Secretary in the case of 404 programs) by taking the following actions, or in such other manner as may be agreed upon with the Administrator.

(1) The State shall give the Administrator (and the Secretary in the case of Section 404 programs) 180 days notice of the proposed transfer and shall submit a plan for the orderly transfer of all relevant program information not in the possession of EPA (such as permits, permit files, compliance files, reports, permit applications, etc.) which are necessary for EPA (or the Secretary in the case of section 404 programs) to administer the program.

(2) Within 60 days of receiving the notice and transfer plan, the Administrator (and the Secretary in the case of section 404 programs) shall evaluate the State's transfer plan and shall identify any additional information needed by the Federal Government for program administration and/or identify any other deficiencies in the plan.

(3) At least 30 days before the transfer is to occur the Administrator shall publish notice of the transfer in the Federal Register and in enough of the largest newspapers in the State to provide Statewide coverage, and shall mail notice to all permit holders, permit applicants and other interested persons on appropriate EPA and State mailing lists.

(b) The following procedures apply when the Administrator orders the commencement of proceedings to determine whether to withdraw approval of a State program, other than a UIC program. The process for withdrawing approval of State UIC programs is set out in § 123.59.

(1) *Order.* The Administrator may order the commencement of withdrawal proceedings on his or her own initiative or in response to a petition from an interested person alleging failure of the State to comply with the requirements of this Part or of the appropriate Act as set forth in § 123.14. When the Administrator receives a petition to commence withdrawal proceedings he may conduct an informal investigation of the allegations to determine whether probable cause exists to commence proceedings under this paragraph. The Administrator's order commencing proceedings under this paragraph shall fix a time and place for the commencement of the hearing and shall specify the allegations against the State which are to be considered at the hearing. Within 30 days the State shall admit or deny these allegations in a written answer. The party seeking withdrawal of the State's program shall have the burden of coming forward with the evidence in a proceeding under this paragraph.

(2) *Definitions.* For purposes of this paragraph the definitions of §§ 22.03 (a), (b), (i), (j), and (p) of this Chapter apply in addition to the following:

(i) "Party" means the petitioner, the State, the Agency and any other person whose request to participate as a party is granted.

(ii) "Person" means the Agency, the State and any individual or organization having an interest in the subject matter or the proceeding;

(iii) "Petitioner" means any person whose petition for commencement of withdrawal proceedings has been granted by the Administrator.

(3) *Procedures.* The following provisions of Part 22 of this Chapter are applicable to proceedings under this paragraph:

(i) Section 22.02—(use of number/gender);

(ii) Section 22.04(c)—(authorities of Presiding Officer);

(iii) Section 22.06—(filing/service of rulings and orders);

(iv) Section 22.07 (a) and (b)—*provided*, that the time for commencement of the hearing shall not be extended beyond the date set in the Administrator's order without approval of the Administrator—(computation/extension of time);

(v) Section 22.08—however substitute "order commencing proceedings" for "complaint"—(Ex Parte contacts);

(vi) Section 22.09—(examination of filed documents);

(vii) Section 22.11 (a), (c) and (d), *provided*, motions to intervene must be filed within 15 days from the date the notice of the Administrator's order is first published—(intervention);

(viii) Section 22.16 *provided*, service shall be in accordance with subparagraph (4) of this paragraph, and *provided further*, the words "recommended decision" shall be substituted for the words "initial decision, except as provided in § 22.28" in § 22.18(c),—(motions);

(ix) Section 22.19 (a), (b) and (c)—(prehearing conference);

(x) Section 22.22—(evidence);

(xi) Section 22.23—(objections/offers of proof);

(xii) Section 22.25—(filing the transcript); and

(xiii) Section 22.26—(findings/conclusions).

(4) *Record of proceedings.* (i) The hearing shall be either stenographically reported verbatim or tape recorded, and thereupon transcribed, by an official reporter designated by the Presiding Officer;

(ii) All orders issued by the Presiding Officer, transcripts of testimony, written statements of position, stipulations, exhibits, motions, briefs or other written material of any kind submitted in the hearing shall be a part of the record and shall be available for inspection or copying, upon payment of costs, by the parties or any other persons in the Office of the Hearing Clerk. Inquiries may be made at the office of the Administrative Law Judges, Hearing Clerk, 401 M Street, S.W., Washington, D.C. 20460;

(iii) Upon notice to all parties the Presiding Officer may authorize corrections to the transcript which involve matters of substance;

(iv) An original and two (2) copies of all written submissions to the hearing shall be filed with the Hearing Clerk;

(v) A copy of each such submission shall be served by the person making the submission upon the Presiding Officer and each party of record. Service under this paragraph shall take place by mail or personal delivery;

(vi) Every submission shall be accompanied by an acknowledgement of service by the person served or proof of service in the form of a statement of the date, time and manner of service and the names of the persons served, certified by the person who made service; and

(vii) The Hearing Clerk shall maintain and furnish to any person upon request, a list containing the name, service address and telephone number of all parties and their attorneys or duly authorized representatives.

(5) *Participation by a person not a party.* A person who is not a party may, in the discretion of the Presiding Officer, be permitted to make a limited appearance by making oral or written statement of his position on the issues within such limits and on such conditions as may be fixed by the Presiding Officer, but he may not otherwise participate in the proceeding.

(6) *Rights of parties.* (i) All parties to the proceeding may:

(A) Appear by counsel or other representative in all hearing and pre-hearing proceedings;

(B) Agree to stipulations of facts which shall be made a part of the record.

(7) *Recommended decision.* (i) Within 30 days after the filing of proposed findings and conclusions, the Presiding Officer shall evaluate the record before him, the proposed findings and conclusions and any briefs filed by the parties and shall prepare a recommended decision, and shall certify the entire record, including the recommended decision, to the Administrator.

(ii) Copies of the recommended decision shall be served upon all parties.

(iii) Within 20 days after the certification and filing of the record and recommended decision, all parties may file with the Administrator exceptions to the recommended decision and a brief in support thereof.

(8) *Decision by Administrator.* (i) Within 60 days after the certification of the record and filing of the Presiding Officer's recommended decision, the Administrator shall review the record before him and issue his own decision;

(ii) If the Administrator concludes that the State has administered the program in conformity with the appropriate Act and regulations his decision shall constitute "final agency action" within the meaning of 5 U.S.C. 704.

(iii) If the Administrator concludes that the State has not administered the program in conformity with the appropriate Act he shall list the deficiencies in the program and provide the State a reasonable time, not to exceed 90 days, to take such appropriate corrective action as the Administrator determines necessary.

(iv) Within the time prescribed by the Administrator the State shall take such appropriate corrective action as required by the Administrator and shall file with the Administrator and all parties a statement certified by the State Director that such appropriate corrective action has been taken.

(v) The Administrator may require a further showing in addition to the certified statement that corrective action has been taken.

(vi) If the State fails to take such appropriate corrective action and file a certified statement thereof, the Administrator shall issue a supplementary order withdrawing approval of the State program. If the State takes such appropriate corrective action, the Administrator shall issue a supplementary order stating that approval of authority is not withdrawn.

(vii) The Administrator's supplementary order shall constitute final Agency action within the meaning of 5 U.S.C. 704.

(c) Withdrawal of authorization under this section and the appropriate Act does not relieve any person from complying with the requirements of State law.

§ 123.16 Sharing of information.

(a) Any information obtained or used pursuant to a State program shall be available to EPA upon request without restriction. If the information has been submitted to the State under a claim of confidentiality, the State must submit that claim to EPA when providing information under this Part. Any information obtained from a State and subject to a claim of confidentiality will be treated in accordance with the regulations in 40 CFR Part 2. If EPA obtains from a State information that is not claimed to be confidential, EPA may make that information available to the public without further notice.

(b) EPA may furnish information to States in order to implement these regulations. In the case of information claimed as confidential by submitters, State access will be subject to the rules in 40 CFR Part 2, Subpart B.

§ 123.17 Coordination with other programs.

(a) Initial issuance of State permits under this Part may be coordinated whenever possible and appropriate in timing and procedure with initial issuance of RCRA, NPDES, 404 and UIC permits whether they are controlled by

the State or EPA. If steps are taken to accomplish this coordination, they shall be addressed in the Memorandum of Agreement.

(b) The State director of any approved program which may affect the planning for and development of hazardous waste management facilities and practices shall consult and coordinate with agencies designated under section 4006(b) of RCRA as responsible for the development and implementation of State solid waste management plans under section 4002(b) of RCRA (40 CFR Part 256, proposed at 43 FR 39534–39548, August 22, 1978).

Subpart B—Additional Requirements for State Hazardous Waste Programs

§ 123.31 Purpose and scope.

This subpart describes additional substantive and procedural requirements for State hazardous waste programs under section 3006 of RCRA, and additional features of EPA's review of State hazardous waste programs. In case of any inconsistency between this Subpart and Subpart A, this Subpart is controlling.

§ 123.32 Interim authorization.

(a) Interim authorization may be granted only for the 24 months beginning on the date six months after the date of promulgation of regulations under section 3001 of RCRA at 40 CFR 250, Subpart A (proposed at 43 FR 58954, December 18, 1978). The Administator shall grant interim authorization under section 3006(c) of RCRA if the State's program complies with the requirements of Subparts A and B of this Part (except as provided in paragraph (b)), and the State:

(1) Controls by permit system at least on-site or off-site hazardous waste disposal facilities. The legislative authority to meet this requirement shall be effective no later than 90 days after the date of promulgation of 40 CFR 250, Subpart A, (proposed at 43 FR 58954–58968, December 18, 1978);

(2) Commits adequate resources, and has the administrative capability to process permits and conduct an effective enforcement program, including a program for compliance evaluation.

(b) To obtain interim authorization States need to show compliance with Subparts A and B of this Part, except that they need only show substantial compliance with §§ 123.8, 123.10 and 123.30(a), States need not comply with §§ 123.33 and 123.39 (b), (c) and (d).

[*Comment:* A program to control hazardous waste treatment or storage facilities is desirable but is not required for interim authorization. State, however, that States within interim authorization which have the necessary authorities in existence to implement a manifest system and/or control of treatment and/or storage facilities *must do so.*]

§ 123.33 Authorization.

(a) The Administrator will not grant authorization under section 3006(b) of RCRA to any State hazardous waste programs until after the date of promulgation of regulations under section 3001 of RCRA at 40 CFR 250, Subpart A (proposed at 43 FR 58954–58968, December 18, 1978), or of this Part, whichever is later.

(b) No partial programs will be approved. A State program must comply with all the requirements of Subparts A and B of this Part in order to obtain the approval of the Administrator.

(c) In order to obtain approval, a State program must be consistent with the Federal program and State programs applicable in other States. For purposes of this paragraph, the phrase "State programs applicable in other States" refers only to those hazardous waste programs which have received authorization under this Part. Any aspect of the State program which restricts, impedes, or operates as a ban on the free movement across the State border of hazardous wastes from or to other States for treatment, storage or disposal at facilities having hazardous waste permits under the Federal or an approved State program may be deemed inconsistent for purposes of this paragraph.

§ 123.34 Program description.

The State's program description shall meet the requirements of § 123.4 and include the following:

(a) In the case of a submission for interim authorization the State's program description shall contain the following:

(1) A general description and estimate of:

(i) The number, types and relative sizes of activities to be regulated by the State during the interim authorization period; and

(ii) If available, the total quantity of hazardous wastes expected to be disposed of annually from both in-State and out-of-State sources.

(2) An "authorization plan" which shall describe the additions or modifications necessary to the State program to qualify for authorization under this Part by the end of the interim authorization period. This plan shall include a schedule which the State proposes to achieve these additions or modifications, and shall describe the nature of and schedules for any changes in State legal authority, resource levels, the permit system and the surveillance and enforcement program which will be necessary during the interim authorization period in order to enable the State to become eligible for authorization.

(b) In the case of a submission for authorization, the State's program description shall include:

(1) A description of the State manifest system.

(2) A description of the types and relative sizes of regulated activities, including an estimate of the number of the following:

(i) Generators;

(ii) Transporters; and

(iii) On- and off-site storage, treatment and disposal facilities which must file for or have been issued a State permit.

(3) If available, an estimate of the annual quantities of hazardous wastes:

(i) Generated within the State;

(ii) Transported into or out of the State; and

(iii) Stored, treated, or disposed of: (A) on-site; and (B) off-site.

(c) Where more than one agency within a State has responsibility for administering the State program, an identification of a "lead agency" and a description of how the State agencies will coordinate their activities.

(d) The State's program description may include such other matters as the State deems relevant.

[*Comment:* A State's past performance in responding to situations involving hazardous waste which may present an endangerment to health or the environment will be considered by EPA in deciding whether to approve its hazardous waste programs.]

§ 123.35 Attorney General's statement for interim authorization.

In the case of a submission for interim authorization, the Attorney General's Statement shall certify that the State has legal authority to implement the program (see, § 123.32) and that the authorization plan (see § 123.34(a)(2)), if carried out, would provide the State with the legal authority to meet the requirements for authorization.

§ 123.36 Progress reports.

In accordance with the reporting requirement of § 123.11, the State Director of a State with interim authorization shall submit a semi-annual progress report to the EPA Regional Administrator within four weeks of the date six months after the date of conferral of interim authorization status, and at six month intervals thereafter

until the expiration of interim authorization. Such reports shall briefly summarize, in a manner and form prescribed by the Administrator, the State's compliance in meeting the requirements of the authorization plan, the reasons and proposed remedies for any delay in meeting milestones, and the anticipated problems and solutions for the next reporting period.

§ 123.37 Memorandum of Agreement.

In addition to the requirements of § 123.6, the Memorandum of Agreement shall include provisions on the following:

(a) The Regional Administrator or his designee may conduct inspections of all major HWM facilities in each Federal fiscal year for which the State has received interim authorization or authorization. The Regional Administrator and the State Director may agree to limitations regarding inspections of non-major HWM facilities, generators and transporters.

(b) The State Director shall agree to forward to the Regional Administrator copies of draft permits and permit applications for all major HWM facilities for review and comment. The Regional Administrator and the State Director may agree to limitations regarding review and comment of draft permits and/or permit applications for non-major HWM facilities.

(c) No limitation on EPA inspection of non-major HWM facilities, generators and transporters under paragraph (a), shall restrict EPA's right to inspect any HWM facility, generator or transporter it has cause to believe is not in compliance with RCRA; however, before conducting an inspection, EPA will normally allow the State a reasonable opportunity to conduct a compliance evalution inspection.

[*Comment:* The inspections conducted pursuant to paragraph (a) are intended to be routine compliance evaluation surveys. Except for major HWM facilities, EPA may agree to limit these routine inspections. However, paragraph (c) provides that EPA may inspect any facility, generator or transporter which the Agency has cause to believe is violating RCRA after affording the State the opportunity to investigate the situation.]

§ 123.38 EPA review of State permits.

(a) The Regional Administrator may comment on permit applications and draft permits within the time provided in the Memorandum of Agreement.

(b) Where a comment indicates that EPA believes issuance of the permit would be inconsistent with RCRA or regulations promulgated thereunder, it shall set forth:

(1) A statement of the reasons for the comment (including the section of RCRA or regulations promulgated thereunder that support the comment); and

(2) The actions that should be taken by the State Director in order to address the comments (including the terms and conditions which the permit would include if it were issued by the Regional Administraor).

(c) The Regional Administrator shall withdraw such a comment if satisfied that the State met or refuted his or her concerns.

§ 123.39 Operational requirements.

(a) In addition to meeting the requirements of § 123.8, any State hazardour waste permit program must have legal authority to implement each of the following provisions and shall be administered in accordance with each of the following provisions:

(1) Section 122.23—(Application for a permit);

(2) Section 122.24–(Establishing permit terms and conditions); and

(3) Section 122.27—(Reporting).

(b) State hazardous waste programs must have legal authority to control the facilities and activites covered by §§ 122.25 (special HWM facility permits), 122.26 (permits by rule), and 122.28 (emergency authorizations). States may choose to regulate these facilities and activities in the same manner as EPA under §§ 122.25, 122.26 and 122.28 or in a more stringent manner.

[*Comment:* An example of more stringent control would be the issuance of an individual permit rather than to authorize the activity by rule.]

(c) Any State program shall provide a degree of control over the generation and transportation of hazardous wastes equivalent to 40 CFR Part 250, Subparts B and C (proposed at 43 FR 58969, December 18, 1978, and 43 FR 18506, April 28, 1978, respectively), and shall include the management of manifests involving both intrastate and interstate transportation of hazardous waste. States shall take such measures as may be appropriate to ensure that interstate shipments of hazardous wastes are sent to and arrive at permitted HWM facilities. States must use the manifest format published by the Administrator in the Federal Register (40 CFR 250.22(h), proposed at 43 FR 58977 and 58980), but may supplement that format as appropriate to meet specific requirements or needs.

(d) The State process for identification and/or listing of hazardous waste and the standards applicable to owners and operators of hazardous waste storage, treatement and disposal facilities shall provide a degree of control equivalent to 40 CFR 250, Subpart A and D (proposed at 43 FR 58954–58966 and 58994–59022 respectively, December 18, 1978).

[*Comment:* Section 3006(b) does not require State programs to be identical to EPA's program, but only "equivalent." These regulations identify what is necessary for a program to be considered "equivalent" to the Federal program, and provide the State a degree of flexibility within the basic framework. The degree of flexibility accorded to States has been carefully set out in the regulations themselves. A program will be considered "equivalent" only if it meets all applicable requirements of Part 123.

To meet the requirements of this Part, States need not use the same language or structure as RCRA and its regulations. However, where allowable under State law, EPA encourage States to incorporate Federal requirements by reference.

The proposed regulations of 40 CFR Part 250 indicate, to an extent, certain requirements for State programs which are necessary in order to be deemed "equivalent." For example, 40 CFR 250.10(c), advises States that in order to be deemed equivalent "their programs [must] contain standards and procedures which identify as hazardous at least the same universe of wastes defined as hazardous" by EPA. In addition, the Agency is considering several alternative approaches for systematically judging equivalency with the 40 CFR Part 250 requirements, including requiring States to directly employ 40 CFR Part 250. For further information and discussion see the preamble to this Part.]

§ 123.40 Approval process.

(a) These regulations identify the procedures by which State Program applications for authorization or interim authorization will be developed and process. Except as exressly provided, each of these requirements apply both to requests for authorization and for interim authorization.

(b) Prior to submitting an application to EPA for approval of a State program, the State shall issue public notice of its intent to seek program approval from EPA. This public notice shall:

(1) Be circulated in a manner calculated to attract the attention of interested persons including:

(i) Publication in enough of the largest newspapers in the State to attract Statewide attention; and

(ii) Mailing to persons on the State agency mailing list and to any other persons whom the agency has reason to believe are interested;

(2) Indicate when and where the State's proposed submission may be reviewed by the public or discussed with agency officials in such

informational public meetings as the agency may choose to hold;

(3) Indicate the cost of obtaining a copy of the submission;

(4) Provide for a comment period of not less than 30 days during which interested members of the public can express their views on the proposed program;

(5) Provide that a public hearing will be held by the State or EPA if sufficient public interest is shown or, alternatively, schedule such a public hearing.

(i) Any public hearing to be held by the State on its application for authorization shall be scheduled no earlier than 30 days after the notice of hearing is published;

(ii) The State is not required to hold a separate public hearing on its application for interim authorization. If the State declines to hold a hearing, the State shall state in its notice of application that a public hearing will be held by EPA if sufficient public interest is shown. The State shall participate in any public hearing held by EPA in lieu of a State hearing (see § 123.62(e) (1) and (2));

(6) Indicate what type of authorization the State will seek and briefly outline the fundamental aspects of the State program and, where interim authorization is sought, of the authorization plan; and

(7) Indicate who an interested member of the public should contact with any questions.

(c) If the proposed State program is substantially modified after the public comment period provided in paragraph (b)(4) of this section, the State shall, prior to submitting its program to the Administrator, provide the opportunity for further public comment in accordance with the procedures of paragraph (b) of this section, *provided* that the opportunity for further public comment may be limited to those portions of the State's application which have been changed since the prior public notice.

(d) After complying with the requirements of (b) and (c) above the State may submit, in accordance with § 123.3, a proposed program to EPA for approval. The program submission shall include copies of all written comments received by the State, a transcript or recording of any public hearing which was held by the State and a responsiveness summary which identifies the public participation activities conducted, describes the matter presented to the public, summarizes significant comments received and responds to these comments, including explanations on what the State has done to accommodate these comments.

(e) Within ninety days from the date of receipt of a complete program submission, the Administrator shall:

(1) Make a tentative determination as to whether or not he expects to grant authorization to the State program or issue notice, in accordance with the procedures of paragraph (b) of this section, of a public hearing on the State's application for interim authorization. If the Administrator indicates that he may not approve the State program he shall include a general statement of his areas of concern. The Administrator shall give notice of this tentative determination in the Federal Register and in accordance with subparagraph (b)(1) of this Section;

(2) Schedule a public hearing to be held by EPA no earlier than 30 days after notice of the tentative determination of authorization or of a public hearing on interim authorization, *provided*, that if public interest in a hearing is not expressed, the hearing may be cancelled if a statement to this effect is included in the public notice;

(3) Afford the public 30 days after the notice to comment on the State's submission and the tentative determination; and

(4) Note the availability of the State submission for inspection and copying by the public.

(f) Within ninety days of the notice given pursuant to paragraph (e) of this section, the Administrator shall make a final determination whether or not to approve the State's program taking into account any comments submitted. The Administrator shall give notice of this final determination in the Federal Register and in accordance with subparagraph (b)(1) of this section. If the Administrator determines not to approve the State program, the notification shall include a concise statement of the reasons for this determination.

§ 123.61 Criteria for withdrawal.

In addition to the criteria set forth in § 123.14, any aspect of the State program which restricts, impedes or operates as a ban on the free movement across the State border of hazardous wastes from or to other States for treatment, storage or disposal at facilities having hazardous waste permits under an approved State or Federal program constitutes grounds for withdrawal of authorization.

Subpart C—Additional Requirements for State Underground Injection Control Programs

§ 123.61 Purpose and scope.

(a) This Subpart describes additional substantive and procedural requirements for State UIC programs authorized under sections 1421 and 1422 of SDWA. In case of any inconsistency between this Subpart and Subpart A, this Subpart is controlling.

(b) Each State listed in the Federal Register under section 1422(a) of SWDA shall submit to the Administrator a proposed State UIC program complying with § 123.3 of this Part within 270 days of the date of promulgation of these regulations or within 270 days of the date of listing under section 1422(a) of SDWA, whichever is later. The Administrator may, for good cause, extend the date for submission of a proposed State UIC program for up to an additional 270 days.

(c) EPA will establish a UIC program in any State which does not comply with paragraph (b) of this section. EPA will continue to operate a UIC program in such a State until the State receives approval of a UIC program in accordance with the requirements of this Part.

(d) Any State which desires to operate a UIC program but which is not listed by the Administrator under section 1422(a) of the SDWA may, nonetheless, make a submission for program approval in accordance with the requirements of this Part. In addition to meeting the requirements of § 123.3 of this Part, such a submission shall contain a petition from the Governor of the State requesting that the State be listed.

[*Comment:* States which are authorized to administer the NPDES permit program under section 402 of CWA are encouraged to rely on existing statutory authority, to the extent possible, in developing a State UIC program. Section 402(b)(1)(D) of CWA requires that NPDES States have the authority "to issue permits which . . . control the disposal of pollutants into wells." In many instances, therefore, NPDES States will have existing statutory authority to regulate well disposal which satisfies the requirements of the UIC program. Note, however, that CWA excludes certain types of well injections from the definition of "pollutant." If the State's statutory authority contains a similar exclusion it may need to be modified to qualify for UIC program approval.

Unlisted States are also encouraged to seek UIC approval prior to listing. If EPA determines that the State's program is fully approvable the State will be listed and approved at the same time.]

(e) Whenever a State UIC program is fully approved by EPA, the State

assumes primary enforcement authority under section 1422(b)(3) of SDWA. EPA retains primary enforcement responsibility whenever the State program is disapproved in whole or in part.

[*Comment:* States with fully approved programs have authority to enforce any violation of the underground injection control program. States which have partially approved programs have authority to enforce any violation of the approved portion. In either case, EPA retains authority to enforce violations of a State underground injection control program, except that, when a State has a fully approved program, EPA will not take enforcement actions without providing prior notice to the State and otherwise complying with section 1423 of SDWA.]

(f)(1) If a State can demonstrate that there are no underground injections within the State for one or more types of injection wells subject to SDWA, the State need not submit a program to regulate such injections. However, the State shall demonstrate adequate legal authority to initiate control over such injections should they occur in the future.

(2) State UIC programs may be approved in part or in full within the discretion of the Administration. (See § 122.3, Definition of "Partial Authorization").

§ 123.52 Program description.

(a) In addition to the requirements of § 123.4, the State's program description shall include:

(1) A State permit plan in accordance with paragraph (b) of this section. This permit plan satisfies the requirements of § 123.4(b)(4);

(2) A detailed description of how the State will implement the authorization of underground injection by rule in accordance with § 122.35, including the procedures which will be followed in promulgating such rules.

(3) a brief description and schedule for the State's program to establish and maintain a current inventory of injection wells which are required to be permitted under State law;

(4) A description of aquifers or parts thereof which the State has determined are underground sources of drinking water under § 122.33, a detailed description of the aquifers, or parts thereof, not designated, and a summary of the data upon which the exemptions are based.

(5) A description and schedule for the State's program to establish an inventory of Class V wells, to prohibit Class IV wells and to assess the need for a program to regulate Class V wells.

(b) The State Director shall develop a permit plan which assures that all injection wells within the State, except those authorized by rule, are issued a UIC permit as expeditiously as possible but no later than 5 years after approval of the State UIC program. The permit plan shall:

(1) Describe the State's priorities for issuing permits including the number of permits by class of injectors which will be issued each year over the first five years of operation of the program;

(2) Describe how the State will implement the mechanical integrity testing requirements of § 146.08 including the frequency of testing that will be required and the number of tests that will be reviewed by the State each year; and

(3) Describe how the State will notify injectors of the requirement for a permit and when to file permit applications (i.e, by individual notice, rule, regulation, or statute). The notice required by this paragraph shall clearly establish application filing deadlines as soon as possible but not later than 4 years after program approval for each injection well which must receive a permit.

(c) In determining the priorities required by subparagraphs (b)(1) and (b)(2) the Director shall consider the following factors:

(1) Injection wells known to be contaminating underground sources of drinking water;

(2) Injection wells known to be injecting fluids containing toxic or hazardous contaminants;

(3) Likelihood of contamination of underground sources of drinking water;

(4) Potentially affected population;

(5) Injection wells violating existing State requirements;

(6) Coordination with the issuance of permits required by other State or Federal permits programs;

(7) Age and depth of the injection well; and

(8) Expiration dates of existing State permits, if any.

§ 123.53 Attorney General's Statement.

In addition to the requirements of § 123.5, the State's Attorney General's Statement shall include an analysis of the legal authority for and enforceability of any rule prohibiting or authorizing well injections without a permit.

§ 123.54 Requirement to obtain a permit.

The State may authorize certain well injections by rule rather than by permit. Any authorization by rule shall comply with § 122.35.

§ 123.55 Progress reports.

In accordance with § 123.11, each State listed by the Administrator as needing a UIC program (see § 123.51(b)) shall submit to the Administrator six months after the date of promulgation of these regulations, or six months after the date of listing, whichever is later, a report describing the State's progress in developing a UIC program. If the Administrator extends the time for submission of a UIC program an additional 270 days, pursuant to § 123.51(b), the State shall submit a second report six months after the first report is due. The report shall be in a manner and form prescribed by the Administrator.

§ 123.56 Annual report.

(a) Each approved State shall submit each year a written report to the Administrator (in a manner and form prescribed by the Administrator) consisting of:

(1) The noncompliance information required under § 122.15(b) including a summary of violations during the preceding year;

(2) A summary of enforcement actions taken by the State Director including actions taken to enforce the ban on Class IV wells;

(3) A detailed description of the State's implementation of its program;

(4) Any necessary changes to the program description and the permit plan which more accurately reflect the State's progress in issuing permits;

(5) A list of all permits issued where an alternative for tubing and packer has been approved by the State Director under 40 CFR § 146.12;

(6) An updated inventory of active underground injection operations in the State; and

(7) A summary of all surface water and ground water contamination cases which may have been caused or affected by underground injection.

(b) In addition to the requirements of paragraph (a) of this section the State Director shall provide the Administrator within three months of the completion of the first year of State operation of the UIC program a supplemental report containing information on remedial actions taken by operators of Class II wells based upon these regulations (including information on the results of mechanical integrity testing and on evaluations of construction of nearby wells located within the area of review). The supplemental report required by this paragraph may be submitted along with the annual report if the time for reporting under this paragraph coincides with that of paragraph (a).

[*Comment:* EPA will issue further guidance on the preparation of the "mid-course assessment" required under this paragraph.]

§ 122.57 Operational requirements.

In addition to the requirements of § 123.8, State UIC programs shall have legal authority to implement each of the following provisions and shall be administered in accordance with each of the following provisions:

(a) Section 122.33—(Designation of aquifers);

(b) Section 122.35—(Authorization by rule);

(c) Section 122.36—(Authorization by permit);

(d) Section 122.37—(Area permits);

(e) Section 122.38—(Corrective action);

(f) Section 122.39—(General prohibition against movement of fluids into underground sources of drinking water);

(g) Section 122.42—(Permit terms);

(h) Section 122.43—(Reporting);

(i) Section 122.44—(Special requirements for wells managing hazardous wastes);

(j) Section 122.45—(Elimination of Class IV); and

(k) Section 122.46—(Inventory of Class V).

§ 122.58 Program approval process.

(a) Prior to submitting an application to the Administrator for approval of a State UIC program, the State shall issue public notice of its intent to adopt a UIC program and to seek program approval from EPA. This public notice shall:

(1) Be circulated in a manner calculated to attract the attention of interested persons. Circulation of the public notice shall include publication in enough of the largest newspapers in the State to attract Statewide attention and mailing to persons on appropriate State mailing lists;

(2) Indicate when and where the State's proposed program submission may be reviewed by the public;

(3) Indicate the cost of obtaining a copy of the submission;

(4) Provide for a comment period of not less than 30 days during which interested persons can comment on the proposed UIC program;

(5) Schedule a public hearing on the State program for no less than 30 days after notice of the hearing is published;

(6) Briefly outline the fundamental aspects of the State UIC program; and

(7) Indicate whom an interested member of the public should contact for further information.

(b) After complying with the requirements of paragraph (a) above any State may submit a proposed UIC program under section 1422 of SDWA and § 123.3 of this Part to EPA for approval. In accordance with § 123.3(d)(3), such a submission shall include a showing of compliance with paragraph (a) of this section including a responsiveness summary which identifies the public participation activities conducted, describes the matters presented to the public, summarizes significant comments received and responds to these comments.

(c) Upon determining that a State's submission for UIC program approval is complete the Administrator shall issue public notice of the submission, provide an opportunity to comment, and schedule a public hearing. This notice may specify that a public hearing will not be held unless sufficient public interest is expressed.

(d) Within 90 days of the receipt of a complete submission (as provided in § 123.3) or material amendment thereto, the Administrator shall by rule, either fully approve, disapprove, or approve in part the State's UIC program.

§ 122.59 Withdrawal process.

Approval of a State UIC program may be withdrawn and a Federal program established in its place where the Administrator determines, after holding a public hearing, that the State program is not in compliance with the requirements of SDWA and this Part.

(a) *Notice to State of Public Hearing.* If the Administrator has cause to believe that a State is not administering or enforcing its authorized program in compliance with the requirements of SDWA and this Part, he or she shall inform the State by registered mail of the specific areas of alleged noncompliance. If the State demonstrates to the Administrator within 30 days of such notification that the State program is in compliance, the Administrator shall take no further action toward withdrawal and shall so notify the State by registered mail.

(b) *Public Hearing.* If the State has not demonstrated its compliance to the satisfaction of the Administrator, within 90 days after notification, the Administrator shall inform the State Director and schedule a public hearing to discuss withdrawal of the State program. This hearing shall be convened not less than 60 days nor more than 75 days following the publication of the notice of the hearing. Notice of the hearing shall identify the Administrator's concerns. All interested parties shall be given opportunity to present written and oral testimony on the State's program at the public hearing.

(c) *Notice to State of Findings.* Where the Administrator finds after the public hearing that the State is not in compliance, he or she shall notify the State by registered mail of the specific deficiencies in the State program and of necessary remedial actions. Within 90 days of receipt of the above letter, the State shall either carry out the required remedial action or the Administrator shall withdraw program approval. If the State carries out the remedial action or, as a result of the hearing is found to be in compliance, the Administrator shall so notify the State by registered mail and conclude the withdrawal proceedings.

§ 122.60 State UIC program revisions.

Within 270 days of any amendment to Parts 122, 123, 124 or 146 which revises or adds any requirement respecting an approved State UIC program, the State shall submit such information as is specified by EPA showing that the State UIC program meets the revised or added requirement. Failure by the State to comply with this provision is cause for disapproval or partial disapproval of the State program.

Subpart D—Additional Requirements for State Programs Under the National Pollutant Discharge Elimination System

§ 122.71 Purpose and scope.

(a) This subpart describes additional requirements for State NPDES programs under sections 318, 402 and 405 of CWA. A State NPDES program will not be approved by the Administrator under section 402 of CWA unless it has authority to control the discharges specified in sections 318 and 405(a) of CWA. Permit programs under sections 318 and 405 will not be approved independent of a section 402 permit program.

(b) These regulations are promulgated under the authority of sections 304(i) and 101(e) of CWA, and implement the requirements of those sections.

(c) No partial NPDES programs will be approved by EPA. The State program must regulate (except as provided in § 122.63) all point source discharges of pollutants, discharges into aquaculture projects and disposal of sewage sludge which results in any pollutant from such sludge entering into any waters of the United States within the State's jurisdiction. NPDES authority may be shared by two or more State agencies but each agency must have Statewide jurisdiction over a class of activities.

Where more than one agency is responsible for issuing permits, each agency must make a submission meeting the requirements of § 123.3 before formal EPA review will commence.

[*Comment:* Although these regulations require States to administer complete programs, EPA recognizes that, as a matter of Federal law, a State may lack authority to exercise jurisdiction over discharges from facilities on Indian lands. The lack of such authority does not constitute grounds for refusal to authorize State administration of a program. However, to the extent that States have authority to exercise jurisdiction, they are required to do so.]

(d) After program approval EPA shall retain jurisdiction over any permits (including general permits) which it has issued unless arrangements have been made with the State in the Memorandum of Agreement for the State to assume responsibility for these permits. Retention of jurisdiction shall include the processing of any permit appeals, modification requests, or variance requests; the conduct of inspections, and the receipt and review of self-monitoring reports. If any permit appeal, modification request or variance request is not finally resolved when the Federally issued permit expires, EPA may, when agreed to by the State, continue to retain jurisdiction until the matter is resolved.

(e) In case of any inconsistency between this Subpart and Subpart A, this Subpart is controlling.

§ 123.72 Memorandum of Agreement.

(a) In addition to the requirements of § 123.6, the Memorandum of Agreement between the Regional Administrator and the State Director shall contain provisions specifying the extent to which EPA review of State-issued permits will be waived under sections 402 (d)(3), (e) or (f) of CWA. While the Regional Administrator and the State may agree to waive EPA review of certain "classes or categories" or permits, no waiver of review may be granted for the following discharges:

(1) Discharges into the territorial sea or contiguous zone;

(2) Discharges which may affect the waters of a State other than the one in which the discharge originates;

(3) Proposed general permits (see § 122.82);

(4) Discharges from publicly owned treatment works with a daily average discharge exceeding 1 million gallons per day;

(5) Discharges of uncontaminated cooling water with a daily average discharge exceeding 500 million gallons per day;

(6) Discharges from any major discharger or from any discharger within any of the 21 industrial categories listed in the Appendix A to Part 122;

(7) Discharges from other sources with a daily average discharge exceeding 0.5 (one half) million gallons per day, except that EPA review of permits for discharges on non-process wastewater may be waived, regardless of flow, with the prior concurrence of the EPA Deputy Assistant Administrator for Water Enforcement;

(b) Whenever a waiver is granted under paragraph (a), a statement that the regional Administrator retains the right to terminate the waiver, in whole or in part, at any time by sending the Director written notice of termination. The waiver shall not affect the duty of the State to supply EPA with copies of all permit applications, public notices and final permits.

§ 123.73 Operational requirements.

In addition to the requirements of § 123.8, State NPDES programs shall have legal authority to implement each of the following provisions and must be administered in conformance with each of the following provisions:

(a) Section 122.64 (e) and (f)—(Variance applications);

(b) Section 122.66—(Duration of permits);

(c) Section 122.67—(Prohibitions);

(d) Section 122.68—(Conditions applicable to all permits);

(e) Section 122.69—(Applicable limitations, standards, prohibitions and conditions);

(f) Section 122.70—(Calculation and specification of effluent limitations and standards);

(g) Section 122.71—(Recording/reporting of monitoring results);

(h) Section 122.72—(Non-compliance reporting);

(i) Section 122.73—(Modifications);

(j) Section 122.74—(Permit termination);

(k) Section 122.75—(Disposal into wells, etc.);

(l) Section 122.76—(Concentrated animal feeding operations);

(m) Section 122.77—(Aquatic animal production facilities);

(n) Section 122.78—(Aquaculture projects);

(o) Section 122.79—(Separate storm sewers);

(p) Section 122.80—(Silviculture);

(q) Section 122.82—(General Permits), *provided* States are not required to implement the general permit program under § 122.82. If a State chooses to issue general permits, such action is subject to the following conditions:

(1) Any general permit shall be issued in accordance with § 122.82;

(2) Prior to, or at the time of proposal of any general permit, the State Attorney General (or other legal officer as appropriate, see § 123.5) shall certify that the State has adequate legal authority to issue and enforce general permits;

(3) EPA shall have 90 days to review any proposed general permit; and

(4) All general permits, except those for separate storm sewers, may be objected to on EPA's behalf by the EPA Deputy Assistant Administrator for Water Enforcement. The State shall transmit a copy of any such proposed general permit to the EPA Deputy Assistant Administrator for Water Enforcement at the same time the proposed permit is transmitted to the enforcement Division Director;

(r) Section 124.56—(Fact sheets);

(s) Section 124.58—(Public notice);

(t) Section 124.59—(Comments from government agencies);

(u) Subparts A, B, C, D, H, I, J, K and L of Part 125; and

(v) 40 CFR Parts 129, 133 and Subchapter N.

§ 123.74 Control of disposal of pollutants into wells.

State NPDES permit programs must have authority to issue permits to control the disposal of pollutants into wells. Such authority shall enable the State Director to protect the public health and welfare and to prevent the pollution of ground and surface waters by prohibiting well discharges or by issuing permits for such discharges with appropriate permit terms and conditions.

[*Comment:* States which are authorized to administer the NPDES permit program under section 402 of CWA are encouraged to rely on existing statutory authority, to the extent possible, in developing a State UIC program under section 1422 of SDWA. Section 402(b)(1)(D) of CWA requires that NPDES States have the authority "to issue permits which . . . control the disposal of pollutants into wells." In many instances, therefore, NPDES States will have existing statutory authority to regulate well disposal which satisfies the requirements of the UIC program. Note, however, that CWA excludes certain types of well injections from the definition of "pollutant." If the State's statutory authority contains a similar exclusion it may need to be modified to qualify for UIC program approval.]

§ 123.75 Inspections, monitoring, entry and reporting.

Any State NPDES permit program shall provide adequate authority to inspect, monitor, enter, and require

reports to at least the same extent as required in section 306 of CWA.

§ 123.76 Receipt and use of Federal information.

Upon receiving EPA approval, the State agency administering a permit program shall be sent any relevant information which was collected by EPA. The Memorandum of Agreement under § 123.6 shall provide for the following, in such manner as the State Director and the Regional Administrator shall agree:

(a) Prompt transmission to the State Director from the Regional Administrator of copies of any pending permit applications or any other relevant information collected before the approval of the State permit program and not already in the possession of the State Director. Where existing permits are transferred to the State Director (e.g., for purposes of compliance monitoring, enforcement or reissuance), relevant information includes support files for permit issuance, compliance reports and records of enforcement actions.

(b) Procedures to ensure that the State Director will not issue a permit on the basis of any application received from the Regional Administrator which the Regional Administrator identifies as incomplete or otherwise deficient until the State Director receives information sufficient to correct the deficiency.

§ 123.77 Transmission of information to EPA.

(a) Each State agency administering a permit program shall transmit to the Regional Administrator copies of permit program forms and any other relevant information to the extent and in the manner agreed to by the State Director and the Regional Administrator in the Memorandum of Agreement and not inconsistent with this Part. The Memorandum of Agreement shall provide for the following:

(1) Prompt transmission to the Regional Administrator of a copy of any complete permit applications received by the State Director;

(2) Prompt transmission to the Regional Administrator of notice of every action taken by the State agency related to the consideration of any permit application, including a copy of each proposed or draft permit and any terms, conditions, requirements, or documents which are related to the proposed or draft permit or which affect the authorization of the proposed permit. For proposed permits the State program shall provide a period of time (up to 90 days) in which the Regional Administrator or, where appropriate, the EPA Deputy Assistant Administrator for Water Enforcement (see § 122.73(q)), may comment upon, object to, or make recommendations with respect to the proposed permit. A copy of any comment, objection or recommendation shall be sent to the permit applicant by the Regional Administrator. In the case of general permits, EPA shall have 90 days to comment upon, object to or make recommendations with respect to the proposed permit.

[*Comment:* Normally EPA review time is substantially less than 90 days. However, EPA reserves the right to take a full 90 days to supply specific grounds for objection where a general objection is filed within the review period of the Memorandum of Agreement.]

(3) Transmission to the Regional Administrator of a copy of every issued permit following issuance, along with any and all terms, conditions, requirements, or documents which are related to or affect the authorization of the permit.

(b) The State program shall provide for transmission by the State Director to EPA of:

(1) Notices from publicly owned treatment works under § 122.68 and 40 CFR Part 403, upon request of the Regional Administrator;

(2) A copy of any significant comments presented in writing pursuant to the public notice and a summary of any significant comments presented at any hearing on any draft permit if:

(i) The Regional Administrator requests this information; or

(ii) The proposed permit contains requirements significantly different from those contained in the tentative determination and draft permit; or

(iii) Significant comments adverse to the tentative determination and draft permit have been presented at the hearing or in writing pursuant to the public notice; and

(3) A quarterly noncompliance report in accordance with § 122.72.

(c) Within the time period agreed upon in the Memorandum of Agreement, (or 90 days in the case of proposed general permits), the Regional Administrator (or, where appropriate, the EPA Deputy Assistant Administrator for Water Enforcement) pursuant to the right to object provided in CWA and § 123.78, may comment upon, object to, or make recommendations on any proposed permit.

(d) The Regional Administrator may, by agreement with the State Director in the Memorandum of Agreement (see § 123.72) waive the right to review, object to, or comment upon proposed permits for classes, types or sizes of discharges within any category of point sources, including the right to receive information under paragraphs (a)(2) and (b)(2) of this section.

(e) Any State permit program shall keep such records and submit to the Administrator such information as the Administrator may reasonably require to ascertain whether the State program complies with the requirements of CWA or of this Part.

§ 123.78 Objections to proposed permits.

(a)(1) Within the period of time provided under the Memorandum of Agreement, the Regional Administrator shall notify the State Director of any objection to issuance of a proposed permit (except as provided in subparagraph (2) of this paragraph for proposed general permits). This notification shall set forth in writing the general nature of the objection.

(2) Within 90 days following receipt of the proposed permit which has been objected to under subparagraph (1), or in the case of general permits within 90 days after receipt of the proposed general permit, the Regional Administrator, or, in the case of general permits other than for separate storm sewers, the EPA Deputy Assistant Administrator for Water Enforcement shall also set forth in writing and transmit to the State Director:

(i) A statement of the reasons for the objection (including the section of CWA or regulations that support the objection), and

(ii) The actions that must be taken by the State Director in order to eliminate the objection (including the effluent limitations and conditions which the permit would include if it were issued by the Regional Administrator).

[*Comment:* This paragraph, in effect, modifies any existing agreement between EPA and the State which provides less than 90 days for EPA to supply the specific grounds for an objection. However, where an agreement provides for an EPA review period of less than 90 days, EPA must file a general objection, in accordance with subparagraph (a)(1) within the time specified in the agreement. This general objection will be followed by a specific objection within the 90-day statutory period. This modification to the MOA's is necessary since the Clean Water Act of 1977 now requires EPA to provide detailed information concerning acceptable permit terms and conditions. To avoid possible confusion, MOA's should be changed to reflect this.]

(b) The Regional Administrator may object to the issuance of a proposed permit as being outside the guidelines and requirements of CWA. This

objection must be based upon one or more of the following grounds:

(1) The permit fails to apply, or to ensure compliance with, any applicable requirement of this Part;

[*Comment:* Under the provisions of this section, a permit not requiring the achievement of required effluent limitations by applicable statutory deadlines shall be subject to objection by the Regional Administrator.]

(2) In the case of any proposed permit for which notification to the Administrator is required under section 402(b)(5) of CWA, the written recommendations of an affected State have not been accepted by the permitting State and the Regional Administrator finds the reasons for rejecting the recommendations are inadequate;

(3) The procedures followed in connection with formulation of the proposed permit failed in a material respect to comply with procedures required by CWA or by regulations thereunder or by the Memorandum of Agreement;

(4) Any finding made by the State Director in connection with the proposed permit misinterprets CWA or any guidelines or regulations under CWA, or misapplies them to the facts;

(5) Any provisions of the proposed permit relating to the maintenance of records, reporting, monitoring, sampling, or the provision of any other information by the permittee are inadequate, in the judgment of the Regional Administrator, to assure compliance with permit conditions, including effluent standards and limitations required by CWA, by the guidelines and regulations issued under CWA, or by the proposed permit;

(6) In the case of any proposed permit with respect to which applicable effluent standards and limitations under sections 301, 302, 306, 307, 318, 403 and 405 of CWA have not yet been promulgated by the Agency, the proposed permit, in the judgment of the Regional Administrator, fails to carry out the provisions of CWA or of any regulations issued under CWA;

[*Comment:* The provisions of this subparagraph apply to determinations made pursuant to § 125.3(c)(2) in the absence of applicable guidelines and to best management practices under section 304(e) of CWA, which must be incorporated into permits as requirements under sections 301, 306, 307, 318, 403 or 405, as the case may be.]

(7) Issuance of the proposed permit would in any other respect be outside the requirements of CWA, or regulations issued under CWA.

(c) Prior to notifying the State Director of an objection based upon any of the grounds set forth in paragraph (b) of this section, the Regional Administrator:

(1) Shall consider all data transmitted pursuant to § 123.77;

(2) May, if the information provided is inadequate to determine whether the proposed permit meets the guidelines and requirements of CWA, request the State Director to transmit to the Regional Administrator the complete record of the permit proceedings before the State, or any portions of the record that the Regional Administrator determines are necessary for review. If this request is made within 30 days of receipt of the State submittal under § 123.77, it shall constitute an interim objection to the issuance of the permit, and the full period of time specified in the Memorandum of Agreement for the Regional Administrator's review shall recommence when the Regional Administrator has received such record or portions of the record; and

(3) May, in his or her discretion, and to the extent feasible within the period of time available under the Memorandum of Agreement, afford to every interested person an opportunity to comment on the basis for an objection;

(d) Within 90 days of receipt by the State Director of an objection by the Regional Administrator, the State or interstate agency or any interested person may request that a public hearing be held by the Regional Administrator on the objection. Following a request, the Regional Administrator shall provide public notice and hold a public hearing in accordance with the procedures of §§ 124.11 and 124.13 if warranted by significant public interest. A hearing shall be held whenever requested by the State or the interstate agency which proposed the permit.

(e) A public hearing held under paragraph (d) shall be conducted by an EPA panel in an orderly and expeditious manner. Members of this panel shall include the Regional Administrator, the Assistant Administrator for Enforcement, the General Counsel, or their respective representatives.

(f) At the conclusion of the public hearing the Regional Administrator shall reaffirm the original objection, modify the terms of the objection, or withdraw the objection, and shall notify the State of this decision.

(g) Where the Regional Administrator has objected to a proposed permit under this section, he or she may issue the permit in accordance with Parts 121, 122 and 124 and any other guidelines and requirements of CWA in the following circumstances:

(1) If no public hearing is held under paragraph (d) and the State does not resubmit a permit revised to meet the Regional Administrator's objection within 90 days of receipt of the objection; or

(2) If a public hearing is held under paragraph (d) and the State does not resubmit a permit revised to meet the Regional Administrator's objection or modified objection within 30 days of the date of the Regional Administrator's notification under paragraph (f) of this section.

[*Comment:* Where the time set out in this paragraph expires without acceptable State action, exclusive authority to issue the permit passes to EPA.]

(h) In the case of proposed general permits for discharges other than from separate storm sewers substitute "EPA Deputy Assistant Administrator for Water Enforcement" for "Regional Administrator" whenever it appears in paragraphs (b), (c), (d), (f), and (g).

§ 123.79 Prohibition.

Any State permit program shall provide that no permit shall be issued when the Regional Administrator has objected in writing under section 402(d) of CWA.

§ 123.80 Compliance evaluation programs.

In addition to the requirements of § 123.9, State compliance evaluation programs shall:

(a) Have procedures and ability for:

(1) The maintenance of a comprehensive inventory of all sources covered by NPDES permits and a forecast of all reporting requirements to the State agency;

(2) Initial screening (i.e., pre-enforcement evaluation) of all permit or grant-related compliance information to identify violations and to establish the priority for further substantive technical evaluation;

(3) Where warranted, a substantive technical evaluation following the initial screening of all permit or grant-related compliance information to determine the appropriate agency response;

(4) The maintenance of a management information system which supports the compliance evaluation activities of this Part.

(b) Provide for inspections of the facilities of all major dischargers (see *Comment* to § 122.72) at least annually.

§ 123.81 Continuing planning process.

Any State permit program shall have an approved continuing planning process under 40 CFR Parts 130 and 131

and shall assure that its approved planning process is at all times consistent with CWA.

§ 123.82 Agency board membership.

(a) Each State permit program shall ensure that any board or body which approves all or portions of permits shall not include as a member any person who receives, or has during the previous 2 years received, a significant portion of income directly or indirectly from permit holders or applicants for a permit.

(b) For the purposes of this section:

(1) "Board or body" includes any individual, including the Director, who has or shares authority to approve all or portions of permits either in the first instance, as modified or reissued, or on appeal.

(2) "Significant portion of income" shall mean 10 percent or more of gross personal income for a calendar year, except that it shall mean 50 percent or more of gross personal income for a calendar year if the recipient is over 60 years of age and is receiving that portion under retirement, pension, or similar arrangement.

(3) "Permit holders or applicants for a permit" shall not include any department or agency of a State government, such as a Department of Parks or a Department of Fish and Wildlife.

(4) "Income" includes retirement benefits, consultant fees, and stock dividends.

(c) For the purposes of this section, income is not received "directly or indirectly from permit holders or applicants for a permit" where it is derived from mutual fund payments, or from other diversified investments over which the recipient does not know the identity of the primary sources of income.

§ 123.83 Approval process.

(a) After determining that a State program submission is complete, EPA shall publish notice of the State's application in the Federal Register, and in enough of the largest newspapers in the State to attract statewide attention, and shall mail notice to persons known to be interested in such matters, including all people on appropriate State and EPA mailing lists and all permit holders and applicants within the State. This notice shall:

(1) Provide a comment period of not less than 45 days during which interested members of the public may express their views on the State program;

(2) Provide for a public hearing within the State to be held no less than 30 days after notice is published in the Federal Register;

(3) Indicate the cost of obtaining a copy of the State's submission;

(4) Indicate where and when the State's submission may be reviewed by the public;

(5) Indicate whom an interested member of the public should contact with any questions; and

(6) Briefly outline the fundamental aspects of the State's proposed program, and the process for EPA review and decision.

(b) Within 90 days of the receipt of a complete program submission under § 123.3 the Administrator shall approve or disapprove the program based on the requirements of this Part and of CWA and taking into consideration all comments received. A responsiveness summary shall be prepared by the Regional Office which identifies the public participation activities conducted, describes the matters presented to the public, summarizes significant comments received and explains the Agency's response to these comments.

(c) If the Administrator approves the State's program he or she shall notify the State and publish notice in the Federal Register. EPA shall suspend the issuance of permits as of the date of program approval.

(d) If the Administrator disapproves the State program he or she shall notify the State of the reasons for the disapproval and of any revisions or modifications to the State program which are necessary to obtain approval.

Subpart E—Additional Requirements for State Programs Under Section 404 of the Clean Water Act

§ 123.91 Purpose and scope.

(a) This Subpart describes additional requirements, both procedural and substantive, for State permit programs under section 404 of the Clean Water Act (regulating discharges of dredged or fill material). Since EPA does not operate the section 404 program, there is no Subpart E to Part 122. Additional permit application and processing requirements applicable to State programs are set out in this Subpart.

(b) These regulations are promulgated under the authority of sections 101(e) and 501(a) of CWA.

(c) No partial section 404 programs will be approved by EPA. Except as provided in § 123.107, the State program must regulate all discharges of dredged or fill material into waters of the United States (as delineated in CWA section 404(g)(1)) within the State's jurisdiction.

(d) After program approval the Secretary shall retain jurisdiction over any permits (including general permits) which he or she has issued unless arrangements have been made with the State in the Memorandum of Agreement under § 123.93 for the State to assume responsibility for these permits. Retention of jurisdiction shall include the processing of any permit appeals, or modification requests; the conduct of inspections, and the receipt and review of self-monitoring reports. If any permit appeal or modification request is not finally resolved when the Federally issued permit expires, the Secretary, upon agreement with the State, may continue to retain jurisdiction until the matter is resolved.

[*Comment:* Under section 404(h)(5) of CWA, States are entitled, after program approval, to administer and enforce general permits issued by the Secretary. If the State chooses not to administer and enforce these permits, the Secretary retains jurisdiction until they expire.]

(e) In case of any inconsistency between this Subpart and Subpart A, Part 122 or Part 124, this Subpart is controlling.

(f) Compliance with a permit issued by a State approved under this Part during its term, including any activity conducted in compliance with a general permit, constitutes compliance for purposes of sections 309 and 505 of CWA, with sections 310, 307 and 403, except for any standard imposed under section 307(a)(5) of CWA.

§ 123.92 Memorandum of Agreement.

(a) In addition to the requirements of § 123.8, the Memorandum of Agreement between the regional Administrator and the State Director shall contain provisions on the scope of the waivers available under sections 404(b) or (l) of CWA. The Regional Administrator and the State, after consultation with the Corps of Engineers, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service, may agree to waive Federal review of certain "classes or categories" of permits. No waiver may be granted for the following activities:

(1) Discharges which may affect the waters of a State other than one in which the discharge originates;

(2) Major dischargers;

[*Comment:* EPA will formulate guidance defining what discharges are "major" under this paragraph. Comments are welcome.]

(3) Discharges into critical areas including fish and wildlife sanctuaries, National and historical monuments, wilderness areas and preserves,

National and State parks and the designated critical habitat of threatened or endangered species.

[*Comment:* EPA is considering adding to this list of critical areas. Comments are welcome.]

(4) Proposed general permits; or

(5) Discharges known or suspected to contain toxic pollutants in toxic amounts or hazardous substances in reportable quantities.

(b) Whenever a waiver is granted under paragraph (a), the Memorandum of Agreement shall contain a statement that the Regional Administrator retains the right to terminate the waiver, in whole or in part, at any time by sending the Director written notice of termination. Notwithstanding any waiver, the State shall continue to supply EPA with copies of permit applications, public notices and final permits when requested by EPA. Nothing in this Section shall diminish the Administrator's authority under section 404(c) or the State's obligation under section 404(h)(1)(F) of CWA.

§ 123.93 Memorandum of Agreement with the Secretary.

In the case of section 404 programs the State shall enter into a Memorandum of Agreement with the Secretary, which shall include:

(a) An identification of those waters in which the Secretary will suspend the issuance of section 404 permits (pursuant to sections 404(g)(1) and (h)(2) of CWA) upon approval of the State program by the Administrator;

(b) Where an agreement is reached, procedures for joint processing of permits for activities which require both a section 404 permit from the State and a section 9 or 10 permit from the Secretary under the Rivers and Harbors Act of 1899.

(c) An identification of those individual and general permits, if any, issued by the Secretary, the terms and conditions of which the State intends to administer and enforce (including inspection, monitoring, and surveillance responsibilities) upon receiving approval of its program and a plan for transferring responsibility for these permits to the State.

[*Comment:* In many instances States will lack the authority to directly administer permits issued by the Federal government. However, procedures may be established to transfer responsibility for these permits. For example, a State could, in one action, issue permits identical to the outstanding Federal permits which could be simultaneously revoked. An individual Corps' permit may be transferred to a State only where the State has the authority to administer and enforce all terms and conditions of the Federal permit.]

(d) Procedures whereby the Secretary will transfer to the State pending section 404 permit applications and other relevant information, as specified in § 123.97.

(e) A provision stating that the State shall not issue any section 404 permit for a discharge which, in the judgment of the Secretary after consultation with the Secretary of the Department in which the Coast Guard is operating, would substantially impair anchorage or navigation.

(f) Those "classes or categories", if any, of proposed State permits for which the Secretary waives the right to review.

(g) Other matters not inconsistent with this Part that the Secretary and the State deem appropriate.

[*Comment:* Where an approved State permit program includes coverage of those traditionally navigable waters in which only the Secretary may issue section 404 permits (by virtue of section 404(g)(1) of CWA), the State is strongly encouraged to establish in this MOA, procedures for joint processing of Federal and State permits, including joint public notices and public hearings.]

§ 123.94 Attorney General's Statement.

In addition to the requirements of § 123.5, the State Attorney General's Statement shall contain:

(a) An analysis of the State's law prohibiting the taking of private property without just compensation, including any applicable judicial interpretations, and assurance that this will not adversely affect the successful implementation of the State's regulation of the discharge of dredged or fill material.

(b) A certification that upon program approval, the State will have authority to prohibit, deny, restrict, or withdraw the specification of disposal sites for the discharge of dredged or fill material in any defined area of those waters for which the State receives section 404 authority, including:

(1) Authority to apply the criteria contained in 40 CFR Part 230;

(2) Authority (similar to EPA's authority under section 404(c)) to prohibit the discharge of dredged or fill material into areas where such discharges would have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas (including spawning and breeding areas), wildlife or recreational areas;

[*Comment:* The above authority to prohibit, deny, restrict, or withdraw the specification of disposal sites should not be limited to situations where an application for a 404 permit has been made, but should also include the authority to designate areas which will not be available for disposal site specification, as described in 40 CFR 230.7(d). Nothing in subparagraph (b)(2) is intended to limit the Administrator's authority to take similar actions under section 404(c) of CWA.]

§ 123.96 Program description.

In addition to the requirements of § 123.4, the State's program description shall:

(a) Designate one agency to be responsible for issuing section 404 permits.

(b) Describe how the State section 404 agency will interact with other State and local agencies.

(c) Describe the categories and sizes of discharges of dredged or fill material for which the State Director proposes to issue permits. For each category, the following information shall be given:

(1) An estimate of the number of facilities within each category which must file for a permit; and

(2) An estimate of the number and percent of activities within each category for which the State has already issued a State permit or equivalent document regulating the discharge.

(d) Describe the specific best management practices requirements proposed to be used to satisfy the exemption provisions of section 404(f)(1)(E) of CWA for construction or maintenance of farm roads, forest roads, or temporary roads for moving mining equipment in accordance with § 123.107.

(e) A description of how the State will coordinate its enforcement strategy with that of the Corps of Engineers and EPA.

§ 123.98 Inspections, monitoring, entry and reporting.

Any State permit program shall provide adequate authority to inspect, monitor, enter, and require reports to at least the same extent as required in section 308 of CWA.

§ 123.97 Receipt and use of Federal information.

Upon receiving EPA approval, the State agency administering a permit program shall be sent any relevant information which was collected by the Secretary. The Memorandum of Agreement under § 123.93 shall provide for the following, in such manner as the State Director and the Secretary shall agree:

(a) Prompt transmission to the State Director from the Secretary of copies of any pending permit applications or any other relevant information collected before the approval of the State permit program and not already in the possession of the State Director. Where existing permits are transferred to the

State Director (e.g., for purposes of compliance monitoring, enforcement or reissuance), relevant information includes support files for permit issuance, compliance reports and records of enforcement actions.

(b) Procedures to ensure that the State Director will not issue a permit on the basis of any application received from the Secretary which the Secretary has identified as incomplete or otherwise deficient until the State Director receives information sufficient to correct the deficiency.

§ 123.93 Transmission of information to EPA.

(a) Each State agency administering a section 404 permit program shall transmit by certified mail to the Regional Administrator, the Corps of Engineers, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service copies of permit programs forms and any other relevant information to the extent and in the manner agreed to by the Director and the Regional Administrator in the Memorandum of Agreement under § 123.6. The Memorandum of Agreement shall provide for the following:

(1) Prompt transmission to the Regional Administrator of a copy of any complete permit applications received by the State Director. Where State law requires preparation of an environmental impact statement (EIS) or similar process, such EIS or other document shall accompany the permit application when transmitted to the Regional Administrator.

(2) Prompt transmission to the Regional Administrator of notice of every action taken by the State agency related to the consideration of any permit application, including a copy of each proposed permit and any terms, conditions, requirements, or documents which are related to the proposed permit or which affect the authorization of the proposed permit. The State program shall provide:

(i) A period of time (up to 90 days) in which the Regional Administrator may comment upon, object to, or make recommendations with respect to the permit application or the proposed permit. A copy of any comment, objection or recommendation shall be sent to the permit applicant by the Regional Administrator.

[*Comment:* Except as provided in paragraph (c), EPA review is usually restricted to permit applications; however, in some cases the Agency may request the State to prepare a proposed permit.]

(ii) Procedures for action by the State agency following a written objection by the Regional Administrator under section 404(j) of CWA.

(iii) For the transmission to the Regional Administrator of a copy of every issued permit following issuance, along with any and all terms, conditions, requirements, or documents which are related to or affect the authorization of the permit.

(b) Within the time period agreed upon the Memorandum of Agreement, the Regional Administrator, pursuant to the right to object provided in CWA and § 123.99, may comment upon, object to, or make recommendations with respect to any permit application or proposed permit. The Regional Administrator shall notify the State Director of his or her intent to comment upon or object to a permit application or a proposed permit within 30 days of receipt, however, if the State proposes to issue a permit which differs from that described in the permit application such approved permit shall be transmitted for review in accordance with this section and §§ 123.99 and 123.110. The Regional Administrator may notify the State that there is no comment but reserve the right to object based on any new information brought out by the public during the comment period or at a hearing.

(c)(1) For discharges listed in § 123.92(a), State section 404 programs shall comply with the draft permit requirements of §§ 124.6 (a) and (b), 124.8 and 124.9, as provided in § 123.8.

(2) For discharges not listed in § 123.92(a), EPA and public review shall be based on the permit application unless EPA requests the State to prepare a proposed permit under § 123.93(c)(2). For these discharges States need not comply with §§ 124.6 (a) and (b), 124.8 and 124.9.

§ 123.99 Objections to permits.

(a)(1) Within the period of time provided under the Memorandum of Agreement, the Regional Administrator shall notify the State Director of any objection to issuance of a permit. This notification shall set forth in writing the general nature of the objection.

(2) Within 90 days following receipt of a permit application or the proposed permit which has been objected to under subparagraph (1), the Regional Administrator shall also set forth in writing and transmit to the State Director:

(i) A statement of the reason(s) for the objection (including the section of CWA or regulations that support the objection), and

(ii) The actions that must be taken by the State Director in order to eliminate the objection (including the conditions which the permit would include if it were issued by the Regional Administrator).

(3) When the State Director has received an objection to a permit application or proposed permit under this section but has taken the steps required by the Regional Administrator to eliminate the objection, the revised permit shall be transmitted to the Regional Administrator for review. If no further objection is received from the Regional Administrator within 15 days of the receipt of the revised permit, the Director may issue the permit.

(b) Any objection under this section must be based upon one or more of the following grounds:

(1) The permit fails to apply, or to ensure compliance with, any applicable requirement of this Part;

(2) In the case of any proposed permit for which notification to the Administrator is required under section 404(h)(1)(E) of CWA, the written recommendations of an affected State have not been accepted by the permitting State and the Regional Administrator finds the reasons for rejecting the recommendations are inadequate;

(3) The procedures followed in connection with formulations of the proposed permit failed in a material respect to comply with procedures required by CWA, regulations and guidelines thereunder or by the Memorandum of Agreement;

(4) Any finding made by the State Director in connection with the proposed permit misinterprets CWA or any guidelines or regulations under CWA, or misapplies them to the facts.

(5) Any provisions of the permit application or the proposed permit relating to the maintenance of records, reporting, monitoring, sampling, or the provision of any other information by the permittee are inadequate, in the judgment of the Regional Administrator, to assure compliance with permit conditions, including water quality standards, required by CWA, by Part 230 guidelines issued under CWA, or by the proposed permit;

(6) In the case of any proposed permit with respect to which applicable standards and limitations have not yet been promulgated by the Agency, the proposed permit, in the judgment of the Regional Administrator, fails to carry out the provisions of CWA; or any regulations issued under CWA;

(7) The information contained in the permit application is insufficient to judge compliance with 40 CFR Part 230; or

(8) Issuance of a permit would in any other respect be outside the requirements of section 404 of CWA, or regulations implementing section 404 of CWA.

(c) Prior to notifying the State Director of an objection based upon any of the grounds set forth in paragraph (b) of this section, the Regional Administrator:

(1) Shall consider all data transmitted pursuant to §§ 123.98 and 123.110.

(2) Shall, if the information provided is inadequate to determine whether the permit application or proposed permit meets the guidelines and requirements of CWA, request the State Director to transmit to the Regional Administrator the complete record of the permit proceedings before the State, or any portions of the record or other information that the Regional Administrator determines are necessary for review. This request shall be made within thirty days of receipt of the State submittal under § 123.98. It shall constitute an interim objection to the issuance of the permit, and the full period of time specified in the Memorandum of Agreement for the Regional Administrator's review shall recommence when the Regional Administrator has received such record or portions. Alternatively, the Regional Administrator, within thirty days of receipt may request the State Director to supplement the application with specified new information (which may include a proposed permit or other information) and resubmit such amended application to EPA and the other Federal agencies under § 123.98. Such amended application (and/or proposed permit) shall be considered a new application for the purposes of Federal and public review procedures.

[*Comment:* It is anticipated that proposed permits will be requested only in exceptional and/or complex cases.]

(3) May, in his or her discretion, and to the extent feasible within the period of time available under the Memorandum of Agreement, afford to every interested person an opportunity to comment on the basis for an objection;

(d) Within 90 days of receipt by the State Director of an objection by the Regional Administrator, the State or any interested person may request that a public hearing be held by the Regional Administrator on the objection. Following a request, the Regional Administrator shall provide public notice and hold a public hearing in accordance with the procedures of §§ 124.12 and 124.13 if warranted by significant public interest. A hearing shall be held whenever requested by the State which proposed the permit.

(e) A public hearing held under paragraph (d) shall be conducted by an EPA panel in an orderly and expeditious manner. Members of this panel shall include the Regional Administrator, the Assistant Administrator for Enforcement, the General Counsel, the Assistant Administrator for Water and Waste Management, or their respective representatives.

(f) At the conclusion of the public hearing the Regional Administrator shall reaffirm the original objection, modify the terms of the objection, or withdraw the objection, and shall notify the State of this decision.

(g) Where the Regional Administrator has objected to a proposed permit under this section, the Secretary may issue the permit in accordance with the guidelines and regulations of CWA in the following circumstances:

(1) If no public hearing is held under paragraph (d) and the State does not resubmit a permit revised to meet the Regional Administrator's objection within 90 days of receipt of the objection; or

(2) If a public hearing is held under paragraph (d) and the State does not resubmit a permit revised to meet the Regional Administrator's objection or modified objection within 30 days of the date of the Regional Administrator's notification under paragraph (f) of this section.

(h) For purposes of this section any draft permit prepared under § 124.6 shall be considered a proposed permit.

§ 123.100 Prohibitions.

No permit shall be issued by the Director in the following circumstances:

(a) Where the terms or conditions of the permit do not comply with the requirements of CWA, or regulations and guidelines implementing CWA, including the section 404(b)(1) environmental guidelines. (40 CFR Part 230).

(b) Where the Regional Administrator has objected to issuance of the permit under section 404(j) of CWA and where such objection has not been satisfied or resolved.

(c) Where, in the judgment of the Secretary of the Army acting through the Chief of Engineers, anchorage and navigation in or on any of the waters of the United States would be substantially impaired by the discharge.

(d) Where the proposed discharge would be into a defined area for which specification as a disposal site has been prohibited, restricted, denied, or withdrawn by the Administrator under section 404(c) of CWA, or by the State Director, and where such discharge would fail to comply with the Director's actions under those authorities.

§ 123.101 Enforcement authority.

In addition to the requirements of § 123.10, State section 404 programs shall include procedures which enable the State Director immediately and effectively to halt or eliminate any unauthorized discharges of dredged or fill material, including the authority to do each of the following:

(a) Issue a cease and desist or an interim protective order to any person responsible for, or involved in an unauthorized discharge.

(b) Sue in the appropriate State court to immediately restrain any person responsible for, or involved in an unauthorized discharge, and

(c) Immediately notify the Regional Administrator by telephone, and by subsequent written confirmation, of any actual or threatened endangerment to the public health and welfare resulting from any discharge of dredged or fill material.

§ 123.102 Continuing planning process.

Any State permit program shall have an approved continuing planning process under 40 CFR Parts 130 and 131 and shall assure that its approved planning process is at all times consistent with CWA.

§ 123.103 Agency board membership.

(a) Each State permit program shall ensure that any board or body which approves all or portions of permits shall not include as a member any person who receives, or has during the previous 2 years received, a significant portion of income directly or indirectly from permit holders or applicants for a permit.

(b) For the purposes of this section:

(1) "Board or body" includes any individual, including the Director, who has or shares authority to approve all or portions of permits either in the first instance, as modified or reissued, or an appeal.

(2) "Significant portion of income" shall mean 10 percent or more of gross personal income for a calendar year, except that it shall mean 50 percent or more of gross personal income for a calendar year if the recipient is over 60 years of age and is receiving that portion under retirement, pension, or similar arrangement.

(3) "Permit holders or applicants for a permit" shall not include any department or agency of a State government, such as a Department of

Parks or a Department of Fish and wildlife.

(4) "Income" includes retirement benefits, consultant fees, and stock dividends.

(c) For the purposes of this section, income is not received "directly or indirectly from permit holders or applicants for a permit" where it is derived from mutual fund payments, or from other diversified investments which the recipient does not know the identity of the primary sources of income.

§ 123.104 Approval process.

(a) Within 10 days of receipt of a State section 404 program submission under § 123.3 of this Part, the Administrator shall provide copies of the State's submission to the Corps of Engineers, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service.

(b) After determining that a State program submission is complete, EPA shall publish notice of the State's application in the Federal Register, and in enough of the largest newspapers in the State to attract Statewide attention, and shall mail notice to persons known to be interested in such matters, including all people on appropriate State, EPA and Corps of Engineers mailing lists and all permit holders and applicants within the State. This notice shall:

(1) Provide a comment period of not less than 45 days during which interested members of the public may express their views on the State program;

(2) Provide for a public hearing within the State to be held no less than 30 days after notice is published in the Federal Register;

(3) Indicate the cost of obtaining a copy of the State's submission;

(4) Indicate where and when the State's submission may be reviewed by the public;

(5) Indicate whom an interested member of the public should contact with any questions; and

(6) Briefly outline the fundamental aspects of the State's proposed program, and the process for EPA review and decision.

(c) Within 120 days of the receipt of a complete program submission under § 123.3, the Administrator shall approve or disapprove the program based on the requirements of this Part and of CWA and taking into consideration all comments received. A responsiveness summary shall be prepared by the Regional Office which identifies the public participation activities conducted, describes the matters presented to the public, summarizes significant comments received and explains the Agency's response to these comments.

(d) If the Administrator approves the State's section 404 program he or she shall notify the State and the Secretary and publish notice in the Federal Register. The Secretary shall suspend the issuance of section 404 permits by the Corps of Engineers within the State, except for those waters specified in section 404(g)(1) of CWA as identified in the Memorandum of Agreement between the State and the Secretary (see § 123.93).

(e) If the Administrator disapproves the State program he or she shall notify the State of the reasons for the disapproval and of any revisions or modifications to the State program which are necessary to obtain approval.

§ 123.105 Applicable conditions and requirements.

In addition to the requirements of § 122.11, each permit issued by the State Director shall provide for and ensure:

(a) That the discharge will be conducted in compliance with the section 404(b)(1) environmental guidelines (40 CFR Part 230), including conditions to ensure that the discharge will be conducted in a manner which minimizes adverse impact upon the physical, chemical, and biological integrity of the waters of the United States.

(b) That if a toxic effluent standard or prohibition for dredged material (including any schedule of compliance specified in such effluent standard or prohibition) is established under section 307(a) of CWA for a toxic pollutant present in the permittee's discharge and that standard or prohibition is more stringent than any limitation upon such pollutant in the permit, the State Director shall modify the permit to conform to the toxic effluent standard or prohibition and so notify the permittee.

(c) That the permit (other than general permits) shall include a detailed sketch, specifying location and boundaries of the proposed discharge site including a limitation of the quantity and type of dredged or fill material which may be discharged at that site. In open water sites, a delination of the disposal site shall be included.

(d) The State Director shall incorporate approved BMP's developed by a Statewide CWA section 208(b)(4)(B) regulatory agency into permits as provided in the agreement described in § 123.110(a)(1). Where BMP's were developed for application in a specific geographic area they shall only be incorporated into permits for that area. Where BMP's are less stringent than the conditions which are necessary to assure compliance with the 40 CFR Part 230, the BMP's shall be supplemented with additional and/or more stringent conditions incorporated into the 404 permit as necessary.

§ 123.106 General permits.

(a) General permits may be issued for activities which are similar in nature, will cause only minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse affects on the environment. If several activities are grouped in one general permit their similarity should be established when the general permit is proposed.

(b) In addition to the conditions in § 122.11 each general permit issued by the State Director shall include, where applicable, the following conditions:

(1) Conditions specified in § 123.105 (a) and (b);

(2) The maximum quantity and type of material that may be discharged and the maximum extent that an area may be modified by a single operation;

(3) A specification of the activities covered by the general permit with emphasis on unique factors, if present;

(4) Geographic area to which the general permit applies, including a clear description of the type(s) of water(s) (with specific references to wetlands) in which the activity(ies) are permitted;

(5) BMP's necessary to assure that environmental effects will be minimal;

(6) limitations on construction of any structures including the following factors:

(i) Size and type of structure(s) permitted;

(ii) Specifications for conservation and environmental protection, including, to the maximum extent practicable, minimizing impairments to the biological, chemical and physical integrity of the waters of the United States;

(iii) Site restoration after the structure is completed.

(iv) Depth of fill permitted.

(7) Any other conditions deemed necessary by the State Director.

(c) The State Director shall require advance notification by persons or agencies intending to discharge dredged or fill material under a general permit, including the name of the discharger, the location, nature and duration of the discharge. Advance notification is required unless the Regional Administrator concurs in writing that it is unnecessary.

[*Comment:* EPA envisions that the information required can be submitted on a postcard. Submission of information should be construed as a notification not as an application for a permit. This information can be used to monitor the individual and cumulative environmental effects of the activities authorized by the general permit and provide a basis for determining whether its modification or termination is necessary.]

(d) After a general permit has been issued, activities falling within the scope of the permit do not require an individual permit unless the State Director determines, on a case-by-case basis, that the concerns of the aquatic environment as expressed in 40 CFR Part 230 indicate the need for an individual permit.

(e) In addition to grounds in §§ 122.9 and 122.10, the State Director may modify, revoke and reissue or terminate a general permit on the following grounds:

(1) If he determines that the effects of the activities authorized by it are having or will have a more than minimal individual or cumulative adverse affect on the environment; or

(2) If he determines that the permitted activities are more appropriately permitted by individual permits.

(f) The State Director shall provide public notice of amendment or termination of a general permit.

(g) The public notice for proposed general permits, including proposed amendments to general permits, shall include:

(1) Applicable statutory authority or regulations;

(2) A copy of the proposed permit, describing the activities and waters to be covered;

(3) A description of the estimated environmental effects of the permit;

(4) Name and water quality standards classification, if applicable, of the receiving waters into which the discharge is proposed, and a general description and location of the site of each proposed discharge;

(5) Any other available information which may assist the public in evaluating the likely environmental affects of the proposed activity, if any, upon the integrity of the receiving waters;

(6) Address and telephone number of the place where interested persons may obtain further information;

(7) Name and address of person to whom comments should be addressed, deadline for submission of comments; and

(8) A statement of the right to request a public hearing, and that a hearing will be held if there is significant public interest.

§ 122.107 Activities not requiring permits.

(a) Except as specified in paragraphs (b) and (c) of this section, any discharge of dredged or fill material that may result from any of the following activities is not prohibited by or otherwise subject to regulation under this section:

(1) Normal farming, silviculture and ranching activities such as plowing, seeding, cultivating, minor drainage, and harvesting for the production of food, fiber, and forest products, or upland soil and water conservation practices.

The construction of any canal, ditch, dike or other waterway or structure which drains or otherwise significantly modifies a stream, lake, swamp, marsh, bay or any other wetland or aquatic area lying within the waters of the United States is not considered minor drainage, and any discharge of dredged or fill material into the waters of the United States incidental to the construction of any such structure or waterway requires a permit.

The discharge of dredged or fill material incidental to the management or rotation of crops on lands in current active use for farming is a normal farming practice not requiring a permit. However, a permit is required for any discharge of dredged or fill material made for the purpose of converting waters of the United States to farming, forestry, or ranching uses (e.g., discharge of dredged or fill material to erect a dike, dam, levee or other structure to divert, reduce or eliminate the flow of water into or through a wetland.

(2) maintenance, including emergency reconstruction of recently damaged parts of currently serviceable structures such as dikes, dams, levees, grions, riprap, breakwaters, causeways, bridge abutments or approaches, and transportation structures. This exemption does not include maintenance that changes the character, scope, or size specific to the original fill design. Emergency reconstruction must occur within a reasonable period of time after damage occurs in order to qualify for this exemption.

(3) Construction or maintenance of farm or stock ponds or irrigation ditches, or the maintenance of drainage ditches. This particular provision does not apply to the construction of drainage ditches. Any discharge of dredged or fill material incidental to the modification of a stream bank or other shoreline area within a water of the United States to connect any such water to a water intake structure or water discharge structure shall be required to have a section 404 permit.

(4) Construction of temporary sedimentation basins on a construction site which does not include placement of fill material into waters of the United States. The term "construction site" refers to any site involving the erection of buildings, roads, and other discrete structures and the installation of support facilities necessary for construction and utilization of such structures. The term also includes any other land areas which involve land-disturbing and excavation activities, including quarrying or other mining activities, where an increase in the runoff of sediment is controlled through the use of temporary sedimentation basins.

(5) Construction or maintenance of farm roads, forest roads, or temporary roads for moving mining equipment, where such roads are constructed and maintained, in accordance with best management practices, to assure that flow and circulation patterns and chemical and biological characteristics of waters of the United States are not impaired, that the reach of the waters of the United States is not reduced, and that any adverse effect on the aquatic environment will be otherwise minimized. These best management practices which must be applied to satisfy this provision shall include those detailed best management practices described in the State's approved program description pursuant to the requirements of § 123.95(d), and shall also include the following baseline provisions:

(i) Logging in streams is prohibited;

(ii) Permanent roads (for farming or forestry activities), temporary access roads (for mining, forestry, or farm purposes) and skid trails (for logging) shall be held to the minimum feasible number, width and total length consistent with the purpose of specific farming, silvicultural or mining operations;

(iii) All roads, temporary or permanent, shall be located sufficiently far from streams or other water bodies (except for portions of such roads which must cross water bodies) to avoid significant increases in sediment runoff;

(iv) The road fill shall be bridged or culverted to prevent the restriction of expected high flows;

(v) The discharge shall not disrupt the migration or other movement of those species of aquatic life inhabiting the water body;

(vi) Discharges into breeding and nesting areas for migratory waterfowl, spawning areas, and wetlands shall be avoided if practical alternatives exist;

(vii) The discharge shall consist of suitable material free from toxic pollutants in toxic amounts;

(viii) The discharge shall not take, or jeopardize the continued existance of, a threatened or endangered species as defined under the Endangered Species Act, or adversely modify or destroy the critical habitat of such species;

(ix) The fill shall be properly maintained during and following construction to prevent erosion and other non-point sources of pollution;

(x) Soil losses shall be held close to geological rates through careful selection of logging and farming methods, and through professional access route management;

(xi) A selective uneven-aged management cutting method should be employed on slopes, near streams, or in other sensitive areas unless the use of other forest management options would result in the same or less alteration of the chemical, physical and biological integrity of affected waters, including less sedimentation;

(xii) Vegetative disturbance shall be kept to minimum.

(xiii) Borrow material shall be taken from upland sources wherever feasible, and sufficient zones of vegetation adjacent to water bodies shall be preserved to filter out debris and sediment transported by runoff from nearby harvest sites and to prevent thermal pollution by preserving shade cover of water bodies.

(xiv) The discharge shall not occur in a component of the National Wild and Scenic River System;

(xv) Upon removal of temporary roads, any area of the waters of the United States whose bottom elevation has been altered by discharge of the road bed fill shall be restored to its original elevation;

(xvi) The use of pesticides and herbicides shall be avoided where possible and shall not be used in water bodies, including wetlands, in conjunction with road construction;

(xvii) All operators electing to qualify for the exemption must be familiar with and shall apply as appropriate to specific practices, professional management methods that are available from technical assistance, training and advice provided by the U.S. Forest Service, State Foresters, the Soil Conservation Service, the office of surface mining, or by similar recognized public sources of technical information and guidance.

(6) Any activity with respect to which a State has an approved program under section 208(b)(4)(B) of CWA which meets the requirements of subparagraphs (B) and (C) of that section.

(b) If any discharge of dredged or fill material resulting from the activities listed in paragraphs (a) (1)–(6) contains any toxic pollutant such discharge shall be subject to any effluent standard or prohibition established for such toxic pollutants pursuant to provisions of section 307 of CWA, and requires a permit under the State program.

(c) Any discharge of dredged or fill material into waters of the United States, incidental to any of the activities identified in paragraphs (a) (1)–(6) or to any other activity must have a permit if its purpose is to bring an area of the waters of the United States into a use to which it was not previously subject, where the flow or circulation of waters of United States may be impaired or the reach of such waters reduced.

[*Comment:* Where the proposed discharge will result in significant discernible alterations to flow or circulation, the presumption is that flow or circulation *may* be impaired by such alteration, and the activity shall be required to have a section 404 permit. Any discharge which converts any area of the waters of the United States to dry land or which connects any such waters to dry land through dikes, levees or other fills shall be deemed to thereby reduce the reach of the waters of the United States and must have a section 404 permit. For example, a permit will be required for the conversion of a cypress swamp to some other use or the conversion of lands from silvicultural to agricultural use when a discharge of dredged or fill materials is made into waters of the United States in conjunction with construction of dikes, drainage ditches or other works or structures used to effect such conversion. The reach of the waters of the United States shall not, however, be deemed to be reduced by a discharge which elevates the bottom of waters of the United States without converting it to dry land.]

(d) Federal projects which qualify under the criteria contained in section 404(r) of CWA are exempt from State section 404 permit requirements.

§ 123.108 Permit application.

(a) *Publicity and Preapplication Consultation.* The State Director is encouraged to establish and maintain a program to inform, to the extent possible, potential applicants for permits of the requirements of the State program and of the steps required to obtain permits for activities in State regulated waters. As part of this program, the State Director is encouraged to include pre-application consultation to assist applicants in understanding the requirements of 40 CFR Part 230 and in fulfilling permit application requirements.

(b) *Application for Permit.* Except where an activity is authorized by a general permit or is exempt from the permit requirement under § 123.107, any person who proposes to discharge dredged or fill material into State regulated waters shall complete, sign and submit an application to the State Director.

[*Comment:* State application forms are subject to EPA review and approval, see § 123.3.]

(c) *Content of Application.* A complete application shall include:

(1) A complete description of the proposed activity including (i) necessary drawings, sketches or plans (in cross section and plan view) showing the general and specific site location including site address and character of all proposed activities; (ii) size relationship of the proposed discharge to the size of the affected waters and depth of water in the area relative to the ordinary high water mark; (iii) the purpose and intended use of the proposed activity, scheduling of the activity and the names and addresses of property owners adjacent to the site and, if appropriate, the location and dimensions of adjacent structures;

(2) The source of the dredged or fill material and method of dredging used, if any; a description of the type, composition and quantity of the material; the proposed method of transportation and disposal of the material, including the type of equipment to be used.

(3) The use of any specific structures to be erected on the fill.

(4) Information about the discharge area needed to evaluate compliance within 40 CFR Part 230, including documentation concerning the following factors:

(i) A discussion of alternatives to the proposed discharge, including alternative disposal site, construction methods, and methods of discharge, and also including reasons for rejecting the alternatives;

(ii) Physical and chemical characteristics of the discharge site including the bottom and the receiving water;

(iii) Plants, fish, shellfish and wildlife in the discharge site which may be dependent on water quality and quantity;

(iv) Site characteristics of the affected and adjacent areas that may require protection or preservation;

(v) Uses of the disposal area which might affect human health and welfare; and

(5) A description of technologies or management practices by which the applicant proposes to minimize adverse environmental effects of the discharge.

[*Comment:* Guidelines for minimizing the adverse effects of discharges of dredged or fill material are found in 40 CFR Part 230.]

(6) A list of the approvals required by other Federal, interstate, State or local agencies for the work, including all approvals received or denials already made.

(7) One original set or one good quality reproducible set of drawings and maps, as specified below;

(i) A vicinity map identifying the map or chart from which the vicinity map was taken and showing the following:

(A) Location of the activity site including latitude and longitude and river mile, if known;

(B) Name of waterway;

(C) All applicable political (e.g., county, borough, town, city, etc.) boundary lines;

(D) Names of all major roads in the vicinity of the site including the road providing closest practicable access to the site;

(E) Graphic scale; and

(F) North arrow.

(ii) A plan view of the proposed activity showing the following:

(A) Existing shorelines;

(B) North arrow;

(C) Graphic or numerical scale;

(D) Ordinary high water mark of the body of the water;

(E) Location of known wetlands;

(F) Delineation of disposal site;

(G) Water depths around the project;

(H) Principal dimensions of the structure or work and extent of encroachment beyond the applicable high water line;

(I) Waterward dimension from an existing permanent fixed structure or object;

(J) Distances to nearby Federal projects, if applicable;

(K) Number of cubic yards, type of material, method of handling, and location of fill or spoil disposal area if applicable. If spoil material is to be placed in approved dumping grounds, a separate map showing the location of the dumping grounds should be attached. The drawing must indicate proposed retention levees, weirs, and/or other devices for retaining dredge or fill materials; and

(L) Location of structures, if any, in waters of the United States immediately adjacent to the proposed activity, including permit numbers, if known. Identify purposes of all structures.

(iii) An elevation and/or section view of proposed project showing the following:

(A) Same water elevations as in the plan view;

(B) Depth at waterward face of proposed work, or if dredging is proposed, show dredging grade;

(C) Dimensions from applicable ordinary high water mark for proposed fill, float or pile supported platform. Identify any structure to be erected thereon;

(D) Graphic or numerical scale;

(E) Cross-section of excavation or fill, including approximate side slopes;

(F) Elevation of spoil areas;

(G) Location of wetlands; and

(H) Delineation of disposal site.

(iv) Notes on all maps or drawings submitted, including:

(A) A list of names of adjacent property owners whose property also adjoins the water and are not shown on plan view;

(B) A statement of the purpose of proposed activity;

(C) A statement of datum used and elevation views. (Use mean low water, mean lower low water, National Ocean Survey Datum or National Geodetic Vertical Datum of 1929); and

(D) A title block for each sheet submitted identifying the proposed activity and containing the name of the body of water; river mile, if applicable; name of county, and State; names of applicant or agent; number of the sheet and the total number of sheets in set; and date the drawing was prepared.

§ 123.109 [Reserved]

§ 123.110 Coordination requirements.

(a) *General Coordination.* (1) The State Director shall develop an agreement with the agency designated to administer a Statewide CWA section 208(b)(4) regulatory program. Such an agreement shall include:

(i) A definition of the activities to be regulated by each program;

(ii) Arrangements for the agencies providing an opportunity to comment on perspective permits, BMP's and other relevant actions; and

(iii) Arrangements for incorporating BMP's developed by the section 208(b)(4) program into section 404 permits, where appropriate.

[*Comment:* Where such a CWA section 208(b)(4) program has been approved, no permit shall be required for activities for which the Administrator has approve BMP's under such approved program except as provided in § 123.107. Until such Section 208(b)(4) program has been approved by the Administrator under CWA section 208(b)(4)(C), a person proposing to discharge must obtain an individual permit or comply with a general permit.]

(2) States are encouraged to receive and use information developed by the Fish and Wildlife Service as part of the National Inventory as it becomes available.

(b) *Coordination with Other Federal and Federal-State Review Process.* To assure coordination of a permit with Federal and Federal-State water related planning and review processes, the State Director shall take the following actions:

(1) Assure that the impact of the proposed discharge will be consistent with the Wild and Scenic Rivers Act where the proposed discharge could affect portions of rivers designated wild, recreational, scenic or under consideration for such designation.

(2) Assure that the proposed discharge will be consistent with State water quality management planning under sections 208 and 303 of CWA.

(3) Consult the State agency(ies) with jurisdiction over fish and wildlife resources.

[*Comment:* Proposed discharges which are determined to be consistent with these authorities in (1)–(4) will nevertheless be denied section 404 permits if such discharge does not comply with other provisions of this Part and 40 CFR 230.]

The State Director shall furnish copies of the permit application to agencies consulted under this subsection.

(c) *Coordination with Other States.* If the proposed discharge may affect the quality of the waters of any State(s) other than the State in which the discharge occurs the State Director shall provide an opportunity for such State(s) to submit written comments within the public comment period on the effect of the proposed discharge on such State(s) waters, and to suggest additional permit conditions. If these recommendations are not accepted by the State Director, he shall notify the affected State and the Regional Administrator in writing of his failure to accept these recommendations, together with his reasons for so doing.

(d) *Review by Corps of Engineers, Fish and Wildlife Service, and National Marine Fisheries Service.* (1) All permit applications transmitted to the District Engineer, to the U.S. Fish and Wildlife Service, and to the National Marine Fisheries Service shall be accompanied by a statement that the agencies have 20 days from the date fo the receipt of the permit application to notify EPA whether they wish to comment. Failure to so notify EPA within 20 days may

constitute a waiver of the right to comment.

(2) In cases where the agencies have notified the Regional Administrator that they wish to comment, they should submit their evaluations and comments to the Regional Administrator within 50 days of receipt of the permit application. The agencies may request additional time. If the Regional Administrator finds that more time should be allowed he will advise the agencies of the new deadline. Written comments should normally be submitted within the initial 20 day period, or as soon as practicable thereafter.

(3) If any of these agencies feels that additional time is necessary to complete evaluation of any permit application, it shall notify the Regional Administrator, who may request an extension from the State Director. If the State Director allows additional time, the Regional Administrator shall notify the affected agencies.

(4) All comments from the U.S. Army Corps of Engineers, the U.S. Fish and Wildlife Service, and the National Marine Fisheries Service will be considered by the Regional Administrator in accordance with provisions of this section. If the Regional Administrator does not adopt an objection of any such agency, he shall consult with the objecting agency(s). The final decision to object or to require permit conditions will be made by the Regional Administrator.

§ 123.111 Emergency procedures.

In an emergency situation the requirements for public notice and full Federal review may be waived with the concurrence of the Regional Administrator. An emergency is a situation which would result in an unacceptable hazard to life or severe loss of property if corrective action requiring a permit is not undertaken within a time period less than the normal time needed to process the application under required procedures of this Part. Emergency permits shall include conditions for restoration of the disposal site.

§ 123.112 Reporting.

In accordance with the requirements of § 122.15, the State Director shall:

(a) Submit to the Regional Administrator a quarterly report on the last day of January, April, July, and October, which shall include:

(1) Any unauthorized discharges of dredged or fill material subject to the State's jurisdiction and a description of enforcement actions taken or contemplated;

(2) A description of investigations conducted to determine compliance with the conditions and limitations of any permits subject to the State's jurisdiction, including any enforcement actions taken against violators of permit terms or conditions.

(b) Submit to the Regional Administrator an annual report assessing the cumulative impacts of the State's permit program on the integrity of State-regulated waters. This annual report may be appended to the October quarterly report described in paragraph (a) as agreed in the Memorandum of Agreement, and shall include:

(1) The number and nature of individual permits issued by the State during the year. This should include the locations and types of water bodies where permitted activities are sited (e.g. wetlands, rivers, lakes, and any other categories which the Director and Regional Administrator may establish);

(2) The number of acres of each of the categories of waters in paragraph (b)(1) which were filled during the year (either by authorized or unauthorized activities);

(3) The number of acres of each of the categories of waters in paragraph (b)(1) which were protected under the State's authorities to prohibit, deny, restrict, or withdraw the specification of disposal sites for receiving dredged or fill material, as required by § 123.94.

(4) The number and nature of permits modified, revoked and reissued or terminated during the year;

(5) The number and nature of permits issued under emergency conditions, as provided in § 123.111;

(6) The approximate number of individuals in the State discharging dredged or fill material under general permits and an estimation of the cumulative impacts of these permitted activities.

PART 124—PROCEDURES FOR DECISION MAKING

Subpart A—General Program Requirements

Sec.

124.1 Purpose and scope.
124.2 Definitions.
124.3 Application for a permit.
124.4 Consolidation of applications.
124.5 Requests for modification or revocation and reissuance or termination of permits.
124.6 Draft permit.
124.7 Other draft permits.
124.8 Statement of Basis.
124.9 Fact Sheet.
124.10 Administrative record for EPA-issued permits.
124.11 Public notice of permits.
124.12 Public comments and requests for hearings.
124.13 Public hearings.
124.14 Cross-examination and other supplementary procedures.
124.15 Obligation to raise points and provide information during the comment period.
124.16 Reopening of comment period.
124.17 Issuance and effective date of permit.
124.18 Stays of contested permit terms.
124.19 Response to comments.
124.20 Administrative record for final permit where EPA is the permitting authority.
124.21 Appeal of RCRA, UIC and PSD permits.
124.22 Additional time after service by mail.

Subpart B—Specific Procedures Applicable to RCRA Permits

124.31 Public notice of receipt of application and availability of summary.

Subpart C—Specific Procedures Applicable to PSD Permits

124.41 Procedures for small sources.

Subpart D—Specific Procedures Applicable to NPDES Permits

124.51 Purpose and scope.
124.52 Permits required on a case-by-case basis.
124.53 State certification.
124.54 Special provisions for State certification and concurrence of applications for section 301(h) modifications.
124.55 Effect of State certification.
124.56 Fact sheets.
124.57 Requirements for NPDES draft permits incorporating section 301(h) modifications.
124.58 Public notice.
124.59 Terms requested by the Corps of Engineers and other governmental agencies.
124.60 Issuance and effective date of NPDES permits.
124.61 Final environmental impact statement.
124.62 Administrative Record.
124.63 Decision on Variances and Modifications.
124.64 Procedures for variances and modifications where EPA is the permit issuing authority.
124.65 Appeals of modifications and variances.
124.66 Special procedures for discharge into marine waters under section 301(h).
124.67 Special procedures for decisions on thermal variances (Section 316(a)).

Subpart E—Evidentiary Hearing for EPA Issued NPDES Permits

124.71 Applicability.
124.72 Definitions.
124.73 Filing and submission of documents.
124.74 Requests for evidentiary hearing.
124.75 Decision on request for a hearing.
124.76 Obligation to raise issues and submit evidence before a final permit is issued.
124.77 Notice of hearing.
124.78 *Ex parte* communications.
124.79 Additional parties and issues.
124.80 Filing and service.

124.81 Assignment of Administrative Law Judge.
124.82 Consolidation and severance.
124.83 Prehearing conferences.
124.84 Summary determination.
124.85 Hearing procedure.
124.86 Motions.
124.87 Record of hearings.
124.88 Proposed findings of fact and conclusions; brief.
124.89 Decisions.
124.90 Interlocutory appeal.
124.101 Appeal to the Administrator.
124.102 Applicability of Subpart E.
124.103 EPA headquarters approval of stipulation or consent agreement.

Subpart F—Non-Adversary Procedures for NPDES Initial Licensing

124.111 Applicability.
124.112 Relation of other subparts.
124.113 Public notice regarding draft permits and permit conditions.
124.114 Request for hearing; Request to participate in a hearing.
124.115 Effect of denial of, or absence of, request for hearing.
124.116 Notice of hearing.
124.117 Request to participate in hearing.
124.118 Submission of written comments on draft permit.
124.119 Presiding Officer.
124.120 Panel hearing.
124.121 Opportunity for cross-examination.
124.122 Record for final permit.
124.123 Filing of brief, proposed findings of fact and conclusions of law and proposed modified permit.
124.124 Recommended decision.
124.125 Appeal from or review of recommended decision.
124.126 Final decision.
124.127 Final decision if there is no review.
124.128 Delegation of Authority; Time Limitations.
124.129 EPA headquarters approval of stipulation or consent agreement.

Authority: Resource Conservation and Recovery Act, 42 U.S.C. 6901 et seq., Clean Air Act, 42 U.S.C. 1857 et seq.; and Clean Water Act, 33 U.S.C. 1251 et seq.

Subpart A—General Program Requirements

§ 124.1 Purpose and scope.

(a) This Part specifies the procedures EPA will follow in issuing and modifying NPDES, RCRA and UIC permits, and permits to implement the "prevention of significant deterioration" (PSD) provisions of the Clean Air Act.

(b) This Part is designed so that permits for a given facility under two or more of the listed programs can be processed either separately or in combination at the choice of the permitting authority. This will allow EPA to combine the processing of permits where greater efficiency is likely to result, but will not bind the Agency to follow that course in all cases. Consolidation of permits can take place either when the permit applications are submitted or when draft of final permits are issued even where permit applications have been submitted separately. Permit applications may recommend whether or not their permit applications should be consolidated in any given case.

(c) Subpart A specifies procedures applicable to all three permit programs. Subparts B–E provide procedures specific to the RCRA, PSD and NPDES permit programs. Subpart F provides a procedure based on the "initial licensing" provisions of the APA that can be used instead of Subparts A–E in appropriate cases.

(d) State administration of each of RCRA, UIC, NPDES and 404 permit programs can be approved by EPA under Part 123. Only selected portions of this Part apply to these approved State programs, as listed in § 123.8. (In the case of PSD programs, none of the provisions of Part 124 has been made applicable to States.) However, there is a need for coordination in making decisions when two or more such permits will be issued to an activity by both EPA and by a State. Accordingly, the regulations provide that applications may be jointly processed, joint comment periods and hearings may be held, and final permits may be drafted on a cooperative basis whenever EPA and a State agree to take such steps either in general or in an individual case. Such joint processing agreements may be provided in the Memorandum of Agreement developed under § 123.6.

§ 124.2 Definitions.

The definitions in Part 122 apply to this Part.

§ 124.3 Application for a permit.

(a) Any person who requires a permit under the RCRA, UIC, PSD or NPDES program shall complete, sign, and submit an application for each permit required to the Director in accordance with §§ 122.6, 122.23, 122.25, 122.36, and 122.64 or 123.105, or the applicable requirements of 40 CFR 52.21, except as provided in § 124.82 for NPDES general permits or for RCRA permits by rule under § 122.26.

(b) No permit shall be issued until the applicant has fully complied with the governing application filing requirements of this Part and Part 122. If an applicant fails or refuses to correct deficiencies in the application, the permit shall be denied or appropriate enforcement actions may be taken under the provisions of the appropriate Act. These provisions include sections 308, 309, 402(h) and 402(k) of the CWA, section 3008 of RCRA, and sections 1423 and 1424 of SDWA.

(c) Permit applications are designed to fit the normal situation for most applicants. However, if the Director determines that further information of a site visit is necessary in order to evaluate the application completely and accurately, the applicant shall be notified and a date shall be scheduled for receipt of the requested information or scheduling of any necessary site visit.

(d) Permit applications must comply with the signature and certification requirements of § 122.5.

(e)(1) Any application submitted by a new source, new HWM facility or new injection well, and any Part B application for an existing HWM facility for an EPA-issued permit shall be reviewed for completeness by the Director within 30 days of its receipt. Upon completing this review, the Director shall inform the applicant in writing whether or not the application is complete and list any required additional information. The requirements of this paragraph shall not preclude a Director from requesting additional information from the applicant at a later time for purposes of clarification, modification or supplementation of previously submitted data.

(2) In the event of such a deficiency, the date of receipt of the application shall be, for the purposes of this section, the date on which the Director received all relevant information.

§ 124.4 Consolidation of applications.

(a) Except as provided for RCRA permit applications (Part A only) under § 122.23, any facility or activity requiring a permit under two or more of the RCRA, UIC or NPDES programs which will be issued entirely by EPA may postpone the filing date for any application for such a permit to consolidate it with another application which has a later filing date:

(1) For up to 180 days, provided:

(i) The other application legally must be filed by the later filing date and it will be timely filed; and

(ii) The permit applicant notifies the Regional Administrator, in writing of his/her intent to postpone the filing date; or

(2) For up to two and one half years, provided the permit applicant obtains the written permission of the Regional Administrator to so consolidate the permits.

(b) Except as provided for RCRA permits applications (Part A only) under § 122.23, if an agreement between EPA and an approved State so provides, any

facility that requires two or more of an RCRA permit, a UIC permit or an NPDES permit, one or more of which will be issued by EPA and one or more of which will be issued by an approved State, may postpone the filing date for any application for such a permit:

(1) For up to 180 days, in order to consolidate it with another permit application which legally must be filed within that period and which will be timely filed, if such person notifies the Regional Administrator and the State Director in writing of his/her intent to postpone the filing date; or

(2) With the written permission of both the Regional Administrator and the State Director, for up to two and one half years in order to so consolidate it.

(c) When permit applications are filed together under this section, neither the Regional Administrator nor the State Director is required to issue the corresponding draft permits under § 124.6 at the same time. Conversely, draft permits for a given facility under the RCRA, UIC and NPDES programs may be issued at the same time even where the permit applications were filed at different times.

[*Comments:* (1) States are encouraged to consolidate applications, where they have been approved by EPA to administer two or more of the RCRA, UIC or NPDES programs. However they are not required to do so.

(2) This section does not apply to Air PSD permits.]

§ 124.5 Requests for modification or revocation and reissuance or termination of permits.

(a) If a permittee believes that a modification to or revocation and reissuance of a RCRA, UIC, PSD or NPDES permit is justified under §§ 122.9 or 122.10, (or section 52.21 in the case of a PSD permit) he/she may request a modification or revocation and reissuance or termination from the Director in writing. The request shall set forth all facts or reasons known to the permittee which may be relevant to a decision on the request.

(b) If the Director agrees that the modification or revocation and reissuance request under paragraph (a) appears justified, he/she shall prepare and formulate a draft permit under § 124.6 incorporating the changes. The Director may request additional information or, in appropriate cases, may require the submission of a new permit application.

(c) If the Regional Administrator, or where appropriate, the State Director decides that the modification or revocation and reissuance request under paragraph (a) does not appear justified, he/she shall reply to the permittee briefly setting forth in writing the reasons for that decision.

(d) When a request for a modification under this section is granted and a new draft permit is formulated, only those terms dependent on the request will be reopened. All other aspects of the permit will remain in force until the expiration of the permit. If the permit is revoked and reissued, the draft permit is subject to the same procedures as if the permit had expired and was being reissued.

(e) In the case of a proposed modification to an existing 404 permit initiated by the permittee which involves any change in applicable conditions or requirements under §§ 122.11 or 123.105, such proposed modification shall be treated as a permit application and shall be processed in accordance with all requirements of § 123.113.

§ 124.6 Draft permit.

(a) If a permit has been properly applied for, or the Director, after analyzing the information concerning a permit furnished under that Part and any other relevant information, shall tentatively decide whether to issue or deny the permit. If the tentative decision is to issue the permit, a draft permit shall be prepared containing at a minimum the following information:

(1) All conditions or requirements specified in § 122.11;

(2) For:

(i) RCRA permits, standards for treatment, storage or disposal and other permit terms and conditions which meet the requirements of § 122.24;

(ii) UIC permits, permit terms and conditions that meet the requirements of § 122.42;

(iii) PSD permits, permit terms and conditions that meet the requirements of 40 CFR 52.21;

(iv) NPDES permits, effluent limitations, standards, prohibitions and conditions required under § 122.60, including where applicable any conditions certified by a States agency under § 124.55, and all variances or other modifications that are to be included under § 124.64. All effluent limitations and standards shall be calculated and specified as required under § 122.70;

(v) 404 permits, permit terms and conditions that meet the requirements of § 123.105;

(3) All compliance schedules required by § 122.12; and

(4) All monitoring requirements required by § 122.14.

(b) All draft permits formulated under this section and § 124.7 shall be accompanied by a statement of basis or fact sheet under §§ 124.8 or 124.9. In addition, EPA-formulated draft permits shall be based on the administrative record required by § 124.9.

[*Comment:* Additional requirements for draft NPDES permits incorporating CWA section 301(h) modifications are set forth in § 124.57.]

(c) If the Regional Administrator determines under 40 CFR Part 6.900 that an Environmental Impact Statement shall be prepared for an NPDES new source, the public notice of the draft permit under this section shall not be given until a draft environmental impact statement is issued.

(d) *Consolidation of draft permits.* (1) If a facility or activity will require a permit under two or more of the RCRA, UIC, PSD or NPDES programs the Regional Administrator may issue consolidated draft permits whether or not the permits were applied for at the same time, provided the conditions for issuance of each seperate permit have been met. Whenever consolidated draft permits are issued the statements of basis (see § 124.8) or fact sheets (see § 124.9), administrative records (see § 124.10), public comment periods (see § 124.11) and any public hearings for those permits shall also be consolidated. However, the final permits need not all be issued together if in the judgment of the Regional Administrator, joint processing would result in unreasonable delay in the issuance of one or more permits.

(2) If a facility or activity will require two or more of a RCRA, UIC, PSD or NPDES permit, one or more of which is to be issued by EPA and one or more of which is to be issued by an approved State, the Regional Administrator and the State Director(s) may agree to issue the draft permits at the same time whether or not they were applied for at the same time. Whenever two or more draft permits are issued at the same time, administrative records (for EPA-issued permits only) should be consolidated for highly significant permits and any public hearings for those permits shall also be consolidated. However, the final permits need not all be issued together if, in the judgment of either the Regional Administrator or the State Director, such consolidation would result in unreasonable delay in the issuance of one or more permits.

(3) The Director shall not, without the written consent of the permit applicant, consolidate issuance of a PSD permit with issuance of any other permit under this section when to do so would delay

issuance of the PSD permit more than one year from the date of application.

(4) Whenever draft permits including an NPDES permit are consolidated under this subsection, and the Regional Administrator elects to make the special "initial licensing" provisions of Subpart F applicable to the NPDES permit, any permits with which that NPDES permit was consolidated shall likewise be processed under Subpart F.

(e) The decision to deny a permit which has been applied for shall be made through the same procedures as any other decision on a permit. A draft notice of intent to deny will be issued and made available for public comment, accompanied by a fact sheet or statement of basis. A response to comments and final decision will then be prepared. Appropriate appeals may then be made under this Part.

§ 124.7 Other draft permits.

(a) The Director may formulate a draft permit or notice concerning a RCRA, UIC, PSD or NPDES permit without having received an application, as provided in this section.

(1) If the Director decides that a permit should be:

(i) Modified or revoked and reissued under § 122.9, the Director shall formulate a draft permit containing the provisions required under § 124.6.

(ii) Terminated under § 122.10, the Director shall issue a notice of intent to terminate the permit.

(2) NPDES general permits under § 122.62 shall be proposed in draft form, shall contain the designation of the General Permit Program Area (under § 122.62(a)(2)), and, except for general permits for storm sewers, shall be sent to the EPA Deputy Assistant Administrator for Water Enforcement for concurrence or objection during the public comment period. No final permit shall be issued if the EPA Deputy Assistant Administrator for Water Enforcement objects to the general permit. Such objections must be made within 90 days from the public notice for the draft general permit under § 124.56(b).

(b) Any draft permit formulated under paragraph (a) shall be based on the administrative record as defined in § 124.10 and § 124.62 (for NPDES permits only).

[*Comment*: Public comment and hearings under §§ 124.12 and 124.13 pertaining to permit modifications will be limited to the terms of the proposed modification.]

(c) In the case of a proposed modification to an existing 404 permit initiated by the State Director which involves any change in applicable conditions or requirements under §§ 122.11 or 123.105, such proposed modification shall be treated as a permit application and shall be processed in accordance with all requirements of § 123.113.

§ 124.8 Statement of Basis.

A statement of basis shall be prepared for every draft permit formulated under § 124.6 for which a fact sheet is not required under § 124.9. The statement of basis shall briefly describe the derivation of the terms and conditions of the permit and the reasons for them. The statement of basis shall be part of the administrative record and shall be sent to the applicant and to interested State and Federal agencies and to other members of the public on request.

§ 124.9 Fact Sheet.

(a) A fact sheet shall be prepared for every draft permit for a major HWM facility, UIC facility, or NPDES discharger, for every NPDES general permit under § 122.62 and NPDES draft permit that incorporates a variance or modification, and for every draft permit which the Director finds is the subject of widespread public interest or raises major issues. The fact sheet shall briefly set forth the major facts and the significant factual, legal, methodological and policy questions considered in setting the terms of the draft permit. The Director shall send this fact sheet to the applicant, to interested State and Federal agencies, and to any other person on request. Any of these persons may waive their right to receive a fact sheet for any classes and categories of permits.

(b) The fact sheet shall include, where applicable:

(1) A brief description of the type of facility or activity which is proposed to be permitted;

(2) The type and quantity of wastes, pollutants or fluids which are proposed to be treated, stored, disposed of, discharged, emitted or injected;

(3) A brief summary of the basis for the proposed permit conditions including reference to applicable statutory or regulatory provisions and, for EPA permits, appropriate supporting references to the administrative record required by § 124.10, and § 124.62 (for NPDES permits only);

(4) Reasons why any requested variances, modifications, or alternatives to required standards do or do not appear justified;

(5) A description of the procedures for deciding on the final permit including:

(i) The beginning and ending dates of the comment period required under § 124.12 and the address where comments will be received;

(ii) Procedures for requesting a hearing and the nature of that hearing; and

(iii) Any other procedures by which the public may participate in the formulation of the final permit.

(6) Name and telephone number of a person to contact for additional information.

(c) "Major permit" means:

(1) In the case of an NPDES permit, any permit for dischargers on the state-by-state list of major dischargers;

(2) In the case of a UIC permit, any permit to an underground injection well identified as a major permit in EPA's annual operating guidance for EPA Regional Offices and States; and

(3) In the case of a RCRA permit, a permit for a major HWM facility as defined in § 122.3(b).

§ 124.10 Administrative record for EPA-issued permits.

(a) Decisions by the Regional Administrator to formulate a draft permit under § 124.6 shall be made only on the basis of the administrative record defined in this section.

(b) The record for formulating a draft permit under § 124.6 shall consist of:

(1) The initial application and any supporting data furnished by the applicant;

(2) The draft permit;

(3) The statement of basis under § 124.8 or any fact sheet under § 124.9;

(4) All documents cited in the fact sheet or statement of basis, unless they are published materials which are generally available, (in which case they should be specifically referenced);

(5) Other documents contained in the supporting file for the permit, including correspondence, telephone and meeting memoranda, compliance reports, etc.

(6) For NPDES permits only, any environmental assessment, Environmental Impact Statement, negative declaration, or environmental impact appraisal that may have been prepared.

(c) The record for formulating a draft permit under § 124.7 shall consist of the draft permit, the statement of basis required by § 124.8 or fact sheet prepared under § 124.9 and all documents cited in the fact sheet or the statement of basis.

(d) Material readily available at the issuing Regional Office or published material which is generally available, and which is included in the administrative record under the

standards of paragraphs (b) and (c), does not need to be physically included in the same file as the rest of the record as long as it is specifically referenced in the statement of basis or the fact sheet.

[*Comments*: (1) The administrative record for draft permits under this section will comprise the bulk of the material for the final administrative record.

(2) See also § 124.62 for additional NPDES administrative record requirements.]

§ 124.11 Public notice of permits.

(a) Notices shall be circulated in a manner designed to inform interested persons of a hearing or determination dealing with permit denial or issuance. Notice of a draft permit shall allow at least 30 days for public comments and notice of a hearing shall be given 30 days before the hearing.

[*Comment*: In the discretion of the Director, this could also include press releases or the use of any other forum or medium to elicit public participation.]

(b) Notice of the formulation of any draft permit formulated under § 124.6 and notice of an initial new source determination under § 124.61, notice of receipt of a section 404 application and notice of all hearings required by § 124.13 shall be given by the Director:

[*Comment*: Notice of receipt of a section 404 permit application is required only where no draft permit is formulated. See § 123.98(c).]

(1) By mailing a copy of the notice to:

(i) The applicant;

(ii) Any other agency which has issued or will issue a RCRA, UIC, PSD or NPDES permit to the activity in question;

(iii) To any State agency responsible for plan development under sections 208(b)(2) or 303(c) of the Clean Water Act;

(iv) For NPDES permits only, to the U.S. Army Corps of Engineers, to Federal and State agencies with jurisdiction over fish, shellfish and wildlife resources and to other appropriate governmental authorities including any affected state;

(v) For 404 permits only:

(A) To the Regional Director of the Federal Aviation Administration, if the discharge involves the construction of structures which may affect aircraft operations or for purposes associated with seaplane operations;

(B) To any adjacent property owner;

(C) To any State agency(ies) responsible for administering water quality, fish, shellfish and wildlife resources and State Section 404 programs in the affected state, if the proposed discharge may effect the waters of any State(s) other than the State in which the work is to be done;

(2) By mailing a copy of the notice to any person on a mailing list developed:

(i) From those who request to be in the list;

(ii) By soliciting persons for "area lists" from participants in past permit proceedings in that area; and

(iii) By notifying the public as to the availability of such notices through periodic press publication and notices in such publications as Regional and State funded newsletters, environmental bulletins, or State Law Journals. The mailing list may be updated from time to time by requesting an indication of continued interest in being on the mailing list; and

(3) By any of the following methods:

(i) By application of a notice meeting the requirements of paragraph (c) in a daily or weekly newsletter within the area affected by the facility or activity;

(ii) By posting a copy of the information required under paragraphs (c) and (d) at the principal office of the municipality or political subdivision affected by the facility or activity, and by posting a copy at the United States Post Office serving those premises;

(iii) By any other method reasonably calculated to give actual notice of the action in question to the persons potentially affected by it; or

(iv) Where the program is being administered by an approved State, in any other manner constituting legal notice to the public under State law.

(4) Any person otherwise entitled to receive notice under subparagraph (1) of this paragraph may waive their right to receive notice for any classes and categories of permits.

(c) All public notices issued under this Part shall contain the following information:

(1) Name and address of the office processing the application or conducting the hearing;

(2) Name and location of the facility or activity to be permitted, except in the case of NPDES general permits under § 122.82;

(3) Name of the person, and address and telephone number where interested persons may obtain further information, including copies of the draft permit and statement of basis or fact sheet or, for section 404 permits only, copies of the application and proposed permit, if required.

(4) For EPA-issued permits, the location of the administrative record required by §§ 124.10 and 124.62 (for NPDES permits only) and the times at which it will be open for public inspection;

(5) For NPDES permits only, (i) a general description of the location of each existing or proposed discharge point, including the receiving water;

(ii) If the applicant has submitted data and information in accordance with CWA section 316(a) for a thermal variance, a statement to that effect. The notice shall state that all data submitted by the application are available as part of the administrative record for public inspection during office hours. The notice shall also state that any person may comment in writing under § 124.12 upon the applicant's desired alternative effluent limitations and may also request a hearing; and

(6) For 404 permits only, applicable statutory authority and regulations;

(7) Any additional information considered necessary or proper.

(d) Public notice mailed to persons identified in paragraphs (b)(1) and (b)(2) shall contain the information required by paragraph (c) and the following information:

(1) A brief description of the applicant's activities or operations that are involved in the facility or activity described in the application and a statement whether the application pertains to a new or existing facility or activity.

(2) A summary of major terms of the draft permit;

(3) Brief description of the comment procedures required by § 124.12, and the time and place of any public hearing that will be held; and

(4) For NPDES permits only, if the discharge is from a new source, a statement of the Regional Administrator's decision as to whether an Environmental Impact Statement will be or has been prepared; and

(5) For 404 permits only:

(i) The purpose of the proposed activity and intended use, including a description of the type of structures, if any, to be erected, and a description of the type, composition and quantity of materials to be changed and means of conveyance; and any proposed conditions and limitations on the discharge;

(ii) Name and water quality standards classification, if applicable, of the receiving waters into which the discharge is proposed, and a general description and location of the site of each proposed discharge.

(iii) Any other available information which may assist the public in evaluating the likely environmental impact of the proposed activity, if any, upon the integrity of the receiving waters.

(6) A statement of the right to request a public hearing.

(7) Any other procedures by which the public may participate in the formulation of the final permit.

(e) In addition to the information required under paragraphs (c) and (d) above, the public notice of a public hearing held under § 124.13 shall contain the following information:

(1) Reference to the date of previous public notice relating to the permit;

(2) Date, time and place of the hearing; and

(3) In the case of mailed public notice, a brief description of the nature and purpose of the hearing, including the applicable rules and procedures.

(4) For 404 permits only, a summary of major issues raised to date during the public comment period.

(f) Public notice issued under this section may describe more than one permit and more than one permitted activity. No public notice shall be given in cases where a request for permit modification is denied, but written notice of that denial shall be given the person requesting such modification. Public notice of the draft permit may be issued at the same time public notice of a hearing is given.

§ 124.12 Public comments and requests for hearings.

(a) During the public comment period provided under § 124.11(a), any interested persons may submit written comments and may request a public hearing. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing. All comments shall be considered in preparing the final permit and shall be responded to as provided in § 124.19.

(b) Written comments may be submitted: (i) For all permits except those section 404 permits for which no draft permit is required (see § 123.98(c)), on the draft permit and accompanying statement of basis or fact sheet or other portions of the administrative record;

(ii) For 404 permits for which no draft permit is required (see § 123.98(c)), on the permit application or amended application (including proposed permit where required).

(c) Where the Director finds a significant degree of public interest in a draft permit or permits, he/she shall hold a public hearing to consider the permit or permits. Public notice of that hearing shall be given as specified in § 124.11. Where a state authority other than the Director is required under State law to hold hearings, on permits, it rather than the Director may hold hearings under this paragraph.

(d) Any person may submit oral or written statements at hearings held under this section. Reasonable limits may be set upon the time allowed for oral statements.

§ 124.13 Public hearings.

(a)(1) When a public hearing will be held under § 124.13 and EPA is the permitting authority, the Regional Administrator shall designate a Presiding Officer for the hearing who shall be responsible for its scheduling and orderly conduct. The Regional Administrator may also designate an EPA panel to take part in the hearing. The membership of the panel in general should consist of EPA employees having special expertise in an area related to the issues to be addressed at the hearing. For this reason, the membership of the panel may change as different issues are presented for discussion. The Regional Administrator may also designate EPA employees who will not or possibly will not serve on the hearing panel to provide staff support to the panel as needed.

(2) Joint EPA-State hearings on permits subject to this Part, one or more of which will be issued by EPA and one or more of which will be issued by an approved state, may be held either as provided in § 124.4 or otherwise by agreement in individual cases. Where joint hearings are held with a State agency, the Presiding Officer and the panel members may be employees of either EPA or the State. The Presiding Officer, any panel members and any panel support staff shall be chosen by agreement of EPA and the State.

(b) At any hearing under this section, any person may submit oral or written statements and data concerning the proposed permit. Reasonable limits may be set upon the time allowed for oral statements, and the submission of statements in writing may be required.

(c) The Presiding Officer and any panel member may question any person participating in the hearing. Persons in the hearing audience, including other hearing participants, may submit written questions to the Presiding Officer for the Presiding Officer to ask the participants, and the Presiding Officer may, after consultation with the panel, and at his/her sole discretion, ask these questions, or allow a member of the panel to ask them.

(d) Participants in the hearing shall submit for the hearing record such additional material as the hearing panel may request within 10 days following the close of the hearing, or such other period of time as is ordered by the Presiding Officer. Participants may also submit additional information for the hearing record on their own accord within 10 days after the close of the hearing.

(e) The hearing shall be either stenographically reported verbatim or tape recorded.

§ 124.14 Cross-examination and other supplementary procedures.

(a) No cross-examination shall be permitted at any hearing held under § 124.13. However, any participant in such a hearing may submit a request for cross-examination after the hearing has closed. The request shall be received by EPA within one week after a full transcript of the panel hearing becomes available and shall specify:

(1) The disputed issue(s) of material fact regarding which cross-examination is requested. This shall include an explanation of why the questions at issue are factual, rather than of an analytical or policy nature, the extent to which they are in dispute in the light of the record made thus far, and the extent to which and why they can reasonably be considered material to the decision on the application for modification; and

(2) The person(s) a participant desired to cross-examine, and an estimate of the time necessary. This shall include a statement as to why the cross-examination requested can be expected to result in resolving the issue of material fact involved.

(b) As expeditiously as practicable after receipt of all requests for cross-examination under paragraph (a) of this section, the Presiding Officer, after consultation with the hearing panel, shall issue an order either granting or denying each such request, which shall be disseminated to all persons requesting cross-examination and all persons to be cross-examined. If any request for cross-examination is granted, the order shall specify:

(1) The issues on which cross-examination action is granted;

(2) The persons to be cross-examined on each issue;

(3) The persons allowed to conduct cross-examination;

(4) Time limits as appropriate for the examination of witnesses by each cross-examiner; and

(5) The date, time and place of the supplementary hearing where cross-examination shall take place.

(c) No later than the time set for requesting cross-examination, a hearing participant may request that alternative methods of clarifying the record (such as the submittal of additional written

information) be used in lieu of or in addition to cross-examination. The Presiding Officer shall issue an order granting or denying such request at the time he issues (or would have issued) an order under paragraph (b) of this section. If the request is granted, the order shall specify the alternative provided and any other relevant information (e.g., the due date for submitting written information).

(d) In issuing any order under paragraph (b), the presiding officer:

(1) May determine that one or more participants have the same or similar interests and that to prevent unduly repetitious cross-examination, they should be required to choose a single representative for purposes of cross-examination. In such a case, the order shall simply assign time for cross-examination by that single representative without identifying the representative further.

(2) Shall consider the extent to which the issues raised are likely to be the subject of an evidentiary hearing under Subpart E and shall deny cross-examination with respect to any such issues. The presiding officer may grant cross-examination to the extent he/she finds such a grant would be likely to avoid the need for an evidentiary hearing.

(3) May require, as a precondition to ruling on the merits of such request, alternative means of clarifying the record to be used whether or not a request to do so has been made under paragraph (b). The person requesting cross-examination shall have one week to comment on the results of utilizing such alternative means, following which the Presiding Officer, as soon as practicable, shall issue an order granting or denying such person's request for cross-examination.

(e) The Presiding Officer and at least one member of the original hearing panel shall preside at the supplementary hearing. During the course of the hearing, the Presiding Officer shall have authority to modify any order issued under paragraph (b) of this section. A verbatim transcript shall be made of this hearing.

§ 124.15 Obligation to raise points and provide information during the comment period.

All persons, including applicants, who believe any of the terms of a draft permit is not appropriate, must raise all reasonably ascertainable issues and submit all arguments and factual grounds supporting their position, including all supporting material by the close of the public comment period (including any public hearing period) required by § 124.12.

§ 124.16 Reopening of comment period.

If any information or arguments submitted during the public comment period, including information or arguments whose submission is required under § 124.15, appears to raise substantial new questions concerning a permit, the Regional Administrator may conclude that one of the following actions is necessary for an informed decision:

(a) Formulation a new draft permit, appropriately modified, under § 124.6.

(b) Preparation a fact sheet or revised fact sheet under § 124.9 and reopening of the comment period under § 124.12; or

(c) Reopening of the comment period under §124.12 to give interested persons an opportunity to comment on the information or arguments submitted.

In each case the notice required by § 124.11 shall be given.

§ 124.17 Issuance and effective date of permits.

(a) After the close of the public comment period (including any public hearing period) required by § 124.12 on a draft permit, the Regional Administrator shall prepare and issue a final permit and shall serve notice of that action on the applicant, and on each person who has submitted written comments or requested notice of the issuance of the final permit. This notice shall include reference to the procedures available to appeal a RCRA, UIC or PSD permit determination or to contest an NPDES permit determination.

(b) A permit shall become effective 30 days after the service of notice of the decision under paragraph (a), unless:

(1) A later effective date is specified in the decision; or

(2) Review is requested under § 124.21 (RCRA, UIC and PSD permits) or a request for an evidentiary hearing is granted under § 124.75 (NPDES permits).

§ 124.18 Stays of contested permit terms.

(a) *Stays.* (1) If a request for review of a RCRA or UIC permit under § 124.21 or § 124.60 is granted, the force and effect of the contested permit terms shall be stayed and shall not be subject to judicial review pending final agency action.

(2) Uncontested terms which are not severable from those contested shall be stayed together with the contested terms under subsection (a). Stayed provisions shall be designated by the Regional Administrator. All other provisions of a permit shall remain in full force and effect, and the permittee shall be subject to all these provisions.

(b) *Stays based on Cross-Effects.* (1) No stay may be granted based on the grounds that an appeal to the Administrator under § 124.21 will likely result in changes to a permit granted to a facility or activity under one statute that will in turn make changes to a permit under some other statute advisable, unless each of the permits involved has been appealed to the Administrator and he/she has accepted the appeal.

(2) If terms and conditions of a RCRA or UIC permit are marked down for reconsideration in an evidentiary hearing on an NPDES permit under § 124.82 then the affected terms and conditions shall be stayed pending both the presiding officer's recommended decision as to them and any action on any recommended changes by the Regional Administrator. Any decision by the Regional Administrator on the presiding officer's recommendation shall be treated like the issuance of a permit for purpose of § 124.17.

(3) No stay of an NPDES, RCRA or UIC permit issued by EPA shall be granted based on the staying for any reason of any such permit issued by a State except at the discretion of the Regional Administrator and upon written request from the State Director.

[*Comment:* NPDES stay provisions are provided in § 124.60.]

§ 124.19 Response to comments.

(a) At the time that any final permit is issued, the Director shall issue a response to comments for that permit. This response to comments shall contain:

(1) A specific indication of which provisions of the draft permit have been changed in the final permit, and the reasons for the change; and

(2) A brief description of and response to all significant comments on the draft permit of the permit application (for section 404 permits only) raised during the public comment period, or during any hearing.

(b) For EPA-issued permits, any documents cited in the response to comments shall be included in the administrative record for the final permit as defined in § 124.20.

(c) The response to comments shall be available to the public.

[*Comment:* If new points are raised or new material supplied during the public comment period, EPA may document its response to those matters by adding new material to the administrative record.]

§ 124.20 Administrative record for final permit where EPA is the permitting authority.

(a) Decisions of the Regional Administrator to issue a final permit under § 124.17 shall be made on the basis of the administrative record defined in this section.

(b) The administrative record for any final permit shall consist of the administrative record for the draft permit and

(1) All comments received during the public comment period provided under § 124.12;

(2) The tape or transcript of any hearing(s) held under § 124.13.

(3) The response to comments required by § 124.19;

(4) For NPDES new source permits only, any final Environmental Impact Statement;

(5) Other documents contained in the supporting file for the permit, including correspondence, telephone and meeting memoranda, compliance reports, etc.; and

(6) The final permit.

(c) The additional documents required under paragraph (b) shall be added to the record as soon as feasible after their receipt or publication by the Agency.

(d) This section applies to all final RCRA, UIC, PSD and NPDES permits where the draft permit was subject to the administrative record requirements of § 124.10.

(e) Material readily available at the issuing Regional Office or published materials which are generally available, and which are included in the administrative record under the standards of this section or of § 124.19 ("Response to Comments"), do not need to be physically included in the same file as the rest of the record as long as it is specifically referenced in the administrative record or in the response to comments.

§ 124.21 Appeal of RCRA, UIC and PSD permits.

(a) Within 30 days after a RCRA, UIC or PSD permit has been issued under § 124.17, any person who filed comments on that permit or participated in the public hearing may petition the Administrator to review any term or condition of the permit. The thirty day period within which a person may request review under § 124.17 begins with the postmark date of notice of the Regional Administrator unless a later date is specified in such notice. The petition shall include a statement of the reasons supporting such review, including a demonstration that any points being raised were raised during the public comment period as required by § 124.12 and where appropriate, a showing that the term or condition in question is based on

(1) A finding of fact or conclusion of law which is clearly erroneous, or

(2) An exercise of discretion or policy which is important and which the Administrator should, in his discretion, review.

(b) The Administrator may also decide on his or her own initiative to review any term or condiditon of any RCRA, UIC or PSD permit issued under this Part.

(c) Within a reasonable time following the filing of the petition for review, the Administrator shall issue an order either granting or denying the petition for review. To the extent review is denied, the terms and conditions of the permit become the final decison of the agency. Public notice of any grant of review or a decision by the Administrator to take review under paragraph (b) shall be given as provided in § 124.11. Any such notice shall set forth a briefing schedule for the appeal and shall state that any interested person may file an amicus brief. Notice of denial of review shall be sent to the person(s) requesting review.

(d) The Administrator may defer consideration of an appeal under this section until the completion of proceedings under Subpart E or F relating to an NPDES permit issued to the same source.

(e) A petition to the Administrator under paragraph (a) of this section is, under 5 U.S.C. 704, a prerequisite to the seeking of judicial review of the final decision of the agency.

(f)(1) For purposes of judicial review under the appropriate Act, final agency action occurs when a final RCRA, UIC or PSD permit is issued by EPA after Agency review procedures are exhausted. A final permit shall be prepared and issued by the Regional Administrator (i) when the Administrator issues notice to the parties that review has been denied if review is denied; (ii) when the Administrator issues a decision if review is not denied and the Administrator does not remand the proceedings or (iii) upon the completion of remand proceedings if the proceedings are remanded, unless the Administrator's Regional order specifically provides that appeal of the remand decision will be required in order to exhaust administrative remedies.

(2) Notice of any final action regarding a PSD permit shall promptly be published in the Federal Register.

§ 124.22 Additional time after service by mail.

Whenever a party or interested person has the right or is required to do some act or take some proceeding within a prescribed period after the service of notice or other paper upon him or her by mail, three days shall be added to the prescribed time.

Subpart B—Specific Procedures Applicable to RCRA Permits

§ 124.31 Public notice of receipt of application and availability of summary.

(a) Upon receipt of a complete RCRA permit application, including both Part A and Part B, for major HWM facilities as defind in § 122.3(b), the Regional Administrator shall issue a public notice that an application has been received.

(b) This notice, as a minimum shall be distributed to the following:

(1) The appropriate State agency in the State where the proposed hazardous waste management facility will be located;

(2) The chief executive or legislative office of any county or municipality within a 10 mile (16 km.) radius of the proposed facility;

(3) The public library serving the location of the facility;

(4) The applicant;

(5) Any person on the mailing list referred to in Section 124.11, and

(6) Anyone else requesting it.

(c) The public notice shall include the following as a minimum:

(1) Name and address of the facility seeking a permit;

(2) Where complete copies of the application are available for inspection;

(3) The name of a person in the EPA Regional office who can be contacted for information or questions; and

(4) A statement that comments may be submitted in writing to EPA on the content of the application, the adequacy of the information submitted, recommendations regarding approval or disapproval of the permit, possible permit conditions, and other related matters during the period of permit review by EPA, and

(5) A statement whether or not a summary of the application will be prepared and when any such summary will be made available to persons requesting it.

(6) That after issuance of a draft permit, all interested persons will be given an opportunity to comment in accordance with § 124.11.

Subpart C—Specific Procedures Applicable to PSD Permits

§ 124.41 Procedures for small sources.

(a) The procedures in Subpart A shall not apply to a source whose increased allowable emissions are less than 50 tons a year, 1,000 pounds a day, or 100 pounds an hour. Instead, to the extent practicable, the Regional Administrator shall make every effort to observe the following schedule:

(1) Completion of the required analyses and notice of the tentative decision to issue or deny the permit within 30 days after receipt of a complete application; and

(2) Completion of the public participation process, to the extent required by § 52.21(r)(3), within 45 days after receipt of a complete application.

(b) At the time the Regional Administrator gives notice of his/her tentative decision, he/she shall also open the comment period, if necessary, for 30 days. If no response is received after 15 days, no public hearing shall be held. If no supportable concerns are received during the scheduled 30-day public comment period (or the public hearing, if one is held) the Regional Administrator shall issue a final decision.

Subpart D—Specific Procedures Applicable to NPDES Permits

§ 124.51 Purpose and scope.

(a) This Subpart sets forth additional requirements and procedures for decisionmaking for the NPDES program.

(b) Decisions on NPDES variance requests will ordinarily be made during the permit issuance process. Permit modifications and other changes in permit terms will be made generally through the same procedures that apply in making decisions on initial permits. Each such decision must move through the same procedures of notice-and-comment and potential hearings as the basic permit.

§ 124.52 Permits required on a case-by-case basis.

(a) Various sections of Part 122, Subpart D allow the Director to determine, on a case-by-case basis, that certain concentrated animal feeding operations (§ 122.70), concentrated aquatic animal production facilities (§ 122.77), separate storm sewers (§ 122.79), and certain other facilities covered by general permits (§ 122.82) that do not generally require an individual permit may be required to obtain an individual permit because of their contribution to water pollution.

(b) Whenever the Regional Administrator decides that an individual permit should be required under this section, the Regional Administrator shall inform the discharger in writing of that decision, the reasons underlying it and shall include an application form in such notice. The discharger must then apply for a permit under § 122.64 within 60 days of such notice. The question whether the initial designation was proper will remain open for consideration during the public comment period under § 124.11 and any subsequent hearing.

§ 124.53 State certification.

(a) Under section 401(a)(1) of CWA, EPA may not issue a permit until a certification is granted or waived in accordance with that section by the State in which the discharge originates or will originate.

(b) When an application is received which does not include a State certification, the Regional Administrator shall forward the application to the certifying State agency with a request that certification be granted or denied.

(c) If State certification has not been received by the time the draft permit is prepared, the Regional Administrator shall send the certifying State agency:

(1) A copy of a draft permit;

(2) A statement that the EPA cannot issue or deny the permit until the certifying State agency has granted or denied certification under § 124.55, or waived its right to certify; and

(3) A statement that the right to certify will be deemed waived unless exercised within a specified reasonable time which shall not exceed 60 days from the date the draft permit is sent to the State unless the Regional Administrator finds that unusual circumstances require a longer time.

(d) Any State certification shall be issued or denied within the reasonable time specified under § 124.53(c)(3). The State shall provide notice of its action, including a copy of any certification, to the applicant and the Regional Administrator.

(e) A State certification shall be made in writing and shall include:

(1) The terms and conditions which will result in compliance with the applicable provisions of sections 208(e), 301, 302, 303, 306, and 307 of CWA and with appropriate requirements of State law;

(2) Where the State certifies a draft permit instead of an application, any conditions, more stringent than those in the draft permit, which the State finds necessary to comply with the requirements listed in subparagraph (1). For each such condition, the provision of CWA or State law which forms the basis for the condition shall be identified. Failure to provide such a statement shall be deemed a waiver of the right to certify with respect to such condition; and

(3) A statement with respect to each term and condition of the draft permit of the extent to which such term or condition can be made less stringent without violating the requirements of State law including water quality standards. Failure to provide such a statement shall be deemed a waiver of the right to certify with respect to any such less stringent condition which may be established during the EPA permit issuance process.

[*Comment:* The requirement of paragraph (e)(3) of this section is necessary to enable the certification to serve its statutory function without requiring continual recertification to the State. For example, a State might certify that a draft permit containing a technology-based limitation of 300 kg/day of BOD will meet State water quality standards and other State law requirements. However, if during the permit issuance process EPA decides that 400 kg/day is the appropriate technology requirement, it is not clear at present whether the previous State certification continues to be valid. It would be impracticable and would add to delay in permit issuance if EPA resubmitted such permits to the State each time the EPA considered setting a less stringent limitation than contained in the draft permit. The requirement that States clearly identify what conditions are necessary to meet State law will simplify the permit issuance process and make certification more useful. However, States may not require EPA to adopt less stringent requirements. See § 124.54.]

§ 124.54 Special provisions for State certification and concurrence on applications for section 301(h) modifications.

(a) Where an application for a permit incorporating a request under 301(h) of CWA is submitted to the State, the appropriate State official shall either:

(1) Deny the request for the modified permit under section 301(h) (and so notify the applicant and EPA); and if the State is an approved NPDES State and the permit is due for reissuance, proceed to process the permit application under normal procedures; or

(2) Forward a certification meeting the requirements of this Subpart to the Administrator or a person designated by the Administrator.

(b) Where EPA issues a tentative determination on the request for modification permit under CWA section 301(h), and no certification has been received under paragraph (a), the Administrator or a person designated by

the Administrator shall forward the tentative determination to the State in accordance with § 124.53(b) specifying a reasonable time for State certification and concurrence. If the State fails to deny or grant certification and concurrence under paragraph (a) within such reasonable time, certification will be deemed to be waived and the State will be deemed to have concurred in the issuance of a modified permit under CWA section 301(h).

(c) Any certification provided by a State under paragraph (a)(2) shall constitute the State's concurrence (as required by section 301(h)) in the issuance of the section 301(h) modified permit subject to any conditions specified therein by the State.

[*Comment:* CWA section 301(h) certification/concurrence under this section will not be forwarded to the State by EPA for recertification after the permit issuance process. Accordingly, States must specify any conditions required by State law including water quality standards, in the certification.]

§ 124.55 Effect of State certification.

(a) Where certification is required under section 401(a)(1) of CWA, no final permit shall be issued:

(1) If certification is denied, or

(2) Unless the final permit incorporates any requirements specified in the certification under § 124.53(d)(1) and (2).

(b) If the State law upon which a certification is based changes, or if a State court stays, vacates or remands a certification, a State which has issued a certification under § 124.53 may issue a modified certification or notice of waiver and forward it to EPA. If the modified certification is received prior to final Agency action on the permit, the permit shall be issued consistent with any more stringent conditions which are based upon State law identified in such certification. If the certification or notice of waiver is received after final Agency action on the permit, the Regional Administrator may modify the permit only to the extent necessary to delete any conditions based on a condition in a certification found invalid by a State court.

(c) A State may not condition a certification or deny a certification on the grounds that State law requires a less stringent condition. The Regional Administrator shall disregard any such certification conditions, and will consider such denials of certification to constitute waivers of certification.

[*Comment:* State certification rights proceed from the authority of States under section 510 of CWA to set more stringent limitations than those require[d] by CWA. States may not require EPA to disregard or downgrade Federal requirements.]

(d) A permit may be modified during Agency review in any manner consistent with a certification meeting the requirements of § 124.53(d). No such modifications shall require EPA to submit the permit to the State for recertification.

(e) Review and appeals of conditions specified by the State shall be made through the applicable procedures of the State and may not be made through the procedures in this Part.

§ 124.56 Fact sheets.

(a) In addition to the requirements of § 124.9, NPDES fact sheets shall contain the following:

(1) Any calculations or other necessary explanation of the derivation of specific effluent limitations and conditions, including a citation to the applicable guideline or standard provisions as required under § 122.69 and reasons why they are applicable or an explanation of how the alternate effluent limitations were developed;

(2) Where appropriate, a sketch or detailed description of the location of the discharge described in the application;

(3) For EPA-issued NPDES permits, the results of any State certification under § 124.53.

(b) In addition to the requirements of § 124.9, the Director shall send all fact sheets for NPDES permits to the District Engineer of the Corps of Engineers, to the Regional Director of the U.S. Fish and Wildlife Service and the National Marine Fisheries Service, to other interested State and Federal agencies (including EPA where the draft permit is prepared by the State), and to any other person on request. Any of these persons may waive their right to receive notice for any classes and categories of permits.

§ 124.57 Requirements for NPDES draft permits incorporating section 301(h) modifications.

Sections 124.6, 124.7, 124.8, 124.9, 124.10 and 124.56 are applicable to draft permits incorporating section 301(h) modifications except that the terms "Administrator or a person designated by the Regional Administrator" shall be substituted for the term Director, as appropriate.

§ 124.58 Public notice.

(a) In addition to the information required under § 124.11 (c) and (d), mailed public notice of an NPDES draft permit for a discharge where a CWA section 316(a) application has been filed under § 122.64(e) shall include:

(1) A statement that the thermal component of the discharge is subject to effluent limitations under sections 301 or 306 of CWA and a brief description including a quantitative statement of the thermal effluent limitations proposed under sections 301 or 306; and

(2) A statement that a section 316(a) application has been filed and that alternative less stringent effluent limitations may be imposed on the thermal component of the discharge under section 316(a) and a brief description including a quantitative statement of the alternative effluent limitations, if any, included in the application.

(3) If the applicant has filed an early screening application under § 125.72 for a section 316(a) variance, a statement that the applicant has submitted such a plan.

(b) Notice of the formulation of a draft general permit under § 122.82 shall include:

(1) The requirements of § 124.11 (c) and (d), shall be concurrently published in a daily or weekly newspaper within the area affected by the discharge and in the Federal Register for EPA-issued permits in a manner constituting legal notice under State law for State issued permits.

(2) The public notice for general permits shall also include:

(i) A brief description of the types of activities or operations to be covered by the general permit;

(ii) A map or description of the General Permit Program Area; and

(iii) The basis for choosing the General Permit Program Area.

(3) The Director shall use all other reasonable means to notify affected dischargers of the draft general permit.

(c) A public notice of an evidentiary hearing under Subpart E shall contain the information required under § 124.11(c), (e)(1) and (e)(3) and a mailed public notice shall also include:

(1) Reference to any public hearing under § 124.12 on the disputed permit;

(2) Name and address of the person(s) requesting the evidentiary hearing;

(3) Brief description of the permit terms and conditions which have been contested and for which the evidentiary hearing has been granted;

(4) Brief description of the nature and purpose of the hearing including the following declarations:

(i) Any person seeking to be a party must file a request to be admitted as a party to the hearing within 15 days of the date of publication of this notice;

(ii) Any person seeking to be a party may, subject to the requirements of § 124.76, propose material issues of fact or law not already raised by the original requester or another party;

(iii) The terms and conditions of the permit(s) at issue may be amended after the evidentiary hearing and any person interested in those permit(s) must request to be a party in order to preserve any right to appeal or otherwise contest the final administrative determination.

(5) Names or organizational description of the EPA employees who shall constitute "Agency trial staff" and the "decisional body" under § 124.78 who are subject to the *ex parte* communication rules.

(6) The name, address and office telephone number of the Regional Hearing Clerk.

(d) A public notice for a draft permit that will be processed under Subpart F shall include the information in paragraphs (c) and a statement that any hearing will be held under the non-adversary procedures for initial licensing. In addition, a mailed public notice shall include:

(1) The information in paragraph (d) except that a public hearing under paragraph (d)(2) is discretionary with the Regional Administrator;

(2) A statement that the permit will be processed under the nonadversary procedures for initial licensing of Subpart F, together with a brief description of those procedures. This description shall state explicitly the manner and timing for any person to request a hearing on the permit. If EPA has decided on its own motion to hold a hearing, the notice shall so state, and shall also contain the information required by § 124.41(f);

(3) A statement that written comments on the draft permit and, in the case of a section 301(h) application, the tentative determination to grant or deny the application submitted to EPA within thirty (30) days of the date of the notice will be considered by EPA in making a final decision on the application. This 30-day period may be extended up to 60 days *sua sponte* or on request of an interested party;

(4) In the case of the public notice of the draft permit or denial of an application for a modified permit under section 301(h) shall include:

(i) A summary of the information contained in the application; and

(ii) A summary of the tentative determination prepared under § 124.114(f).

(e) A notice of a grant of a panel hearing requested under Subpart F shall include the applicable information from paragraph (d). In addition, the mailed public notices shall include:

(1) Name and address of the person requesting the hearing, or a statement that the hearing is being held by order of the Regional Administrator, and the name and address of each known party to the hearing;

(2) Names or organization description of the EPA employees who shall constitute the "decisional body" and the "Agency trial staff," under § 124.78 who are subject to the *ex parte* communication rules;

(3) A statement whether the recommended decision will be issued by the Presiding Officer or by the Regional Administrator;

(4) The due date for filing a written request to participate in the hearing under § 124.117;

(5) The due date for filing comments under § 124.118; and

(6) The name, address, and office telephone number of the Regional Hearing Clerk.

§ 124.59 Terms requested by the Corps of Engineers and other governmental agencies.

(a) During the comment period for an NPDES draft permit, if the District Engineer advises the Director in writing that anchorage and navigation of any of the waters of the United States would be substantially impaired by the granting of a permit, the permit shall be denied and the applicant so notified. If the District Engineer advises the Director that imposing specified conditions upon the permit is necessary to avoid any substantial impairment of anchorage or navigation, then the Director shall include the specified conditions in the permit. Review or appeal of denial of a permit or of conditions specified by the District Engineer shall be made through the applicable procedures of the Corps of Engineers, and may not be made through the procedures provided in this Part.

(b) If during the comment period the U.S. Fish and Wildlife Service, the National Marine Fisheries Service, or any other State or Federal Agency with jurisdiction over fish, wildlife or public health advises the Director in writing that the imposition of specified conditions upon the permit is necessary to avoid substantial impairment of fish, shellfish or wildlife resources, the Director may include the specified conditions in the permit to the extent they are determined necessary to carry out the provisions of CWA.

(c) In appropriate cases the Director may consult with one or more of the agencies referred to in this section before issuing a draft permit and may reflect their views in the statement of basis, the fact sheet or the draft permit.

§ 124.60 Issuance and effective date of NPDES permits.

In addition to the requirements of § 124.17, the following provisions apply to NPDES permits.

(a) If a request for an evidentiary hearing is granted under §§ 124.75 or 124.111(a)(3) regarding the initial permit issued for a new source or a new discharger, or if a petition for review of the denial of a request for an evidentiary hearing with respect to such a permit is timely filed with the Administrator under § 124.101, the applicant shall be without a permit for the proposed new source or new discharge, pending final Agency action under § 124.101.

(b) Whether or not a draft NPDES permit was formulated or final permit was issued, the Regional Administrator, at any time prior to the rendering of an initial decision in an evidentiary hearing on that permit, may withdraw the permit in whole or in part and formulate a new draft permit under § 124.7 addressing the portions so withdrawn. The new draft permit shall proceed through the same process of public comment and opportunity for a public hearing, etc. as would apply to any other draft permit subject to this Part. Any portions of the permit which are not withdrawn and which are not stayed under § 124.60 shall remain in effect.

(c)(1) If a request for a hearing is granted in whole or in part under §§ 124.75 or 124.111(a)(3) regarding a permit for an exisiting source, or if a petition for review of the denial of a request for an evidentiary hearing with respect to such a permit is timely filed with the Administrator under § 124.101, the force and effect of the contested provisions of the final permit shall be stayed and shall not be subject to judicial review under section 509(b) of CWA, pending final Agency action under § 124.101. The Regional Administrator shall serve notice, in accordance with § 124.75, on the discharger and all parties identifying the terms of the final permit which are not contested and therefore are enforceable obligations of the discharger.

(2) Where effluent limitations are contested, but the underlying control technology is not, the notice shall identify the installation of the technology in accordance with the permit compliance schedules (if uncontested) as an uncontested, enforceable obligation of the permit.

(3) Where a combination of technologies is contested, but a portion of the combination is not contested, such portion shall be identified as uncontested if compatible with the combination of technologies proposed by the requester.

(4) A term or condition, otherwise uncontested, shall not be identified as uncontested if it is inseverable from a contested term or condition.

(5) Uncontested terms and conditions shall become enforceable 30 days after the date of such notice, provided, however, that if a request for an evidentiary hearing on a term or condition was denied and the denial is appealed under § 124.101, then such term or condition shall become enforceable upon the date of the notice of the Administrator's decision on the appeal if the denial is affirmed, or shall be stayed, in accordance with this section, if the Administrator reverses the denial and grants the evidentiary hearing on such permit term.

(6) Uncontested terms and conditions shall include:

(i) Permit requirements for which an evidentiary hearing has been requested but the hearing has been denied;

(ii) Preliminary design and engineering studies or other requirements necessary to achieve the final permit term or conditions which do not entail substantial expenditures;

(iii) Permit conditions which will have to be met regardless of which party prevails at the evidentiary hearing;

(iv) Where the discharger proposed a less stringent level of treatment than that contained in the final permit, any permit conditions appropriate to meet the levels proposed by the discharger, if the measures required to attain such less stringent level of treatment are consistent with the measure required to attain the limits proposed by the Agency; and

(v) Construction activities such as segregation of waste streams or installation of equipment which would partially meet the final permit terms or conditions and could also be used to achieve the discharger's proposed alternatives terms and conditions.

(d) Where an evidentiary hearing is granted under § 124.75 on an application for a renewal of an existing permit, all provisions of the existing permit, as well as uncontested provisions of the new permit, shall continue in full force and effect until final Agency action under § 124.101. Upon written request from the applicant, the Regional Administrator may modify the existing permit to delete requirements which unnecessarily duplicate uncontested provisions of the new permit.

[Comment: The following examples demonstrate the application of paragraphs (c) and (d):

Example 1: The discharger requests and is granted an evidentiary hearing on its contention that the EPA's proposed effluent limitation for total suspended solids (TSS) at level X is too stringent and should be relaxed to level Y. Treatment technology A attains level Y whereas technology A plus B is necessary for level X. In this case, the discharger's obligation to install technology A is effective 30 days after service of the notice under § 124.75(b) and this obligation is not stayed by virtue of the contest as to the need for additional technology B. The discharger would be required to comply with all portions of the compliance schedule relating to design, construction and attainment of technology A, but would obtain a stay of such provisions with respect to technology B. This is true even if the schedule does not separate the two technologies. The discharger must of course also perform all basic work such as segregation of waste streams, site preparation, monitoring, reporting and initial construction because this will be necessary regardless of the outcome of the contest. The additional obligations of technology B are stayed.

Example 2: The same facts as in Example 1 except that a public interest group has also requested and been granted participation in the evidentiary hearing. The group intends that TSS level X is too lenient and should be tightened to level Z. Treatment technology C, which is inconsistent with both A and B technologies, is required for level Z. In this case the discharger's obligation to install technologies A, A and B or C are all stayed. The discharger's obligations to perform basic work such as segregation of waste streams, site preparation, monitoring, reporting and perhaps initial construction are not stayed because they are unaffected by the contest.

Example 3: The discharger requests an evidentiary hearing on two issues: that the permits total suspended solids (TSS) limit and pH limit are each too strict. The Regional Administrator grants the evidentiary hearing on the TSS issue but denies it on the pH claim. The TSS and pH technologies are independent and severable and the discharger does not appeal the denial of hearing on the pH control technology is not stayed and becomes effective 30 days after service of the Regional Administrator's notice under § 124.75(b). If the underlying technology for the TSS limit is at issue, the TSS limitation is stayed. However, as described in Example 1 and 2, the discharger's obligations to perform all work unaffected by the stay (e.g., segregation of waste streams, site preparation, initial construction, etc.) are not stayed.

Example 4: The same facts as in Example 3 that the equipment required for attaining the pH limit is achieved by the installation of the TSS equipment. In this the Regional Administrator may determine that the pH permit term is inseverable from the TSS contest and thus the limits for both parameters would be stayed by virtue of the hearing on TSS, although as noted in the preceding examples, the discharger's obligations to perform all work unaffected by the stay are not stayed. Noted however, that if the pH limit is achievable in an inexpensive and temporary alternative such as additional chemical treatment in the discharger's existing equipment, then the Regional Administrator may determine that the pH permit term is severable and refuse to stay the pH term.

Example 5: The same facts as in Example 3 except that the discharger appeals (to the Administrator) the Regional Administrator's denial of the evidentiary hearing on Issue No. 2 (the pH limit). In this case the pH limitation is also stayed (with the exceptions noted in the preceding examples) at least until the Administrator's decision on such appeal. If the Administrator affirms the denial of the evidentiary hearing on the pH limit then upon service of notice under § 124.75(b) the stay terminates. If the Administrator reverses and thus grants the evidentiary hearing on the pH term then the stay continues until final Agency action.

(e) When issuing a finally effective permit under Subpart F, the Regional Administrator shall extend the permit compliance schedule to the extent required by a stay under this section; provided that no such extension shall be granted which would:

(1) Result in the violation of an applicable statutory deadline; or

(2) Cause the permit to expire more than five years after issuance under § 124.17(a).

[Comment: Extensions of compliance schedules will not automatically be granted for a period equal to the period the stay is in effect for an effluent limitation. For example, if both the Agency and the discharger agree that a certain treatment technology is required by the Act where guidelines do not apply, but a hearing is granted to consider the effluent limitations which the technology will achieve, requirements regarding installation of the underlying technology will not be stayed during the hearing. Thus, unless the hearing extends beyond the final compliance date in the permit, it will not ordinarily be necessary to extend the compliance schedule. However, where application of an underlying technology is challenged, the stay for installation requirements relating to that technology would extend for the duration of the hearing.]

(f) For purposes of judicial review under section 509(b) of CWA, final administrative action on a permit does not occur unless and until a party has requested and exhausted its Administrative remedies under Subparts E and F and § 124.101. Any party which neglects or fails to seek review under § 124.101 thereby waives its opportunity to exhaust available Agency remedies.

§ 124.61 Final environmental impact statement.

No final NPDES permit for a new source shall be issued until at least 30 days after the date of issuance of a final Environmental Impact Statement if one is required under 40 CFR 6.916.

§ 124.62 Administrative Record.

Whether or not a draft or final permit was prepared subject to these regulations, the Regional Administrator, in any case where it appears during the course of an evidentiary hearing on a permit that significant new factors affecting that permit should be considered, may withdraw the contested terms subject to the hearing and issue a new draft permit addressing those terms under §§ 124.8 or 124.7. Uncontested terms shall remain in effect. The new draft permit shall proceed through the same process of public comment and opportunity for a public hearing, etc., as would any other draft permit.

§ 124.63 Decision on Variances and Modifications.

(a) The Director may grant or deny the following modifications or variances (subject to EPA objection under § 123.78 for State permits):

(1) Extensions under CWA section 301(i) based on delay in completion of a publicly owned treatment works;

(2) After consultation with the Regional Administrator, extensions under CWA section 301(k) based on the use of innovative technology; or

(3) Variances under CWA section 316(a) for thermal pollution.

(b) The State Director may deny, or forward to the Regional Administrator with a written concurrence or submit to EPA without recommendation a completed application for:

(1) A variance based on the presence of "fundamentally different factors" from those on which an effluent limitations guideline was based;

(2) A variance based on the economic capability of the applicant under section 301(c) of CWA;

(3) A variance based upon certain water quality factors under CWA section 301(g); or

(4) A modification of CWA section 302(b)(2) requirements under section 302(a) (water quality related effluent limitations).

(c) The Regional Administrator may deny, or may forward to the EPA Deputy Assistant Administrator for Water Enforcement with recommendation for approval, an application for a variance listed in paragraph (b) which is forwarded by the State Director, or submitted to the Regional Administrator by the applicant where EPA is the permitting authority.

(d) The EPA Deputy Assistant Administrator for Water Enforcement may approve or deny any variance application submitted under paragraph (c). If the EPA Deputy Assistant Administrator approves the variance, the Director may formulate a draft permit incorporating the variance. Any public notice of a draft permit for which a variance or modification has been approved or denied shall identify the applicable procedures for appealing that determination under § 124.54.

§ 124.64 Procedures for variances and modifications where EPA is the permit issuing authority.

(a) In States where EPA is the permit issuing authority and an application for a variance or modification is filed as required by § 122.64, the application shall be processed as follows:

(1) If at the time an application for a variance or modification is submitted the Regional Administrator has received an application under § 124.3 for issuance or renewal of that permit but has not yet formulated a draft permit under § 124.6 covering the discharge in question, the Regional Administrator after obtaining any necessary concurrence of the EPA Deputy Assistant Administrator for Water Enforcement under § 124.63, shall set forth a tentative determination on the request at the time the draft permit is formulated as specified in § 124.6, unless this would significantly delay the processing of the permit. In that case the processing of the variance or modification request may be separated from the permit in accordance with paragraph (3), and the processing of the permit shall proceed without delay.

(2) If at the time an application for a variance or modification is filed the Regional Administrator has formulated a draft permit under § 124.6 covering the discharge in question, but that permit has not yet become final, administrative proceedings concerning that permit may be stayed and the Regional Administrator shall formulate a new draft permit including a tentative determination on the request, and the fact sheet required by § 124.9. However, if this will significantly delay the processing of the existing permit or the Regional Administrator for other reasons considers combining the variance request and the existing permit inadvisable, the request may be separated from the permit in accordance with paragraph (3), and the administrative disposition of the existing permit shall proceed without delay.

(3) If the permit has become final and no application under § 124.3 concerning it is pending or if the variance or modification request has been separated from a permit as described in paragraphs (1) and (2), the Regional Administrator shall formulate a new draft permit under § 124.6. This permit shall be accompanied by the fact sheet required by §§ 124.9 and 124.56 except that the only matters considered shall relate to the requested variance.

§ 124.65 Appeals of modifications and variances.

(a) Normally, the appeals of permit determinations are handled in one proceeding, either State or Federal. When a State issues a permit in which EPA has made a variance determination, a separate appeal on that determination is possible. In such cases, requests for appeal on the EPA permit conditions must be filed under Subpart F after the public notice of the grant or denial of the variance. If the owner or operator is challenging issues in a State proceedings on the same permit, the Regional Administrator will decide, in consultation with State officials, which case will be heard first.

(b) Appeals of modifications or variance determinations shall be governed by Subpart F unless the Regional Administrator determines that consolidation with an evidentiary hearing under Subpart E will expedite consideration of the issues presented.

[*Comment:* The panel proceedings of Subpart F will generally be utilized when there is a State issued permit and only the variance issues are in the Federal forum.]

(c) *Stays for section 301(g) variances.* Under the authority of CWA section 301(j)(2), if a request for an evidentiary hearing is granted regarding a variance under CWA section 301(g), or if a petition for timely review of the denial of a request for an evidentiary hearing is timely filed with the Administrator under § 124.101 with respect to such a variance, any otherwise applicable standards and limitations under section 301 of CWA shall not be stayed unless:

(1) In the judgment of the Regional Administrator, the stay or the variance sought will not result in the discharge of pollutants in quantities which may reasonably be anticipated to pose an unacceptable risk to human health or the environment because of bioaccumulation, persistency in the environment, acute toxicity, chronic toxicity, or synergistic propensities; and

(2) In the judgment of the Regional Administrator, there is a substantial likelihood that the discharger will succeed on the merits of its appeal; and

(3) The discharger files any bond or other appropriate security which is required by the Regional Administrator to assure timely compliance with the requirements from which a variance is sought in the event that the appeal is unsuccessful.

(d) Stays for variances or modifications other than section 301(g) are granted pursuant to § 124.60.

§ 124.66 Special procedures for discharge into marine waters section 301(h).

(a) Where it is clear on the face of a section 301(h) application that the discharge is not entitled to a modification, the application shall be denied.

(b) In the case of all other section 301(h) applications the Administrator, or a person designated by the Administrator may either:

(1) Give written authorization to an applicant to submit information required by Part 125, Subpart G or the final application by a date certain, not to exceed 9 months, if:

(i) The applicant proposes to submit new or additional information and the applicant demonstrates that:

(A) The applicant made consistent and diligent efforts to obtain such information prior to submitting the final application;

(B) The failure to obtain such information was due to circumstances beyond the control of the applicant; and

(C) Such information can be submitted promptly; or

(ii) The applicant proposes to submit minor corrective information and such information can be submitted promptly; or

(2) Make a written request of an applicant to submit additional information by a date certain, not to exceed 9 months, if such information is necessary to issue a tentative determination under § 124.114(g).

All additional information authorized or requested under this paragraph which is timely received, shall be considered part of the original application.

(c) Applications for modifications under Section 301(h) shall be processed independently of any pending application for the issuance or reissuance of a permit requiring the applicant to meet effluent limitations based on secondary treatment under section 301(b)(1)(B).

(d) No modified permit shall be issued granting a section 301(h) modification unless the appropriate State officials have concurred or waived concurrence pursuant to § 124.54. In the case of a permit issued to an applicant in an approved State, the State Director may:

(1) Revoke any existing permit as of the effective date of the EPA-issued modified permit; and

(2) Co-sign the modified permit, if the Director has indicated an intent to do so in the written concurrence.

(e) Appeals of determinations under section 301(h) shall be governed by Subpart F of this Part.

§ 124.67 Special procedures for decisions on thermal variances (section 316(a)).

(a) Except as provided in § 124.66 the only issues connected with issuance of a particular permit on which EPA will make a final agency decision before the final permit is issued under §§ 124.17 ands 124.60 are whether alternative effluent limitations would be justified under CWA section 316(a) and whether cooling water intake structures will use the best available technology under section 316(b). Applicants who wish an early decision on these issues should request it and furnish supporting reasons at the time their applications are filed under § 122.64. The Regional Administrator will then decide whether or not to grant it. If it is granted, both the early decision on CWA section 316 (a) or (b) issues and the grant of the balance of the permit shall be considered permit issuance under these regulations, and shall be subject to the same requirements of public notice and comment and the same opportunity for an evidentiary hearing.

(b) If the Regional Administrator, on review of the administrative record, determines that the information necessary to decide whether or not an alternative effluent limitation under CWA section 316(a) should be granted to a source is not likely to be available by the time a decision on permit issuance must be made, the Regional Administrator may issue a permit under § 124.17 for a term of up to five years. This permit shall require that the point source achieve the effluent limitations initially proposed for the control of the thermal component of the discharge no later than the date otherwise required by applicable legal requirements. However, the permit shall also afford the permittee an opportunity to file a demonstration under CWA section 316(a) after conducting such studies as are required under 40 CFR Part 125, Subpart H.

[*Comment:* A New discharger may not commence operation in violation of the thermal effluent limitation which are initially proposed unless and until the CWA section 316(a) variance request is finally approved.]

(b) Any hearing scheduled under paragraph (a) shall be publicized as required by § 124.11 and shall be held enough in advance of the final compliance date specified in the permit to allow the permittee to take necessary measures to comply by that date in the event its request for modification of thermal limits is eventually denied after the hearing is concluded.

(c) Whenever the Regional Administrator defers the determination under CWA section 316(a), any determination under section 316(b) may be deferred.

Subpart E—Evidentiary Hearings for EPA Issued NPDES Permits

§ 124.71 Applicability.

The regulations in this Subpart govern all evidentiary hearings conducted by EPA under section 402 of CWA, except as otherwise provided in Subpart F. An evidentiary hearing is available to challenge any permit issued under § 124.17 except for a general permit. Persons affected by a general permit may not challenge the terms and conditions of a general permit; but may instead apply for a individual NPDES permit under § 122.64 as authorized in § 122.82 and then request an evidentiary hearing on the issuance or denial of an individual permit. In certain cases, evidentiary hearings may also be held on the terms of RCRA, UIC and PSD permits that are very closely linked with the terms of NPDES permits as to which a hearing has been granted. See § 124.74(b)(2).

§ 124.72 Definitions.

For the purpose of this Subpart, the following definitions are applicable:

(a) "Judicial Officer" means a permanent or temporary employee of the Agency appointed as a Judicial Officer by the Administrator under these regulations and subject to the following conditions:

(1) A Judicial Officer shall be a licensed attorney. A Judicial Officer shall not be employed in the Office of Enforcement or the Office of Water and Waste Management, and shall not participate in the consideration or decision of any case in which he or she performed investigative or prosecutorial functions.

(2) The Administrator may delegate any authority to act in an appeal of a given case under this Subpart to a Judicial Officer who, in addition, may perform other duties for EPA, provided that the delegation shall not preclude a Judicial Officer from referring any motion or case to the Administrator when the Judicial Officer decides referral would be appropriate. The Administrator, in deciding a case, may

consult with and assign the drafting of preliminary findings of fact and conclusions and/or a preliminary decision to any Judicial Officer.

(b) "Party" means the EPA trial staff under § 124.78 and any person whose request for a hearing under § 124.74 or whose request to be admitted as a party or to intervene under §§ 124.79 or 124.117 has been granted.

(c) "Presiding Officer" means an Administrative Law Judge appointed under 5 U.S.C. 3105 and designated to preside at the hearing.

(d) "Regional Hearing Clerk" means an employee of the Agency designated by a Regional Administrator to establish a repository for all books, records, documents and other materials relating to hearings under this subpart.

§ 124.73 Filing and submission of documents.

(a) All submissions authorized or required to be filed with the Agency under this Subpart shall be filed with the Regional Hearing Clerk, unless the regulations provide otherwise. Submissions shall be considered filed on the date on which they are mailed or delivered in person to the Regional Hearing Clerk.

(b) All such submissions shall be signed by the person making the submission, or by an attorney or other authorized agent or representative.

(c)(1) All data and information referred to or in any way relied upon in any such submissions shall be included in full and may not be incorporated by reference, unless previously submitted as part of the administrative record in the same proceeding, except for State or Federal statutes and regulations, judicial decisions published in a national reporter system, officially issued EPA documents of general applicability, and any other material which is generally available or of peripheral relevance, in which case the party relying on it shall file a written undertaking to make copies available as directed by the Regional Administrator or the Presiding Officer.

(2) If any part of the material submitted is in a foreign language, it shall be accompanied by an English translation verified under oath to be complete and accurate, together with the name, address, and a brief statement of the qualifications of the person making the translation. Translations of literature or other material in a foreign language shall be accompanied by copies of the original publication.

(3) Where relevant data or information is contained in a document also containing irrelevant matter, either the irrelevant matter shall be deleted and only the relevant data or information shall be submitted or the relevant portions shall be briefly indicated.

(4) The failure to comply with the requirements of this section or any other requirement in this Subpart may result in the exclusion from consideration of any portion of the submission which fails to comply. If the Regional Administrator or the Presiding Officer, on motion by any party or *sua sponte*, determines that a submission fails to meet any requirement of this Subpart, the Regional Administrator or Presiding Officer shall direct the Hearing Clerk to return the submission with a copy of the applicable regulations indicating those provisions not complied with in the submission. The party proposing to submit any rejected materials shall have 14 days to correct the errors and resubmit, unless the Regional Administrator or the Presiding Officer determines that there is good cause to allow a longer time.

(d) The filing of a submission shall not mean or imply that it in fact means all applicable requirements or that it contains reasonable grounds for the action requested or that the action requested is in accordance with law.

(e) The original of all statements and documents containing factual material, data, or other information shall be signed in ink and shall state the name, address and the representative capacity of the person making the submission. The signing shall comply with the signature and certification procedures of § 122.5.

§ 124.74 Requests for evidentiary hearing.

(a) Within 30 days following the service of notice of the Regional Administrator's issuance of a final permit under § 124.17, any interested person may submit a request to the Regional Administrator under paragraph (b) for an evidentiary hearing to reconsider or contest the terms of that permit. If such a request is submitted by a person other than the permittee, the person shall simultaneously serve a copy of the request on the permittee.

(b)(1) In accordance with § 124.78, such requests shall state each legal or factual question alleged to be at issue, and their relevance to the permit decision, together with a designation of the specific factual areas to be adjudicated and the hearing time estimated to be necessary for that adjudication. Information supporting the request or other written document relied upon to support the request shall be submitted as required by § 124.73 unless it is already in the administrative record required by § 124.20.

[*Comment*: This paragraph allows the submission of requests for evidentiary hearings even though both legal and factual issues may be raised, or only legal issues may be raised. In the latter case, because no factual issues were raised, the Regional Administrator would be required to deny the request. However, on review of the denial, the Administrator is authorized by § 124.101(a)(1) to review policy or legal conclusions of the Regional Administrator. EPA is requiring an appeal to the Administrator even of purely legal issues involved in a permit decision to ensure that the Administrator will have an opportunity to review any permit before it will be final and subject to judicial review.]

(2) Persons requesting an evidentiary hearing on an NPDES permit under this section may also request an evidentiary hearing on a RCRA, UIC or PSD permit. Such a request is subject to all the requirements of paragraph (1) and in addition will only be granted if each of the following conditions is met:

(i) Processing of the RCRA, UIC or PSD permit at issue was consolidated with the processing of the NPDES permit as provided in § 124.8(d);

(ii) The standards for granting a hearing on the NPDES permit are met; and

(iii) It is likely that the issues raised concerning the NPDES permit will be resolved in a way that makes modification of the RCRA or UIC permit appropriate.

(c) Such requests shall also contain:

(1) The name, mailing address and telephone number of the person making such request;

(2) A clear and concise factual statement of the nature and scope of the interest of the requester;

(3) The names and addresses of all persons whom the requester represents; and

(4) A statement by the requester that, upon motion of any party, or *sua sponte* by the Presiding Officer and without cost or expense to any other party, the requester shall make available to appear and testify, the following:

(i) The requester;

(ii) All persons represented by the requester; and

(iii) All officers, directors, employees, consultants and agents of the requester and the persons represented by the requester.

(5) Specific references to the contested permit terms and conditions, as well as suggested revised or alternative permit terms and conditions (not excluding permit denial) which, in the judgment of the requester, would be

required to implement the purposes and policies of CWA.

(6) In the case of challenges to the application of control or treatment technologies identified in the statement of basis or fact sheet, identification of the basis for the objection, and the alternative technologies or combination of technologies which the requester believes are necessary to meet the requirements of CWA.

(7) Specific identification of each of the discharger's obligations which should be stayed if the request is granted. If the request contests more than one permit term or condition then each obligation which is proposed to be stayed must be referenced to the particular contested term warranting the stay.

(d) The Regional Administrator (upon notice to all persons who have already submitted hearing requests) may extend the time allowed for submitting hearing requests under this section for good cause.

§ 124.75 Decision on request for a hearing.

(a) Following the expiration of the time allowed by § 124.74 for submitting a request for an evidentiary hearing, the Regional Administrator shall determine whether the request shall be granted, denied or granted in part and denied in part. The Regional Administrator shall grant a request either in whole or in part only if the request conforms to the requirements of § 124.74, and sets forth material issues of fact relevant to the issuance of the permit.

(b) If the Regional Administrator grants a request for an evidentiary hearing, in whole or in part, the Regional Administrator shall state and identify the permit terms and conditions which have been contested by the requester and for which the evidentiary hearing has been granted. Permit terms and conditions which are not contested or for which the Regional Administrator has denied the hearing request shall not be affected by or considered at, the evidentiary hearing. The Regional Administrator shall specify these terms and conditions in writing in accordance with § 124.60(e).

(c) If the Regional Administrator grants a request for an evidentiary hearing in whole or in part, in regard to a particular proposed permit, then any other request for an evidentiary hearing in regard to that permit shall be treated as a request to be a party and the Regional Administrator shall grant any such request which meets the requirements of paragraph (a).

(d) If a request for a hearing is denied in whole or in part, the Regional Administrator shall briefly state the reasons. That denial is then subject to review by the Administrator under § 124.101.

§ 124.76 Obligation to raise issues and submit evidence before a final permit is issued.

No evidence shall be submitted by any party to a hearing under this Subpart that was not submitted to the administrative record required by § 124.20 as part of the formulation of and comment on a draft permit, unless good cause is shown for the failure to submit it. No issues, shall be raised by any such party that were not submitted to the administrative record required by § 124.20 as part of the formulation of and comment on a draft permit unless good cause is shown for the failure to submit them. Good cause includes the case where the party seeking to raise the new issues, or introduce new information, shows that it could not reasonably have ascertained the issues or made the information available within the time required by § 124.15.

§ 124.77 Notice of hearing.

Public notice of the grant of an evidentiary hearing regarding a permit shall be given as provided in § 124.58(c) and in addition by mailing a copy to all persons who commented on the draft permit or submitted a request for a hearing. Before the issuance of such notice the Regional Administrator shall designate the Agency trial staff and the members of the decisional body (as defined in § 124.78).

§ 124.78 Ex parte communications.

(a)(1) No interested person outside the Agency or member of the Agency trial staff shall make or knowingly cause to be made to any members of the decisional body an *ex parte* communication relevant to the merits of the proceedings.

(2) No member of the decisional body shall make or knowingly cause to be made to any interested person outside the Agency or member of the Agency trial staff an *ex parte* communication relevant to the merits of the proceedings.

(3) A member of the decision body who receives or who makes or knowingly causes to be made a communication prohibited by the Regional Hearing Clerk, for the public hearings, all such written communications or memoranda stating the substance of all such oral communications together with all written responses and memoranda stating the substance of all oral responses.

(b) Upon receipt by any members of the decision making body of an *ex parte* communication knowingly made or knowingly caused to be made by a party in violation of this section, the person presiding at the stage of the hearing then in progress may, to the extent consistent with justice and the policy of CWA require the party to show cause why its claim or interest in the proceedings should not be dismissed, denied, disregarded or otherwise adversely affected on account of such violation.

(c) The prohibitions of this section begins to apply upon issuance of the notice of the grant of a hearing under §§ 124.77 or 124.116. This prohibition terminates at the date of final Agency action.

(d) For purposes of this section, the following definitions shall apply:

(1) "Agency trial staff" means those Agency employees, whether temporary or permanent, who have been designated by the Agency under §§ 124.77 or 124.116 as available to investigate, litigate and present the evidence, arguments and position of the Agency in the evidentiary hearing or non-adversary initial licensing hearing. Appearance as a witness does not necessarily require a person to be designated as a member of the Agency trial staff;

(2) "Decisional body" means any Agency employee who is or may reasonably be expected to be involved in the decisional process of the proceeding including the Administrator, Judicial Officer, Presiding Officer, the Regional Administrator (if he does not designate himself as a member of the Agency trial staff) and any of their direct support staff participating in the decisional process. In the case of a nonadversary initial licensing proceeding, the decisional body shall also include the panel members whether or not permanently employed by the Agency;

(3) "*Ex parte* communication" means any communication written or oral relating to the merits of the proceeding between the decisional body and an interested person outside the Agency or the Agency trial staff where such communication was not originally filed or stated in the administrative record or in the hearing. *Ex parte* communications do not include:

(i) Communications between Agency employees other than the Agency trial staff and the members of the decisional body;

(ii) Discussions between the decisional body and either

(A) Interested persons outside the Agency; or

(B) The Agency trial staff, *if* all parties have received prior written notice of such proposed communications and have been given the opportunity to be present and participate therein.

(4) "Interested person outside the Agency" includes the permit applicant, any person who filed written comments in the proceeding, any person who requested the hearing, any person who requested to participate or intervene in the hearing, any participant or party in the hearing and any other interested person not employed by the Agency at the time of the communications and the attorney of record for such persons.

§ 124.79 Additional parties and issues.

(a) Any person may submit a request to be admitted as a party within 15 days after the date of mailing, publication or posting of notice of the grant of an evidentiary hearing, whichever occurs last. The Presiding Officer shall grant such requests as meet the requirements of §§ 124.74 and 124.78. Such request must specifically identify those issues already raised which the requester seeks to address at the hearing.

(b) After the expiration of the time prescribed in paragraph (a) any person may file a motion for leave to intervene as a party. This motion must meet the requirements of §§ 124.74 and 124.78 and set forth the grounds for the proposed intervention provided, however, that no factual or legal issues in addition to those raised by timely hearing requests may be proposed except for good cause. Any motion to intervene must also contain a verified statement showing good cause for the failure to file a timely request to be admitted as a party. The Regional Administrator, or the Presiding Officer if one has been assigned, shall grant such motion only upon an express finding on the record that:

(1) Extraordinary circumstances justify granting the motion;

(2) The intervenor has consented to be bound by:

(i) Prior written agreements and stipulations by and between the existing parties, and

(ii) All orders previously entered in the proceedings; and

(3) Intervention will not cause undue delay or prejudice the rights of the existing parties.

§ 124.80 Filing and service.

(a) An original and one (1) copy of all written submissions relating to an evidentiary hearing filed after the notice of hearing is published shall be filed with the Regional Hearing Clerk.

(b) The party filing any submission shall serve a copy of such submission upon the Presiding Officer and each party of record. Service shall be by mail or personal delivery.

(c) Every submission shall be accompanied by an acknowledgment of service by the person served or proof of service in the form of a statement of the date, place, time, and manner of service and the names of the persons served, certified by the person who made service.

[*Comment:* A signed statement that an attached list of persons were mailed the submission is sufficient to meet the requirements of this paragraph. Certified mail is not required.]

(d) The Regional Hearing Clerk shall maintain and furnish to any person upon request, a list containing the name, service address and telephone number of all parties and their attorneys or duly authorized representatives.

§ 124.81 Assignment of administrative law judge.

No later than the date of mailing, publication or posting of the notice of a grant of an evidentiary hearing, whichever occurs last, the Regional Administrator shall refer the proceeding to the Chief Administrative Law Judge who shall make an assignment of an Administrative Law Judge to serve as Presiding Officer for the hearing.

§ 124.82 Consolidation and severance.

(a) The Administrator, Regional Administrator or Presiding Officer, has the discretion to consolidate, in whole or in part, two or more proceedings to be held under this Subpart, whenever it appears that a joint hearing on any or all of the matters in issue would expedite or simplify consideration of the issues and that no party would be prejudiced thereby. Consolidation shall not affect the right of any party to raise issues that might have been raised had there been no consolidation.

(b) If the Presiding Officer determines consolidation is not conducive to an expeditious, full and fair hearing, any party or issues may be severed and heard separately.

§ 124.83 Prehearing conferences.

(a) The Presiding Officer, *sua sponte*, or at the request of any party, may direct the parties or their attorneys or duly authorized representatives to appear at a specified time and place for one or more conferences before or during a hearing, or to submit written proposals or correspond for the purpose of considering any of the matters set forth in paragraph (c).

(b) The Presiding Officer shall allow a reasonable period before the hearing begins for the orderly completion of all prehearing procedures and for the submission and disposition of all prehearing motions. Where the circumstances warrant, the Presiding Officer shall call a prehearing conference, to inquire into the use of available procedures contemplated by the parties and the time required for their completion, to establish a schedule for their completion, and to set a tentative date for beginning the hearing.

(c) In conferences held, or in suggestions submitted, under paragraph (a), the following matters may be considered:

(1) The necessity or desirability of simplification, clarification, amplification or limitation of the issues.

(2) The admission of facts and of the genuineness of documents, and the possibility of stipulations with respect to facts.

(3) The consideration of and ruling upon objections to the introduction into evidence at the hearing of any written testimony, documents, papers, exhibits, or other submissions proposed by a party, except that the administrative record required by § 124.20 shall be received in evidence subject to the provisions of § 124.85(d)(2). Notwithstanding the foregoing, at any time before the end of the hearing any party may make, and the Presiding Officer shall consider and rule upon, motions to strike testimony or other evidence other than the administrative record on the grounds of relevance, competency or materiality.

(4) The identification of matters of which official notice may be taken.

(5) The establishment of a schedule which includes definite or tentative times for as many of the following as are deemed necessary and proper by the Presiding Officer:

(i) The submission of narrative statements of position on each factual issue in controversy;

(ii) The submission of written testimony and documentary evidence (e.g., affidavits, data, studies, reports and any other type of written material) in support of such statements; or

(iii) The written requests to any party for the production of additional documentation, data, or other information relevant and material to the facts in issue.

(6) The grouping of participants with substantially like interests for purposes of eliminating duplicative or repetitive

development of the evidence and making and arguing motions and objections.

(7) Such other matters as may expedite the hearing or aid in the disposition of the matter.

(d) At a prehearing conference or within some reasonable time set by the Presiding Officer, each party shall make available to all other parties the names of the expert and other witnesses it expects to call. At its discretion or at the request of the Presiding Officer, a party may include a brief narrative summary of any witness's anticipated testimony. Copies of any written testimony, documents, papers, exhibits, or materials which a party expects to introduce into evidence, and the administrative record required by § 124.20, shall be marked for identification as ordered by the Presiding Officer. Witnesses, proposed written testimony and other evidence may be added or amended only upon a finding by the Presiding Officer that good cause existed for failure to introduce the additional or amended material within the time specified by the Presiding Officer. Agency employees and consultants shall be made available as witnesses by the Agency to the same extent that production of such witnesses is required of other parties under § 124.74(c)(4). (See also § 124.85(b)(16)).

(e) The Presiding Officer shall prepare a written prehearing order reciting the actions taken at the prehearing conference and setting forth the schedule for the hearing, unless a transcript has been taken and accurately reflects these matters. The order shall include a written statement of the areas of factual agreement and disagreement and of the methods and procedures to be used in developing the evidence and the respective duties of the parties in connection therewith. This order shall control the subsequent course of the hearing unless modified by the Presiding Officer for good cause shown.

§ 124.84 Summary determination.

(a) Any party to an evidentiary hearing may move with or without supporting affidavits and briefs for a summary determination in his or her favor upon all or any part of the issues being adjudicated on the basis that there is not genuine issue of material fact for determination. Any such motion shall be filed at least 45 days before the date set for the hearing, unless upon good cause shown such motion may be filed at any time before the close of the hearing.

(b) Any other party may, within 30 days after service of the motion, file and serve a response to it or a countermotion for summary determination. When a motion for summary determination is made and supported, a party opposing the motion may not rest upon mere allegations or denials but must show, by affidavit or by other materials subject to consideration by the Presiding Officer, that there is a genuine issue of material fact for determination at the hearing.

(c) Affidavits shall be made on personal knowledge, shall set forth facts that would be admissible in evidence and shall show affirmatively that the affiant is competent to testify to the matters stated therein.

(d) The Presiding Officer has the discretion to set the matter for oral argument and call for the submission of proposed findings, conclusions, briefs or memoranda of law. The Presiding Officer shall rule on the motion not more than 30 days after the date responses to the motion are filed under paragraph (b) of this section.

(e) If all issues of material fact are decided on a motion for summary determination, no hearing will be held and the Presiding Officer shall thereupon prepare an initial decision under § 124.89. If the motion for summary determination is denied or if only a partial summary determination is granted, the Presiding Officer shall issue a memorandum opinion and order, interlocutory in character, and the hearing will proceed on the remaining issues. Appeals from interlocutory rulings are governed by § 124.90.

§ 124.85 Hearing procedure.

(a)(1) The permit applicant always bears the burden of persuading the Agency that a permit authorizing pollutants to be discharged should be issued and not denied. This burden does not shift.

(2) The Agency has the burden of going forward to present an affirmative case in support of any challenged term or condition of a final permit.

[*Comment:* In many cases the documents contained in the administrative record, in particular the fact sheet or statement of basis and the response to comments should adequately discharge this burden.]

(3) Any hearing participant who, by raising material issues of fact, contends:

(i) That particular terms, conditions or requirements in the permit are improper or invalid, and who desires either:

(A) The inclusion of new or different terms, conditions or requirements; or

(B) The deletion of such terms, conditions or requirements; or

(ii) That the denial or issuance of a permit is improper or invalid, shall have the burden of going forward to present an affirmative case.

(b) The Presiding Officer shall have the authority and duty to conduct a fair and impartial hearing, to take action to avoid unnecessary delay in the disposition of the proceedings, to maintain order and all powers necessary to these ends, including the power to:

(1) Arrange and issue notice of the date, time and place of hearings and conferences and;

(2) Establish the methods and procedures to be used in the development of the evidence;

(3) Prepare, after considering the views of the participants, written statements of areas of factual disagreement among the participants;

(4) Hold conferences to settle, simplify, determine or strike any of the issues in a hearing, or to consider other matters that may facilitate the expeditious disposition of the hearing;

(5) Administer oaths and affirmations;

(6) Regulate the course of the hearing and govern the conduct of participants;

(7) Examine witnesses;

(8) Identify and refer issues for interlocutory decision under § 124.90;

(9) Rule on, admit, exclude, or limit evidence;

(10) Establish the time for filing motions, testimony and other written evidence, briefs, findings, and other submissions;

(11) Rule on motions and other procedural matters pending before him, including but not limited to motions for summary determination in accordance with § 124.84;

(12) Order that the hearing be conducted in stages in cases where the number of parties is large or the issues are numerous and complex;

(13) Take any action not inconsistent with the provisions of this subpart for the maintenance of order at the hearing and for the expeditious, fair and impartial conduct of the proceeding;

(14) Provide for the testimony of opposing witnesses to be heard simultaneously or for such witnesses to meet outside the hearing to resolve or isolate issues or conflicts;

(15) Order that trade secrets be treated confidential business information in accordance with § 122.16 and 40 CFR Part 2.

(16) Allow such cross-examination as may be required for a full and true disclosure of the facts. No cross-examination shall be permitted on questions of law or policy, or regarding matters (such as the validity of effluent limitations guidelines) that are not subject to challenge in an NPDES

proceeding. No Agency witnesses shall be required to testify or be made available for cross-examination on such matters. In determining whether cross-examination shall be permitted the Presiding Officer shall consider whether it is not likely to result in clarifying or resolving a disputed issue of fact material to the decision, and whether the issue can be more economically clarified in other ways. The party seeking cross-examination has the burden of demonstrating that this standard has been met.

(c) All direct and rebuttal evidence at an evidentiary hearing shall be submitted in written form, unless, upon motion and good cause shown, the Presiding Officer determines that oral presentation of the evidence on any particular fact will materially assist in the efficient identification and clarification of the hearing issues. Written testimony shall be prepared in narrative form. To the extent that testimony is to be submitted in writing, the Presiding Officer may set dates for the filing of such evidence with the Regional Hearing Clerk as follows:

(1) The participant with the burden of going forward to present an affirmative case upon an issue (as defined in § 124.85(a) of these regulations) shall file his direct testimony first.

(2) All participants other than participants specified in the preceding subsection shall file their direct testimony on said issue not later than twenty days after the date of the filing of the testimony under the preceding subsection.

(3) All rebuttal testimony shall be filed no later than thirty days after the date of the filing of the testimony under paragraph (c)(1).

(d)(1) The Presiding Officer shall admit all relevant, competent and material evidence, except evidence that is unduly repetitious. Evidence may be received at any hearing even though inadmissible under the rules of evidence applicable to judicial proceedings. The weight to be given evidence shall be determined by its reliability and probative value.

(2) The administrative record required by § 124.20 shall be admitted and received in evidence. Any party may move that a sponsoring witness be provided for a portion or portions of the administrative record. The Presiding Officer, upon finding that the standards for cross-examination of § 124.85(b)(3) have been met and that the administrative record taken as a whole indicates legitimate doubt about such portion of the record, shall grant such motion and direct the appropriate party to produce such witness. If a sponsoring witness cannot be provided, the Presiding Officer may reduce the weight afforded the appropriate portion of the record as a factual statement accordingly.

[*Comment:* Receiving the administrative record into evidence automatically serves several purposes: (1) it documents the prior course of the proceeding; (2) it provides a record of the views of affected persons for consideration by the agency decision-maker; and (3) it provides factual material for use by the decision-maker. Subject to § 124.78, parties are free to contest the factual portions of the administrative record in the hearing, and to argue that portions of it should not be given weight unless sponsored by a witness who will be available for cross-examination.]

(3) Whenever any evidence or testimony is excluded by the Presiding Officer as inadmissible, all such evidence or testimony existing in written form shall remain a part of the record as an offer of proof. The party seeking the admission of oral testimony may make an offer of proof, which shall consist of a brief statement on the record describing the testimony excluded.

(4) Where two or more parties have substantially similar interest and positions, the Presiding Officer may limit the number of attorneys or other party representatives who will be permitted to cross-examine and to make and argue motions and objections on behalf of such parties. Attorneys may, however, engage in cross-examination relevant to matters not adequately covered by previous cross-examination.

(5) Rulings of the Presiding Officer on the admissibility of evidence or testimony, the propriety of cross-examination, and other procedural matters shall appear in the record and shall control further proceedings, unless reversed as a result of an interlocutory appeal taken under § 124.90.

(6) All objections shall be made promptly or be deemed waived. Parties shall be presumed to have taken exception to an adverse ruling. No objection shall be deemed waived by further participation in the hearing.

(e) Parties may at any time stipulate to relevant facts or to settlement. However, all settlements to which the Agency is a party must be approved by the Deputy Assistant Administrator for Water Enforcement in accordance with § 124.103.

§ 124.86 Motions.

(a) Any party may make a motion, (including a motion to dismiss a particular claim on a contested issue), to the Presiding Officer about any matter relating to the proceeding. All motions shall be filed and served as provided in § 124.80 except those made on the record during an oral hearing before the Presiding Officer.

(b) Within 10 days after service of any written motion, any party to the proceeding may file a response to the motion. The time for response may be shortened to 3 days or extended for an additional ten days by the Presiding Officer for good cause shown.

(c) Notwithstanding § 122.68, any party may file with the Presiding Officer a motion seeking to apply to the permit any regulatory or statutory requirement issued or made available after the issuance of the permit under § 124.17. The Presiding Officer shall grant any motion to apply a new statutory requirement unless he or she finds it contrary to legislative intent. The Presiding Officer may grant a motion to apply a new regulatory requirement where appropriate to carry out the purposes of CWA, and where no party would be unduly prejudiced thereby.

§ 124.87 Record of hearings.

(a) All orders issued by the Presiding Officer, transcripts of oral hearings or arguments, written statements of position, written direct and rebuttal testimony, and any other data, studies, reports, documentation, information and other written material of any kind submitted in the proceeding shall be a part of the record of the hearing, and shall be available except as provided in § 122.16 to the public in the office of the Regional Hearing Clerk promptly upon receipt in that office.

(b) Evidentiary hearings shall be either stenographically reported verbatim or tape recorded, and thereupon transcribed. After the hearing, the reporter shall file with the Regional Hearing Clerk:

(i) The original of the transcript; and

(ii) The exhibits received or offered into evidence at the hearing.

(c) The Regional Hearing Clerk shall promptly notify each of the parties of the filing of the certified transcript of proceedings. Any party who desires a copy of the transcript of the hearing may obtain a copy of the hearing transcript from the Regional Hearing Clerk and upon payment of costs.

The Presiding Officer shall allow witnesses, parties, and their counsel an opportunity to submit written proposed corrections of the transcript of any oral testimony taken at the hearing, pointing out errors that may have been made in transcribing the testimony, as are required to make the transcript conform to the testimony.

Except in unusual cases, no more than thirty days shall be allowed for submitting such corrections from the day a complete transcript of the hearing becomes available.

§ 124.88 Proposed findings of fact and conclusions; brief.

Within 45 days the certified transcript is filed, any party may file with the Regional Hearing Clerk proposed findings of fact and conclusions and a brief in support thereof, each containing appropriate reference to the record. A copy of any such findings, conclusions and brief shall be contemporaneously served upon every other party and the Presiding Officer. The Presiding Officer, for good cause shown, may extend the time for filing the proposed findings and conclusions and/or the brief. The Presiding Officer may allow reply briefs.

§ 124.89 Decisions.

(a) The Presiding Officer shall review and evaluate the record, including the proposed findings and conclusions, any briefs filed by the parties and any interlocutory decisions pursuant to § 124.90 and shall issue and file his initial decision with the Regional Hearing Clerk. The Regional Hearing Clerk shall immediately serve copies of the initial decision upon all parties (or their counsel of record) and the Administrator.

(b) The initial decision of the Presiding Officer shall automatically become the final decision thirty (30) days after its service unless within such time.

(i) A party files a petition for review by the Administrator pursuant to § 124.101; or

(ii) The Administrator *sua sponte* files a notice that he or she will review the decision pursuant to § 124.101; or

(c) If a hearing has been granted on terms or conditions of a RCRA, UIC or PSD permit under the standards set forth in § 124.74(b)(2), the initial decision of the Presiding Officer to those terms and conditions shall be in the form of recommendations to the Regional Administrator for changes to the RCRA, UIC or PSD permit. The Regional Administrator shall modify the RCRA, UIC or PSD permit to the extent he or she considers appropriate, and explain his or her reasons for rejecting any recommendations of the Presiding Officer, within thirty days of receipt of the Presiding Officer's recommendations. The permit as modified may be appealed to the Administrator as provided in § 124.21.

§ 124.90 Interlocutory appeal.

(a) Except as provided in this section, appeals to the Administrator may be taken only under § 124.101. Appeals from orders or rulings may be taken under this section only if the Presiding Officer, upon motion of a party, certifies those orders or rulings to the Administrator for appeal on the record. Requests to the Presiding Officer for certification must be filed in writing within ten days of service of notice of the order, ruling, or decision and shall state briefly the grounds relied on.

(b) The Presiding Officer may certify an order or ruling for appeal to the Administrator if:

(1) The order or ruling involves an important question on which there is substantial ground for difference of opinion; and

(2) Either:

(i) An immediate appeal of the order or ruling will materially advance the ultimate completion of the preceeding, or,

(ii) A review after the final order is issued will be inadequate or ineffective; and,

(3) Such an appeal is necessary to prevent exceptional delay, expense or prejudice to any party.

(c) To the extent an appeal under this section involves issues of law, the Administrator shall refer those issues to the General Counsel for determination subject to his or her approval.

(d) If the Administrator decides that certification was improperly granted, he or she shall decline to hear the appeal. The Administrator shall accept or decline all interlocutory appeals within 30 days of their submission; if the Administrator takes no action within that time, the appeal shall be considered dismissed. When the Presiding Officer declines to certify an order or ruling to the Administrator for an interlocutory appeal, it may be reviewed by the Administrator only upon appeal from the initial decision of the Presiding Officer, except when the Administrator determines, upon motion of a party and in exceptional circumstances, that to delay review would not be in the public interest. Such motion shall be made within five days after receipt of notification that the Presiding Officer has refused to certify an order or ruling for interlocutory appeal to the Administrator. Ordinarily, the interlocutory appeal will be decided on the basis of the submissions made to the Presiding Officer. The Administrator may, however, allow briefs and oral argument.

(e) The Presiding Officer may stay the proceeding pending a decision by the Administrator upon an order or ruling certified by the Presiding Officer for an interlocutory appeal, or upon the denial of such certification by the Presiding Officer. Only in exceptional circumstances will proceedings be stayed.

(f) The failure to request an interlocutory appeal shall not foreclose a party from taking exception to an order or ruling in an appeal under § 124.101.

§ 124.101 Appeal to the Administrator.

(a)(1) Within 30 days after service of an initial decision, or the denial in whole or in part of a request for an evidentiary hearing, any party or requester, as the case may be, may appeal any matter set forth in such initial decision or denial, any adverse order or ruling to which the party objected during the hearing by filing with the Administrator notice of appeal and petition for review. Proof of service upon all parties shall accompany such filing. The petition shall include a statement of the supporting reasons for such exceptions and, where appropriate, a showing that the initial decision contains:

(i) A finding of fact or conclusion of law which is clearly erroneous, or

(ii) An exercise of discretion or policy which is important and which the Administrator should, in his discretion, review.

(2) Within 15 days after service of a petition for review under paragraph (a)(1), any other party to the hearing in question may file a responsive petition.

(3) Policy or legal conclusions made in the course of denying a request for an evidentiary hearing may be reviewed and changed by the Administrator in an appeal under this section.

(b) Within 30 days of an initial decision or denial of an evidentiary hearing the Administrator may, *sua sponte*, review such decision. Within seven (7) days after the Administrator has decided under this section to review an initial decision or the denial of an evidentiary hearing, notice of that decision shall be served by mail upon all affected parties and the Regional Administrator.

(c) Within a reasonable time following the filing of the petition for review, the Administrator shall issue an order either granting or denying the petition for review. When the Administrator grants a petition for review or determines under paragraph (b) to review a decision, the Administrator may notify the parties that only certain issues shall be briefed.

(d) Notwithstanding the grant of a petition for review or a determination under paragraph (b) to review a decision, the Administrator may summarily affirm without opinion an initial decision or the denial of an evidentiary hearing.

(e) To the extent an appeal under this section involves issues of law, the Administrator shall refer those issues to the General Counsel for determination subject to his approval.

(f) A petition to the Administrator under paragraph (a) for review of any initial decision or the denial of an evidentiary hearing is, under 5 U.S.C. 704, a prerequisite to the seeking of judicial review of the final decision of the Agency.

(g)(1) If a party timely files a petition for review or if the Administrator *sua sponte* orders review, then, for purpose of judicial review under section 509(b) of CWA, final Agency action on an issue occurs after EPA review procedures are exhausted and the Administrator's decision is issued as follows:

(i) If the Administrator denies review or summarily affirms without opinion as provided in § 124.101(d), then the initial decision or denial becomes the final Agency action and occurs upon the service or notice of such decision.

(ii) If the Administrator issues a decision without remanding the proceeding then the final permit, redrafted as required by the Administrator's decision, shall be reissued and served upon all parties to such appeal in accordance with paragraph (2).

(iii) If the Administrator issues a decision remanding the proceeding then final Agency action occurs upon completion of the remanded proceeding, including any Administrator appeals therefrom.

(2) For purposes of judicial review under section 509(b) of CWA, final agency action occurs 10 days after a final permit is issued. After Agency review procedures are exhausted a final permit shall be prepared and issued by the Regional Administrator:

(i) When the Administrator issues notice to the parties that review has been denied if review is denied;

(ii) When the Administrator issues a decision if review is not denied and the Administrator does not remand the proceedings; or

(iii) Upon the completion of remand proceedings if the proceedings are remanded unless the Administrator's remand order specifically provides that appeal of the remand decision will be required in order to extend administrative remedies.

(h) The petitioner may file a brief in support of the petition within 21 days after the Administrator has granted a petition for review. Any other party may file a responsive brief within 21 days of service of a brief in support of the petition. The petitioner may file a reply brief within 14 days of service of the responsive brief and any person may file an *amicus brief* for the consideration of the Administrator. If the Administrator determines, *sua sponte*, to review an initial Regional Administrator's decision or the denial of an evidentiary hearing, the Administrator shall notify the parties of the briefing schedule.

(i) Review by the Administrator of an initial decision or the denial of an evidentiary hearing shall be limited to issues specified under paragraph (a) of this section, except after notice to all parties, the Administrator may raise and decide other matters which he or she considers material on the basis of the record.

§ 124.102 Applicability of subpart E.

(a) All the provisions of this subpart except § 124.78, § 124.83(c)(3) and § 124.86(d)(1) concerning the automatic receipt of the administrative record into evidence shall apply to all hearings for which the notice of hearing under § 124.77 is issued after the effective date of these regulations, *provided* that the Presiding Officer at any such proceeding may vary or suspend any of the terms of these regulations during a six-month transitional period after their effective date to avoid inconvenience or injustice.

(b) Section 124.78 and the provisions of §§ 124.83(c)(3) and 124.86(d)(1) for automatic receipt of the administrative record into evidence shall apply to all hearings regarding a permit which was based on an administrative record under §§ 124.20 and 124.82.

§ 124.103 EPA headquarters approval of stipulation or consent agreement.

No evidentiary hearing under Subpart E may be resolved, settled or decided, in either whole or substantial part, by the stipulation or consent of the parties thereto, unless and until the stipulation or consent is approved and signed by the Deputy Assistant Administrator for Water Enforcement.

No stipulation or consent without such approval and signature shall bind EPA or have any force or effect or be filed in any proceeding.

Subpart F—Non-Adversary Procedures for NPDES Initial Licensing

§ 124.111 Applicability.

(a) Except as set forth in this Subpart, this Subpart applies in lieu of, and to the complete exclusion of, Subparts A through E in the following cases:

(1) In all proceedings for the issuance of a modified permit under section 301(h) of the Clean Water Act, except that in such proceedings:

(i) The terms "Administrator or a person designated by the Administrator" shall be substituted for the term "Regional Administrator"; and

(2) In any proceedings for the issuance of any other NPDES permit which constitutes "initial licensing" under the Administrative Procedure Act, where the Regional Administrator elects to apply this Subpart and explicitly so states in the public notice of the draft permit. If an NPDES draft permit is processed under this Subpart, any other draft permits which have been consolidated with the NPDES draft permit under § 124.6(d) shall likewise be processed under this Subpart.

(3) The parties to an evidentiary hearing that would otherwise be held under Subpart E may agree to conduct that hearing in accordance with this Subpart. Any applicant for an NPDES permit which is not an initial licensee may request when requesting an evidentiary hearing under § 124.74 that its application be processed under the procedures of this Subpart. If the Regional Administrator agrees with this request, and if a hearing is granted the notice of the hearing issued under § 124.116 shall include a statement that the permit will be processed under the procedures set forth in this Subpart unless a written objection is received within 30 days stating the reasons. If no such objection is received, the application shall be processed in accordance with §§ 124.117–124.121 of this Subpart, except that any reference to a draft permit shall be taken as referring to the final permit. If an objection is received, Subpart E shall be applied instead.

(b) "Initial licensing" includes both the first grant of an NPDES permit to a discharger that has not previously held a NPDES permit and the first decision on any variance applied for by a discharger.

§ 124.112 Relation to other subparts.

The following provisions of Subparts A through E apply to procedures under this Subpart:

(a)(1) Sections 124.1 through 124.11.

(2) Section 124.18;

(3) Section 124.22.

(c)(1) Section 124.54 "Terms requested by the Corps of Engineers and other Government Agencies".

(2) Section 124.61 "Final environmental impact statement".

(3) Section 124.6e "Decision on variances and modifications".

(d)(1) Section 124.72 "Definitions".

(2) Section 124.73 "Filing".

(3) Section 124.78 "Ex parte communications".

(4) Section 124.80 "Filing and service".

(5) Section 124.85(a) (Burden of proof);

(6) Section 124.86 "Motions"; and

(7) Section 124.87 "Record of hearings".

(8) Section 124.90 "Interlocutory appeal".

§ 124.113 Public notice regarding draft permits and permit conditions.

Public notice of the formulation of a draft permit under this Subpart shall be given as provided in §§ 124.11 and 124.56. At the discretion of the Regional Administrator, the comment period specified in this notice may include an opportunity for a public hearing under § 124.12.

§ 124.114 Request for hearing; request to participate in a hearing.

(a) By the close of the comment period set forth in § 124.113, any person may request the Regional Administrator to hold a panel hearing on the draft permit by submitting a written request containing the following:

(1) A brief statement of the interest of the person requesting the hearing;

(2) A statement of any objections to the draft permit;

(3) A statement of the issues which such person proposes to raise for consideration at such hearing; and

(4) Statements meeting the requirements of § 124.74(c)(1)–(5).

(b) Whenever (1) a written request satisfying the requirements of paragraph (a) of this section has been received and presents genuine issues of material fact, or (2) the Regional Administrator determines *sua sponte* that a hearing under this Subpart is necessary or appropriate, the Regional Administrator shall serve written notice of the determination on each person requesting such hearing and the applicant, and shall provide public notice of the determination in accordance with § 124.56(e). If the Regional Administrator determines that a request filed under paragraph (a) of this section does not comply with the requirements of paragraph (a) or does not present genuine issues of fact, the Regional Administrator may deny the request for the hearing and shall serve written notice of such determination on all persons requesting the hearing.

(c) The Regional Administrator may also decide before a draft permit is issued that a hearing should be held under this Part. At the discretion of the Regional Administrator the notice may provide for a hearing under § 124.13 before a panel hearing is held, provided that no cross-examination under § 124.14 shall be permitted. When such a hearing is to be held, the notice of the formulation of the draft permit under § 124.113 shall so state.

§ 124.115 Effect of denial of, or absence of, request for hearing.

If no request for a hearing is made under § 124.114, or if all such requests are denied under that section, the draft permit shall be treated procedurally as if it were a recommended decision issued under § 124.124 of this Subpart, except that for purposes of §§ 124.125 and 124.126 the term "hearing participant" or "person who participated in the hearing" shall be construed to mean the applicant and any person who submitted comments under § 124.56(d).

§ 124.116 Notice of hearing.

(a) Upon granting a request for a hearing under § 124.114 the Regional Administrator shall promptly publish a notice of the hearing as required under § 124.56(e). The mailed notice shall include a statement which indicates whether the Presiding Officer or the Regional Administrator will issue the recommended decision.

§ 124.117 Request to participate in hearing.

(a) Each person desiring to participate in any hearing noticed under this section, shall file a motion to participate with the Regional Hearing Clerk by the deadline set forth in the notice of the grant of the hearing. The request shall include:

(1) A brief statement of the interest of the person in the proceeding;

(2) A brief outline of the points to be addressed;

(3) An estimate of the time required; and

(4) The requirements of § 124.74(c)(1)–(5).

(5) If the request is submitted by an organization, a non-binding list of the persons to take part in the presentation. As soon as practicable, but in no event later than two weeks before the scheduled date of the hearing, the Presiding Officer shall make a hearing schedule available to the public and shall mail it to each person who requested to participate in the hearing.

§ 124.118 Submission of written comments on draft permit.

(a) No later than 30 days before the scheduled start of the hearing (or such other date as may be set forth in the notice of hearing), each party shall file all of its comments on the draft permit, based on information in the administrative record and any other information which is or reasonably could have been available to that person. All comments shall include any affidavits, studies, data, tests or other materials relied upon for making any factual statements in the comments.

(b)(1) Written comments filed under paragraph (a) shall constitute the bulk of the evidence submitted at the hearing. Oral statements at the hearing should be brief and in the nature of argument. They shall be restricted either to points that could not have been made in written comments, or to emphasize points which are made in the comments, but which the participant believes can be more effectively argued in the hearing context.

(2) Notwithstanding the foregoing, within two weeks prior to the deadline specified in paragraph (a) for the filing of main comments, any party who has filed a request to participate in the hearing may move to submit all or part of its comments orally at the hearing in lieu of submitting written comments and the Presiding Officer shall, within one week, grant such motion if the Presiding Officer finds that such person will be prejudiced if required to submit such comments in written form.

(c) Parties to any hearing may submit written material in response to the comments filed by other participants under paragraph (a) at the time they appear at the panel stage of the hearing under § 124.120.

§ 124.119 Presiding officer.

(a)(1) Upon the granting of a request for hearing the Regional Administrator shall, as soon as practicable, request that the Chief Administrative Law Judge assign an Administrative Law Judge as Presiding Officer. The Chief Administrative Law Judge shall thereupon make such assignment.

(2) If all parties to the hearing waive in writing their statutory right to have the persons identified in paragraph (a) preside at the hearing, the Regional Administrator shall name a lawyer permanently or temporarily employed by the Agency and without prior connection with the proceeding to serve as Presiding Officer.

(b) It shall be the duty of the Presiding Officer to conduct a fair and impartial hearing. The Presiding Officer shall have the authority:

(1) Conferred by § 124.85(b)(1)–(15), § 124.83 (b) and (c), and;

(2) To receive relevant evidence, provided that all comments, under

§ 124.118, the record of the panel hearing under § 124.120, and the administrative record, as defined in § 124.10 (or in the case of voluntary use of these procedures under § 124.111(a)(3), the administrative record for the final permit under § 124.20 and § 124.62) shall be received in evidence.

§ 124.120 Panel hearing.

(a) A Presiding Officer shall preside at each hearing held under this Subpart. An EPA panel shall also take part in the hearing. The panel shall consist of three or more EPA temporary or permanent employees having special expertise in areas related to the hearing issue, at least two of whom shall not have taken part in preparing the draft permit. If appropriate for the evaluation of new or different issues presented at the hearing, the panel membership may change or may include persons not employed by the EPA.

(b) At the time of the hearing notice pursuant to § 124.116, the Regional Administrator shall designate the persons who shall serve as panel members for the hearing and the Regional Administrator shall file with the Regional Hearing Clerk the name, address and area of expertise of each person so designated. The Regional Administrator may also designate EPA employees who will provide staff support to the panel but who may or may not serve as panel members. Such designated persons shall be subject to the *ex parte* rules in § 124.78. The Regional Administrator may also designate Agency trial staff as defined in § 124.78 for the hearing.

(c) At any time before the close of the hearing, the Presiding Officer, after consultation with the panel, may request that any person having knowledge concerning the issues raised in the hearing and not then scheduled to participate therein appear and testify at the hearing.

(d) The panel members may question any person participating in the panel hearing. Cross-examination by persons other than panel members shall not be permitted at this stage of the proceeding except where the Presiding Officer determines, after consultation with the panel, that such cross-examination would expedite consideration of the issues. However, the parties may submit written questions to the Presiding Officer for the Presiding Officer to ask the participants, and the Presiding Officer may, after consultation with the panel, and at his or her sole discretion, ask these questions.

(e) At any time before the close of the hearing, any person may submit to the Presiding Officer written questions specifically directed to any person appearing or testifying in the hearing. The Presiding Office, after consultation with the panel may, at his sole discretion, ask the written question so submitted.

(f) Within ten days after the close of the hearing, any of the participants shall submit such additional written testimony, affidavits, information or material as such participant deems relevant or which the panel may request of such participant. These additional submissions shall be filed with the Regional Hearing Clerk and shall be a part of the hearing record.

§ 124.121 Opportunity for cross-examination.

(a) Any participant in a panel hearing may submit a written request to cross-examine on any issue of material fact. The motion shall be submitted to the Presiding Officer within 15 days after a full transcript of the panel hearing is filed with the Regional Hearing Clerk and shall specify:

(1) The disputed issue(s) of material fact regarding which cross-examination is requested. This shall include an explanation of why the questions at issue are factual, rather than of an analytical or policy nature, the extent to which they are in dispute in light of the record made up to that stage of the record, and the extent to which they are material to the decision on the application; and

(2) The person(s) a participant desires to cross-examine, and an estimate of the time necessary. This shall include a statement as to why the cross-examination will result in resolving the issue of material fact involved.

(b) After receipt of all motions for cross examination under paragraph (a) of this section, the Presiding Officer, after consultation with the hearing panel, shall promptly issue an order either granting or denying each such request. If any request for cross-examination is granted, the order shall be served on all hearing participants and shall specify:

(1) The issues on which cross-examination is granted;

(2) The persons to be cross-examined on each issue;

(3) The persons allowed to conduct cross-examination;

(4) Time limits for the examination of witnesses by each cross-examiner; and

(5) The date, time and place of the supplementary hearing at which cross-examination shall take place.

In issuing this ruling, the Presiding Officer may determine that one or more participants have the same or similar interests and that to prevent unduly repetitious cross-examination, they should be required to choose a single representative for purposes of cross-examination. In such a case, the order shall simply assign time for cross-examination by that single representative without identifying the representative further. If said participants with the same or similar interests shall fail to designate such single representative, then the Presiding Officer shall divide the assigned time among the representatives of such participants or issue such other order as justice may require.

(c) The Presiding Officer and to the extent possible, the members of the hearing panel shall be present at the supplementary hearing. During the course of the hearing, the Presiding Officer shall have authority to modify any order issued under paragraph (b) of this section. A record will be made under § 124.87.

(d)(1) No later than the time set for requesting cross-examination, a hearing participant may request that alternative methods of clarifying the record (such as the submission of additional written information) be used in lieu of or in addition to cross-examination. The Presiding Officer shall issue an order granting or denying such request at the time he issues (or would have issued) an order under paragraph (b) of this section. If the request is granted, the order shall specify the alternative provided and any other relevant information (e.g., the due date for submitting written information).

(2) In passing on any request for cross-examination submitted under paragraph (a) of this section, the Presiding Officer may, as a precondition to ruling on the merits of such request, require alternative means of clarifying the record to be used whether or not a request to do so has been made under the immediately preceding paragraph. The person requesting cross-examination shall have one week to comment on the results of utilizing such alternative means, following which the Presiding Officer, as soon as practicable, shall issue an order granting or denying such person's request for cross-examination.

(e) The provisions of § 124.85(d)(2) apply to proceedings under this Subpart.

§ 124.122 Record for final permit.

(a) The record on which the final permit shall be based in any proceeding under this Subpart (other than a proceeding by consent of the parties under § 124.111(a)(3)) consists of:

(1) The administrative record compiled under § 124.20;

(2) Any material submitted under § 124.78 relating to *ex parte* contracts.

(3) All notices issued under § 124.113;

(4) All requests for hearings, and rulings on those requests received or issued under § 124.114;

(5) Any notice of hearing issued under § 124.116;

(6) Any request to participate in the hearing received under § 124.117;

(7) All comments, submitted under § 124.118, any motions made under that section and the rulings on them, and any comments filed under § 124.113(b)(9);

(8) The full transcript and other material received into the record of the panel hearing under § 124.120;

(9) Any motions for, or rulings, on cross-examination filed or issued § 124.121;

(10) Any motions for, orders for and the results of, any alternatives to cross-examination under § 124.121;

(11) The full transcript of any cross-examination held; and

(b) In any proceedings under this Subpart involving a permit which is not an initial license and which are conducted under § 124.111(a)(3), the record for decision shall consist of:

(1) The administrative record under § 124.20 or § 124.62;

(2) All requests for hearing submitted under § 124.74, and all rulings on those requests; and

(3) The items specified in subparagraphs (a)(4) through (a)(11) of this section.

§ 124.123 Filing of brief, proposed findings of fact and conclusions of law and proposed modified permit.

Unless otherwise ordered by the Presiding officer, each party may, within 20 days after all requests for cross-examination are denied or after a transcript of the full hearing including any cross-examination becomes available, submit proposed findings of fact; conclusions regarding material issues of law, fact, or discretion; a proposed modified NPDES permit (if such person is urging that the draft permit should be modified); and a brief in support thereof; together with references to relevant pages of transcript and to relevant exhibits. Within 10 days thereafter each party may file a reply brief concerning matters contained in opposing briefs and containing alternative findings of fact; conclusions regarding material issues of law, fact, or discretion; and a proposed modified permit. Oral argument may be held at the discretion of the Presiding Officer on Motion of any party or sua sponte.

§ 124.124 Recommended decision.

The person named to prepare the decision shall, as soon as practicable after the conclusion of the hearing, evaluate the record of the hearing and prepare and file a recommended decision with the Regional Hearing Clerk. That person may consult with, and receive assistance from, any member of the hearing panel in drafting the recommended decision, and may delegate the preparation of the recommended decision to the panel or to any member or members of it. This decision shall contain findings of fact, conclusions regarding all material issues of law, and a recommendation as to whether and in what respect the draft permit shall be modified. After the recommended decision has been filed, the Regional Hearing Clerk shall serve a copy of such decision on each party and upon the Administrator.

§ 124.125 Appeal from or review of recommended decision.

(a)(1) Within 30 days after service of the recommended decision, any party may take exception to any matter set forth in such decision or to any adverse order or ruling of the Presiding Officer to which such party objected, and may appeal such exceptions to the Administrator as provided in § 124.101. Except that references to "initial decision" will mean recommended decision under § 124.124.

§ 124.126 Final decision.

As soon as practicable after all appeal proceedings have been completed, the Administrator shall issue a final decision. Such final decision shall include findings of fact; conclusions regarding material issues of law, fact, or discretion, as well as reasons therefor; and a modified NPDES permit to the extent appropriate. It may accept or reject all or part of the recommended decision. The Administrator may delegate some or all of the work of preparing this decision to a person or persons without substantial prior connection with the matter. The Administrator or his designee may consult with the Presiding Officer, members of the hearing panel or any other EPA employee in preparing the final decision. The Hearing and Record Clerk shall file a copy of the decision on all hearing participants.

§ 124.127 Final decision if there is no review.

If no party appeals a recommended decision to the Administrator, and if the Administrator does not elect to review it, the recommended decision is deemed the final decision of the Agency upon the expiration of the time for filing any appeals.

§ 124.128 Delegation of authority; time limitations.

(a) The Administrator may delegate to a Judicial Officer any or all of his or her authority to act under this Subpart.

(b) The failure of the Administrator, Regional Administrator or Presiding Officer to do any act within the time periods specified herein shall not be construed as a waiver or in derogation of any rights, powers or authority of the United States Environmental Protection Agency.

(c) Upon a showing by any party that it has been prejudiced by a failure of the Administrator, Regional Administrator, or Presiding Officer to do any act within the time periods specified herein, the Administrator, Regional Administrator, or Presiding Officer, as the case may be, may grant such party such relief of a procedural nature (including extension of any time for compliance or other action) as may be appropriate.

§ 124.129 EPA headquarters approval of stipulation or consent agreement.

No non-adversary initial licensing hearing under Subpart F may be resolved, settled or decided, in either whole or substantial part, by the stipulation or consent of the parties thereto, unless and until the stipulation or consent is approved and signed by the Deputy Assistant Administrator for Water Enforcement.

No stipulation or consent without such approval and signature shall bind EPA or have any force or effect or be filed in any proceeding.

Federal Register

Part III

Environmental Protection Agency

Draft Consolidated Permit Application Forms and Proposed National Pollutant Discharge Elimination System Regulations

ENVIRONMENTAL PROTECTION AGENCY

[FRL-1233-8]

Draft Application Forms for EPA Programs

AGENCY: Environmental Protection Agency.

ACTION: Publication of draft application forms.

SUMMARY: Elsewhere in today's Federal Register, EPA is proposing regulations to consolidate certain permit programs administered by the Agency. As part of this initiative, EPA is developing a single set of forms and instructions to be used for applying for permits issued under the consolidated permits program.

This notice solicits public comments on draft of several parts of the consolidated permit application form and accompaning instructions. When complete, the consolidated application form will consist of a general form asking for information common to all programs within the consolidated permits program (including an identification of the facility and a general description of the pathways by which pollutants are released to the environment), followed by specific forms tailored to the different programs.

The forms included today are: (1) A general form for applicants for EPA permits; (2) a form to apply for National Pollutant Discharge Elimination System (NPDES) permits under the Clean Water Act for concentrated animal feeding operations and aquatic animal production facilities; (3) a form for existing industrial dischargers applying for NPDES permits under the Clean Water Act; and (4) a form for hazardous waste management facilities (HWM facilities) which require hazardous waste storage, treatment or disposal permits under the Resource Conservation and Recovery Act.

Additional forms will be published for public comment in the future to reflect the application requirements of other programs within the consolidated permits initiative.

DATES: Comments must be received on or before September 12, 1979 to be considered.

A pamphlet describing the proposed regulations and their relationship to the new NPDES application form has been prepared, titled "A Guide to the Consolidated Permit Application and Conforming NPDES Regulations" (C-7). This pamphlet, and six other pamphlets describing the final NPDES regulations, the proposed consolidated permit regulations and other proposed regulations pertaining to the consolidated permit programs are available from the Environmental Protection Agency, Public Information Center (PM-215), 401 M St., SW., Washington, D.C. 20460.

Meetings open to the public to discuss and receive comments on the consolidated application form are scheduled for four cities. These same meetings will also serve as a forum to receive comments on other aspects of the consolidated permits program, including the consolidated permit program regulations which are proposed elsewhere in today's Federal Register, and reproposed part 146 of the Underground Injection Control (UIC) regulations published on April 20, 1979 at 44 FR 23738. Both the RCRA and the NPDES portions of this consolidated application form will be discussed on the second and third day of each meeting.

These meetings will be held at the following places and dates:

July 16, 17*, 18, 1979, Northpark Inn, 9300 North Central Expressway, Dallas, Texas.
July 23, 24*, 25, 1979 HEW Auditorium, 330 Independence Avenue SW., Washington, D.C.
July 26*, 27, 28, 1979, Water Tower Hyatt, 800 North Michigan Avenue, Chicago, Illinois.
July 30, 31*, August 1, 1979 EPA Region X, 1200 6th Avenue, Seattle, Washington.

At each public meeting, registration will be held from 8:30 to 9:00 a.m. and comments will be received from 9:00 a.m. until concluded, or no later than 5:00 p.m. In addition, an evening session will be held on the dates noted with an asterisk above, from 7:30 until concluded. Anyone wishing to make an oral statement at the meetings should notify the following person in writing, specifying the meeting dates and the city in which they are interested: Ms. Judith Shaffer, Permits Division (EN-336), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

ADDRESSEE: Comments should be addressed to: Edward A. Kramer (A-1), Permits Division (EN-336), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460 (202) 755-0750.

FOR FURTHER INFORMATION CONTACT: Edward A. Kramer (A-1), Permits Division (EN-336), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460 (202) 755-0750.

*Day and evening sessions.

SUPPLEMENTARY INFORMATION:

I. Introduction

In the interest of regulatory reform, the Agency is presently consolidating its permit programs wherever feasible. The goal of this effort is to eliminate gaps and overlaps among the programs, to insure consistency of regulatory approaches of the various programs, and to provide the regulated community with uniform procedures. Although statutory constraints preclude complete uniformity, the Agency believes that the goal of consolidation should be pursued to the extent possible.

The Agency has already begun its consolidation efforts by proposing consolidated regulations elsewhere in today's Federal Register for five programs: The Hazardous Waste Permit Program under sections 3005 and 3006 of the Resource Conservation and Recovery Act (RCRA), the Underground Injection Control (UIC) program under sections 1421-1423 of the Safe Drinking Water Act (SDWA), the National Pollution Discharge Elimination System (NPDES) permit program under section 402 of the Clean Water Act (CWA), the permit program for dredged or fill material under section 404 of the CWA, and the prevention of significant deterioration (PSD) program under the Clean Air Act.

During the preparation of the consolidated regulations, many overlaps, gaps and inconsistencies in regulatory coverage were discovered and eliminated by the various EPA program offices responsible for each program. In addition, procedures for approving State programs, applying for permits, issuing permits, and other similar matters were made consistent to the extent permitted by law and sound policy.

EPA is now taking another major step in its consolidation effort by developing a single set of application forms and instructions for the following four programs:

(1) Hazardous waste;

(2) Underground injection control (UIC);

(3) Discharges to surface water (NPDES, with separate parts designed for existing industrial dischargers, new industrial sources and discharges, publicly owned treatment works, and concentrated animal feeding facilities); and

(4) Prevention of Significant Deterioration (PSD) for new sources under section 165 of the Clean Air Act.

The fifth program covered by the consolidated permit program regulations, the section 404 dredge or fill program, is not included in EPA's

consolidated application form project at this time since EPA does not issue those permits.

The family of forms for the consolidated permit program is as follows, including those parts that are reserved for addition in the future:

Form 1—General Information
Form 2—Discharges to Surface Water (NPDES Permits)
a. Publicly Owned Treatment Works [Reserved]
b. Concentrated Animal Feeding Operations and Aquatic Animal Production Facilities.
c. Existing Manufacturing, Commercial, Mining, and Silvicultural Operations
Form 3—Hazardous Waste Information Summary (RCRA Permits)
Form 4—Underground Injection of Fluids (UIC Permits) [Reserved]
Form 5—Proposed Facilities (PSD new sources, NPDES new sources and new dischargers, and new injection wells)
a. Compliance with Other Environmental Laws [Reserved]
b. Application for PSD and NPDES Permits [Reserved]
c. New Source Applicability Questionaire (PSD and NPDES) [Reserved].

Forms 1, 2b, 2c and 3 and associated instructions are included in today's public notice. The forms and instructions which are reserved in this package will be developed according to the following schedule:

	Federal Register Notice	Final Form
Form 2a	December 1978	July 1980
Form 4	August 1980	April 1981
Form 5	December 1979	July 1980

The goals of the consolidated application form are to:

(1) Reduce paperwork burdens upon applicants and resource burdens upon EPA and State officials in the preparation and review of applications under more than one permit program.

(2) Insure consistency of application requirements.

(3) Insure that applicants consider and report, at a single time and in a uniform manner, all pathways by which they release pollutants to the environment. This will make clear to the applicant and to EPA (or an approved State) precisely which programs apply, resulting in proper regulation of all sources of pollution as required by the various statutes. It will also facilitate the development by permit writers of consistent permit conditions under the various programs.

The consolidation effort is an EPA initiative. States are encouraged, but not required, to consolidate their programs. EPA hopes that today's notice will set a positive example for States to follow.

EPA's consolidation effort is limited by the fact that in many cases some programs will be operated by EPA's Regional offices while others will be operated by States, sometimes by different offices in a State. Thus, for example, an applicant might be required to apply to EPA for an NPDES and UIC consolidated permit, to one State agency for a hazardous waste permit, and to another State agency for a PSD permit.

To minimize this problem, EPA intends to actively encourage further consolidation of programs. EPA also intends to notify applicants by letter as to which Federal and State offices operate which programs. In addition, permit program coordinators will be available in each EPA Regional office to assist permit applicants in this regard. Special coordinators for new sources have already been established in each EPA Region and are listed at 44 FR 23306 (April 19, 1979).

The Agency has determined that the best way to consolidate application forms is to combine common elements in a general part and leave program-unique elements to specific parts. The alternative of developing a single form encompassing all programs was rejected as being too unwieldy and potentially confusing.

To ensure that the forms are understandable, the questions and instructions are being drafted to be as concise and clear as possible and to require as brief a response as possible. Different colors will be used in the final forms for each program to help distinguish them.

In addition, the questions and instructions in the general form (Form 1) have been designed to enable an applicant to determine which additional forms are applicable. Further, once Form 5c is developed, applicants will be able to submit preliminary information to EPA and receive formal determinations of whether they are subject to the new source requirements of the PSD and NPDES programs. Of course, if an applicant remains unsure of which programs apply, he or she is encouraged to call, visit or write EPA's Regional representative for assistance.

Today's notice contains drafts of the general form, a RCRA form, two NPDES forms, and all associated instructions. After receipt of public comments, these will be altered if necessary. In addition, these forms must be approved by the Office of Management and Budget before EPA can use them. The forms which have not been included in today's notice will be published as drafts in future Federal Register notices, and incorporated into the consolidated permit application form when final.

II. General Form (Form 1)

This form requires submission of general identification information: name, address, phone number of the applicant (and of the facility, if different) the four Standard Industrial Classification (SIC) codes best describing the principal products of the facility, and the name and telephone number of the facility contact (e.g., plant manager). The type of ownership (Federal, State, private, etc.) must also be described.

In addition to identifying the facility, this form will be used as a guide to determine which specific forms must be completed by the applicant. The applicant is asked, by the use of brief questions requiring "yes" or "no" answers, whether it conducts certain activities, each of which requires a permit. In most cases, a "yes" answer will lead the applicant to the additional specific form necessary to obtain a permit for the activity. The applicant must also list any permits which it presently holds.

Finally, this form requires applicants to submit topographic maps of their facilities extending to at least one mile beyond property boundaries. The maps must show the location of each of the source's intake and discharge points, hazardous waste treatment, storage and disposal sites, and injection wells. These requirements will give an overview of the release of different wastes to the environment by each facility.

The Agency considered asking for other more detailed information in the general form. This could prove useful where more than one program solicits similar information. However, such information is generally not relevant to all of the programs. To avoid soliciting this information from applicants who need not submit it, the Agency decided to request it in the program-specific forms.

III. Hazardous Waste Form (Form 3)

Section 3001 of the Resource Conservation and Recovery act (RCRA) provides authority for determining whether a waste is hazardous and therefore whether it must be managed according to other provisions of RCRA. Regulations implementing this section of RCRA were proposed on December 18, 1978 (43 FR 58956).

Section 3010 of RCRA, requires any person who generates, transports, or owns or operates a facility that treats, stores or disposes of hazardous wastes to notify EPA of such activity within 90 days of promulgation of the section 3001

regulations. Regulations governing this notification were proposed at 43 FR 29908 (July 11, 1978), which require existing Hazardous Waste Management (HWM) facilities to provide the location and general description of their activities and wastes. Because this is a brief document which is not a part of an application for a permit, EPA decided to develop a separate form for notification.

Section 3004 of RCRA, and the implementing regulations which were proposed at 43 FR 58994 (December 18, 1978), address standards for owners and operators of hazardous waste treatment, storage and disposal facilities. These standards define the levels of proposed human health and environmental protection to be achieved by these facilities.

Section 3005 of RCRA requires permits for facilities which treat, store, or dispose of hazardous waste. Regulations to implement this permit program are proposed elsewhere in today's Federal Register as part of the consolidated permit program regulations. These regulations provide for three types of permits for HWM facilities: Regular permits, experimental special permits, and health care special permits.

A. *Regular Permits*

The proposed RCRA regulations establish information requirements for applications for regular permits. For administrative convenience, proposed §§ 122.23 (c) and (d) divide these information requirements into two parts (Part A and Part B). The Part A requirements of the regulations will be implemented by Form 1 and Form 3 of the consolidated permit application, while Part B requirements will be satisfied by direct submission of the required information to the permitting authority (no separate form will be developed). Table I describes the schedule for submission of information required to obtain a regular permit.

1. *Part A Requirements (Forms 1 and 3).* Form 1 is discussed in Part II of this preamble. The information required in Form 3 of the permit application focuses on the nature and quantity of hazardous waste handled at the facility, but also includes: (1) Data such as the zoning of the area in which the facility is located and the type of RCRA permit sought; (2) a detailed description of the facility, including available design and operation drawings and specifications for the facility, and its hazardous waste treatment, storage and disposal processes, techniques and equipment; (3) detailed and specific identification, description and quantification of the wastes to be handled at the facility; and (4) the processes or technologies to be applied for the treatment, storage or disposal of hazardous wastes at the facility. These date requirements reflect the intent and content of proposed §§122.23(c)(3–7).

2. *Part B Requirements (No Application Form). The date and information required by Part B information requirements is site and process specific. The Agency decided not to develop a specific form for Part B since the information required is not readily adaptable to a standard format.*

The specific requirements of Part B, which appear as § 122.23(d) in the proposed consolidated permit program regulations elsewhere in today's Federal Register, include administrative, hydrological, design and operational data on the facility. When sumitted by an applicant, the specific facility and site data required by Part B will be compared to the standards and criteria required by section 3004 of RCRA (40 CFR 250.40 through 250.46, proposed on December 18, 1978 at 43 FR 58994).

The date requirements of Part B include:

(a) Treatment, storage and disposal data: The facility's structures, operating and maintenance plans, emergency or contingency plans, leachate and other pollution control measures, planned life of operation, closure and post-closure maintenance and uses, programs for monitoring and visual inspections during and after use, plans for segregation of incompatible wastes, and plans for incinerator trial burns at appropriate facilities.

(b) Facility site data: The geology, climate, and hydrology [Within 290 m (100 ft) of the facility boundaries] are required in terms of their possible relation to air and water pollution.

(c) Facility staffing data: Information on expected performance and related training of persons responsible for operation of the HWM facility. This data will help EPA to assess operational and maintenance safety of the facility and the associated risks.

(d) Financial responsibility data: Data which supplies evidence of continued financial responsibility, such as performance bonds, insurance carriers/policies, trusts, escrow accounts or other instruments.

These data are usually needed to determine the human health, environmental and economic risk associated with the decision to issue or deny a permit. However, proposed §122.23(d)(7) allows that, on written request and justification from the applicant, any of the information requirements in Part B may be waived if the Director determines that this information is not needed to establish compliance with standards in proposed §§ 250.42–250.46.

B. *Experimental Special Permits*

Owners or operators of experimental facilities which are intended to advance the state of the art for hazardous waste treatment, storage or disposal may seek one-year experimental special permits. These permits may be extended up to one additional year.

Applicants must submit Part A requirements (Forms 1 and 3) and Part B requirements according to the schedule in Table 1. However, certain items may not be relevant. In these cases, certain Part B requirements may be waived.

C. *Health Care special Permits*

Owners or operators of health care facilities that treat or store hazardous waste may apply for health care special permits.

To qualify for this special permit, the following conditions must be met:

(1) The facility must be licensed under a State law that requires compliance with requirements for storage, sterilization, incineration, or treatment of all hazardous waste generated.

(2) The State law must provide for the enforcement of the requirements of the licensing program.

(3) If an incinerator is used, it must be operated under the terms and conditions of a license under applicable State law.

(4) The facility must submit a certification statement indicating compliance with an issued license signed by the appropriate State licensing official.

Applicants for these permits need not submit Part B information. They are also exempt from certain items in Form 3, as described in the instructions.

D. *Interim Status*

The preparation and review of permit applications are expected to take a substantial period of time. Therefore, HMM facilities which were in operation or under physical construction prior to the date of promlugation of section 3001 regulations are eligible for interim status. To qualify for this status, the facility must fulfill the notification requirements of section 3010, and submit Forms 1 and 3 of the consolidated permit application no later than 180 days from the date of promulgation of section 3001 regulations.

Under interim status, the facilities will be treated as having been issued valid permits, thus allowing their continued operation until required to complete the application process by filing Part B information and a final permit is issued. Facilities granted interim status are subject to certain minimum criteria

under section 3004 of RCRA. See proposed 40 CFR 260.40 (43 FR 58946, December 18, 1978). Facilities which do not meet the above conditions (e.g., new facilities) must submit both Part A (Forms 1 and 3) and Part B information prior to permit issuance.

Table I summarizes the types of permits for which applications must be made, the type of forms to be used and the date by which application must be submitted.

Table I—*Summary of RCRA § 3005 Application Requirements*

Permit for which application is submitted	Type of applicant	Deadline for submission of part A (forms 1 and 3)	Deadline for submission of part B (no form provided)
Regular RCRA Permit (Interim Status)	Owner/operator of Existing HWM Facility	A	B
Regular RCRA Permit	Owner/operator of New HWM Facility	C	C
Experimental Special Permit (Interim Status)	Owner/operator of Existing HWM Facility	A	B
Experimental Special Permit	Owner/operator of New HWM Facility	C	C
Health Care Special Permit (Interim Status)	Owner/operator of Existing HWM Facility	A	Not required.
Health Care Special Permit	Owner/operator of New HWM Facility	C	Not required.

A: No later than 180 days after final promulgation of regulations under section 3001 of RCRA.
B: As required by the Director (upon at least six months notice to the applicant).
C: No later than 180 days before physical construction is expected to begin.

E. *Impacts of RCRA Application Reporting Requirements.*—The requirement to obtain a RCRA permit is expected to place an economic and workload burden on approximately 30,000 owners or operators of regulated HWM facilities. The impact on applicants who must complete Form 3 is summarized in Table II. The estimates are considered to be overstated because several States already required submission of some of the same information in their State operated permit programs. In addition, some of the same information necessary for completion of the form may be available through such sources as the Department of Transportation shipping documents which depict the waste, and responsible companies that maintain daily operating logs.

Table II.—*Summary of Form 3 Impact*

	Storage	Treatment and disposal		Health care
		Onsite*	Offsite*	
Number of respondents	17,000	4,800	1,200	7,000
Frequency of response	Once	Once	Once	Once
Cost in work hours	2	27	5	1
Cost in dollars**	$44	$600	$110	$22

*Onsite means on the same or geographically contiguous property; offsite means *not* on the same property.
**Based on $22/hr.

The impacts of Part B requirements are addressed on page 95 of the Draft Subtitle C Economic Impact Analysis. Copies of this document can be obtained by writing Ed Cox, Solid Waste Information Office, Environmental Protection Agency, 26 West St. Clair Street, Cincinnati, Ohio 42560, telephone (513) 684–8491. In addition, copies of this document are available for review in the EPA Library Reading Room, 2404, Waterside Mall, 401 M St., SW., Washington, D.C. 20460, and in the EPA Regional office libraries.

IV. NPDES Forms (Forms 2b and 2c)

All applicants for EPA-issued NPDES permits must submit the general section (Form 1) plus the applicable specific section (Form 2a, 2b, 2c, or 5) of the consolidated application form. Applicants for State-issued permits must use State application forms, unless the State has adopted EPA's form without change.

Only the forms for existing industrial dischargers (Form 2c) and concentrated animal feeding operations and aquatic animal production facilities (Form 2b) are included in this notice. The Agency is also developing application forms for new sources and new dischargers (Form 5) and for publicly owned treatment works (Form 2a). It is expected that many of the considerations addressed in developing the form for existing industrial sources will also be relevant to those forms.

State application forms are not required to be identical to the EPA form, but they are subject to EPA approval prior to use (see the definition of "application" in 40 CFR 122.3 and the requirement of EPA approval in 40 CFR 123.73). To ensure consistency of approach, EPA has today proposed elsewhere in the Federal Register (§ 122.64(d)) minimum requirements for applications for NPDES permits, which would apply even where States use forms other than the EPA form. Of course, States are welcome to use EPA's format, substituting the State's name, address and logo, for EPA's.

Applicants should continue to use existing permit NPDES application forms until revised forms are made available.

The Agency is proposing elsewhere in today's issue of the Federal Register a set of conforming regulations for the NPDES program which establish the framework for the control of pollutants in general and section 307(a) toxic pollutants in particular through a strategy of application reporting and permitting. These regulations are preceded by a detailed preamble which explains the entire strategy. Included in that preamble is a discussion of how the application reporting requirements fit into the overall strategy, including an anaylsis of the basis for each requirement. That discussion will not be repeated here. However, the permit application requirements for existing industrial dischargers may be summarized as follows:

1. Applicants must report discharge levels of pollutants which have traditionally been of concern in the NPDES permit program.

2. Applicants must also report discharge levels of the 129 toxic pollutants listed under section 307(a) of the Clean Water Act (this list is an elaboration upon, but contains no addition to, the list of 65 toxic pollutants contained in the *NRDC Consent Decree* and referred to in section 301(b)(2)(C) of the Clean Water Act). For process wastewater streams discharged by sources in 36 industries, this reporting must be based on analyses conducted by using gas chromatography/mass

spectrometry (GC/MS) analytical techniques for most of the 115 organic chemicals on the toxics list. This analysis will be performed upon composite samples of the applicant's waste stream which have been collected over a 72-hour period. For non-process wastewater streams and sources in other industries, estimates will be accepted.

3. Applicants must describe the variability of the levels of pollutants that may be expected to occur during the term of the permit. Examples include batch process discharges and predictable changes in raw materials usage (e.g., a change by a coal-fired steam electric generating plant from one source of coal to another).

4. At their option, applicants may submit information on expected discharges of hazardous substances as defined under section 311 of the Clean Water Act. As described in proposed 40 CFR 117.12(b) (44 FR 10271, February 16, 1979), applicants who state that they expect to discharge pollutants in certain quantities and concentrations and show that adequate treatment equipment or management practices are or will be in place to control those discharges are eligible for exemption of those discharges from the requirements and penalties of section 311.

It should be noted that the Agency has made efforts to minimize reporting burdens upon applicants. Of course, reporting burdens are increased in some areas as a result of the increased emphasis on toxics required by the 1977 amendments to the Clean Water Act (see the background discussion in the preamble to the proposed conforming NPDES regulations elsewhere in today's Federal Register). However, certain requirements imposed by the expiring NPDES application form have been deleted, including the following:

1. Certain pollutants no longer must be reported (e.g., specific conductance, potassium, and settleable matter).

2. Applicants are no longer required to sample and analyze pollutants in their intake water. However, they must do so if they intend to seek credit for pollutants in their intake as provide by 40 CFR 122.70(g).

3. Applicants are no longer required to provide information on the raw materials used and the types and quantities of products produced, unless an applicable effluent guideline employs limits based on production, raw materials, or some other measure of operation. Where such guideline limits apply, the total amount of product produced or raw material used must be reported in order for the permit writer to apply the guideline.

Applicants are reminded that all information contained in an application for an NPDES permit is available to the public as required by section 401(j) of the Clean Water Act. In order to minimize collection of data which could compromise trade secrets, the Agency is requesting only end-of-pipe effluent data. If a permit writer determines, after reviewing an application, that other waste stream information (such as sensitive data concerning upstream process discharges) is required in a particular case, he or she will generally do so under section 308 of the Clean Water Act or equivalent State authority. The rules governing claims of confidentiality are contained in 40 CFR Part 2.

The economic and reporting impacts of these NPDES forms are discussed elsewhere in this issue of the Federal Register as part of the preamble to the proposed NPDES regulations implementing these NPDES application forms.

Comments: Comments are solicited on the layout of each form and on the clarity of all questions and instructions. Comments are also requested on EPA's approach towards consolidating its permit application forms, and suggestions are invited on ways to further reduce duplicative reporting of information.

Dated: June 4, 1979.

Douglas M. Costle,
Administrator.

Consolidated Permit Application Form

Form 1—General Information
Form 2—Discharges to Surface Water (NPDES Permits)
a. Publicly Owned Treatment Works [Reserved]
b. Concentrated Animal Feeding Operations and Aquatic Animal Production Facilities
c. Existing Manufacturing, Commercial, Mining, and Silvicultural Operations

GENERAL INFORMATION

Consolidated Permits Program

(Refer to instructions for legal authorizations.)

ITEMS	AFFIX LABEL BELOW
II. FACILITY I.D. NO.	DRAFT PLEASE PLACE LABEL IN THIS SPACE
III. FACILITY NAME	
V. MAILING ADDRESS	
VI. FACILITY LOCATION	
VII. SIC CODES	

GENERAL: If a preprinted label has been provided, affix it in the designated space. Review the information carefully; if any of it is incorrect, cross through it and enter the correct data in the appropriate shaded area below. Also, if any of the preprinted data is absent (the area to the left of the label space lists the information that should appear), please provide it in the proper fill-in area below. If the label is complete and correct, you need not complete Items II, III, V, VI, and VII. Complete all items if no label has been provided.

I. POLLUTANT CHARACTERISTICS

INSTRUCTIONS: Complete questions A through J to determine whether you need to file any permit forms. If you answer no to every question, you are not required to submit any of these forms. If you answer yes to any of these questions, refer to the instructions before proceeding. Each of the terms in questions A through J printed in bold face type has a certain meaning; refer to the glossary in Section D of the instructions for definitions.

SPECIFIC QUESTIONS	MARK "X" YES	MARK "X" NO
A. Is the facility a publicly owned treatment works which results in a discharge to waters of the U.S.?	16	17
B. Does this facility (either existing or proposed) include a concentrated animal feeding operation or aquatic animal production facility which results in a discharge to waters of the U.S.?	18	19
C. Are there any operations now existing at the facility which result in a discharge to waters of the U.S. other than those described in A or B above?	20	21
D. Is this a proposed operation (other than those described in A or B above) which will result in a discharge to waters of the U.S.?	22	23
E. Do you own or operate a facility that treats, stores, or disposes of hazardous wastes?	24	25
F. Do you inject or propose to inject industrial, municipal or nuclear effluent below underground sources of drinking water?	26	27

SPECIFIC QUESTIONS	MARK "X" YES	MARK "X" NO
G. Do you inject or propose to inject any fluids related to oil and gas production, such as enhanced recovery, salt water disposal, or hydrocarbon storage?	28	29
H. Do you inject or propose to inject fluids for special process operations such as solution mining of minerals, in situ gasification of oil, shale, coal, etc., or the recovery of geothermal energy?	30	31
I. Is the facility a proposed stationary source in one of the 28 industrial categories listed in the instructions to this question that will potentially emit 100 tons per year of any air pollutant regulated under the Clean Air Act, and its emissions may affect or be located in an attainment area?	32	33
J. Is the facility a proposed stationary source which is NOT one of the 28 industrial categories listed in the instructions to this question, will potentially emit 250 tons per year of any air pollutant regulated under the Clean Air Act, and its emissions may affect or be located in an attainment area?	34	35

ADDITIONAL FORMS: You can obtain additional forms by calling or writing your EPA's Regional office (see Table 1 of the instructions).

E. For each outfall, describe which processes or operations contribute wastewater to the effluent and what treatment the resulting effluent receives. Attach additional sheets if necessary.

1. OUTFALL NO.	2. PROCESS OR OPERATION (specify)	3. TREATMENT (specify)

DRAFT

IV. IMPROVEMENTS

A. Are you now required by any Federal, State or local authority to meet any implementation schedule for the construction, upgrading or operation of wastewater treatment equipment or practices? This includes, but is not limited to, permit conditions, administrative or enforcement compliance schedule letters, stipulations, court orders, and grant or loan conditions.

☐ YES *(complete the following table)* ☐ NO *(go to Question IV–B)*

1. IDENTIFICATION OF CONDITION, ORDER, AGREEMENT, ETC	2. OUTFALL OR NONPOINT SOURCE AFFECTED	3. BRIEF DESCRIPTION OF PROJECT	4. FINAL COMPLIANCE DATE	
			a. REQUIRED	b. PROJECTED

B. Attach additional sheets describing any additional water pollution control programs *(or other environmental projects which may affect your discharge)* you now have underway or which you plan. Indicate whether each program is now underway or planned, and indicate your actual or planned schedules for construction.

☐ Mark 'X' if description of additional control programs is attached.

V. INTAKE AND EFFLUENT CHARACTERISTICS

See instructions before proceeding – Complete one table for each outfall – Annotate the outfall number in the space provided. Except for Part V–C, pollutant levels reported in this question must be based upon actual analyses conducted in accordance with the methods specified in the instructions, and may not be based upon estimates or conjecture. Column (1) in each table must be completed only if you are requesting credit for pollutants present in your intake water *(see instructions)*. NOTE: Tables V–A, V–B, and V–C are included on a separate sheet *(oversized sheet)*.

Continued from the front.

VI. VARIABILITY

A. Are your operations such that your raw materials, processes, and/or products can reasonably be expected to vary so that future concentrations of pollutants from each outfall may exceed five times the average values reported in Question V?

☐ YES *(complete Questions VI–B & VI–C)* ☐ NO *(go to Question VII)*

B. If you answered 'Yes' to Question VI–A, describe the reasons that the concentrations of pollutants can be expected to significantly vary from the levels reported in Question V, for each outfall where you expect such variations to occur.

C. If you answered 'Yes' to Question VI–A, describe in detail the range of levels of pollutants which you anticipate will be discharged from each outfall over the next five years, to the best of your ability at this time. Attach additional sheets if necessary.

DRAFT

VII. BIOMONITORING DATA

A. Do you have any knowledge or reason to believe that biological monitoring tests for acute and/or chronic toxicity have been made on any of your discharges or on a receiving water in relation to your discharge within the last five years?

☐ YES *(go to Question VII–B)* ☐ NO *(go to Question VIII)*

B. If 'Yes' to Question VII–A, please identify the test and describe the results; and specify at which outfall or receiving water the tests were conducted.

VIII. DATA ON POLLUTANTS NOT REPORTED ELSEWHERE ON THIS FORM

Do you know of any analytical data collected within the last five years on the presence or levels of pollutants in your effluents in addition to those pollutants reported in Questions III–B or V?

☐ YES *(briefly describe this information below)* ☐ NO *(go to Question IX)*

Continued from page 4.
IX. DISCHARGES OF HAZARDOUS SUBSTANCES (OPTIONAL)

FACILITY ID NUMBER

Form Approved.
OMB No. 158-RXXX

FACILITY I D NUMBER

Form Approved
OMB No. 158–PXXX

Continued from page 4.

IX. DISCHARGES OF HAZARDOUS SUBSTANCES *(OPTIONAL)*

NOTE: Discharges identified under this Question may be eligible for exemption from the requirements and penalties of Section 311 of the Clean Water Act. See instructions.

A. Identify and describe any hazardous substance listed under Section 311 of the Clean Water Act which you discharge or may discharge in the future.

1. POINT OF DISCHARGE	2. HAZARDOUS SUBSTANCE	3. ORIGIN OR CAUSE OF DISCHARGE	4. FREQUENCY OF OCCURRENCE	5. CONCENTRATION			6. AMOUNT	7. ANALYTICAL METHOD OR BASIS OF ESTIMATION
				a. AVERAGE	b. MAXIMUM	c. UNITS		

DRAFT

Section IX continued from the front.

B. List any treatment methods or management practices which are or will be used to control each discharge listed in (A) on the reverse. Attach additional sheets if necessary.

DRAFT

X. CONTRACT ANALYSIS INFORMATION

Were any of the analyses reported in this application performed by a contract laboratory or consulting firm?

☐ YES *(List the name, address, & telephone number of each laboratory or firm below.)* ☐ NO *(go to Question XI)*

A. NAME	B. ADDRESS	C. TELEPHONE

XI. CERTIFICATION *(see instructions)*

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

II. APPLICATION TYPE

III. FACILITY CONTACT

IV. TYPE OF OPERATION

V. ZONING

A. What is the zoning classification(s) for the facility?

B. If a zoning variance is required for your operation, has it been obtained?

VI. FACILITY DESCRIPTION

Provide a brief description of the nature of your business and the principal products or services provided by each operation listed in questions A.1 and A.2 of Section IV above.

VII. IF YOU OWN OR LEASE FACILITIES OTHER THAN THOSE DESCRIBED IN QUESTIONS A.1 AND A.2 OF SECTION IV ABOVE, PLEASE COMPLETE THE FOLLOWING:

A. A certificate of disclosure of ownership interests in the facility is attached.

B. A list of names and addresses of all persons who own or lease the facility is attached.

VIII. CERTIFICATION

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

INSTRUCTIONS

GENERAL: Each of the following instructions apply specifically to each part of Item IX. Before completing, photo copy as many copies as necessary of the reverse side, so that that you'll be able to list all your wastes.

A. WASTE NUMBER: Starting with '1', enter a number sequentially for each waste described.

B. HAZARDOUS WASTE NAME: Enter the common name of the waste described.

C. CONFIDENTIALITY CLAIM: If you wish to keep information about a specific waste confidential, mark 'X'.

D. WASTE DEFINITION CODE: Enter the appropriate code from Appendix C of the instructions manual.

E. HAZARD CLASS: Enter the appropriate EPA and DOT codes from the following lists.

1. DOT HAZARD CLASS CODES

EA=EXPLOSIVES A
EB=EXPLOSIVES B
EC=EXPLOSIVES C
FL=FLAMMABLE LIQUID
FS=FLAMMABLE SOLID
OX=OXIDIZER
NG=NONFLAMMABLE GAS
CL=CORROSIVE LIQUID
PA=POISON A
PB=POISON B
RM=RADIOACTIVE MATERIAL
OP=ORGANIC PEROXIDE
CH=CHLORINE
OL=OXYGEN, PRESSURIZED LIQUID
OR=OTHER REGULATED MATERIAL

2. EPA HAZARD CLASS CODES

B=BIOACCUMULATIVE
I=IGNITABLE
O=ORGANIC TOXICANT
C=CORROSIVE
R=REACTIVE
A=RADIOACTIVE
M=MUTAGENIC
N=INFECTIOUS
T=TOXIC

F. ACTION CODE: Enter the appropriate code(s) from the following list. S=STORE T=TREAT D=DISPOSE

G. AMOUNT: Enter the annual amount of waste handled to the nearest whole digit using any of units of measure described in 'H'. If the reported figure is greater than nine digits, enter '9' in every space.

H. UNITS OF MEASURE: Enter the appropriate code from the following list.

ENGLISH UNITS

P=POUNDS
T=TONS(short)
G=GALLONS
Y=CUBIC YARDS

METRIC UNITS

K=KILOGRAMS
M=TONNES(metric)
L=LITERS
C=CUBIC METERS

I. HANDLING CODE: Enter the appropriate code from the list provided in the instructions manual.

J. HANDLING TECHNIQUE: Briefly describe the technique used to handle the waste.

A. WASTE NO.	B. HAZARDOUS WASTE NAME				
C. CLAIM OF CONFIDENTIALITY	D. WASTE DEFINITION CODE	E. HAZARD CLASS 1. DOT 2. EPA	F. ACTION CODE	G. AMOUNT	UNIT OF MEASURE

Instructions For Consolidated Permit Application

Section A. General Instructions

Who must apply?

With the exceptions described in the next section, Federal laws require you to apply for and receive a permit as follows:

- *NPDES* (National Pollutant Discharge Elimination System under the Clean Water Act, 33 U.S.C. 1251). You may not discharge pollutants into the waters of the United States without an NPDES permit.
- *RCRA* (Resource Conservation and Recovery Act, 42 U.S.C. 6901). You must have a permit to treat, store, or dispose of hazardous wastes.
- *UIC* (Underground Injection Control under the Safe Drinking Water Act, 42 U.S.C. 300f). You may not inject fluids underground by gravity flow or pumping without a UIC permit.
- *PSD* (Prevention of Significant Deterioration under the Clean Air Act, 72 U.S.C. 7401). Most new or modified sources of air pollution which are located in or near an area which has attained the National Ambient Air Quality Standards for one or more pollutants must have a PSD permit.

The U.S. Environmental Protection Agency (EPA) is consolidating the above permits into a single permit program, although approved States operate some programs in place of EPA. You must use this application form to apply for a permit for those programs administered by the EPA. For those programs administered by approved States, contact the State environmental agency for the proper forms.

Form 1 of the EPA consolidated form collects general information applying to all programs and must be filled out by all applicants, regardless of whether your operation or activity requiring a permit is new or existing. In addition, you must fill out a supplemental form for each permit needed under each of the above programs. Item I of Form 1 provides a guide to the additional forms you need for your activities.

You should note that certain activities do not require a permit. These exclusions are summarized below, and described in greater detail in section C of these instructions. If you are not required to have a permit under any of the programs above, then you do not need to complete and return any forms.

If you have any questions about whether you need a permit under any of the above programs, contact the appropriate Regional office of the U.S. Environmental Protection Agency as indicated in Table 1.

Copies of application forms are available from all U.S. Environmental Protection Agency Regional offices.

Who Need Not Apply

The above statues and EPA's regulations exclude certain activities from requirements to apply for and obtain a permit. These exclusions are summarized below. If you think you may not need a permit, refer to section C of these instructions, where the regulatory and statutory exclusions governing the exclusions are described in greater detail.

Table 1—Addresses of EPA Regional Offices and States Within Their Jurisdiction

Region I

Regional Administrator, John F. Kennedy Federal Building, Room 2203, Boston, Mass. 02203, 617–223–7210, FTS 223–7210, Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Regional Administrator, 215 Fremont Street, San Francisco, California 94105, 415–556–2320, FTS 556–2320, Arizona, California, Hawaii, Nevada, Guam, American Samoa, Trust Territories

Region X

Regional Administrator, 1200 6th Avenue, Seattle, Washington 98101, 206–442–1220, FTS 399–1220, Alaska, Idaho, Oregon, Washington

a. *Discharges to water.* You are not required to obtain an NPDES permit for the following types of discharges:

- Sewage discharged from vessels (e.g., ships);
- Water, gas and other materials injected into a well to facilitate production of oil or gas production and disposed of in a well, where authorized by the State in which the well is located;
- Dredged or fill material subject to a permit under section 404 of the Clean Water Act;
- Discharges from properly functioning marine engines;
- Discharges conveyed directly to a publicly or privately owned waste treatment facility (however, discharges originating from publicly or privately owned waste treatment facilities are not excluded);

• Some discharges from separate storm sewers (discharges from storm sewers which receive industrial, municipal, and/or agricultural wastes which are considered by the permitting authority to be significant contributors to pollution are not excluded); or

• Animal feeding operations and aquatic animal production facilities below certain sizes.

b. *Hazardous wastes.* With certain exceptions, you are not required to obtain a RCRA Subtitle C permit if you:

• Are a generator or transporter storing hazardous wastes for less than 90 days;

• Are disposing of less than 100 kg of hazardous wastes per month;

• Are a farmer or retailer; or

• Operate publicly owned treatment works (POTW) and ocean disposal barges or vessels that accept hazardous waste designated as special waste. You will be subject to a *permit by rule* and are *not* required to submit an RCRA permit application.

c. *Underground injection of fluids.* You are not required to obtain a permit under this program if you:

• Inject into existing wells used to enhance recovery of oil and gas or to store hydrocarbons (note, however, that these underground injections are regulated by Federal rules); or

• Inject into or above an underground source of drinking water. However, you must notify EPA of your injection and submit certain required information on forms supplied by the Agency, and your operation will be phased out (see regulations proposed on April 20, 1979, 44 FR 23738.)

d. *Air emissions.* The following types of activities do not require a PSD (Prevention of Significant Deterioration) permit under the Clean Air Act:

• All existing sources;

• Members of the 28 industries listed in Table 2 of the instructions to item I of Form 1 which do not emit or have the potential (prior to control) to emit more than 100 tons per years of any air pollutant;

• Any other sources which do not emit or have the potential (prior to controls) to emit more than 250 tons per year of any air pollutant;

• Any other sources which do not emit or have the potential (prior to controls) to emit more than 250 tons per year of any air pollutant; or

• Proposed nonprofit health or education institutions exempted by a State.

Again, please note that these exclusions are more carefully defined in section C of these instructions. Before determining that you do not need any permits, refer to section C of these instructions because the statute for each of the programs above provides that *you may be heavily penalized if you do not apply for a permit where a permit is required.*

Upon your request, and based upon information supplied by you, EPA will determine whether you are required to obtain a permit for a particular activity. Contact the appropriate EPA Regional office listed in Table 1.

Where to File

The original of the application form should be mailed to the EPA Regional office having jurisdiction over the State in which the discharge is located (see Table 1).

If the State in which the facility is located has one or more Federally approved permit programs, you should contact the appropriate State agencies for the correct forms. You may obtain the addresses of the appropriate State agencies from your EPA Regional office (Table 1).

When to File

Because of statutory requirements, the deadlines for filing applications vary according to the type of facility you operate and the type of permit you need. In addition, if you need two or more permits, Federal regulations have been proposed which, if promulgated, may allow you to postpone filing one of them in order to consolidate your applications. [See 44 FR. (. 1979).]

A detailed guide to when you must file and whether you can postpone filing to consolidate applications appears in the instructions to item I of Form 1.

Fees

The U.S. EPA does not require a fee for applying for any permit under the consolidated permit program. However, some States are primarily responsible for administering certain permit programs, and these States may require a fee. You should check with the State administering the program to determine whether any fees are required.

Use of Information.

All information contained in this application will, upon request, be made available to the public for inspection and copying. A separate sheet entitled "Confidential Answers" must be used to set out information which is considered by the applicant to be methods and processes entitled to protection as trade secrets. The information must clearly indicate the item number to which it applies. Confidential treatment can be considered only for the information for which a specific written request of confidentiality has been made on the attached sheet.

However, the Clean Water Act requires that *all* information contained by the NPDES part of the application must be public information, and may not protected as confidential or privileged information, except in certain cases involving national security.

Completion of Forms

Unless otherwise specified in the following instructions, each item in each form submitted must be answered. To indicate that each item has been considered, enter "NA", for not applicable, where a particular item does not fit the circumstances or characteristics of your facility or activity.

If you have previously submitted information to the U.S. EPA or to an approved State agency which answers a question, either repeat the information in the space provided, or attach a copy of the previous submission. If you attach a copy of the previous submission, state that you are doing so in your answer to the question, and identify the attached information by the name of the facility, and the form and item number to which the submission refers.

If you have any questions on any item, contact your EPA Regional office.

Attachments and Supplemental Information

Some items in the form require narrative explanation. If more space is necessary to answer a question, attach a separate sheet entitled "Additional Information". Where a separate sheet is used or when other information is attached, identify it by the name of the facility, and the form and item number to which the explanation refers.

Financial Assistance for Pollution Control

There are a number of direct loans, loan guarantees, and grants available to eligible facilities for pollution control expenditures. These are provided by the Small Business Administration, the Economic Development Administration, and the Farmers Home Administration. Each U.S. EPA Regional office (Table 1) has a financial assistance coordinator who can provide you with additional information.

In addition, EPA's construction grants program under Title II of the Clean Water Act may be an additional source of assistance to publicly owned treatment works. Contact the

appropriate EPA Regional office for details.

Section B. Detailed Instructions

Form 1—General Information

This form must be completed by all applicants.

Item I. Answer each question to determine whether you need to fill out additional special forms for each permit program. Be sure to check the glossary in section D of these instructions for the legal definitions of the bold faced words.

Questions (I) and (J) refer to 28 industries which may be subject to prevention of significant deterioration (PSD) requirements under the Clean Air Act of 1977. These industries are listed in Table 2.

Table 2—The 28 Industrial Categories Subject to PSD Requirements under the Clean Air Act of 1977

Fossil fuel-fired steam generators of more than 250 million BTU per hour heat input
Coal cleaning plants (with thermal dryers)
Kraft pulp mills
Portland cement plants
Primary zinc smelters
Iron and steel mills plants
Primary aluminum ore reduction plants
Primary copper smelters
Municipal incinerators capable of charging more than 250 tons of refuse per day
Hydrofluoric acid plants
Nitric acid plants
Sulfuric acid plants
Petroleum refineries
Lime plants
Phosphate rock processing plants
Coke oven batteries
Sulfur recovery plants
Carbon black plants (furnace process)
Primary lead smelters
Fuel conversion plants
Sintering plants
Secondary metal production plants
Chemical process plants
Fossil fuel boilers (or combination thereof) totaling more than 250 million BTU per hour heat input
Petroleum storage and transfer units with a total storage capacity exceeding 300,000 barrels
Taconite ore processing plants
Glass fiber processing plants
Charcoal production plants.

If you checked "no" to every question, then you do not need a permit, and you do not need to complete and return any of these forms.

If you checked "yes" to a question, you should note that federal regulations may exclude your activity from requirements to apply for and obtain a permit. Those exclusions are summarized in the General Instructions, and the regulations governing the exclusions are described in detail in section C of the instructions.

Note that the Federal statute for each program provides for serious penalties if you do not apply for a permit where a permit is required. If you have any doubt about whether you need to apply for a permit under any program, contact the appropriate EPA Regional office listed in Table 1.

If you checked "yes" to any box, and you determined that you are required to have a permit, then complete and file additional forms in accordance with Table 3.

Table 3.—*Forms and Filing Dates for Permits*

If you checked yes in item:	Then you must file:	By this deadline:
A	EPA Standard Form A, OMB No. 158-120100.	180 days before your present permit expires.
B	Forms 1 and 2b	180 days before your present permit expires, *or* 180 days prior to startup.
C	Forms 1 and 2c	180 days before your present permit expires.
D	[Reserved. Check with EPA Regional office for forms].	180 days prior to startup.
E	Forms 1 and 3	Existing facility: 180 days following publication of final regulations. New facility: 180 days before commencing physical construction. (See Glossary for definition of terms.)
F, G, or H	[Reserved]	You are not now required to apply for a permit. Future regulations will set requirements.
I or J	[Reserved. Check with EPA Regional office for forms].	You must obtain a Prevention of Significant Deterioration (PSD) permit before you commence construction. See 40 FR 26380 (June 19, 1979).

Federal regulations require you to file in accordance with the above deadlines. Regulations have recently been proposed, however, which when promulgated may allow postponement of certain filing requirements in order to consolidate applications [see 44 FR (, 1979)]. Until these regulations are promulgated, however, the above deadlines apply and may not be postponed.

See the General Instructions to determine where to file your completed application.

If you don't have all the permit forms you need, you can obtain them by writing or phoning your nearest EPA Regional office.

Item II. Facility Identification Number. A common number for each business establishment will help the U.S. EPA and State environmental agencies to consolidate all environmental activities and requirements affecting the business establishment. In addition, common identification numbers will help EPA and State environmental agencies speed up the processing of all information submitted under Federal and State environmental regulations.

The facility identification number requested here for private, municipal, and State-owned facilities is the Data Universal Numbering System, or otherwise called the DUNS Number, developed by Dunn and Bradstreet, Inc. Most business establishments in the United States have already been assigned DUNS numbers, including all types and sizes of business establishments, branches, factories, distribution centers and purchasing units. State and municipal facilities, including publicly owned treatment works, have also been assigned DUNS numbers.

In some cases, EPA can provide you with your DUNS number. If so, you can find your DUNS number preprinted on the upper left hand corner of the label used to mail these forms to you. If EPA did not provide you with your number on your mailing label and you need to find out the DUNS number for your business, you can obtain this information free of charge by calling the nearest office of Dunn and Bradstreet, Inc.

For Federal facilities, the General Services Administration (GSA) real property number should be used. All Federal facilities have already been assigned a real property number by GSA. If you don't know your number, call the nearest local office of GSA.

Fill in the number as follows:

- *State code*—In the first two positions of the number insert the U.S. Postal Service State Code for the appropriate State or territory in which the facility is located, such as PA, MD, NJ, NY, or MA;
- *DUNS or GSA Identifier and Number*—In the remaining positions after the State code insert a "D" for a private, municipal, or State-owned facility followed by the 9 digit DUNS number; *OR* insert a "G" for a Federally

owned facility followed by the GSA number.

Examples

1. Private facility ——— PAD784621382 in Pennsylvania
2. Federal facility ——— NTG284370158 in New York
3. State facility ——— CAD 302429824 in California

Item III. The facility is the distinct activity or installation, under the responsibility of the applicant, which is subject to one or more of the permit programs detailed in item I of this form. Name the facility as it is officially or legally referred to in order to distinguish it from similar entities in the same geographical area. Do not use colloquial names as a substitute for the official name.

Item IV. Give the name, title, and work telephone number of a person who is thoroughly familiar with the operation of the facility and with the facts reported in this application and can be contacted by reviewing offices if necessary.

Item V. Give the complete mailing address of the facility's main office, where correspondence should be sent. This often will not be the same address used to designate the location of the facility or activity.

Item VI. Give the address or location of the facility identified in Item III of this form.

Item VII. List the four most significant 4-digit standard industrial classification (SIC) codes describing the nature of your facility, in descending order of importance in terms of the principal products you produce. Also, specify each classification in words. These classifications may differ from the SIC codes describing the operation generating the discharge, air emissions, or hazardous wastes.

Standard industrial classification (SIC) code numbers are descriptions which may be found in the 1972 edition of the "Standard Industrial Classification Manual" prepared by the Executive Office of the President, Office of Management and Budget, which is available from the Government Printing Office, Washington, D.C. Do not use previous editions of the manual.

Item VIII–A. Give the name, as it is legally referred to, of the person, firm, public organization, or any other entity which owns or is directly responsible for the facility or activity described in this application. This may or may not be the same name as the facility or activity producing the discharge. Do not use colloquial names as a substitute for the official name.

Item VIII–B. Enter the appropriate letter to indicate the type of ownership. Indicate "public" for a facility solely owned by local government(s) such as a city, town, county, parish, etc.

Items VIII–C, D, E, F, and G. Enter the telephone number and address of the owner identified in item VIII–A.

Item IX. Give the number of each presently effective permit issued to the facility for each program, or if you have previously filed an application but have not yet received a permit, give the number of the application, if any. List any relevant environmental State or local permits or applications under "other".

Item X. Provide a topographic map or maps of the area extending at least to one mile beyond the property boundaries of the source which clearly show the following:

- The outline of the facility;
- The location and serial number of each of your existing and proposed intake and discharge structures;
- Each of the hazardous waste treatment, storage, or disposal facilities which you own or operate;
- Each well where you inject fluids underground; and
- All known wells, springs and surface water bodies in the area.

Where an intake or discharge structure, hazardous waste disposal site, or injection well associated with the facility is located more than one mile from the plant, include it on the map, if possible. If not, attach additional sheets describing the location of the structure, disposal site or well, and identify the U.S. Geological Survey map corresponding to your description.

On each map, include the map scale, a meridian arrow showing north, and latitude and longitude at the nearest whole second. On all maps of rivers, show the direction of the current, and in tidal waters, show the directions of the ebb and flow tides. The scale of the map shall have one inch equal to no more than 2000 feet. This corresponds to a 7½ minute series map published by the U.S. Geological Survey, which may be obtained through the U.S. Geological Survey Offices in Washington, D.C., Denver, Colorado, or Anchorage, Alaska. If a 7½ minute series map has not been published for your facility site, then you may use a 15 minute series map from the U.S. Geological Survey.

You may trace your map from a geological survey chart, or other map meeting the above specifications. If you do, your map should bear a note showing the number or title of the map or chart it was traced from. Include the names of nearby towns, water bodies, and other prominent points. An example of an acceptable location map is shown in Figure A of these instructions.

Item XI. Self explanatory.

Item XII. Federal statutes provide for severe penalties for submitting false information on this application form.

18 U.S.C. section 1001 provides that "Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes or uses any false writing or document knowing same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisonment not more than five years, or both."

Section 309(c)(2) of the Clean Water Act and section 113(c)(2) of the Clean Air Act each provide that "Any person who knowingly makes any false statement, representation, or certification in any application, * * * shall upon conviction, be punished by a fine or no more than $10,000 or by imprisonment for not more than six months, or both."

In addition, section 3008(d)(3) of the Resource Conservation and Recovery Act provides for a fine up to $25,000 or imprisonment up to one year for a first conviction for making a false statement in any application under the Act, and for double these penalties upon subsequent convictions.

Federal Regulations Require This Application to be Signed as Follows:

(1) For a corporation, by a principal executive officer of at least the level of vice president;

(2) For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or

(3) For a municipality, State, Federal or other public facility, by either a principal executive officer or ranking elected official.

This application is not considered to be complete until it is signed by the appropriate official.

Form 2a—NPDES: Publicly Owned Treatment Works [Reserved. Until a new form and accompanying instructions are developed all applicants should continue to use the existing form, OMB No. 158–R0100, Standard Form A]

Form 2b—NPDES: Concentrated Animal Feeding Operations and Aquatic Animal Production Facilities

This form must be completed by all persons who checked "yes" to Item I–B in Form 1.

Note that not all animal feeding operations or fish farms are required to obtain NPDES permits. Exclusions are based on size and occurrence of discharge. See the description of these statutory and regulatory exclusions in section C of the instructions. In particular, for animal feeding operations, the size cutoffs are smaller for facilities where pollutants are discharged into waters of the United States by a man-made device, or are discharged because waters of the United States make direct contact with the facility. Also, a facility for laying hens or boilers is not "concentrated" unless it has a liquid manure handling system or continuous overflow watering.

For aquatic animal production facilities, the size cutoffs are based on whether the species are warm water or cold water, on the production weight per year in harvestable pounds, and on the amount of feeding in pounds of food (for cold water species). Also, only facilities which discharge at least 30 days per year, or only during periods of excess runoff (for warm water fish) are "concentrated" and required to apply for an NPDES permit.

Item I–A. See note above and sections C and D to the instructions to be sure that your facility is "concentrated".

Item I–B. Supply the quarter, section, township and range of your facility location.

Item I–C. Check "proposed" if your facility is not now in operation, or not now "concentrated" under the statutory definition.

Item II. Supply all information in item II if you checked (1) in item I–A.

Item II–A. Give the maximum number of each type of animal in open confinement or housed under roof held at your facility for a total of 45 days or more in any 12 month period.

Use the following categories for type of animals:

Slaughter Cattle
Feeder Cattle
Mature Dairy Cattle (milked or dry)
Swine (each weighing over 55 pounds)
Horses
Sheep
Lambs
Turkeys
Laying Hens*
Broilers*
Ducks

*Application for permit is not required unless facility has a liquid manure handling system or continuous overflow watering.

Item II–B. (1) Give only the area used for the animal confinement or feeding facility. Do not include area used for growing or operating feed.

(2) Provide the number of acres of land that are owned or leased by the facility for manure disposal.

Item II–C. Check "yes" if any system for collection of runoff has been constructed. Supply the information under (1), (2), and (3) to the best of your knowledge.

Item III. Supply all information in item III if you checked (2) in item I–A.

Item III–A. Outfalls should be numbered to correspond with the map submitted as required by Form 1. Values given for flow should be representative of your normal operation. The maximum daily flow is the maximum flow occurring over a 24-hour period. The maximum monthly flow is the average daily flow in the consecutive 30-day period of highest flow. The average yearly flow is the average flow over a calendar year.

Item III–B. Give the total number of discrete ponds or raceways in your facility. Under "other", give a descriptive name of any structure which is not a pond or a raceway but which results in discharge to waters of the United States.

Item III–C. Use names corresponding to the map attached with Form 1.

Item III–D. The names for fish species should be proper, common, or scientific names as given in special Publication No. 6 of the American Fisheries Society, "A List of Common and Scientific Names of Fishes from the United States and Canada". The values given for total weight produced by your facility per year and the maximum weight present at any one time should be representative of your normal operation.

Item III–E. The value given for maximum monthly pounds of food should be representative of your normal operation.

Item IV. The Clean Water Act provides for severe penalties for submitting false information on this application form.

Section 309(c)(2) of the Clean Water Act provides that "Any person who knowingly makes any false statement, representation, or certification in any application, * * * shall upon conviction, be punished by a fine or no more than $10,000 or by imprisonment for not more than six months, or both."

Federal Regulations Require This Application To Be Signed as Follows:

(1) For cooperation, by a principal executive officer of at least the level of vice president;

(2) For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or

(3) For a municipality, State, Federal or other public facility, by either a principal executive officer or ranking elected official.

This application is not considered to be complete until it is signed by the appropriate official.

Form 2c—NPDES: Existing Manufacturing, Commercial, Mining and Silvicultural Operations

Public Availability of Submitted Information. Your application will not be considered complete unless you answer every question on this form. Where an item does not apply to you, enter "NA" (for not applicable) to show that you considered the question.

Under Federal statutes and regulations, you may not withstand any information requested in this form as confidential (except in certain cases involving national security). Federal statutes also require that all information submitted on this form must be made available to the public.

Definitions. All significant terms used in these instructions and in the form are defined in the glossary found in section D of the instructions.

Item I–A. All effluent guidelines promulgated by EPA appear in the Federal Register and are codified yearly in 40 CFR Subchapter N. If you are unsure whether you are affected by a promulgated effluent guideline, check with your EPA Regional office (Table 1). You must check "yes" if an effluent guideline affecting you has been promulgated, even if the guideline limitations are being contested in court. If you believe that a promulgated effluent guideline has remanded for reconsideration by a court and does not apply to your operations, you may check "no", but you must identify the guideline in question in item I–B. In addition, you may check "no" here if an effluent guideline has been promulgated but the limits are not expressed in terms of production.

If you improperly check "no", and do not provide the production information required in item I–B, then this application will not be considered to be complete.

Item I–B. This item must be completed only if you checked "yes" to item I–A. The production information requested here is necessary to apply effluent guidelines promulgated by EPA under section 304 of the Clean Water Act, and *you may not withhold it as confidential.*

List the principal products produced (or if the effluent guideline is expressed in terms such as raw materials consumed or services provided, list the appropriate materials or services) and the average and maximum quantities produced or consumed per operating day at the facility. The production figures provided must reflect a reasonable measure of actual operation (such as the high month during the last twelve months, or the highest year of the last five years), which represents the level of activity expected over the next five years. Report quantities in the units of measurement normally used by your industry.

Where several similar articles are produced, use a broader term which will include all or most of the specific ones, e.g., use "costume jewelry" to designate the production of bracelets, earrings, and pins.

All terms used to describe production, etc, must correspond to the terms used in the applicable effluent guideline.

Item II. Self explanatory. An example of an acceptable line drawing appears in Figure B to these instructions.

Item III–A. Complete to the best of your ability, and base your answers on actual flow measurements whenever available. Where unavailable, you may use your best estimates. Each term is defined in the Glossary.

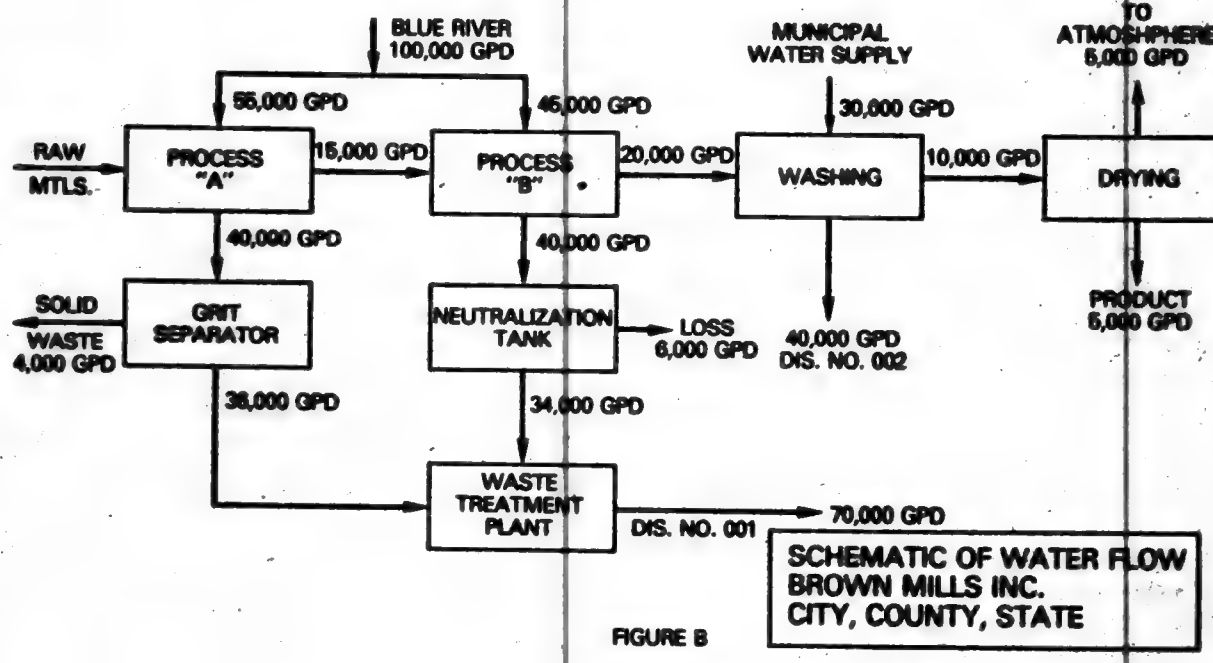

FIGURE B

For storm runoff, base your entry under "maximum flow" upon the 10-year 24-hour rainfall event. You may enter UNK (for unknown) for the average flow under this heading if no data on the average flow is available and you are unable to make an estimate.

In addition, specify any other source of wastewater discharged from any outfall.

Item III–B. You must complete this item to the best of your ability for discharges of toxic or hazardous pollutants to waters of the United States from ancillary industrial activities. Ancillary activities include:

(1) Plant site runoff.
(2) Spillage or leaks.
(3) Sludge or waste disposal.
(4) Materials storage and handling.
(5) Loading and unloading areas.

Describe the source of the discharge (e.g., drainage from truck loading stations, or runoff from Slag Dump #4), your estimate of the average and maximum total flow of the discharge, the frequency of the discharge (e.g. once per week or twice per month), the average and maximum concentration of the pollutant in the discharge (to the best of your knowledge), and the receiving water affected.

Where no measurements or historical data are available, use estimates.

As used in this question, toxic and hazardous pollutants are those pollutants listed under sections 307(a) and 311 of the Clean Water Act. The section 307(a) toxic pollutants include all pollutants listed in item V–B of this Form, plus cyanide, asbestos and 2,3,7,8 Tetrachlorodibenzo-p-dioxin (TCDD). The section 311 hazardous substances, which include many of the toxic pollutants, are listed at 43 FR 10474 (March 13, 1978) and 44 FR 10266 (February 16, 1979).

Under recent amendments to section 311 of the Clean Water Act, you may be eligible to be exempted from the requirements and liabilities of section 311 for the discharges of hazardous substances which you list here. If you desire such exemption, you must also complete item VIII of this Form.

Item III–C. 40 CFR 125.104 requires each person discharging toxic or hazardous pollutants to waters of the United States from ancillary industrial activities to prepare a Best Management Practices program. As required by the regulation, attach a copy of your BMP program to the application. The BMP program must address the discharges you described in item III–B, and meet the specifications below. A BMP program must include the following:

- Statement of Policy
- Spill (Incident) Control Committee
- Spill Reporting and Notification
- Materials Inventory
- Employee Training
- Visual Inspections
- Preventive Maintenance
- Housekeeping
- Materials Compatability
- Security.

In addition, at your option, the BMP program may include the following:

- Monitoring
- Non-destructive Testing
- Labeling
- Covering
- Vehicle Positioning
- Pneumatic and Vacuum Conveying
- Secondary Containment
- Flow Diversion Systems Vapor/Dust Control
- Sealing
- Mitigation/Cleanup Procedures
- Treatment of Spilled Material
- Ultimate Disposal Techniques.

Additional technical guidance on BMP programs is contained in the publication "NPDES Best Management Practices Guidance Document" available for review and copying at EPA Regional offices.

Item III–D. Federal regulations define a "continuance discharge" as a discharge which occurs without interruption, except for infrequent shutdowns for maintenance, process changes, or other similar activities throughout the operating hours of the facility. As used in this question, a "noncontinuous discharge" is any discharge which is not a continuous discharge.

Exclude discharges resulting from storm runoff in your answer to this question.

Item III–E. Provide for each outfall a brief description of the processes contributing to the effluent and the pollution control technologies and practices currently in use, including in-plant recycle and reuse of wastewater streams. Indicate sizes, flow rates, and retention times for each treatment unit. If no treatment is provided, enter "none."

Example: Outfall 001. 1.5 mgd wastestream generated from blast furnace operations, furnaces #6 and #7. Treatment consists of primary sedimentation using one 24-foot clarifier (8-hour retention) followed by recycle over evaporative cooling tower. 0.1 mgd blowdown treated with high pressure filters. Clarifier underflow is treated by digestion and vacuum filtration. Final sludge disposal is by incineration.

Item IV–A. If you check "yes" to this question, complete all parts of the chart.

- Clearly identify the permit condition, administrative or enforcement order, enforcement compliance schedule letter, stipulation, court order, or grant or loan condition that requires you to meet an implementation schedule for installing, upgrading, or operating wastewater treatment equipment or practices or any other environmental programs which may affect your discharges.
- Identify each discharge within the scope of each condition, order, stipulation, or letter identified in the first column where you are now or will be required to complete a control program.
- For each discharge identified, describe the project required. Attach additional sheets if necessary.
- For each project described, list the date for final compliance as required by the condition, order, stipulation, or letter, and the date by which you now project that compliance will be achieved.

Item IV–B. Self explanatory. You are not required to submit a description of future water pollution control projects if none are planned.

Items V–A, B, and C. These items require you to submit information on the pollutant characteristics of wastewater discharged from each outfall. All parts of this question must be answered once for each outfall. You are not required to complete these items for discharges you identified in item III–B.

Your answers to parts (A) and (B) of this question must report the actual results from samples collected and analyzed in accordance with the methods specified in 40 CFR Part 136 (these methods are summarized in section E of these instructions). No estimates are acceptable for these two parts. While you may make estimates in your response to part (C) of this item, actual analyses are preferred. If you have analytical data on the levels of pollutants required by part (c), you must report it.

You Must Make an Entry Next to Each Pollutant to Show You Considered it. Where You do not Find a Pollutant to be Present, Insert in Column 3 "L.T." or "<" (Less Than) The Detection Limit of the Analytical Method. (An appropriate entry would be "L.T. 10 μg/L.")

As established by 40 CFR § 122.63(a)(2), the detection limit of the

analytical method is the least stringent of the following:

• Ten micrograms per liter;

• The detection limit (or lowest appropriate concentration) specified in the applicable analytical method promulgated under section 304(h) of the Clean Water Act (these detection limits are included in section E of these instructions); or

• The detection limit as determined by the permittee for the applicable analytical method. For this purpose, the detection limit is the lowest concentration giving a signal-to-noise ratio of five to one or less, in accordance with any generally accepted procedure for determining the level of background noise. This detection limit may be based on either a laboratory standard or an individual sample.

All values you report must be representative of your discharge during the twelve months of operation preceding the date you submit this form. Where actual analyses are required, choose a time for sampling that is representative of your normal operation. All operations and processes which contribute waste water should be operating normally, to the extent feasible. Also, your treatment system should be operating properly with no system upsets. Where you make estimates, estimate pollutant levels which reflect your normal operation, without upsets. The permitting authority, at its discretion, may require you to conduct additional sampling and analysis to further characterize your waste streams.

The three parts of this question must be completed as follows:

a. Part V–A must be completed by all applicants for all outfalls, including outfalls containing only noncontact cooling water or storm runoff. All values reported must be based on actual analyses conducted in accordance with section E of the instructions.

b. Part V–B must be completed only by all applicants in Group I industries (see Table 4), and only for those outfalls containing process wastewater (defined in the Glossary). If the information requested in this chart is available for other outfalls as well, you may use this part in lieu of "other" under Part V–C. All values reported must be based on actual analyses conducted in accordance with 40 CFR Part 136 (see section E of the instructions).

The Effluent Guidelines Division of EPA has collected and analyzed samples from some plants for the pollutants listed in Part V–B of this question in the course of its BAT development program. If your effluents were sampled and analyzed as part of this BAT development project in the last two years you may use this data to answer Part V–B of this Form: *Provided,* That the permitting authority approves, *And provided,* That no process change or change in raw materials or operating practices has occurred since the samples were taken that would make the analyses unrepresentative of your current discharge.

Table 4—The 38 Industrial Categories Classified as Group I for NPDES Application Form Requirements

1. Adhesives and Sealants
2. Aluminum Forming
3. Auto and Other Laundries
4. Battery Manufacturing
5. Coal Mining
6. Coil Coating
7. Copper Forming
8. Electric and Electronic Compounds
9. Electroplating
10. Explosives Manufacturing
11. Foundries
12. Gum and Wood Chemicals
13. Inorganic Chemicals Manufacturing
14. Iron and Steel Manufacturing
15. Leather Tanning and Finishing
16. Mechanical Products Manufacturing
17. Nonferrous Metals Manufacturing
18. Ore Mining
19. Organic Chemicals Manufacturing
20. Paint and Ink Formulation
21. Pesticides
22. Petroleum Refining
23. Pharmaceutical Preparations
24. Photographic Equipment and Supplies
25. Plastic and Synthetic Materials Manufacturing
26. Plastic Processing
27. Porcelain Enameling
28. Printing and Publishing
29. Pulp and Paperboard Mills
30. Rubber Processing
31. Soap and Detergent Manufacturing
32. Steam Electric Power Plants
33. Textile Mills
34. Timber Products Processing
35. Asbestos Manufacturing
36. Ferroalloys

c. Part V–C must be completed by all applicants for all outfalls, including outfalls containing only noncontact cooling water or storm runoff. Your answers should be based on actual analyses conducted in accordance with 40 CFR Part 136 (section E of the instructions), but your best estimate will be acceptable in the absence of analyses.

For each pollutant in this part, check "present" or "absent" and indicate whether you base this assertion on actual analyses or upon your own best judgment. If you check "present", complete columns (1) through (3) in the manner described below.

In the space marked "other" at the end of this part, identify the following pollutants if present:

• Pollutants listed in Part V–B if you are in a Group I industry (see Table 4) and if the outfall does not contain any process waste water;

• Pollutants listed in Part V–B discharged from the outfall if you are not in a Group I industry (see Table 4);

• Any pesticide not listed elsewhere in item V for which an analytical method has been promulgated in 40 CFR Part 136.

The meaning of each column heading in each of the three parts to this question is as follows:

Column 1. *This column is optional.* It must be completed only if you desire credit for pollutants present in your intake water when permit limitations are calculated. Under 40 CFR 122.70(f), you are not eligible to receive credit unless you meet the following conditions:

• The intake water is drawn from the same body of water to which it is discharged;

• A promulgated effluent guideline affecting your facility provides that limitations shall be applied on a net basis, or the pollutants present in your intake water will not be entirely removed by your treatment systems;

• Each pollutant in your intake water for which you desire credit does not vary physically, chemically, or biologically from the pollutant as it appears in your outfall; and

• The concentrations of pollutants in the intake water does not increase significantly in the discharge even if the total amount of pollutants remains the same.

Under Federal regulations, credit for pollutants present in intake waters must be calculated on the basis of the amount of pollutants present after any treatment steps have been performed on the intake water.

Complete this column in the same manner described for column (2) below.

Column 2. Specify the arithmetic average of the results of all analyses that you are reporting. These must be analyses performed during the twelve months preceding the date that this application is submitted.

If you are completing Part V–C of this item and are not basing your answers to that part on actual analyses, estimate the average value for the pollutant over a 24-hour period.

Column 3. Specify the highest of all the analyses you are reporting. If you are reporting only one analysis, enter N.A. for not applicable. If you are completing Part V–C of this item and are

not basing your answers to that part on actual analyses, estimate the maximum value expected for the pollutant over a 24-hour period.

Column 4 (Parts A and B only). Specify the number of analyses performed on your effluent during the last twelve months that form the basis of the values you reported in columns (2) and (3).

Column 5 (Parts A and B only). Specify the type of samples that were analyzed to form the basis of the values you reported in columns (1)–(3). Your entry must conform to the sample type specified in section E of the instructions, although where a choice is given, select the method that will most appropriately describe your waste stream.

Note that 40 CFR 122.66(a) establishes a limitation for each pollutant in your discharge based upon the average concentration value or detection limit you report in column (2) of this item, unless the pollutant is otherwise limited in an NPDES permit. Where you do not identify a pollutant as being present, this limitation is based on the detection limit of the method (as specified in section E of the instructions or as described earlier in the instructions to this item).

Item VI–A. For this item, consider only those variations which may result in concentrations of pollutants in effluents which may exceed five times the values you reported in item V. These variations may be part of your routine operations, or part of your regular cleaning cycles.

Do Not Consider Variations Which Are the Result of Upsets or Bypasses.

Increased levels of pollutants which are discharged as a result of upsets or bypasses are regulated separately under 40 CFR 122.66(k), (l), and (m), and will not be considered here.

Item VI–B. Examples of the types of variations to be described here include:

- Changes in raw or intermediate materials;
- Changes in process equipment or materials;
- Changes in product lines;
- Chemical reactions between pollutants in waste streams, if significant;
- Variation in removal efficiencies of pollution control equipment, if significant; and
- Variation of concentrations of pollutants in intake water.

You may indicate other types of variations was well, except those which are the result of upsets or bypasses. After receipt of your application, the permitting authority may require you to further investigate or document variations you report here.

Item VI–C. Base your answer upon your knowledge of your processes, raw materials, past and projected product ranges, etc., or upon any testing conducted upon your effluents which indicates the range of variability that can be expected in your effluent over the next five years.

Example: Outfall 001 discharges water used to clean six 500-gallon tanks. These tanks are used for formulation of dispersions of synthetic resins in water (adhesives). Usage of toxic pollutants which can be expected in the next 5 years are:

1. Copper acetate inhibitor, ½ lb. per tank
2. Dibutyl phthalate, 50 lbs. per tank
3. Toluene, 5 lbs. per tank
4. Antimony oxide, 1 lb. per tank.

Based on normal cleaning, an average of 1% and a maximum of 3% of the contents of each tank is collected and discharged once every two weeks in the 150 gallons of water used for cleaning. Treatment (pH adjustment, flocculation, filtration) removes 95% of metals and 50% of organic compounds.

Items VII–A and B. Self explanatory.

Item VIII. This item asks for information concerning pollutants which are not specifically asked about elsewhere in this Form. If you or any other person has conducted examinations (including analyses) of your effluents within the last five years which resulted in data on the presence or levels of such pollutants in your waste stream, briefly describe those programs here. Use additional sheets of necessary.

Include the approximate dates the investigations were conducted, and estimate the volume of your material concerning pollutants not reported elsewhere in this application. Include brief descriptions of the following types of investigations:

- Identification or quantification of GC/MS or GC peaks not reported elsewhere in this application;
- Identification or quantification of other pollutants by other analytical methods; and
- Identification or quantification of other pollutants through formulation or by mass balances of raw or intermediate materials.

Item IX. This item is optional. You must, however, complete it if you wish to exclude certain discharges of hazardous substances from the liabilities and requirements of section 311 of the Clean Water Act (CWA). Section 311 of the CWA establishes reporting requirements, civil penalties and clean-up cost liabilities for spills of oil and hazardous substances.

The list of hazardous substances, which overlaps with the section 307(a) toxics list to some extent, presently includes 299 pollutants. They may be found at 43 FR 10474 (March 13, 1978) and 44 FR 10260 (February 16, 1979).

A number of these hazardous substances are compounds which dissociate in water. To obtain exclusions for these compounds, each ion resulting from the dissociation must be reported in this section of this Form.

Section 311(a)(2) of the Clean Water Act excludes the following from section 311 requirements: "(A) discharges in compliance with a permit under section 402 of this Act, (B) discharges resulting from circumstances identified and reviewed and made a part of the public record with respect to a permit issued or modified under section 402 of this Act, and subject to a condition in such permit, and (C) continuous or anticipated intermittent discharges from a point source, identified in a permit or permit application under section 402 of this Act, which are caused by events occurring within the scope of relevant operating or treatment systems."

For an in-depth discussion of these exclusions, refer to regulations proposed at 44 FR 10271 (February 16, 1979).

If you list and describe a hazardous substance in this question of the NPDES application form in order to avoid the penalties and requirements of section 311 of the CWA, then the discharge becomes subject to the NPDES requirements of the CWA. As a result, the permitting authority may set technology-based limitations in a permit under sections 301 and 304 of the CWA for the discharge of the pollutant; otherwise the application-based limitations specified in 40 CFR 122.66(a)(2) will apply.

In Order to be Excluded From 311 Liability for Hazardous Substance Discharge, You Must Identify the Hazardous Substances in This Question and Complete all Parts of This Question.

Item. IX–A. For each outfall or nonpoint source where you desire a discharge of a hazardous substance to be excluded from section 311 of the CWA, identify the point at which the discharge enters or will enter navigable waters (this may include nonpoint sources as well as outfalls). For each point of discharge, identify the hazardous substances which are or will be discharged. If you previously identified the substance elsewhere in

this Form, you must also identify it here to obtain an exclusion.

In the third column, identify the origin or source of the discharge of each hazardous substance you identified. If the discharge is or may be the result of normal process operations, indicate the process that is or may be generating the discharge. If the discharge is or may be the result of other causes, such as washdown of leaks and spills from storage areas, runoff and leachate from materials storage areas, or discharges that could be caused by tank ruptures or chemical spills, then specify the cause in detail.

In the fourth column, indicate the frequency that the pollutant is or is projected to be discharged, e.g., continuously, once a day, or potentially 3 times per year.

For each substance, indicate the amount of the substance that is or which may be discharged, based on the concentration of the substance and the highest expected flow. Base all your concentrations and mass figures on actual analyses if possible, but if the discharge is only a potential one or if it cannot be measured, use your best estimate. In the last column, identify the analytical method or the basis of the estimate used to develop the concentration and amount figures reported in the proceeding two columns.

Item IX–B. For each outfall or nonpoint source you listed in item IX–A, describe your present or planned treatment system or management practice to treat or eliminate the discharge. If any part of the treatment system is or will be installed specifically to control discharges identified in this item, this should be specified in the description. (Examples of a management practice are holding ponds to contain materials discharged from ruptured tanks, followed by treatment or disposal, and diversion of wastes by ditching around storage areas to facilitate collection, followed by treatment and disposal.)

Item X. Self explanatory.

Item XI. The Clean Water Act provides for severe penalties for submitting false information on this application form.

Section 309(c)(2) of the Clean Water Act provides that "Any person who knowingly makes any false statement, representation, or certification in any application, * * * shall upon conviction, be punished by a fine or no more than $10,000 or by imprisonment for not more than six months, or both."

FEDERAL REGULATIONS REQUIRE THIS APPLICATION TO BE SIGNED AS FOLLOWS:

(1) For a corporation, by a principal executive officer of at least the level of vice president;

(2) For a partnership or sole proprietorship, by a general partner or the proprietor, respectively; or

(3) For a municipality, State, Federal or other public facility, by either a principal executive officer or ranking elected official.

This application is not considered to be complete until it is signed by the appropriate official.

FORM 3—RCRA: Hazardous Waste Management Facility Permit

Public availability of submitted information. Your answer to every question asked on this form is necessary to write a hazardous waste management (HWM) facility permit.

In general, all information contained in the HWM Facility Permit Application is considered to be open to the public. However, an applicant may claim confidential status for any information submitted to EPA pursuant to section 3005 of RCRA (proposed as 40 CFR Parts 122 and 124). Such claim must be made at the time of submission, by stamping the words "Confidential Business Information" on each page containing such material. If no claim is asserted, the information will be disclosed only in accordance with procedures established in Title 18 of the U.S. Code.

Definitions. Terms used in these instructions and in Form 3 are defined in the glossary found in section D of the instructions.

Applicants for special RCRA permits. Applicants for Health Care Facility Special Permits must complete *only* items I, II, III, IV, V, and VI on Form 1, and *only* items I, VII–A and VII–B on Form 3. Applicants for Experimental Facility Special Permits must complete all items in Form 1 and Form 3.

For additional definitions and procedures to use in applying for RCRA permits, refer to regulations pursuant to section 3005 of RCRA and proposed as 40 CFR Parts 122 and 124.

Item I. Enter the Facility Identification Number provided by EPA which can be found in the upper left hand corner of the label used to mail these forms to you. The Facility I.D. number for private, municipal, and State-owned facilities is the Data Universal Numbering System, or otherwise called the DUNS Number, developed by Dunn and Bradstreet, Inc.

In the event that EPA did not provide an I.D. number (DUNS Number) on your mailing label, one can be obtained by contacting your nearest office of Dunn and Bradstreet, Inc. or your EPA Regional office.

For Federal facilities, the General Services Administration (GSA) real property number is used in lieu of the DUNS Number. All Federal facilities have been assigned a real property number by GSA. In the event that EPA did not provide an I.D. number on your mailing label, one can be obtained by contacting the nearest local office of GSA.

Item II. Check the box that best describes the relationship of the applicant to the facility. Relevant definitions:

- Ownership—legal right to possession.
- Purchase—to acquire (property) legally by means other than inheritance.
- Rent—use of another's property in return for regular payments.
- Lease—a contract granting use or occupation of land or holdings during a specified period in exchange for rent.

In addition, modifications to RCRA permits are addressed in proposed § 122.9(e), which appears elsewhere in today's Federal Register. It should be noted that certain minor modifications listed under § 122.9(g) may not require public notice and opportunity for hearings.

Item III. Check the box that best describes the current status of the facility.

Item IV. Check the box that best describes the type of permit that is desired. The two types of permits that require applications are the following:

A. Regular Permits
B. Special Permits
- Experimental Facility
- Health Care Facility.

Note.—Permits by rule will be granted to facilities listed in § 122.28(a) of regulations pursuant to section 3005 of RCRA and proposed elsewhere in today's Federal Register. *No application* is required for permits by rule.

Item V. In the space provided, indicate:

A. The present zoning of the site.

B. What new zoning classification should be if a change is required.

Item VI. Only existing HWM facilities (see Glossary) are required to provide copies of all available drawings and specifications of the HWM facility, its processes, and equipment. Also indicate the *date* the HWM facility came into operation or under physical construction.

Item VII. Only owners/operators of health care facilities (HCF) that treat and/or store hazardous waste are

eligible for a special permit under section 3005 of RCRA. The following information must be provided:

A. A certification statement signed by appropriate State licensing authority indicating that the facility has an effective licensee as specified under § 122.25(a) of regulations pursuant to section 3005 of RCRA proposed elsewhere in today's Federal Register.

B. A list of hazardous wastes covered by the State licenses.

Item VIII. An authorized representative of the applicant should sign and date the permit application, thereby certifying to the validity of all responses and data submitted to EPA. Under section 3008(d) of RCRA, "Any person who knowingly makes any false statement or representation in any application, label, manifest, record, report, permit, or other document filed, maintained, or used for purposes of compliance with this subtitle shall, upon conviction, be subject to a fine of not more than $25,000 for each day of violation, or to imprisonment not to exceed 1 year, or both. If the conviction is for a violation committed after a first conviction of such a person under this paragraph, punishment shall be by a fine of not more than $50,000 per day of violation, or by imprisonment for not more than 2 years, or by both."

Item IX. Each of the following instructions apply specifically to each part of item IX.

A. *Waste number.* Wastes must be numbered sequentially beginning with number (1).

B. *Hazardous waste name.* Provide the proper Department of Transportation (DOT) shipping name of each hazardous waste that is stored, treated, or disposed of at the facility. The DOT proper shipping names are listed in the Code of Federal Regulations, 49 CFR 172.101 (proposed at 43 FR 22631 (May 25, 1978)). If the proper shipping name is not included in the DOT list and the term "Not Otherwise Specified" (NOS) is indicated, the EPA hazardous waste name as listed in 40 CFR 250.14 must be used after the DOT proper shipping name. Both references may be obtained by contacting the appropriate EPA Regional office responsible for issuing the permit. If the waste cannot be located in either of these lists, and it is determined to be a hazardous waste under the procedures established by the section 3001 regulations, then use the common name or chemical name of the waste, and so indicate by placing an asterisk (*) before the name of the waste.

If all wastes cannot be specified on a single sheet, additional copies may be requested from the solid waste representative in the EPA Regional office which is responsible for issuing hazardous waste management facility permits in your State.

C. *Confidentiality claim.* If you wish to claim confidential status for this information, mark an X in this box (see item titled *"Public Availability of Submitted Information"*).

D. *Waste definition code (common code).* Enter the waste definition code associated with each "hazardous waste name" listed in item IX–B. A unique code number has been assigned to each EPA hazardous waste listed in 40 CFR 250.14 and to each DOT hazardous waste material listed in 49 CFR 127.101 (proposed at 43 FR 22631 (May 25, 1978)).

Note.—These codes are not included in this notice, but they will be made part of EPA's final instruction manual.

E. *Hazard class.* List the hazard class by its Department of Transportation (DOT) category name, as identified or listed in the Hazardous Waste Materials Table in the *Code of Federal Regulations*, 49 CFR 172.101 (proposed at 43 FR 22631 (May 25, 1978)). For the DOT hazard class "OTHER REGULATED MATERIAL" (ORM), use the EPA characteristics identified in § 250.14 of regulations pursuant to section 3001 of RCRA and proposed as 40 CFR Part 250 in 43 FR 58957, December 18, 1978. The hazard class is simply a systematic means of identifying substances with similar characteristics.

Enter the assigned code listed below corresponding to the appropriate classification.

The DOT hazard classes and assigned codes are:

EA—Explosives A
EB—Explosives B
EC—Explosives C
FL—Flammable liquid
FS—Flammable solid
OX—Oxidizer
CL—Corrosive liquid
NG—Nonflammable gas
PA—Poison A
PB—Poison B
RM—Radioactive material
OP—Organic peroxide
CH—Chlorine
OL—Oxygen pressurized liquid.

The EPA classification system and data input codes include:

I—Ignitable waste
C—Corrosive waste
N—Infectious waste
R—Reactive waste
A—Radioactive waste
T—Toxic waste
O—Organic toxicant
M—Mutagenic
B—Bioaccumulative

F. *Action code.* Indicate the type of action(s) or function(s) employed at the facility in relation to each hazardous waste. The appropriate code(s) are listed below:

S—Store hazardous waste
T—Treat hazardous waste
D—Dispose of hazardous waste

G. *Amount.* For each hazardous waste that the facility stores, treats, and/or disposes, indicate the quantity handled on an annual basis. Use the units of measure shown in (H) below.

H. *Unit of measure.* For each amount indicated, the units are to be specified using the abbreviations of English or metric units shown below:

English Units	*Metric Units*
P—Pounds	K—Kilograms
T—Tons	M—Tonnes
G—Gallons	L—Liters
Y—Cubic Yard	C—Cubic Meters

I. *Handling code.* Enter the handling code(s) listed below that most closely represent the technique(s) used at the facility to store, treat, or dispose of hazardous waste. For each hazardous waste, and for each applicable action code (see F above) enter the most appropriate handling code listed below. This code is intended to supplement (H) below, which is the handling technique.

(1) Storage

S01	Tank truck/rail
S02	Missile silo
S03	Underground storage
S04	Concrete drum
S06	Other (specify)

(2) Treatment

(a) Thermal Treatment Process

T07	Modular incinerator
T08	Rotary kiln incinerator
T09	Fluidized bed incinerator
T10	Cement kiln incinerator
T11	Multiple hearth incinerator
T12	Electrical utility boiler
T13	Liquid injection incinerator
T14	Sludge incinerator
T15	Chemical waste incinerator
T16	Process heater
T17	Lime kiln
T18	Wood waste incinerator
T06	Other (specify)

(b) Chemical Treatment Process

T19	Cyanide destruction
T20	Chemical oxidation
T21	Chemical precipitation
T22	Chemical reduction
T23	Neutralization
T24	Pyrolysis
T25	Degradation
T26	Chlorination
T27	Chemical fixation
T28	Detoxification
T29	Absorption mound
T30	Absorption field
T31	Ion exchange
T06	Other (specify)

(c) Physical Treatment Process

1. Liquid-solids separation

T32 Centrifugation
T33 Clarification
T34 Filtration
T35 Flocculation
T36 Sedimentation
T37 Decanting
T38 Coagulation
T39 Flotation
T40 Foaming
T41 Thickening
T42 Open pit (seepage pit)*
T43 Concrete basin*
T44 Surface impoundment*
T45 Holding tank*
T00 Other (specify)

2. Removal of Specific Components

T46 Blending
T47 Catalysis
T48 Distillation
T49 Evaporation
T50 Solvent
T51 Stripping
T52 Absorption—molecular sieve (activated carbon)
T53 Crystallization
T54 Sand filter
T55 Dialysis
T56 Electrodialysis
T57 Leaching
T58 Reverse osmosis
T00 Other (specify)

(d) Biological Treatment

T59 Activated sludge
T60 Aerobic lagoons
T61 Anaerobic lagoons
T62 Spray irrigation
T63 Thickening filters
T64 Waste stabilization pond
T65 Septic tank*
T66 Aerobic tank*
T00 Other (specify)

(e) Other

T67 Electron irradiation
T68 Air stripping
T00 Other (specify)

(3) Disposal

D69 Chemical waste landfill
D70 Soil incorporation
D71 Ocean disposal
D72 Deep well injection
D73 Dilution/dispersion
D74 Open burning/burial
D75 Encapsulation
D76 Open pit
D77 Encasement (cement)
D78 Missile silo*
D79 Waste digestor
D80 Cave
D00 Other (specify).

*These techniques are considered *storage* if they are covered and there is no discharge to air or groundwater.

J. *Hazardous waste handling technique.* Briefly describe the technique used at the facility in storing, treating, or disposing of hazardous wastes. For each different material and action, identify the specific technique used. Example responses include the following:

- Sink-float separation; decant and evaporate.
- Shredding, rotary kiln incineration, dispose residuals in hazardous waste landfill.
- Evaporation, centrifuge and pyrolysis.
- Containerize in steel drums and cover with earth.
- Containerize and store in missile silo.
- Neutralize hazardous solution and reprocess.
- Use ion exchange resin; recover concentrates.

Form 4—UIC: Underground Injection of Fluids [Reserved]

Form 5—PSD: Proposed Facilities (PSD New Sources, NPDES New Sources and New Dischargers, and New Injection Wells) [Reserved]

Section C. Activities Which Do Not Require Permits

I. *National Pollutant Discharge Elimination System (NPDES) Permits under the Clean Water Act.* You are not required to obtain an NPDES permit if your discharge is in one of the following categories, as provided by the Clean Water Act (CWA) and by the NPDES regulations (40 CFR Parts 122–125, promulgated on June 7, 1979). However, under section 510 of the CWA, a discharge exempted from NPDES requirements may still be regulated by a State authority and so you should check with your State environmental agency to determine whether you need a State permit.

A. *Discharges from Vessels.* Discharges of sewage from vessels, effluent from properly functioning marine engines, laundry, shower, and galley sink wastes, and any other discharge incidental to the normal operation of a vessel do not require NPDES permits. However, discharges of rubbish, trash, garbage, or other such materials, discharged overboard do require permits, and so do other discharges when the vessel is operating in a capacity other than as a mean of transportation, such as when the vessel is being used as an energy of mining facility, a storage facility, or a seafood processing facility, or is secured to the bed of the ocean, contiguous zone, or waters of the United States for the purpose of mineral or oil exploration or development.

B. *Dredged or Fill Material.* Discharges of dredged or fill material into waters of the United States do not need NPDES permits if the dredging or filling is regulated under section 404 of the CWA.

C. *Discharges into Publicly Owned Treatment Works (POTW).* The introduction of sewage, industrial wastes, or other pollutants into a POTW does not need an NPDES permit. You must comply with all applicable pretreatment standards promulgated under section 307(b) of the CWA, which may be included in the permit issued to the POTW. If you have a plan or an agreement to switch to a POTW in the future, this does not relieve you of the obligation to apply for and receive an NPDES permit until you have stopped discharging pollutants into waters of the United States. Also, you do need an NPDES permit for introduction of pollutants to privately owned treatment works which discharge into waters of the United States, and for other discharges through pipes, sewers, or other conveyances owned by a State, municipality, or other party not leading to treatment works.

D. *Discharges from Agricultural and Silvicultural Activities.* Any introduction of pollutants to waters of the United States from agricultural and silvicultural activities, except as described below, does not require an NPDES permit. This includes runoff from orchards, cultivated crops, pastures, range lands, and forest lands, but does not include the exceptions described below.

(1) Discharges from Concentrated Animal Feeding Operations.

A lot or facility is an animal feeding operation if it meets the following conditions:

(i) Animals (other than aquatic animals) have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period, and

(ii) Crops, vegetation, forage growth or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.

Two or more animal feeding operations under common ownership are a single animal feeding operation if they adjoin each other or if they use a common area or system for disposal of wastes.

An animal feeding operation is required to have an NPDES permit if it is a "concentrated animal feeding operation", which means that it has been designated as a "concentrated animal feeding operation" under 40 CFR 122.76(c), or that it meets one of the criteria in (i) or (ii) below:

(i) More than the numbers of animal specified in any of the following categories are confined:

(A) 1,000 slaughter and feeder cattle,
(B) 700 mature dairy cattle (whether milked or dry cows),
(C) 2,500 swine each weighing over 55 pounds,
(D) 500 horses,
(E) 10,000 sheep or lambs,
(F) 55,000 turkeys,
(G) 100,000 laying hens or broilers (if the facility has continuous overflow watering)
(H) 30,000 laying hens or broilers (if the facility has a liquid manure handling system),
(I) 5,000 ducks, or
(J) 1,000 animal units (see definition below); or

(ii) One of the following conditions are met: Pollutants are discharged into water of the United States through a man-made ditch, flushing system or other similar man-made device; or pollutants are discharged directly into navigable waters which originate outside of and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation; and more than the following numbers and types of animals are confined:

(A) 300 slaughter or feeder cattle,
(B) 200 mature dairy cattle (whether milked or dry cows),
(C) 750 swine each weighing over 55 pounds,
(D) 150 horses,
(E) 3,000 sheep or lambs,
(F) 16,500 turkeys,
(G) 30,000 laying hens or broilers (if the facility has continuous overflow watering),
(H) 9,000 laying hens or broilers (if the facility has a liquid manure handling system),
(I) 1,500 ducks, or
(J) 300 animal units (see definition below).

No animal feeding operation is a concentrated animal feeding operation as defined above if such animal feeding operation discharges only in the event of a 25 year, 24 hour storm.

The term "animal unit" means a unit of measurement for any animal feeding operation calculated by adding the following numbers: The number of slaughter and feeder cattle multiplied by 1.0, plus the number of mature dairy cattle multiplied by 1.4, plus the number of swine weighing over 55 pounds multiplied by 0.4, plus the number of sheep multiplied by 0.1, plus the number of horses multiplied by 2.0.

(2) Discharges from Concentrated Aquatic Animal Production Facilities.

An aquatic animal production facility is required to have an NPDES permit if it is a "concentrated aquatic animal production facility", as defined below or as designated under 40 CFR 122.77(c).

"Concentrated aquatic animal production facility" means a hatchery, fish farm, or other facility which contains, grows, or holds:

(i) Cold water fish species or other cold water aquatic animals in ponds, raceways or other similar structures which discharge at least 30 days per year but does not include:

(a) Facilities which produce less than 20,000 harvest weight pounds of aquatic animals per year; and

(b) Facilities which feed less than 5,000 pounds of food during the calendar month of maximum feeding.

(ii) Warm water fish species or other warm water aquatic animals in ponds, raceways or other similar structures which discharge at least 30 days per year, but does not include:

(a) Closed ponds which discharge only during periods of excess runoff; or

(b) Facilities which produce less than 100,000 harvest weight pounds of aquatic animals per year.

"Cold water aquatic animals" include, but are not limited to, the *Salmonidae* family of fish, e.g., trout and salmon.

"Warm water aquatic animals" include, but are not limited to, the *Ameiuridae, Centrarchidae*, and *Cyprinidae* families of fish, e.g., respectively catfish, sunfish and minnows.

(3) Discharges to Aquaculture Projects.

Discharges to aquaculture projects, as defined below, require NPDES permits.

"Aquaculture project" means a defined managed water area which uses discharges of pollutants into that designated area for the maintenance or production of harvestable freshwater, estuarine, or marine plants or animals.

"Designated project area" means the portions of the waters of the United States within which the applicant for a permit plans to confine the cultivated species, using a method or plan or operation (including, but not limited to, physical confinement) which, on the basis of reliable scientific evidence, is expected to ensure that specific individual organisms comprising an aquaculture crop will enjoy increased growth attributable to the discharge of pollutants permitted under this part, and be harvested within a defined geographic area.

(4) Discharges from Silvicultural Point Sources.

Discharges from non-point source silvicultural activities do not require NPDES permits. These activities include nursery operations, site preparations, reforestation and subsequent cultural treatment, thinning, prescribed burning, pest and fire control, harvesting operations, surface drainage, and road construction and maintenance from which there is runoff from precipitation. However, some of these activities, such as stream crossings for roads, may involve point source discharges of dredged or fill material which may require a section 404 permit. See 33 CFR 209.120.

Discharges from silvicultural point sources do require NPDES permits. A silvicultural point source is any discernable, confined, and discrete conveyance which discharges pollutants into waters of the United States and which is related to rock crushing and gravel washing facilities, or to log sorting and log storage facilities, as defined below, which are operated in connection with silvicultural activities.

"Rock crushing and gravel washing facilities" are facilities which process crushed and broken stone, gravel and riprap (see 40 CFR Part 436, Subpart B, and the effluent limitations guidelines for these facilities).

"Log sorting and log storage facilities" are facilities whose discharges result from the holding of unprocessed wood, e.g., logs or roundwood with bark or after removal of bark in self-contained bodies of water (mill ponds or log ponds) or stored on land where water is applied intentionally on the logs (wet decking). (See 40 CFR Part 429, Subpart J, and the effluent limitations guidelines for these facilities.)

II. *Hazardous Waste Permits Under the Resource Conservation and Recovery Act (RCRA).* You are not required to obtain an RCRA Subtitle C permit, if you are in one of the following categories:

(1) Generators and transporters who store hazardous waste for less than 90 days.

(2) Persons who produce and dispose of less than 100 kilograms (approximately 220 pounds) per month of hazardous waste. Persons are exempted provided they comply with the provisions of 40 CFR 250.20—Standards Applicable to Generators of Hazardous Waste (proposed at 43 FR 58970 on December 18, 1978). These provisions require that any hazardous waste generated, no matter how small the quantity, be disposed of either in (i) a solid waste facility which has been permitted or otherwise certified by the State as meeting the criteria of section 4004 of RCRA; or (ii) a treatment, storage, or disposal facility permitted by the Director under 40 CFR Parts 124 and 125, or permitted by an authorized State program under 40 CFR Part 123.

(3) Retailers who dispose of any quantity of hazardous waste other than waste oil. This exclusion only applies if the hazardous waste is disposed of in accordance with the provisions of 40 CFR 250.29 (described in (2) above). This exclusion does not extend to gasoline stations and companies that accumulate more than 100 kilograms of waste oil per month.

(4) Farmers who dispose of any quantity of hazardous waste: *Provided,* That they comply with the provisions of 40 CFR 240.29. These provisions require farmers to (i) dispose of all waste pesticide in accordance with instructions on the pesticide label or, in the absence of label instructions, dispose of the pesticide in accordance with the procedures and criteria specified in 40 CFR Parts 165 and 257; and (ii) triple rinse each pesticide container after it has been emptied and use the rinsate as make-up water in the tank mix or, at an application rate consistent with pesticide labeling, on crop lands: *Provided, however,* That the pesticide must be registered for the particular crops and such application must be consistent with criteria established in 40 CFR Part 257; and (iii) dispose of all other hazardous wastes in accordance with the provisions described in (2) above.

(5) Publicly owned treatment works (POTW), ocean disposal barges or vessels that receive manifested hazardous wastes and facilities that treat, store or dispose of hazardous wastes designated as special waste as defined in 40 CFR 240.46 shall be considered as having a permit if the requirements proposed in 40 CFR 122.26 are met. Therefore, the owners and operators of these facilities do not need to apply for an RCRA permit.

III. *Underground Injection Control Permits Under the Safe Drinking Water Act.* [Reserved]

IV. *Prevention of Significant Deterioration Permits Under the Clean Air Act.* [Reserved]

Section D. Glossary

Note.—This Glossary includes terms used in the instructions and in Forms 1, 2b, 2c, and 3. Additional terms will be included in the future when other forms are developed to reflect the requirements of other parts of the consolidated permit program.

"Aliquot" means a sample of specified volume used to make up a total composite sample.

"Animal feeding operation" means a lot or facility (other than an aquatic animal production facility) where the following conditions are met:

(i) Animals (other than aquatic animals) have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any 12-month period, and

(ii) Crops, vegetation, forage growth or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.

Two or more animal feeding operations under common ownership are a single animal feeding operation if they adjoin each other or if they use a common area or system for the disposal of wastes.

"Animal unit" means a unit of measurement for any animal feeding operation calculated by adding the following numbers: The number of slaughter and feeder cattle multiplied by 1.0 plus the number of mature dairy cattle multiplied by 1.4 plus the number of swine weighing over 55 pounds multiplied by 0.4, plus the number of sheep multiplied by 0.1, plus the number of horses multiplied by 2.0.

"Application" means the EPA standard national forms for applying for a permit, including any subsequent additions, revisions or modifications to the form; or forms approved by EPA for use in approved States, including any approved modifications or revisions.

"Application, Part A" means that part of the consolidated permit application form which an RCRA permit applicant must complete to qualify for interim status under section 3005(e) of RCRA and for consideration for a permit. Part A consists of Form 1 (General Information) and Form 3 (Hazardous Waste Information Summary).

"Application, Part B", means that part of the application which an RCRA permit applicant must complete to be considered for a permit. EPA is not developing a specific form for Part B of the permit application.

"Approved program" means a State program which meets the requirements of 40 CFR Part 123 and which has been submitted to and approved by EPA under the appropriate Act. An "approved State" is one administering an "approved program."

"Aquifer" means a geological formation, group of formations, or part of a formation that is capable of yielding useable quantities of groundwater.

"Area of review" means the area surrounding an injection well which is described according to the criteria set forth in 40 CFR 146.06.

"Area permit" means a UIC permit applicable to a geographical area, rather than to a specified well, under 40 CFR 122.37.

"Attainment area" means for any air pollutant, an area which is shown by monitored data or which is calculated by air quality modeling (or other methods determined by the Administrator to be reliable) not to exceed any national air quality standard for such pollutant. Standards have been set for sulfur oxides, particulate matter, nitrogen dioxide, carbon monoxide, ozone, lead and hydrocarbons.

"Authorization" means authorization, or approval by EPA of a State program which has met the applicable requirements of section 3006(b) of RCRA and 40 CFR Part 123, Subparts A & B.

"Batch" process or operation means a process or operation which occurs as a series of single, discrete operations.

"Best Management Practices" ("BMP") means methods, measures, or practices to prevent or reduce the contribution of pollutants to waters of the United States. For purposes of these forms and instructions, BMPs include treatment requirements, operating and maintenance procedures, schedules of activities, prohibitions of activities, and other management practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. BMPs do not include actual plant process design, and related operating decisions. BMPs may be imposed in addition to or in the absence of effluent limitations, standards or prohibitions.

"Biological monitoring test" means any test which includes the use of aquatic algal, invertebrate, or vertebrate species to measure acute or chronic toxicity, and any biological and/or chemical measure of bioaccumulation.

"Bypass" means the intentional diversion of wastes from any portion of a treatment facility.

"Composite sample" is a sample made up of a number of individual aliquots collected over a period of time.

"Concentrated animal feeding operation" means an animal feeding operation which meets the criteria set forth in (b)(2)(i), (ii) or (iii) below:

(i) More than the numbers of animal specified in any of the following categories are confined:

(A) 1,000 slaughter or feeder cattle,

(B) 700 mature dairy cattle (whether milked or dry cows),

(C) 2,500 swine each weighing over 55 pounds,

(D) 500 horses,

(E) 10,000 sheep or lambs,

(F) 55,000 turkeys,

(G) 100,000 laying hens or broilers (if the facility has a continuous overflow watering)

(H) 30,000 laying hens or broilers (if the facility has a liquid manure system),

(I) 5,000 ducks, or

(J) 1,000 animal units; or

(ii) More than the following numbers and types of animals are confined:

(A) 300 slaughter or feeder cattle,

(B) 200 mature dairy cattle (whether milked or dry cows),

(C) 750 swine each weighing over 55 pounds,

(D) 150 horses,

(E) 3,000 sheep or lambs,

(F) 16,500 turkeys,

(G) 30,000 laying hens or broilers (if the facility has continuous overflow watering),

(H) 9,000 laying hens or broilers (if the facility has a liquid manure handling system),

(I) 1,500 ducks, or

(J) 300 animal units;

and either one of the following conditions are met: Pollutants are discharged into water of the United States through a man-made ditch, flushing system or other similar man-made device; or pollutants are discharged directly into navigable waters which originate outside of and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation.

Provided, however, That no animal feeding operation is a concentrated animal feeding operation as defined above if such animal feeding operation discharges only in the event of a 25 year, 24 hour storm event; or

(iii) The Director determines that the operation is a significant contributor of pollution to waters of the United States, in accordance with 40 CFR 122.76(c).

"Concentrated aquatic animal production facility" means a hatchery, fish farm, or other facility which contains, grows or holds:

(i) Cold water fish species or other cold water aquatic animals in ponds, raceways or other similar structures which discharge at least 30 days per year but does not include:

(i) Facilities which produce less than 20,000 harvest weight pounds of aquatic animal per year; and

(ii) Facilities which feed less than 5,000 pounds of food during the calendar month of maximum feeding.

(2) Warm water fish species or other warm water aquatic animals in ponds, raceways or other similar structures which discharge at least 30 days per year, but does not include:

(i) Closed ponds which discharge only during periods of excess runoff; or

(ii) Facilities which produce less than 100,000 harvest weight pounds of aquatic animals per year.

"Contact cooling water" means water used to reduce temperature which comes into contact with a raw material, intermediate product, waste product, or finished product.

"Contiguous zone" means the entire zone established by the United States under article 24 of the convention of the Territorial Sea and the Contiguous Zone.

"Continuous discharge" means a discharge which occurs without interruption, except for infrequent shutdowns for maintenance, process changes or other similar activities throughout the operating hours of the facility.

"CWA" means the Clean Water Act (formerly referred to the Federal Water Pollution Control Act) Pub. L. 92-500, as amended by Pub. L. 95-217 and Pub. L. 95-576, 33 U.S.C. 1251 *et seq.*

"Detection limit" means the lowest concentration of a substance that has a signal-to-noise ratio of five-to-one or less.

"Direct discharge" means the discharge of pollutants as defined below.

"Director" means the Regional Administrator, or the State Director as defined in this section.

[Comment: Where there is an approved State program, the term "Director" normally refers to the State Director. In some circumstances, however, EPA retains authority to take certain actions even where there is an approved State program; e.g., where EPA issued an NPDES permit prior to the approval of a State program, EPA may retain jurisdiction over that permit after program approval. See 40 CFR 123.71 and 123.91. In such cases, the term "Director" means the Regional Administrator and not the State Director.]

"Discharge" when used without qualification includes a discharge of a pollutant and a discharge of pollutants.

"Discharge of a pollutant" and "discharge of pollutants" each means:

(i) Any addition of any pollutant or combination of pollutants to navigable waters other than the territorial sea, from any point source, or

(ii) Any addition of any pollutant or combination of pollutants to the waters of the territorial sea, the contiguous zone or the ocean from any point source other than a vessel or other floating craft when being used as a means of transportation.

This definition includes discharges into waters of the United States from: surface runoff which is collected or channelled by man; discharges through pipes, sewers, or other conveyances owned by a State, municipality, or other party which do not lead to treatment systems; and discharges through pipes, sewers, or other conveyances, leading into treatment systems owned in whole or in part by a third party other than a State or a municipality.

"Disposal" means the discharge, deposit, injection, dumping, spilling, leaking, or placing of any solid waste into or on any land or water so that such solid waste or hazardous waste or any constituent thereof may enter the environment or be emitted into the air or discharged into any waters, including groundwaters.

"Disposal facility" means any Hazardous Waste Management facility which disposes of hazardous waste.

"Effective date of a UIC program" means the date that a State UIC program is approved or the date that a UIC program is established by the Administrator.

"Effluent limitation" means any restriction imposed by a State or the Administrator on quantities, rates, and concentrations of pollutants which are discharged from point sources into navigable waters or the waters of the contiguous zone or the ocean.

"Environmental Protection Agency" ("EPA") means the United States Environmental Protection Agency.

"Existing HWM facility" means a Hazardous Waste Management facility which was in operation or under physical construction, on or before the date or promulgation of the regulations under § 3001 of RCRA, 40 CFR Part 250, Subpart A (proposed at 43 FR 58954 (December 18, 1978)).

"Existing source" means any source which is not a new source or a new discharger.

"Existing injection wells" means all injection wells other than new injection wells as defined in this Glossary.

"Facilities or equipment" means buildings, structures, process or production equipment or machinery which form a permanent part of the new source and which will be used in its operation, provided that such facilities or equipment are of such value as to represent a substantial commitment to construct. It does not include facilities or equipment used in connection with feasibility, engineering and design studies regarding the pollution treatment for the source.

"Facility or activity" means any activity or facility (including land or appurtenances thereto) that is subject to regulation under the RCRA, UIC, or NPDES programs.

"Farmer" means a person whose principal business is operating a farm,

which is a piece of land on which crops or animals are raised.

"Fluid" means material or substance which flows or moves whether semisolid, liquid, sludge or any other form or state.

"General information form" or "Form 1" means the consolidated permit application form containing general information which is common to several EPA permit programs.

"Generator" means any person or Federal agency whose act or process produces hazardous waste identified or listed under 40 CFR Part 250, §§ 250.13 and .14 (proposed at 43 FR 58955 (December 18, 1978)). Certain producers are specifically exempted from the § 3002 regulations. These are discussed in section C of the instructions and in 40 CFR Part 250, § 250.29 (proposed at 43 FR 58979 (December 18, 1978)).

"Grab composite sample" means a combination of grab samples collected over a specified sampling period.

"Grab sample" means an individual sample collected at a randomly—selected time over a period of time not exceeding 15 minutes.

"Group I industry" means any of the industries listed in Table 4 of the instructions as being in Group I.

"Group II industry" means any industry listed in Table 4 of the instructions as being in Group II.

"Gross limitation" means a limitation which is not adjusted to reflect credit for pollutants in a discharger's intake water.

"Ground water" means water in the saturated zone beneath the land surface.

"Hazardous substance" means any of the substances designated as hazardous in 40 CFR Part 118.

"Harzardous waste" means a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed; or as further defined and identified by 40 CFR Part 250, Subpart A, §§250.13 and .14 (proposed at 43 FR 58955 (December 18, 1978)).

"Hazardous waste management facility" ("HWM facility") means any facility, land and appurtenances thereto used for the treatment, storage, and/or disposal of hazardous wastes except that solid waste disposal facilities which receive hazardous wastes only from persons subject to 40 CFR 250.29 shall not be considered HWM facilities.

[*Comment:* Persons subject to 40 CFR 250.229 are those who produce and dispose of no more than 100 kilograms (approximately 220 pounds) of hazardous wastes in any one month, retailers who dispose of hazardous wastes other than waste oil, and farmers who dispose of pesticides which are hazardous and who follow certain specified operating procedures.]

"In operation" applies to Hazardous Waste Mangement facilities actively treating, storing or disposing of hazardous waste.

"Indirect discharger" means a non-municipal, non-domestic discharger introducing pollutants to a publicly owned treatment works which introduction does not constitute a "discharge of pollutants."

"Injection" means the subsurface emplacement of fluids through a well.

"Injection well" means a well into which well injection occurs, including 21 types of injection wells covered by the UIC program which are divided into the classes in 40 CFR 123.34.

"Interim authorization" refers to authorization or approval by EPA of a State program which has met the applicable requirements of section 3006(c) of RCRA and 40 CFR Part 123, Subparts A and B.

"Listed State" means a State listed by the Administrator under section 1422 of the SDWA as needing a State UIC program.

"Man-made" means constructed by man and used for the purpose of transporting wastes.

"Mgd" means millions of gallons per day.

"Municipality" means a city, village, town, borough, county, parish, district, association, or other public body created by or under State law and having jurisidiciton over disposal of sewage, industrial wastes, or other waste, or an Indian tribe or an authorized Indian tribal organization, or a designated and approved management agency under section 208 of the CWA.

"Lease" means a contract granting use or occupation of land or holdings during a specified period in return for rent.

"National Pollutant Discharge Elimination System" ("NPDES") means the national program for issuing, conditioning, modifying, revoking, denying, monitoring, and enforcing permits for the discharge of pollutants from point sources into the waters of the United States under sections 402, 318, and 405 of the CWA. The term includes any State of inter-state program which has been approved by the Administrator under section 208 of the CWA.

"Navigable waters" means "waters of the United States, including the territorial seas." This term includes:

(1) All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;

(2) Interstate water, including interstate wetlands;

(3) All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats and wetlands, the use, degradation or destruction of which affect or could affect interstate or foreign commerce including any such waters:

(i) Which are or could be used by interstate or foreign travelers for recreational or other purposes;

(ii) From which fish or shellfish are or could be taken and sold in interstate or foreign commerce;

(iii) Which are used or could be used for industrial purposes by industries in interstate commerce;

(4) All impoundments of waters otherwise defined as navigable waters under this paragraph;

(5) Tributaries of waters identified in paragraphs (1)–(4) of this section, including adjacent wetlands; and

(6) Wetlands adjacent to waters identified in paragraphs (1)–(5) of this section: *provided*, That waste treatment systems (other than cooling ponds meeting the criteria of this paragraph) are not waters of the United States.

[*Comment:* For purposes of clarity the term "waters of the United States" is primarily used throughout the form and instructions rather than "navigable waters."]

"Net" limitations are effluent limitations which are adjusted to reflect credit for pollutants in a discharger's intake water.

"New discharger" means any building, structure, facility or installation: (1) Which on October 18, 1972, had never discharged pollutants; (2) which has never received a finally effective NPDES permit; (3) from which there is or may be a new or additional discharge of pollutants; and (4) which does not fall within the definition of "new source".

"New HWM facility" means a Hazardous Waste Management facility which does not meet the definition of an existing facility as defined in this Glossary.

"New injection wells" means those wells which begin injection after an applicable UIC program becomes effective in the State.

"New source" means any building, structure facility or installation from which there is or may be a discharge of pollutants, the construction of which commenced:

(i) After promulgation of standards of performance under section 306 of the Clean Water Act which are applicable to such source, or

(ii) After proposal of standards of performance under section 306 of the Clean Water Act which are applicable to such source, but only if the standards are promulgated within 120 days of their proposal.

[*Comment:* See 40 CFR 122.81 for the criteria and standards to be used in determining whether a source has begun construction within the measuring of this definition, for the types of construction activities which result in new sources or new discharges, and for the effect of a new source or new discharger determination.]

"Non-contact cooling water" means water used to reduce temperature which does not come into direct contact with any raw material, intermediate product, waste product, or finished product.

"Nonpoint source" means any source of discharge to waters of the United States which is not a point source.

"Off-site" means any site that does not meet the definition of "on-site" as defined in this Glossary.

"On-site" means on the same or geographically contiguous property. Two or more pieces of property which are geographically contiguous and are divided by public or private right(s)-of-way are considered a single site.

"Outfall" means a point source as defined in this Glossary.

"Owner or operator" means the owner or operator of any facility or activity subject to regulation under the RCRA, UIC or NPDES programs. Where a facility or activity is owned by one person but is operated by another person, it is the operator's duty to obtain a permit.

"Ownership" means the legal right to possession.

"Permit" means a permit or equivalent control document issued by EPA or an approved State. In 40 CFR Part 124, references to "permit" may include permit modification, revocation or denial.

"Physical construction" means excavation, movement of earth, erection of forms or structures, the purchase of equipment of any other activity involving the actual preparation of the facility to treat, store or dispose of hazardous waste.

"Point source" means any discernible, confined conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft from which pollutants are or may be discharged. This term does not include return flows from irrigated agriculture.

"Pollutant" means dredged spoil, solid waste, incinerator residue, filter backwash, sewage, garbage, sewage sludge, munitions, chemical waste, biological materials, radioactive materials, heat, wrecked or discarded equipment, rocks, sand, cellar dirt, and industrial, municipal, and agriculture waste discharged into water. It does not mean:

(1) Sewage from vessels; or

(2) Water, gas, or other material which is injected into a well to facilitate production of oil or gas, or water derived in association with oil and gas production and disposal of in a well, if the well used either to facilitate production or for disposal purposes is approved by authority of the State in which the well is located, and if such State determines that such injection or disposal will not result in the degradation of ground or surface water resources.

[*Comment:* The legislative history of the CWA indicates that "radioactive materials" as included within the definition of "pollutant" in section 502 of the CWA means only radioactive materials which are not encompassed in the definition of source, byproduct, or special nuclear materials defined by the Atomic Energy Act (AEA) of 1954, as amended, and regulated under the AEA. Examples of radioactive materials not covered by the AEA and, therefore, included within the term "pollutant" are radium and accelerator produced isotopes. See *Train* v. *Colorado Public Interest Research Group, Inc.* 426 U.S. 1 (1976).]

"Prevention of significant deterioration" (PSD) means the national permitting program under section 165 of the Clean Air Act (CAA) (42 U.S.C. 1857 et seq.), to prevent emissions of any pollutant regulated under the CAA from significantly deteriorating air quality in areas where the concentration of pollutant is lower than the applicable National Ambient Air Quality Standard.

"Process wastewater" means any water which, during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, by-product, or waste product.

"Publicly owned treatment works" or "POTW" means a treatment works as defined in section 212 of the Clean Water Act (CWA), which is owned by a State or municipality (as defined by section 502(4) of the CWA). This definition includes any sewers that convey waste water to such a treatment works, but does not include pipes, sewers or other conveyances not connected to a facility providing treatment.

"Purchase" means to acquire (property) legally by means other than inheritance.

"Retailer" means a person engaged wholly in the business of selling directly to a consumer.

"Rent" means use of another's property in return for regular payment.

"RCRA" means the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 (Pub. L. 94-580, as amended by Pub. L. 95-609).

"Sanitary Wastes" means human body wastes and wastes from toilets and other receptacles intended to receive or retain domestic wastes, including showers.

"Schedule of compliance" means a schedule of remedial measures including an enforceable sequences of actions, operations, or milestone events leading to compliance with the appropriate Act and regulations.

"SDWA" means the Safe Drinking Water Act (Pub. L. 93-523, as amended by Pub. L. 95-1900).

"SDWA pollutant" means any pollutant for which a Primary Drinking Water Standard has been issued under 40 CFR Part 141.

"Separate storm sewer" means a conveyance or system of conveyances (including but not limited to pipes, conduits, ditches, and channels) primarily used for collecting and conveying storm water runoff and either:

(i) Located in an urbanized area as designed by the Bureau of Census according to the criteria in 39 FR 15202 (May 1, 1974); or

(ii) Not located in an urbanized area as designed by the Bureau of Census according to the criteria in 39 FR 15202 May 1, 1974); or

The term "separate storm sewer" does not include any conveyance which discharges process water or storm water runoff contaminated by contact with wastes, raw materials, or pollutant contaminated soil, from lands or facilities used for industrial or commercial activities, into waters of the United States or into separate storm sewers. Such discharges are subject to the general provisions of 40 CFR 122.45.

"Sewage from vessels" means human body wastes and the wastes from toilets and other receptacles intended to receive or retain body wastes that are discharged from vessels and regulated

under section 312 of the CWA, except that with respect to commercial vessels on the Great Lakes this term includes graywater. For the purposes of this definition "graywater" means galley, bath, and shower water.

"Sewage sludge" means the solids, residues, and precipitate separated from or created in sewage by the unit processes of a publicly owned treatment works. "Sewage" as used in this definition means any wastes, including wastes from humans, households, commercial establishments, industries, and storm water runoff, that are discharged to or otherwise enter a publicly owned treatment works.

"Site" means the land or water area upon which an activity is physically conducted or located, including but not limited to adjacent land used for utility systems, as repair, storage, shipping or processing areas or other areas incident to the control process or activity.

"Solid waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from community activities, but does not include solid or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under section 402 of the Clean Water Act, or source, special nuclear, or byproduct material as defined by the Atomic Energy Act of 1954, as amended (68 Stat. 923).

"Source" means any building, structure, facility or installation from which there is or may be a discharge or emission of pollutants.

"State" means any of the 50 States, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands (except in the case of RCRA), and the Northern Mariana Islands (except in the case of CWA).

"Stationary Source" means any building, structure, facility, installation, or operation (or combination thereof) which is located on one or more contiguous or adjacent properties, which is owned or operated by the same person (or by persons under common control) and which emits or may emit any air pollutant.

"Storage" means the containment of hazardous waste, either on a temporary basis or for a period of years, in such a manner as not to constitute disposal of such hazardous wastes.

"Storage facility" means any Hazardous Waste Management facility which stores hazardous waste, except for generators who store their own wastes on-site for less than 90 days for subsequent transport off-site, in accordance with regulations in 40 CFR Part 250, § 250.20(c)92) (proposed at 43 FR 58976 (December 18, 1978)).

"Storm water runoff" means water discharged as a result of rain, snow, or other precipitation.

"Toxic pollutant" means any pollutant listed under section 307(a) of the CWA.

"Transporter" means a person or Federal Agency engaged in the transportation of hazardous waste by air, rail, highway or water.

"Treatment" when used in connection with treatment of hazardous waste, means any method, technique, or process, including neutralization, designed to change the physical, chemical, or biological character or composition of any hazardous waste so as to neutralize such waste or so as to render such waste nonhazardous, safer for transport, amenable for recovery, amenable for storage or reduced in volume. Such term includes any activity or processing designed to change the physical form or chemical composition of hazardous waste so as to render it nonhazardous.

"Treatment facility" means any hazardous waste management facility which treats hazardous waste.

"Underground injection" means the subsurface emplacement of fluids by well injection, as defined by this Glossary.

"Underground source of drinking water" or "USDW" means any underground aquifer not identified by the Director as a non-USDW in accordance with 40 CFR 146.4.

"Upset" means an exceptional incident in which there is unintentional and temporary noncompliance with technology-based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventative maintenance, or careless or improper operation.

"Waters of the United States" means navigable waters, as defined in this Glossary.

"Well injection" means the subsurface emplacement of fluids through a bored, drilled or driven well; or through a dug well, where the depth of the dug well is greater than the largest surface dimension, whenever a principal function of the dug well is the subsurface emplacement of fluids.

"Wetlands" means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include playa lakes, swamps, marshes, bogs, and similar areas such as sloughs, prairie potholes, wet meadows, prairie river overflows, mudflats, and natural ponds.

Section E. NPDES Sampling and Analytical Methods

I. *Sampling.* EPA has not yet promulgated many sampling methodologies under section 304(h) of the CWA. This section gives some general guidance on good sampling techniques; contact your EPA or State permitting authority for more detailed guidance or for answers to specific questions. Where the approved methods referenced in Table 5 include requirements on how samples should be collected and preserved, follow the requirements whenever you use those methods.

A. *General considerations.* 1. Choose a time for sampling that is representative of your normal operation. All operations and processes which contribute wastewater should be in normal operation, to the extent feasible. Also, your treatment system should be operating properly with no system upsets.

2. The sample should be collected where the wastewater is well mixed: near the center of the flow channel, where turbulence is at a maximum.

3. The location for sampling should be adequate for the collection of a representative sample; the site specified in the permit if there is one.

4. Sampling for ponds and lagoons should be by composite samples unless past studies have proved that the retention time is long enough that the discharge is homogeneous.

5. The volume of the collected sample should be sufficient to perform all required analyses, including quality control and split sampling. Consult the laboratory receiving the sample and the methods in Table 5 for specific volume requirements.

6. Sample containers must be made of appropriate materials and cleaned thoroughly to prevent any contamination or change in volume of the sample. See the methods in Table 5 for specific requirements.

7. All samples must be preserved by refrigeration at 4°C from the time of collection (and during collection for composite samples) until the time of analysis.

B. *Types of Samples.* 1. Grab—An individual sample collected at a randomly-selected time over a period of time not exceeding 15 minutes. The sample volume must be at least 100 ml, and adequate for all required analyses. Grab samples are analyzed separately, and the average is computed with flow-weighted values.

2. Grab composite—A series of grab samples collected over the sampling period, and composited prior to analysis. For volatile organic toxics, follow the compositing method in the appropriate methods in Table 5.

3. 24-hour composite—A composite of samples collected at periodic intervals, over a 24-hour period. The composite must be flow proportional, with either the time interval between aliquots or the volume of aliquots proportional to the stream flow at the time of sampling, or to the total stream flow since the last aliquot. The number of aliquots shall be no less than eight, and in all cases as specified by the methods in Table 5. The minimum volume of each aliquot is 100 ml. The sample collection may be done either by manually collecting the periodic aliquots or by using an automatic sampler. More than eight aliquots will be required when the wastewater loading is highly variable.

For periods of flow less than 24 hours, collect flow proportional aliquots over the entire period of flow, with no less than eight aliquots.

4. 72-hour composite—May be collected in the following three ways:

a. A continuous composite, wth the same requirements as specified in (3) above for 24-hour composites, except that there shall be no less than 24 aliquots collected in the 72-hour period; or

b. Three consecutive 24-hour composites collected as specified in (3) above, combined prior to analysis in either equal volumes or flow proportional volumes; or

c. For non-volatile organic toxic pollutants, three consecutive 24-hour composites collected as specified in (3) above, each extracted with methylene chloride according to the methods in Table 5 at the conclusion of each 24-hour compositing period, with the three extracts combined for further sample preparation and analysis.

II. *Analytical Methods.* The following table represents the analytical methods promulgated under 40 CFR Part 136 as of May 1979. Revisions and additions to the methods will be proposed starting in Summer 1979 (see footnote 14), and when these changes are final, they will be incorporated into the table.

The following table has been included in these instructions for the convenience of permit applications, but it does not constitute the official listing of approved methods. Refer to 40 CFR Part 136 for the complete listing, which includes a brief description of each method, as well as some further details of analytical procedures in footnotes.

Alternate test procedures to those listed here and in 40 CFR Part 136 may be approved for use on an individual basis or for nationwide use. Refer to 40 CFR Part 136 for prodedures and requirements concerning application for approval of alternate test procedures.

(11) The method found on p. 75 measures the dissolved portion and the method on p. 78 measures suspended. Therefore, the two results must be added together to get "total".

(12) Methods available from the Environmental Monitoring and Support Laboratory, the U.S. Environmental Protection Agency, Cincinnati, Ohio 45268.

(13) See referenced methods for detection limits of individual pesticides and organic toxic pollutants. In most cases, the 10 μg/l limit in 40 CFR § 122.66(a)(2)(ii)(A) will apply.

(14) Methods for the analysis of the 114 organic toxic pollutants and asbestos are being developed by the Agency's Office of Research and Development. The methods for analysis of organic pollutants will include:

(1) Gas chromatography/mass spectrometry (GC/MS) screening protocol for qualitative analysis for all 114 organic toxics. (An earlier version of this protocol has been used in the screening phase of developing national effluent guidelines.)

(2) Gas chromatography (GC) and liquid chromatography (LC) methods for twelve classes of the organic pollutants, which are being developed by EMSL, Cincinnati and by Effluent Guidelines Division contractors.

(3) Quantitative GC/MS, consisting of quality assurance procedures for use with the GC/MS screening protocol which will make it a quantitative method.

By early Summer 1979 the Agency expects to propose for comment the GC/MS screening protocol and the GC and LC methods developed by EMSL, Cincinnati. Shortly thereafter, the Agency will propose methods for sampling and preservation, and for determining the detection limit of an analytical method, and will update the references used in the existing methods. The other methods described above, as well as a new method for total metals using Inductively Coupled Argon Plasma (ICAP), and a method for asbestos analysis, will be proposed for comment about six months later.

The analysis for organic toxic pollutants required by item V-B of Form 2c will be satisfied by using either the proposed GC/MS screening protocol followed by quantification of those organic toxic pollutants identified as present using the proposed GC or LC methods; or by using the proposed quantitative GC/MS method.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Parts 122, 123, 125]

[FRL-1233-7]

National Pollutant Discharge Elimination System; Revision of Existing Regulations

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: The Environmental Protection Agency is today proposing regulations under the Clean Water Act (CWA) for the National Pollutant Discharge Elimination System (NPDES). In addition, a revised NPDES application form is being published today in draft form in a public notice elsewhere in this Federal Register. The proposed regulations and the revised application form are intended to improve control of toxic pollutant discharges under the NPDES program.

To achieve proper control of toxic pollutant discharges, it is necessary to insure first, that dischargers are aware of the nature of their discharges and second, that they take all necessary actions to control their discharges. Today's proposed regulations implement this approach as follows:

1. Proposed § 122.94(d) establishes minimum requirements for applications to EPA for NPDES permits. The requirements are also made applicable to approved NPDES States by proposed § 123.73(a). These include requirements for certain applicants to analyze their process wastewater discharges for all toxic pollutants listed under section 307(a) of the CWA. In particular, certain applicants will be required for the first time to determine the levels or organic toxic pollutants in certain of their waste streams by analyzing 72-hour composite samples.

2. Proposed § 122.66(a)(2) provides that any pollutant which is reported or required to be reported in the application may not be discharged in excess of five times the average level reported in the application (or five times the detection limit of the analytical method if the pollutant is not detected) whenever the pollutant is not otherwise limited in the permit. This requirement is a modified version of the August 21, 1978 (43 FR 37078) proposal that pollutant discharges be limited to reported levels. (This regulation was originally proposed as § 122.14(a), but has been renumbered as § 122.66(a) in order to conform with the new numbering system of EPA's consolidated permit program regulations, which appear elsewhere in today's Federal Register.) Proposed § 122.66(a)(3) provides a mechanism for demonstrating that a multiple other than five is appropriate for the purposes of proposed § 122.66(a)(2).

3. The proposed regulations also contain a provision designed to implement the recent amendments to section 311(a)(2) of the CWA (Pub. L. 95-576, November 2, 1978). These provide that discharges of hazardous substances listed under section 311 are exempted from the penalties and requirements of section 311 if they are properly covered by the NPDES program. EPA proposed regulations on February 16, 1979 (44 FR 10271) which set forth in detail the requirements for exemptions. Proposed § 122.04(d)(18) provides permit applicants the opportunity to submit the necessary information for obtaining exemptions from the liabilities and requirements of section 311.

4. The proposed regulations also contain several other provisions which help implement the application, permit-writing, monitoring and reporting aspects of toxic pollutant control.

DATES: Comments must be received on or before September 12, 1979.

Meetings open to the public to discuss and receive comments on these proposed regulations and on the consolidated application form are scheduled for four cities. These same meetings will also serve as a forum to receive comments on two other aspects of the consolidated permits program, namely, the consolidated permit regulations which are proposed elsewhere in today's Federal Register, and reproposed Part 146 of the underground injection control (UIC) regulations published on April 20, 1979 at 44 FR 23738. The proposed conforming NPDES regulations will be discussed on the second and third day of each meeting.

These meetings will be held at the following places and dates:

July 16, 17,* 18, 1979, Dallas Texas.
July 23, 24,* 25, 1979, Washington, D.C.
July 26,* 27, 28, 1979, Chicago, Illinois.
July 30, 31,* August 1, 1979, Seattle, Washington.

ADDRESSES: Interested persons may participate in this proposed rulemaking by submitting comments to Edward A. Kramer (A-1), Permits Division (EN-336), Office of Water Enforcement, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Please indicate clearly which regulation is referred to in all comments.

A copy of all public comments will be available for inspection and copying at EPA Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, SW., Washington, D.C. 20460. EPA's Public Information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

Four public hearings have been scheduled at the following locations:

July 16, 17,* 18, 1979, Northpark Inn, 9300 North Central Expressway, Dallas, Texas.
July 23, 24,* 25, 1979, HEW Auditorium, 330 Independence Avenue, SW., Washington, D.C.
July 26,* 27, 28, 1979, Water Tower Hyatt, 800 North Michigan Avenue, Chicago, Illinois.
July 30, 31,* August 1, 1979, EPA—Region X, 1200 6th Avenue, Seattle, Washington.

At each public meeting, registration will be held from 8:30-9:00 a.m. and comments will be received from 9:00 a.m. until concluded, but no later than 5:00 p.m. In addition, an evening session will be held on the dates noted with an asterisk above, from 7:30 p.m. until concluded. Anyone wishing to make an oral statement should notify the following in writing, specifying the city and the date on which they wish to speak:

Ms. Judith Shaffer, Permits Division (EN-336), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

A pamphlet describing the proposed regulations and their relationship to the new NPDES application form has been prepared, titled "A Guide to the Consolidated Permit Application and Conforming NPDES Regulations" (C-7). This pamphlet, and six other pamphlets describing the final NPDES regulations, the proposed consolidated permit regulations and other proposed regulations pertaining to the consolidated permit programs are available from the Environmental Protection Agency, Public Information Center (PM-215), 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Edward A. Kramer (A-1), Office of Water Enforcement (EN-336), Environmental Protection Agency, Washington, D.C. 20460, (202) 755-0750.

B. Compliance Monitoring Costs.

I. Introduction

On June 7, 1979 EPA promulgated regulations in 40 CFR Parts 122–125 for the National Pollutant Discharge Elimination System (NPDES) permit program established by the Clean Water Act (CWA). These regulations substantially revised the former NPDES regulations.

The revised NPDES regulations did not implement all of the provisions contained in the original proposal of August 21, 1978 (43 FR 37078). In particular, they did not implement proposed § 122.14(a) (renumbered here as § 122.68(a)), which proposed that the discharge of any pollutant which was required to be reported in an NPDES application would be limited to the reported level. Many commentors on that provision remarked that they could not properly analyze the impact of the proposal until the revised application form became available. EPA agreed with these comments and withdrew the proposed requirement from final promulgation. Section 122.14(a) was reserved for reproposal pending public notice of the application form, which is accomplished today.

Elsewhere in today's Federal Register, EPA is proposing a set of regulations to consolidate all of its permit programs. In addition to NPDES, the proposed consolidated permit program regulations cover the Hazardous Waste program under the Resources Conservation and Recovery Act and the Underground Injection Control program under the Safe Drinking Water Act. While the substance of the NPDES regulations is largely unaffected by their incorporation into the proposed consolidated permit program regulations, the various provisions of the NPDES regulations are reordered and renumbered. Today's proposal of conforming NPDES regulations follows the organization and numbering system of the proposed consolidated permit program regulations.

Today's proposal addresses the issues which were deferred by the reservation of § 122.14(a) in the final NPDES regulations (now § 122.68(a)) as follows:

1. Proposed § 122.64(d) establishes minimum application reporting requirements for existing industrial dischargers seeking NPDES permits from EPA, and proposed § 123.73(a) makes these requirements applicable to States which operate NPDES programs ("approved NPDES States"). These requirements are reflected in EPA's revised application form, a draft of which is published in a public notice elsewhere in today's Federal Register. Among other requirements, § 122.64(d) requires the identification and reporting of toxic pollutants [listed under section 307(a) of the CWA] in certain waste streams discharged by applicants in certain industries. As described below in the permitting strategy discussion (section III), this information will assist permit writers in setting permit limits.

Provision is also made in this section for applicants to report discharges of hazardous substances listed under section 311 of the CWA; however, such reporting is not mandatory. However, as discussed below, many applicants may want to report these pollutants to take advantage of recent amendments to section 311(a)(2) of the CWA which now allows exclusion of these discharges from all requirements of section 311 whenever they are adequately covered by the NPDES program.

2. Proposed § 122.68(a)(2) provides that the discharge of any pollutant which is reported or required to be reported in the application is limited to five times the reported average level (or five times the pollutant's detection limit if the pollutant is not detected or reported) whenever the pollutant is not otherwise limited in the permit. This proposal is a modification of the August 21, 1978 proposal (in § 122.14(a)) that pollutants be limited to reported levels. This modification, as discussed below in detail, is designed to account for normal waste stream variability which assuring that, in general, pollutant discharges will not rise above reported levels. Proposed § 122.68(a)(3) further provides that a applicant may apply for limits based upon a multiplier greater than five if the applicant demonstrates, through prescribed procedures, that the variability of a particular waste stream warrants a different factor.

Another significant provision included in today's proposal, proposed § 125.3(g), is designed to implement the Agency's strategy for controlling discharges of toxic pollutants. This provision is discussed in section III–D of this preamble.

Today's proposal does not complete the regulation of toxic pollutants under NPDES. New application forms and associated requirements for publicly owned treatment works (POTW's) and for new industrial sources are currently being developed and will be proposed in the near future. Many of the issues addressed in the development of the proposed application requirements for existing industrial dischargers will be relevant to these other dischargers. The Agency will strive for consistency of requirements wherever feasible.

II. Background

A. 1977 Amendments to CWA: Revision of Permit Strategy.—The first round of five-year NPDES permits issued to industrial dischargers began in 1973–1974. The permit strategy focused on assuring permittees' compliance with the CWA's deadline of July 1, 1977 for achievement of best practicable control technology currently available (BPT) and of various water quality and other standards required by section 301(b)(1)(C) of the Clean Water Act. Effluent guidelines promulgated under section 304 of the CWA focused on BPT-level limitations of a set of pollutant parameters which had traditionally been of concern in the field of water pollution control.

In December 1977, Congress amended the Clean Water Act (Pub. L. 95–217) to require increased emphasis upon the control of toxic pollutants listed under section 307(a). The Clean Water Act of 1977 established an initial list of toxic pollutants which included 65 compounds and classes of compounds which reflected a list of pollutants contained in a consent decree in *Natural Resources Defense Council v. Train*, 8 ERC 2120 (D.D.C. 1976), amended on March 9, 1979. (The list of 65 compounds and classes of compounds potentially includes thousands of specific compounds, and the task of analyzing for all of these pollutants would be overwhelming for the Agency and for the regulated community. EPA has revised the list of the 129 specific toxic pollutants which are the most persistent, prevalent, and toxic.) By July 1, 1984 (with certain exceptions), discharges of toxic pollutants must be reduced to levels which reflect the best available technology economically achievable (BAT). In most cases, BAT will be a more stringent standard than BPT.

The 1977 amendments also established a category of "conventional pollutants" for which the "best pollution control technology" ("BCT") must be achieved. BCT determinations involve the use of a cost test (under section 304(b)(4)(B) of the CWA), which in some cases may result in less stringent requirements than BAT (but no less stringent than BPT). As required by the amendments, the Agency has listed pH, fecal coliform, total suspended solids (TSS) and biochemical oxygen demand (BOD) as conventional pollutants (43 FR 32857, July 28, 1978). At the same time, the Agency also proposed to list chemical oxygen demand (COD), phosphorus, and oil and grease as conventional pollutants. The final decision whether to list these as conventional pollutants will be announced in the Federal Register, in the near future.

All pollutants other than toxic pollutants and conventional pollutants are commonly referred to as "nonconventional pollutants". Nonconventional pollutants are subject to BAT by July 1, 1984 or within three years after limitations are established, whichever is later, but in no case later than July 1, 1987 (section 301(b)(2)(F) of the CWA). The Clean Water Act also provides that BAT limits for nonconventional pollutants may be modified (to no less stringent a limit than BPT) under section 301(c) or (g) if the discharger can make certain economic or environmental demonstrations. These modifications are not allowed by the CWA for toxic or conventional pollutants.

The 1977 Amendments' increased emphasis on the control of toxic pollutants requires a revision of Agency priorities for water pollution control efforts. This revision is being conducted in two complementary areas.

(1) The Agency is currently developing effluent guidelines which establish BAT levels for toxic pollutants in certain industrial subcategories. Guidelines are being developed first for a selected list of industrial categories, agreed on in the NRDC Consent Decree, which are believed to present the most serious threat of toxic pollutant discharges. The guidelines are scheduled to be promulgated in stages, with the last guidelines scheduled to be promulgated by May 1981.

(2) Where promulgated effluent guidelines do not address a particular class of discharges or a particular class or pollutants, section 402(a)(1) of the CWA authorizes the Agency to set permit limits on a case-by-case basis. In such cases, permit writers must use any available guidance and their own best judgment to apply the relevant factors listed in section 304(b) of the CWA to the case at hand. See 40 CFR 125.3. The new emphasis on toxic pollutants now requires the development of the ability to set such case-by-case permit limits on toxic metals plus 115 organic toxic pollutants when guidelines are not available. This presents a whole new range of technical issues, requiring revision of the permit writing strategy (including the application requirements).

Because the Agency has needed time to implement the 1977 amendments, it developed a "second-round" permit policy. The policy is set forth in detail in EPA's Policy and Guidance for Issuing the Second Round of NPDES Permits to Industrial Dischargers (July 1978), which may be obtained from the contact person above. The major feature of the policy is the issuance of short-term (less than five years) permits containing BPT limitations to sources in certain industries, with expiration dates scheduled for eighteen months after the original NRDC Consent Decree schedule for promulgation of effluent guidelines. The first of these short-term permits will expire in mid-1980, at which time the new application will be used and the new permitting strategy will be applied.

The Agency's increased emphasis on the control of toxic pollutants also requires the Agency to close a significant loophole in the NPDES program. Where a particular pollutant is not specifically limited in the permit, there is no regulatory mechanism in place to insure that its discharge will be limited. Consider the situation where an applicant receives a permit containing technology-based limitations on those pollutants reported at significant levels in an application form. If the applicant discloses a small amount of a pollutant in an application (and therefore a specific permit limit is not set for the pollutant), and the applicant is later found to be discharging large amounts of that pollutant, no specific permit limit would be violated. This situation has occurred in the past, and has resulted in large unregulated discharges of toxic pollutants. While the Agency continues to maintain its general policy that pollutants may not be discharged except as authorized by a permit, it has endeavored to specify this requirement for pollutants reported or required to be reported in the application by imposing "application-based limits" (proposed §122.68(a)(2)) on those pollutants.

B. 1978 Amendments to the CWA: Exemption of Hazardous Substance Discharges Covered by NPDES from the Requirements of Section 311 of the CWA

On November 2, 1978, the President signed further amendments to the Clean Water Act (Pub. L. 95–576). Section 311(a)(2) was amended to provide that all discharges of hazardous substances which are adequately covered under the NPDES program are exempt from the requirements and penalties of section 311 of the CWA. (See discussion below in section IV–E. See also the proposed hazardous substance regulations at 44 FR 10271, February 16, 1979.) As a result of the amendment of section 311(a)(2), the Agency was required to revise its NPDES application requirements to allow applicants the opportunity to report discharges of hazardous substances. When pollutants are

exempted from section 311 requirements in this way, they become subject to NPDES requirements. Permit conditions for reported hazardous substances will be established in a similar manner as conditions for toxic pollutants (discussed immediately below).

III. Permitting Strategy

This section explains how the new permitting strategy for toxics will work. The nex section discusses the proposed application requirements and shows how they fit into this strategy.

A. General Scheme: Interrelation of Guidelines, Standards and Case-by-Case Designations of Limits

Under section 402(a)(1) of the CWA, each permit must contain conditions to assure that all discharges will meet all applicable requirements of the CWA. These requirements include the technology-based requirements such as BAT and BCT (sections 301(b)(2) and 307(a)) as well as requirements based upon water quality standards, pollutant load allocation and other standards (sections 301(b)(1)(C), 208(e) and 307(a) of the CWA). The permit must be consistent with the most stringent applicable requirements.

Each State is required to establish standards for certain pollutants in its various water quality basins. In addition, EPA has promulgated effluent standards and prohibitions in 40 CFR Part 129 for six of the section 307(a) toxic pollutants. Whenever a pollutant is covered by any such standard, the permit writer must set a permit limit consistent with the standard.

However, when BAT-level permits addressing section 307(a) toxic pollutants begin to be issued in mid-1980, many States will not yet have established numerical water quality standards for most of the toxic pollutants. Similarly, the Agency will not have promulgated effluent standards or prohibitions under section 307(a) for most of the toxic pollutants. Even when standards are available, the pemit writer must consider the Act's technology-based requirements as well. If a technology-based requirement is more stringent for a particular pollutant in a particular waste stream than the applicable water quality or toxicity standard, the technology-based requirement must be applied.

Because the 1977 amendments emphasize BAT control of section 307(a) toxic pollutants and because water quality standards have not yet been established for most of the toxics, the permitting strategy has focused upon insuring the installation of BAT technology to control the toxics. Of course, where water quality or other standards apply, they will be included in permits as well.

The Agency has developed a dual approach to setting technology-based limits as provided for in section 402(a)(1) of the CWA. The chief source of technology-based limits is the effluent limitations guidelines, which are promulgated under sections 301 and 304 of the CWA and made applicable to entire classes (generally industry subcategories) of dischargers. Where guidelines do not completely cover a particular waste stream or particular pollutants in the waste stream, the permit writer must use his or her best professional judgment to set appropriate limits. This case-by-case approach, authorized by section 402(a)(1), allows permit writers to assure that all significant pollutant parameters are limited, so that EPA may focus its guidelines development on the most severe toxic pollutant discharges.

Under the amended NRDC Consent Decree, the Agency is initially developing effluent guidelines, which focus upon toxic pollutants, for thirty-four industries. These are:

Adhesives and Sealants.
Aluminum Forming.
Auto and Other Laundries.
Battery Manufacturing.
Coal Mining.
Coil Coating.
Copper Forming.
Electric and Electronic Compounds.
Electroplating.
Explosives Manufacturing.
Foundries.
Gum and Wood Chemicals.
Inorganic Chemicals Manufacturing.
Iron and Steel Manufacturing.
Leather Tanning and Finishing.
Mechanical Products Manufacturing.
Nonferrous Metals Manufacturing.
Ore Minning.
Organic Chemicals Manufacturing.
Paint and Ink Formulation.
Pesticides.
Petroleum Refining.
Pharmaceutical Preparations.
Photographic Equipment and Supplies.
Plastics and Synthetic Materials Manufacturing.
Plastic Processing.
Porcelain Enamelling.
Printing and Publishing.
Pulp and Paperboard Mills.
Rubber Processing.
Soap and Detergent Manufacturing.
Steam Electric Power Plants.
Textile Mills.
Timber Products Processing.

New BAT guidelines for these industries will be developed and promulgated in stages. Several are scheduled for promulgation in 1979, and the last three will be promulgated by mid-1981. Thus, guidelines will be available in many cases to permit writers when short-term permits expire and permittees submit new applications.

However, as mentioned above, case-by-case determinations will be used to write permits for those discharges which are not covered by guidelines. These occur in several types of situations.

1. Where part or all of an applicant's operation is not in one of the 34 industrial categories listed in the NRDC Consent Decree, BAT guidelines for toxics will generally not have been promulgated. (In some cases, however, existing BAT guidelines may be adequate, such as where the only significant toxics in an industry are metals. In addition, effluent guidelines for some additional industries will be developed after the guidelines for the 34 industries covered by the Consent Decree are completed.)

2. Even within the 34 industrial categories, the NRDC Consent Decree gives EPA further authority to set priorities. Subparagraph 8(a) of the Decree allows EPA to exclude from guidelines development up to 5% of the sources within each subcategory. Further, subparagraph 8(a) allows EPA to exclude entire categories or subcategories where the amount and toxicity of each pollutant in the discharge does not justify developing national regulations in accordance with the Decree's schedule (even though some plants in the category or subcategory may pose a threat of toxic discharges). Similarly, a guideline for a particular subcategory may exclude particular pollutants if the frequency of their occurrence at toxic levels does not justify developing a national regulation for them (even though some individual plants may discharge significant quantities of these pollutants). Excluded industries will generally not be covered by adequate toxics BAT guidelines, although, as mentioned above, existing BAT guidelines may be sufficient in some instances.

3. The Decree was recently modified to extend the schedule for guidelines development. Thus, it is likely that certain short-term permits will expire prior to promulgation of applicable guidelines.

B. Outline of Permit-Writing Procedure

1. *General.* Upon receipt of a permit application, the permit writer will generally develop permit limits in the following manner:

a. The permit writer will first review the permit application. The reported SIC code and other relevant process or product related information (as

explained in section IV of this preamble) will be reviewed to determine the applicant's subcategory and to decide whether a guideline applies to the subcategory. The permit writer will next determine whether any of the plant's processes generating a discharge are not covered by the guideline. If the plant or a particular process does not appear to be covered by a guideline, it may be necessary to request further information from the applicant before setting limits.

b. Upon obtaining all necessary information, including file data and other sources of data on discharges for the facility, the permit writer will determine whether any pollutant not regulated by an applicable guideline is being discharged in a significant amount, requiring the development of specific permit limits (rather than relying upon the proposed § 122.66(a)(2) application-based limits provision) for the pollutant. The permit writer will thus have developed an informal list of pollutants for which additional control is required. These will include the section 307(a) toxic pollutants which have been reported in the application to be present at significant levels.

c. Permit limits must then be set to insure adequate reduction of these pollutants. Permit writers will use all available information to insure that permits reflect the appropriate technological standards. This information includes treatability studies currently being developed by EPA. These studies will demonstrate what levels are achievable for each toxic pollutant by use of certain types of treatment equipment (singly or in combination) for certain types of waste streams.

2. *Proposed 125.3(c)(4): Use of toxicity units as technology-based limits.* One drawback of the testing requirements for an NPDES application proposed in § 122.64(d)(16) is that the pollutants which are required to be tested constitute only a small portion of the total universe of pollutants. As a result, the effluent data reported in an application may show that no section 307(a) toxic pollutants are present, even though other pollutants are being discharged in toxic quantities.

Additional chemical testing beyond the pollutants listed in proposed § 122.64(d)(16) is not required because analytical methods for these additional pollutants have not yet been developed by the Agency. However, biomonitoring tests are a useful tool to determine whether a waste stream is significantly toxic, regardless of the pollutant(s) causing the toxicity.

While biomonitoring tests are not required as part of an NPDES application, permit writers have authority to require them under section 308 of the CWA or equivalent State authority. EPA believes it is appropriate to exercise this authority when there is a significant likelihood that a waste stream is toxic, based upon past biomonitoring tests, fish kills near the applicant's plant or similar plants elsewhere, the general character of the discharge as determined by chemical analysis, or other relevant factors. Permit writers are encouraged to use biomonitoring as a tool to supplement chemical analyses as part of the process of applying for an NPDES permit.

If a biomonitoring test is conducted and a significant level of toxicity is detected in a waste stream, the permit writer has several options. He or she can require the applicant to further analyze its waste stream to determine the cause of the toxicity and, if certain pollutants are thereby discovered which are believed to cause the toxicity, the permit writer may limit those pollutants directly. If treatability information is lacking for those pollutants, the permit writer may require the applicant to perform treatability studies under section 308 of the CWA or equivalent State authority.

If the permit writer is unable to trace the toxicity problem to specific pollutants, he or she may still require the applicant to conduct treatability studies, such as pilot plant studies, on the effectiveness of known treatment technologies in reducing the toxicity of the applicant's effluent. If a particular technology or series of technologies effectively reduces the toxicity, the permit writer may set limits reflecting that reduction. These may be toxicity-based limits such as LC_{50} numbers, provided that the toxicity-based limits reflect BAT.

(Note that toxicity-based limits, like other broad parameters such as BOD and COD, may be regulated in permits pursuant to sections 402 and 502(11) of the CWA, and may be necessary in some cases to achieve water quality standards.)

EPA intends to publish in the near future a biomonitoring protocol which explains more fully how biomonitoring may be used as part of the NPDES permitting strategy. This protocol will be a revised version of the May 1, 1978 draft which has been previously circulated to the public, and which may still be obtained from the contact person identified above.

C. *The Use of Limits on Indicators to Control Toxic Pollutants*

As in the past, permit writers may set limits on each pollutant which is discharged at significant levels. However, a new permitting strategy is required to reduce discharges of many of the organic toxic pollutants to BAT levels. The problem of setting specific permit limits upon specific organic pollutants is twofold:

1. Permit writers and industrial dischargers have not focused upon organic pollutants to any great extent in the past. The Agency has begun to develop treatability studies for all the organic toxic pollutants. These treatability studies will demonstrate which control equipment is effective in removing organic toxic pollutants. The Agency anticipates that the permit writer and the discharger will usually agree based upon these studies and other available information, that a certain piece or combination of treatment equipment will achieve BAT control for the toxic pollutants in the discharge. However, the lack of a historical data base will often preclude agreements upon precise numbers representing the levels of the toxic pollutants in effluents leaving the treatment equipment. This may result in protracted disputes over numerical limitations despite a general agreement upon appropriate technologies, and could cause serious delay in implementing the CWA's requirements.

2. Sampling and analysis for organic pollutants is much more expensive than it has been for pollutants traditionally regulated by the NPDES program. If organic pollutants are limited in the permit, the cost of periodic compliance monitoring can be very high and possibly unaffordable in some cases (see the detailed discussions of analytical methods and associated costs below in sections V-C and VII-A).

The Agency encourages the direct limitation of specific toxic pollutants wherever feasible, such as where only a few toxics are present in the waste stream and where sufficient data exists to allow agreement between the permit writer and applicant on achievable levels. In addition, direct limitation of a toxic pollutant will be necessary where the discharge of the pollutant is significant.

However, as described above, the Agency believes that it may not always be feasible to directly limit each toxic which is present in a waste stream. As a result, the Agency has developed an alternative approach to directly limiting toxic pollutants. This alternative approach centers upon setting limitations on certain more commonly regulated parameters which can be

relatively easily agreed upon and which will not result in greatly increased compliance monitoring costs. This approach has been applied to a certain degree in the past (e.g., certain BPT guidelines which limit certain metals insure the installation of technology which also removes other metals). In developing new toxics-oriented BAT guidelines, this approach will be used even more than in the past. Similarly, permit writers may use this approach in setting case-by-case permit limits under section 402(a)(1).

The Agency uses the term "indicator" to denote a parameter which is limited in a permit based on treatment for removal of toxic pollutants, in lieu of specific limits on each toxic pollutant. Thus, once the appropriate BAT technology for reducing toxic pollutants has been identified, limits on properly selected indicators can be used to require permittees to attain the same degree of control over toxic pollutants as specific limits on toxic pollutants would require.

Indicators will generally be parameters or specific pollutants which are generally familiar. Some of the pollutant parameters which may be used as indicators are: Total suspended solids (TSS), biochemical oxygen demand (BOD), chemical oxygen demand (COD), total organic carbon (TOC), total Kjeldahl nitrogen (TKN), total phosphorus, cyanide, certain metals and ammonia. Most of these have been frequently limited in permits in the past. Further, most of them may be analyzed by methods which cost substantially less than the methods used to measure many specific pollutants (especially organic toxic pollutants).

However, the Agency recognizes that the use of indicators is not appropriate in all cases. In some situations, EPA may not be able to identify an indicator. For example, current information indicates that chloroform is best treated by steam or air stripping. If a waste stream contains no pollutants in significant quantitites except for chloroform and several metals, it may not be possible to require chloroform control by the use of any indicator. In that case, it will be necessary to specify a limitation for chloroform.

Another situation where specific limitations on toxics are required is where any combination of indicator limits could also be met by installation of an alternate treatment technology which would not sufficiently treat the toxic pollutants. If appropriate limits on indicator pollutants would allow the installation of controls which will not remove toxic pollutants, then the toxic pollutant must be controlled directly, or other indicator pollutants must be selected.

One potential problem associated with the indicator approach is that a plant may change its process in a manner which reduces or eliminates the indicator without affecting the indicated toxics. This would allow toxics discharges to take place without being detected by monitoring the indicator.

Another deficiency of indicators is their relative lack of sensitivity to short-term fluctuations of specific toxic pollutants. This means that if many organic constituents of a waste stream are discharged at unusually low levels, a particular organic toxic pollutant could be discharged at an unusually high level without causing a violation of an indicator limit. However, the Agency believes that the risk of an unacceptably high discharge of a particular toxic pollutant is not great so long as proper treatment equipment is installed and is operated and maintained properly. In addition, application-based limits under proposed § 122.68(a)(2) remain as a basis of liability for significantly increased discharges of any individual pollutant. This provision may be supported by permit requirements of occasional monitoring for all or some organic toxics or of additional monitoring when indicator limits are violated. Furthermore, permits may require biomonitoring tests to provide additional safeguards against toxicity (see discussion below on monitoring in section VI).

As noted above, however, the use of indicators is not a required part of EPA's strategy for regulating toxic pollutants, but rather an additional mechanism to allow more rapid agreement on BAT controls and appropriate permit limits. This mechanism has the added benefit of minimizing compliance monitoring costs. Permit writers may still apply direct limits on toxic pollutants as the circumstances warrent, and are encouraged to do so whenever technically and economically feasible.

D. *Proposed § 125.3(g): Requirement That Indicators Used to Control Toxics Be Limited to BAT Levels*

The indicator strategy relies on the principle that limits on indicator parameters will insure the installation and operation of BAT-level equipment to achieve BAT-level reduction of other pollutants, especially of organic toxic pollutants. For the strategy to work, BAT limits must be set for indicators which are used to indirectly control toxic pollutants. This principle has also been expressed in prior Agency documents, including the Federal Register notice listing conventional pollutants (43 FR 32858 (July 28, 1978)) and EPA's *Policy and Guidance for Issuing the Second Round of NPDES Permits to Industrial Dischargers (July, 1978)). Proposed § 125.3(g) establishes this principle in regulatory form.*

Therefore, proposed § 125.3(g) provides that conventional pollutants (such as BOD and TSS) which are used as indicators for toxics are subject to BAT and are not subject to BCT cost tests. Similarly, nonconventional pollutants (such as COD and TOC) which are used as indicators for toxics are also subject to BAT and are not eligible for modifications under sections 301(c) and 301(g) of the CWA.

A potential problem with the concept of indicators is that if it is abused, it could subvert Congressional intent to set BCT limits for conventional pollutants and to allow variances for nonconventional pollutants. To minimize any such abuse, the regulations set a number of tests linking indicators to toxics which must be satisfied before a conventional or nonconvention pollutant can be regulated as an indicator pollutant.

To use conventionals or nonconventionals as indicators to control toxics to BAT levels, permit writers must identify (in the permit and in the accompanying statement of basis or fact sheet required by §§ 124.8 and 124.9) which toxics are intended to be controlled by each indicator, unless the indicator is established by an applicable effluent guideline. In addition, permit writers must be able to justify indicator limits by demonstrating that the indicator limits will result in installation of treatment equipment which constitutes BAT for toxic pollutant discharges. This will insure that conventional and nonconventional pollutants are not limit to levels which are more stringent than is required to achieve BAT-level reduction of toxic pollutants. It should be noted that in many instances, conventional and nonconventional pollutants will be limited to BAT levels because of other requirements of the CWA, even if they are not use as indicators. This will occur where BCT for a conventional is the same as BAT or where a source fails to meet the section 301(c) or (g) criteria for modifications from BAT for a nonconventional pollutant.

Nonmodifiable BAT limits for conventionals and nonconventionals where they are used as toxic indicators will not result in the imposition of stricter controls than are authorized by the CWA. For example, where an

indicator is a conventional pollutant, the treatment installed to meet the indicators's BAT limit is the same treatment as would be installed to meet the BCT limit for the conventional plus the BAT limits for specific toxics covered by the indicator. While the conventional pollutant may be reduced to levels more stringent than required by BCT, this would occur in any event as the result of the required installation of BAT technology to control the toxics, if they were being regulated directly. The method used to require the installation of BAT technology (direct limitation of toxics or the use of indicators) will not affect ultimate level of pollution control.

Comments on all aspects of the indicator approach and suggestions on other alternatives are welcome.

IV. Proposed § 122.64(d): Minimum Requirements for Applying for NPDES Permits

A. General Considerations

Generally, the Agency believes that dischargers have a duty to be aware of any significant pollutant levels in their discharges. Under existing application requirements, applicants must examine their waste streams and processes in a manner that reflects existing considerations in water pollution control. Proposed §§ 122.64(d) and 123.73(a) (which makes § 122.64(d) applicable to States) increase the requirements to reflect the new emphasis on toxic pollutant discharges.

Specifically, the proposed application reporting requirements will serve two major functions:

1. Like the requirements of the existing application, they will generate the information which permit writers need to set permit limits which accurately reflect the achievable pollutant reductions for each discharger.

2. They will establish the basis for application-based limits under proposed § 122.66(a)(2): Any pollutant which is reported or required to be reported in the application and is not otherwise limited in the permit is limited to five times the reported level (or five times the pollutant's detection limit, if the pollutant was not detected).

As previously noted, EPA's NPDES application form (a draft of which is published in a public notice elsewhere in today's Federal Register will implement the new requirements where EPA operates the NPDES program. While States must also apply these requirements in developing their application forms, they need not use EPA's application format or language. Of course, they may and are encouraged to conform to EPA's approach.

It is important to note that any effluent data which is contained in a permit application must be made available to the public. This is explicitly required by section 402(j) of the CWA and is not subject to change be EPA. However, EPA has taken two steps to make certain that this requirement is administered reasonably. First, product information (e.g. the amount of product produced per year) must be reported only where the information is needed to apply a production-based effluent guideline limitation (as opposed to, e.g., the use of concentration-based guideling or the case-by-case development of individualized permit limits). Second, only end-of-pipe effluent data must be reported. If the permit writer needs additional information (e.g., process discharges upstream of a treatment system), he or she will generally request it under section 308 of the CWA (or equivalent State authority), which provides that proprietary information may be claimed as confidential in appropriate circumstances (which are set forth in 40 CFR Part 2).

Applicants will be required to report their pollutant discharges in several ways. (In addition, intake water data must be reported by those applicants who seek credit for pollutants in their intakes under 40 CFR 122.70(g).)

First, all applicants will submit effluent data for pollutants which have traditionally been of concern in the field of water pollution control: the conventional pollutants, certain nonconventional pollutants (including those which can function as indicators for toxic pollutants) and certain toxic pollutants (including cyanide, total phenols and certain metals). While some of this information may be based upon estimates, most of it must be based upon sampling and analyzing the discharge.

Second, certain applicants must analyze and submit effluent data for certain waste streams for the toxic pollutants. Estimates of toxic pollutant discharges must be submitted for all waste streams which are not analyzed.

Third, applicants will be required to identify pollutant discharges which may occur during the term of the permit at more than five times the average levels found in the analyzed waste stream. This may be based on knowledge or expectation that certain processes or raw materials will be used at some point during the life of the permit (e.g., batch processes, changed processes, raw materials substitutions and periodic discharges). This requirement appears only as a provision in EPA's application form which is public noticed elsewhere in today's Federal Register and is not established as a minimum application requirement in proposed § 122.64(d), since a similar requirement appears in proposed § 122.66(a)(3) (discussed in section V of this preamble).

Fourth, in accordance with recent amendments to section 311 of the CWA, each applicant will be given the opportunity, at its option, to anticipate discharges (including occasional spills) of hazardous substances (designated by the Administrator under section 311 of the CWA) which are not otherwise identified in the application.

The information discussed in the preceding paragraphs will help insure that (1) permit limits adequately address all pollutants which may be discharged by applicants (whether or not the pollutants are detected in the waste streams which the applicant has analyzed) and (2) applicants are exempted from section 311 requirements as provided by section 311(a)(2) of the CWA and proposed 40 CFR 117.12.

Applicants are also required to identify any other relevant information which they possess, such as biomonitoring data and analyses of discharge levels of pollutants not otherwise required to be reported in the application. The permit writer may then request any of the identified data which he or she believes will help to choose appropriate permit limits.

The Agency recognizes that the proposed list of pollutants for which effluent data must be provided is not exhaustive. For example, there are many section 311 hazardous pollutants (or ions of such pollutants) which are not listed as toxic pollutants under section 307(a). Similarly, three contaminants for which primary drinking water standards have been promulgated in 40 CFR Part 141 are not on the toxics list.

The omission of specific reporting requirements for these and most other nonconventionals has been required by constraints upon Agency resources. Consistent with the NRDC Consent Decree and the 1977 amendments, the Agency has concentrated its limited resources upon the worst problem, that is, the section 307(a) toxic pollutants. Thus, effluent guidelines as well as Agency development of both test methods and treatability studies are presently focusing upon the toxics. However, *the proposed list of pollutants to be reported should not be viewed as static.* The Agency intends to develop test methods and treatability studies on pollutants of concern which are not now on the toxics list. This development process has already begun, with initial

emphasis being placed upon section 311 hazardous substances. Reporting requirements will be expanded as additional test methods are developed and treatability studies are completed.

The general requirement that applicants identify information which they have in their possession but are not required to submit, plus the invitation that applicants submit information on hazardous substances, may lead to identification and control of significant discharges which are not specifically required to be reported. Furthermore, permit writers may require applicants to submit additional information where necessary. This may include additional testing, such as biomonitoring tests to assess the relative toxicity of a waste stream. See § 122.64(d)(20).

The Agency strongly recommends that permit writers require applicants to perform biomonitoring tests as part of the application process in appropriate situations. Such tests could include acute and chronic aquatic toxicity tests and tests for bioaccumulation. The Agency is also evaluating the use of specific screening tests for carcinogenicity, mutagenicity and teratogenicity. Factors relevant to requiring biomonitoring include past history of fish kills, previous biomonitoring results indicating toxicity, the nature of the applicant's process, and the applicant's industrial category. This information is useful for setting permit limits where reported effluent data for the toxics is insufficient (see discussion in section III–B(2) above) and for establishing priorities for permit issuance.

Finally, it should be noted that even without direct permit controls on many pollutants, their levels will often be reduced incidentally by the treatment equipment installed to reduce toxic pollutants to BAT levels.

B. *Detailed Discussion of the Proposed Reporting Requirements*

The new emphasis on toxic pollutants has caused the proposed addition of a number of organic compounds to the list of pollutants required to be reported by the expiring form. (For the sake of simplicity in this discussion, compounds such as cyanide and the perchlorinated hydrocarbons will be grouped with the organics.) In addition, certain changes are proposed in the reporting requirements for asbestos, metals (13 of which are now classified as toxic pollutants) and various other pollutants. These changes include both additions to and deletions from the list as well as changes in the nature of reporting requirements for certain pollutants retained on the list.

Additions and deletions were made for various reasons. Some parameters were deleted (e.g., specific conductance and settleable matter) because they are not sufficiently sensitive or because they overlapped other more useful parameters. Others such as chloride, calcium, potassium, and sodium, were deleted because they are relatively nontoxic and the levels and amounts found in industrial discharges are generally not of concern. Algicides and chlorinated organic compounds were deleted since the test methods for these general parameters specify analyses for specific toxic pollutants listed under section 307(a), which are now required to be reported individually.

Additions include the organic toxic pollutants, as well as total Kjeldahl nitrogen (TKN) and total organic carbon (TOC), which are expected to be particularly useful as indicator pollutants.

The requirements of the existing application form include quantitative reporting for certain pollutants, qualitative (presence or absence) for others, and qualitative followed by quantitative reporting (if the pollutant is present) for still others. In the existing form, qualitative reporting may always be based upon estimates.

The new requirements follow this pattern to some extent. However, most pollutants must now be reported quantitatively. Other pollutants which are not found in most waste streams or which are less significant may be reported qualitatively, and, if present, quantitatively.

Analyses are required for pollutants which are expected to be useful as indicator pollutants and (with two exceptions noted below) for toxic pollutants which are likely to be found in a waste stream. For other pollutants, which are either not of overriding importance environmentally or which do not frequently appear in significant concentrations, estimates are permitted. However, applicants are expected to use analyses whenever they are unable to make reliable estimates.

Two pollutants on the toxics list may be reported in all cases on the basis of estimates. These are asbestos and 2,3,7,8-Tetrachlorodibenzo-p-dioxin(TCDD). Asbestos is excluded from testing requirements because its analytical method is both very expensive and highly controversial. TCDD is excluded because it is so highly toxic that it would be against the public interest to promote the routine shipping of analytical standards of TCDD, which are necessary for quantitative analysis. Instead, EPA is investigating other approaches to determine where this particular pollutant can be expected to be found.

The pollutant reporting requirements are summarized in the following three tables:

Table I—Pollutants Reportable Under Existing Requirements but Deleted in Proposed Requirements.

Algicides.
Calcium
Chloride.
Chlorinated Organic Compounds.
Organic Nitrogen.
Potassium.
Settleable Matter.
Sodium.
Specific Conductance.

Table II—Pollutants not Reportable Under Existing Requirements But Added in Proposed Requirements

Pollutant	Proposed reporting requirement
Asbestos	Qualitative/Quantitative.*
Dioxin	Qualitative/Quantitative.*
Toxic organics (except asbestos, cyanide and dioxin)	Quantitative for Group I** for process wastewater discharges. Qualitative/Quantitative for Group II and non-process waste-water discharges from Group I.
TKN	Quantitative.
TOC	Quantitative.

*"Qualitative/Quantitative" means a qualitative determination of whether the pollutant is present based on estimates or analyses, followed by quantification only if the pollutant is present.

**"Group I industries are the 34 industries covered by the NRDC consent agreement (listed in section III—A of this preamble), plus asbestos manufacturing and ferroalloys. All other applicants are in Group II. The basis for the groupings is discussed below in the discussion of organic toxic pollutants.

Pollutants Retained From Existing Form

Pollutant	Existing requirement	Proposed requirement
Aluminum, Total	•	•
Ammonia	•	•
Antimony	Qualitative	••
Arsenic	•	••
Barium, Total	Qualitative	•
Beryllium, Total	•	••
BOD,	Quantitative	Quantitative.
Boron, Total	Qualitative	•
Bromide	Qualitative	•
Cadmium, Total	•	••
Chromium, Total	•	••
Cobalt, Total	Qualitative	•
COD	Quantitative	Quantitative.
Color	Qualitative	•
Copper, Total	•	••
Cyanide, Total	•	Quantitative.
Fecal Coliform	Qualitative	•
Fluoride	Qualitative	•
Iron, Total	Qualitative	•
Lead, Total	•	••
Magnesium, Total	Qualitative	•
Manganese, Total	Qualitative	•
Mercury, Total	•	••
Molybdenum, Total	Qualitative	•
Nickel, Total	•	••
Nitrate	Qualitative	•
Nitrite	Qualitative	•
Oil and grease	•	Quantitative.
Pesticides	Qualitative	•
pH	Quantitative	Quantitative.
Phenols, Total	Qualitative	•

Pollutants Retained From Existing Form—Continued

Pollutant	Existing requirement	Proposed requirement
Radioactivity	Qualitative	•
Residual Chlorine	•	•
Selenium, Total	•	••
Silver, Total	Qualitative	••
Sulfate	Qualitative	•
Sulfide	Qualitative	•
Surfactants	Qualitative	•
Temperature	Quantitative	Quantitative.
Thallium, Total	Qualitative	••
Total Phenols	•	Quantitative.
Tin	Qualitative	•
Titanium	Qualitative	•
TSS	Qualitative	Qualitative.
Zinc	•	••

*Qualitative/Quantitative. This means a qualitative determination of whether the pollutant is present based on estimates or analyses, followed by quantification only if the pollutant is present.

**Group I process wastewater discharges: Quantitative. All other dischargers: Qualitative/Quantitative.

C. *Organic Toxic Pollutants.*

1. *The Problem.* Organic toxic pollutants have not traditionally been of concern in the field of water pollution control. However, under the 1977 amendments, they have become the focus of the agency's water pollution control efforts (they comprise 115 of the 129 toxics listed under section 307(a)). Their control requires consideration for the first time of various technical and economic issues. The issues and their proposed resolutions are discussed below.

There are several features associated with the analytical methods for organic chemicals that make these chemicals more difficult and expensive to analyze than other pollutants. Many of the comments on the August 21, 1978 proposal of the NPDES regulations emphasized these aspects, which are summarized below.

(a) Methods of sampling and analyzing for most organics are in their relative infancy compared to those used for other pollutants. (However, 40 CFR Part 136 test methods have already been promulgated for several organics on the toxic pollutants list under section 304(h) of the CWA. These are cyanides, total phenols, pentachlorophenol, some pesticides and several chlorinated organics). The American Society of Testing Materials does not yet have standardized methods for many such pollutants, and achievability of a high degree of precision and accuracy for such analyses is not universally acknowledged. The Agency has not yet promulgated test methods for most of the organic toxics although it intends to propose such methods for incorporation into 40 CFR Part 136 by early Summer 1979. However, EPA has had a draft screening protocol since 1977, which has been used extensively in developing information for effluent guidelines. Copies of the draft protocol may be obtained by contacting the Analytical Methods Coordinator, Effluent Guidelines Division (WH-552), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

(b) In many industries, the level of any particular toxic pollutant in a waste stream may fluctuate widely even within short periods of time. This is caused by a number of factors, including varying feedstocks, variations in the process, variations in the efficiencies of the treatment systems, chemical reactions of pollutants in the waste stream, the periodic use of different cleaning fluids (often of a composition known only to the manufacturer), and other causes which prevent a steady state. These factors make it difficult to report pollutant discharge levels which are representative of the waste stream.

(c) The costs of sampling and analyzing for the 115 organic toxic pollutants are high when compared to costs for measuring the more traditional pollutants. A typical cost for sampling and analyzing an outfall may be expected to be in the vicinity of $4,500 as explained more fully in the discussion of costs in section VII below. The total cost of sampling and analysis for plants with many outfalls will be much higher. Further, if frequent waste characterizations are required subsequent to permit issuance, compliance monitoring costs could in some cases become unaffordable. While the indicator approach will greatly reduce monitoring costs, permit writers may require occasional monitoring of specific organic toxics or additional monitoring when indicator limits are violated (see discussion below in section VI).

In designing both the application requirements and the permitting strategy, the Agency focused its efforts on accounting for waste stream variability and on minimizing dischargers' costs without sacrificing the goals of the CWA.

2. *Development of Test Methods for Organic Toxic Pollutants.* The Agency intends to propose sampling and analytical methods for all of the organic toxic pollutants under section 304(h) of the CWA in the Summer of 1979 and to promulgate them by the time applicants begin to use the revised application form. (As noted previously, test methods have already been promulgated for several organic toxics.) Two alternative analytical methods will be provided. One method is quantitative GC/MS (gas chromatography/mass spectrometry). The alternate provides for identification or "screening" (presence/absence) of organic toxics by GC/MS followed by GC (or liquid chromatography—LC—in certain cases) quantification of those pollutants which have been identified.

Applicants will be given the choice of using either analytical method. Quantitative GC/MS is the less expensive method for waste streams containing many of the organic toxic pollutants. It also overcomes pollutant interferences that can in some instances make GC or LC analysis difficult to use reliably.

The Agency has not promulgated approved methods for sampling; however, some general guidance is provided in section E of the instructions to the consolidated application form (the instructions appear along with the consolidated application form as a public notice elsewhere in this Federal Register). Certain aspects of sampling methodology may be proposed for inclusion in 40 CFR Part 136 in the near future. However, it is not possible to specify sampling methods which cover every specific situation in detail. Good sampling techniques depend largely on the qualification and experience of the person conducting or providing on-site supervision of the applicant's sampling. The Agency therefore encourages, and has assumed in its costs analysis (section VII below), that each applicant will employ at least one experienced independent contractor to perform its sampling activities.

3. *Waste Stream Variability.* Waste stream variability consists of both short-term and long-term variations. The latter, which applies to metals and other inorganic pollutants as well as to organics, is addressed in the next section. This discussion focuses on the short-term aspects of variability.

Short-term fluctuations in levels of a pollutant are generally smaller in BPT-treated waste streams than in untreated waste streams. Since the Clean Water Act required dischargers to install BPT treatment by July 1, 1977, most applicants have installed BPT equipment; thus the variability problems associated with raw waste streams have been somewhat mitigated. Some sources that have not installed BPT equipment as required by the CWA may argue that they may be forced to incur additional expenses in trying to accurately characterize their raw or inadequately treated waste streams. In such situations, any additional expense will be the result of their own failure to install BPT equipment.

Even where BPT has been installed, some short term variability may be expected. The Agency is addressing this

problem for organic toxics by requiring a single flow proportional composite sample taken over a 72-hour period (for certain pollutants, such as volatile organics, periodic grab samples of the discharge taken over the 72-hour period will be necessary). This procedure, which the Agency has used in collecting samples in its effluent guidelines development, helps minimize the effect of short-term fluctuations upon the measured value, and will contribute greatly to a more accurate representation of the discharger's waste stream.

Seventy-two hour composites will not provide a perfectly representative picture of the applicant's waste stream. However, experience in developing effluent guidelines shows that 72-hour composites are adequate to the purposes of the permitting strategy: setting permit limits for pollutants which are present at significant levels, and imposing application-based limits.

The decision to use a single 72-hour composite sample resulted from the Agency's judgment that the incremental benefits of requiring further sampling and obtaining a slightly better picture of the range of potential variability do not justify the imposition of the significantly greater costs which would result from either (1) extending the length of time for sampling, or (2) increasing the required number of samples (e.g., consecutive or nonconsecutive 24-hour composites). Similarily, the Agency believes that a 72-hour composite yields a significantly better picture of the waste stream than a single 24-hour composite, thereby justifying the resulting increase in sampling costs. Comments and data are invited on the Agency's choice of the single 72-hour composite sample for use in analyzing organic toxic pollutants, and on what techniques are necessary to preserve such samples.

The Agency recognizes that certain dischargers may wish to go beyond the requirement of a 72-hour composite sample. For example, they may analyze two or more composite samples, in which case they must report the arithmetic average as well as the maximum level of the analyses. The application-based liability provision of proposed § 122.68(a)(2) will apply to the arithmetic average of the reported levels.

4. *Cost Considerations.* Costs are minimized by exempting certain applicants (based on industry category) from analyzing for organic toxic pollutants and by exempting all applicants from conducting such analyses for non-process wastewater outfalls.

(a) *Exemption of Certain Industries from the Requirement to Analyze for Toxic Pollutants.* Industries are required to test for toxic pollutants on the assumption that such pollutants are likely to be present in their waste streams. The Agency's sampling of the 34 NRDC Consent Decree industries has generally revealed toxic pollutants in their discharges. In certain plants, the Agency did not discover significant levels of toxic pollutants. However, the Agency only sampled a few plants per subcategory in most cases, and the Agency does not feel that its sampling was sufficient to exclude all plants within any of the 34 categories or their subcategories from requirements to test for toxic pollutants as part of an application for a permit.

As a result, all plants within the 34 industries will be required to test for toxic pollutants, with exceptions of TCDD and asbestos for reasons explained in section IV–B. To avoid needless duplication, however, where EPA's Effluent Guidelines Division or its contractors analyzed the waste stream of a plant as part of EPA's project to develop new BAT guidelines for toxic pollutants, then the new application form provides that the plant may submit that data (where the data is acceptable) in lieu of testing again. Such data may be submitted only where conditions at the plant have not changed to the extent that the Effluent Guidelines Division's data no longer represent the discharge of the plant.

The Agency has not yet begun to develop BAT guidelines to regulate discharges of toxic pollutants in industries beyond the 34 included in the NRDC Consent Decree. Moreover, existing BPT and BAT guidelines development for these industries did not focus upon organic toxics. As a result, the Agency's sampling for such pollutants in preparation of those guidelines has been limited. However, the sampling data collected to date reveals that, in addition to the 34 NRDC industries, at least the following industries are likely to discharge organic toxic pollutants:

Ferrolloys. Effluent testing has revealed the presence of at least phenols and cyanide. See pages 59–118 of EPA's Development Document for this industry (EPA 440/1–73/008, August 1975). Effluents from blast furnaces may also contain polynuclear aromatic hydrocarbons.

Asbestos Manufacturing. Effluents may contain at least phenols, cyanide and asbestos. In addition, high levels of COD and TOC (Development Document 440/1–74/035, August 1974) may reflect the presence of other toxic pollutants. It should be noted, however, that since most sources in this category have already achieved zero discharge of process wastewater, the analytical requirements for this category will have minimal impact. See pages 47–55 of the Development Document (EPA 440/1–73/017, October 1973).

Applicants from these two industries must also sample and analyze for all the toxic pollutants in all discharges which contain process wastewater.

Applicants who are required to analyze for the toxic pollutants discharged from outfalls containing process wastewater (sources in the 34 NRDC industries, plus the asbestos and ferroalloys industries) are referred to as Group I applicants. All other applicants, referred to as Group II applicants, are generally exempt from analyzing for the organic toxic pollutants. However, they must analyze for any such pollutants which they know or have reason to believe may be present in their waste streams, and of course, permit writers have authority under section 308 of the CWA or similar State statutes to require such analyses on a case-by-case basis.

The list of Group I industries as set forth above is not final. As noted above, the Agency's information on organic toxics outside of the 34 industrial categories is presently limited. Further investigation may reveal that presently exempted industries or waste streams should not be exempted. (The industrial categories being considered for possible inclusion in Group I include Fertilizer, Concrete Products and Cement.) As information is developed, certain industries may be added to the Group I list, and applicants from those industries would then be required to analyze for the organic toxics when they apply for a new permit. It is also possible that some applicants who are now required to analyze for organics may be exempted in the future as more complete data becomes available.

When promulgated, § 122.64(d)(16) and the final revised application form may contain a different list of Group I and II industries from today's proposed list. Comments are solicited on inclusions and exclusions of all industries, no matter how they are classified in this proposal.

Several commenters upon the August 21, 1978 proposed NPDES regulations suggested that, in certain industries, only certain organic toxic pollutants should be required to be analyzed and reported. The Agency has considered

this approach but has not accepted it for two reasons.

First, Agency sampling of plants to date reveals considerable plant-to-plant variations of toxic pollutant in waste streams, even within industrial subcategories. In addition, this sampling has demonstrated that waste streams often contain pollutants which are not easily predicted by analyzing raw materials or production processes. As a result, it is not possible, based upon existing data, to predict with a high degree of confidence that any Group I discharger need not analyze for all the organic toxics.

Second, the commenters' suggested approach would probably not result in significant cost savings over the proposed requirements. The cost of collecting a sample would remain approximately the same no matter how many toxic pollutants were excluded. As for savings in analytical costs, if only a few pollutants need to be analyzed for, GC analysis without prior GC/MS screening might be used. However, even then, the savings realized by eliminating GC/MS screening would be partially offset by increased GC costs over those incurred when GC is preceded by GC/MS screening. Even if quantitative GC/MS is used, only a minor cost reduction could be achieved, and only in those cases where entire fractions (classes into which the organic toxics are divided for purposes of conducting GC/MS analysis) are excluded.

The Agency believes that the burden of determining the nature of pollutants discharged lies with the discharger, not with the Agency. While Agency experience analyzing waste steams as part of its BAT development project indicates that not all of the toxic pollutants will be found in every waste stream, this same experience leads the Agency to conclude that it is impossible at this time to determine which pollutants will be present in which waste stream, and most importantly, which pollutants will never be present. As a result, all indistries with a demonstrated potential for discharging toxic pollutants are required to analyze their waste streams containing process wastewater for all of the toxic pollutants.

However, the Agency is aware that in some waste streams in some industries, there may be a low likelihood that certain toxic pollutants will be present. The Agency invites comments and supporting data indicating which industries can omit analysis of which pollutants and demonstrating what the cost savings would be. In addition, the Agency solicits comments on the suggestion by one trade organization that it and other groups perform representative sampling for an industry to demonstrate that no toxics are present in particular classes of discharges within the industry. These comments should address how much investigation is necessary and what type of results would justify exclusion of the industry (or of a subcategory) from testing requirements for certain toxic pollutants. The Agency is particularly interested in this information as it pertains to relieving the testing burdens on small businesses.

It should be noted that although Group II applicants are not required by these regulations to analyze for the organic toxics, they may be required to do so by permit writers in particular situations under the authority of section 308 of the CWA, or equivalent state authority. For example, a Group II applicant may be required to conduct boimonitoring tests to determine the toxicity of its effluent. If the results reveal some evidence of toxicity, the applicant may then be required by the permit writer to analyze for the organic toxics. Such requirements are within the discretion of EPA and State permit writers, as set forth in proposed § 122.64(d)(20).

(b) *Exemption of Non-Process Wastewater Discharges from Toxic Pollutant Analyses.* All applicants are not required to sample and analyze non-process wastewater discharges for the toxic pollutants, provided that those discharges are not combined with process wastewater discharges. The exemption applies to discharges such as non-contact cooling water, surface runoff and sanitary wastes. The decision to exempt such discharges from testing requirements was based upon the facts that they are usually (although not always) nontoxic and that even when they contain toxic pollutants, those pollutants are often so diluted by large quantities of discharge water as to be analytically undetectable. However, these waste streams must be analyzed for parameters such as COD, BOD, and TOC, which will provide some information concerning discharges of organics. In addition, further information will be submitted as described in section IV–E below.

While these waste streams are not required to be tested for the toxic pollutants, all applicants are required to estimate any amounts which may be present. In addition, permit writers may require additional testing under section 308 of the CWA, or equivalent state authority.

D. *Pollutant Discharges Which Were Not Identified in the Sampled Waste Stream*

Applicants for EPA-issued permits will be required to supplement the required effluent data reporting by identifying pollutant discharges at levels which were not revealed by the required waste stream analysis and which may exceed five times the reported levels. The purpose of this requirement is to help the permit writer account for long-term waste stream variability.

Many waste stream fluctuations can be predicted to some degree. A coal-fired steam electric generating plant which obtains its coal from several different sources can often predict within a range that its effluent will at times contain pollutants (such as toxic metals) which are present in the various types of coal. Similarly, a plant which operates various batch processes can often predict the range and the types of pollutants that can be expected to be discharged as a result of those processes.

Not all waste stream variability is predictable. For example, changes in production methods several years after permit issuance may not have been predictable at the time of application. In such cases, § 122.11(c) of the consolidated permit program regulations provides that the permittee must notify the Director when it knows or has reason to believe that such changes have occurred or will occur. Where these changes result in a permit violation (including exceedance of the application-based limit), the permit may be modified under §§ 122.9(e) and 122.78.

Applicants are also required to identify any relevant analytical data or other information which they know to be available concerning pollutants which are not required to be reported by proposed § 122.64(d). The permit writer may request submission of any identified information which may be of assistance in writing the permit.

E. *Identification of Substances Identified as Hazardous Under Section 311 of the CWA*

Section 311 of the CWA contains strict penalties, reporting requirements and other provisions to prevent discharges (including spills) of oil and hazardous substances. In 40 CFR Part 116, the Agency has identified 200 substances as hazardous (some of these substances are on the section 307(a) toxics list as well). See 43 FR 10474 (March 13, 1978) and 44 FR 10266 (February 16, 1979).

Until recently, the section 311 provisions unnecessarily overlapped with section 402. It was possible that a discharge or spill of a hazardous substance through an outfall which was either in compliance with a permit or reviewed by the permit issuing authority but not controlled by the permit at all would constitute a discharge of "harmful quantities" of the substance under section 311, resulting in section 311 penalties.

To eliminate the overlap between sections 311 and 402, Congress amended section 311 in late 1978 to exempt discharges covered under the NPDES program. The amendments also deleted the standard of " harmful quantities" referred to above and introduced in its place the concepts of "reportable quantities" and "quantities which may be harmful."

Exemptions from the requirements and penalties of section 311 were provided for in three situations:

"(A) discharges in compliance with a permit under section 402 of this Act, (B) discharges resulting from circumstances identified and reviewed and made a part of the public record with respect to a permit issued or modified under section 402 of this Act, and subject to a condition in such permit, and (C) continuous or anticipated intermittent discharges from a point source, identified in a permit or permit application under section 402 of this Act, which are caused by events occurring within the scope of relevant operating or treatment systems." Section 311(a)(2) of the CWA, as amended in November 1978.

The Agency proposed regulations on February 16, 1979 which clarify the exemption, 40 CFR 117.12 (44 FR 10271). The proposal is explained in a detailed preamble to those regulations, which will not be repeated here. However, the exemption strategy may be summarized as follows:

1. Discharges of hazardous substances which may be predicted to result from normal operating procedures should be regulated through the NPDES system. This includes typical discharges such as process wastewater or non-contact cooling water. It may also include tank ruptures or other atypical events which may be controlled through the requirements of the NPDES program.

2. Spills of hazardous substances which either cannot be or have not been identified by the discharger in advance and controlled properly (either through new permit requirements or through already existing operating or treatment systems) remain subject to the requirements and penalties of section 311.

3. Dischargers should be given the opportunity to obtain section 311 exemptions by expressly seeking NPDES coverage. This is done by allowing applicants for NPDES permits to identify all discharges or potential discharges which may occur and to demonstrate the adequacy of treatment systems (or management practices such as spill diversion or containment) to control such discharges.

Proposed § 122.64(d)(19) and EPA's draft revised application form provide the applicant the option of identifying present and anticipated discharges of hazardous substances. The instructions which accompany the application form describe in detail the nature of the information to be submitted.

V. Proposed § 122.68(a): Application-Based Limits

Proposed § 122.68(a) is a reproposal of § 122.14(a) (proposed on August 21, 1978, 43 FR 37078). Proposed § 122.68(a) states that permittees are bound by two sets of limits: (1) For pollutants specifically limited in a permit, the technology-based, water quality-based or other limit set forth in the permit; and (2) for all pollutants which are reported or required to be reported in the application but which are not specifically limited in a permit, a limit which is a multiple of the reported average level (or a multiple of the detection limit of the method if the pollutant is not detected). Proposed § 122.68(a)(2) sets the multiple at five for most cases, but proposed § 122.68(a)(3) provides a mechanism for applying for a multiple other than five for particular effluents. Permittees who exceed the application-based limits established by § 122.68(a)(2) are subject to the same consequences (e.g., enforcement or permit modification) as any other type of permit violation.

No explicit limits are set for pollutants which are not required to be reported in the application. However, as noted above, the list of reportable pollutants may be expanded in the future, and BAT control equipment for the toxic pollutants will also serve to control many non-reported pollutants in the interim. Furthermore, the permitting authority may always modify a permit for cause, including the situation where biomonitoring tests identify a discharge as significantly toxic despite the installation of BAT equipment designed to control the reported pollutants. See §§ 122.9(e) and 122.73 of the proposed consolidated permit program regulations.

The factor of five for reportable pollutants was developed as a general measure of the magnitude of variation of pollutant levels normally found in waste streams. In recognition of the fact that the levels of pollutants in some waste streams may vary by a factor of more than five, § 122.68(a) includes a provision allowing permittees to demonstrate through testing that another multiplier is appropriate.

When a pollutant is not detected in a waste stream or is not reported as required in an application, the application-based limits under § 122.68(a)(2) are established as a multiple of the detection limit of the analytical method. Detection limits are usually included in the test methods promulgated under 40 CFR Part 136 (these limits are summarized in section E of the instructions to the consolidated application form, which appears as a public notice elsewhere in today's Federal Register). Where an approved method does not specify a detection limit, the detection limit may be determined by the applicant using standard analytical practices.

The proposed regulations also specify a detection limit of 10 μg/l (10 ppb) as the lowest level of detection that will be applied. In many cases, the actual detection limit is lower than 10 μg/l if a highly sensitive detector is used (e.g., electron capture), but for the purposes of the application-based limit, the detection limit is set to reflect the use of the least sensitive approved method.

The concept of an application-based limit was originally raised in the August 21, 1978 proposal of § 122.14(a), which provided that "[t]he permittee shall not discharge any pollutants for which information was requested in the application except as expressly authorized by the permit" and explained further in a comment that "the permit may specify that discharge levels for [the reported] pollutant are not to exceed the levels reported in the application." Today's proposal, which is less strict to account for normal variability of pollutant levels in waste streams, continues the philosophy that dischargers are responsible for their discharges and should not be permitted to significantly increase pollutant discharges above reported levels.

The reason for introducing a multiplier in today's proposal is not to allow permittees to increase their discharges, but to provide a sensible ceiling in acknowledgment of normal waste stream variability. The Agency believes that the multiple of five will ensure that pollutant discharges do not significantly increase from reported levels, without burdening permittees with technologically unreasonable limits. As

stated above, where the multiple of five does not adequately reflect the innate variability of pollutant levels in a waste stream, the proposed regulation affords the discharger the opportunity to demonstrate through testing that another multiplier is appropriate.

The application-based limit is clearly authorized by the Clean Water Act. Section 101(a)(1) of the CWA declares "the national goal [is] that the discharge of pollutants into the navigable waters be eliminated by 1985." Allowing dischargers to increase their pollutant discharges would contravene that goal. The application-based limit is also consistent with the technology-based requirements of section 301(b) of the CWA. Clearly, any level of pollution control which the applicant is already attaining is achievable through BAT or BCT.

The multiplier approach to establishing limitations for pollutants reported in an application form but which are not specifically limited in a permit was developed after extensive consideration of alternative approaches. The principal alternatives are:

1. Limit discharges to the levels reported in an application (as in the August 21, 1978 proposal of § 122.14(a));

2. Set pollutant-specific limits which would apply to all dischargers, e.g., no discharger shall discharge pollutant Y at concentrations greater than Z mg/l;

3. Allow applicants to choose a limit for each pollutant to which they would be willing to be held;

4. Limit applicants to reported levels of certain indicator pollutants only; or

5. Establish a biomonitoring-based overall toxicity limit.

All of these alternatives have certain advantages and certain disadvantages.

The first alternative would provide maximum environmental protection by minimizing allowable discharges. However, as mentioned previously, normal waste stream variability precludes the strict approach of limiting pollutants to reported levels.

The second alternative has the virtue of simplicity and clarity. Unfortunately, this approach cannot be supported by existing effluent data. Therefore, this option was rejected, at least for the present.

The third alternative also holds a certain attraction for its simplicity. Its deficiency lies in its leniency. It would be an ideal method for dischargers willing to accept reasonably low limits. However, for those dischargers who wished to circumvent liability by selecting inordinately high limits, protracted disputes would be unavoidable. This option is analogous to allowing applicants to select their own permit limits and, in the opinion of the Agency, would not lead to effective control of toxic pollutants.

The fourth alternative would serve to restrict excessive discharges of certain toxic pollutants in some instances. However, its utility is limited. While indicators are valuable in certain cases in helping to regulate the installation of BAT equipment to control specific toxics which have been identified in some waste streams, they cannot be applied effectively in all situations to ensure that discharges of the 129 toxic pollutants will not increase significantly from reported levels. As a result, this option was rejected.

The last major alternative considered was to set an overall toxicity limit on each waster stream based upon biomonitoring tests required of each applicant. While biomonitoring has certain uses, tests on complex waste streams to determine characteristics other than acute toxicity, such as chronic toxicity, carcinogenicity, and mutagenicity, are not well established. Further, biomonitoring for acute toxicity is not effective in detecting or limiting large discharges of pollutants which occur at low concentrations, such as in waste streams which are diluted after treatment by large volumes of noncontact cooling water. Further, the cost of conducting biomonitoring tests to determine chronic toxicity, carcinogenicity, and mutagenicity would be much higher than the costs of pollutant analyses required by proposed § 122.64(d). As a result, this alternative was also rejected. As explained in section III–B(2) of this preamble, however, biomonitoring tests are very useful in many instances. They will therefore play an important role in the Agency's strategy for implementing BAT-level control of toxic discharges.

After considering the other alternatives and finding them inadequate, the Agency selected the multiplier approach. The principal remaining issue is the selection of a multiplier which is justifiable both analytically (accounts for variability) and environmentally (protects against significant increases in discharges of toxic pollutants).

Several commenters on the NPDES proposal of August 21, 1978 recommended the multiplier approach and suggested appropriate multipliers despite the fact that the Agency did not specifically raise this issue in the proposal. The suggestions were as follows:

1. A major industrial discharger expressed its support of proposed § 122.14(a) (renumbered in today's proposal as § 122.66(a)) and the accompanying comment, but suggested that permits contain the following language:

"For all pollutant(s) for which discharge is not limited or authorized in this permit by explict numerical effluent limitations, the permittee shall limit discharges to the amount declared at the time of permit application plus the additional amount or margin otherwise prescribed by the paragraph. If in the permit application the quantity of discharge was declared as a true measurement of discharge or was not otherwise identified, the permittee shall limit the discharge of such pollutant to an amount no more than fifty (50) percent greater than the average amount declared in the application. If in the permit application the presence of such pollutant was declared but the quantity of discharge was only estimated, the permittee shall limit the discharge of such pollutant to a level no more than one hundred (100) percent greater than, or twice the average amount estimated in the application." (Emphasis in the original).

2. Another commenter suggested that permittees be allowed to discharge pollutants which are not otherwise limited "so long as the levels of the pollutants in the discharge are within an order of magnitude (i.e., a factor of ten) of the levels set forth in the application."

3. Another commenter did not suggest a specific multiplier but stated that "variability factors should be comparable to those applied to annual averages used in effluent limitation guideline development for several industries."

A fourth commenter suggested that the application-based limit should simply reflect the "margin of error of both flow and analytical techniques."

In developing the multiplier used in this proposal, the Agency recognized that developing a single all-encompassing factor to describe the upper limit of pollutant variability in all kinds of industrial waste streams would be extremely difficult, if not impossible. A large factor, e.g., several orders of magnitude, could be used, but at the expense of abandoning the original purpose of the regulations, to protect against significant increases in discharges of pollutants not specifically limited in permits.

The Agency then decided to take the more practical approach of selecting a multiplier high enough to account for the variability of pollutants in waste streams that has been observed for the general case, and to provide an opportunity for each discharger with an unusually high range of variability to demonstrate its case and to qualify for a different factor.

Variability in the levels of pollutants found in waste streams is largely a result of the following:

1. The degree to which the sample taken from the waste stream is representative of the waste stream;

2. The accuracy and precision of the analytical method;

3. Fluctuations of pollutants in waste streams due to varying amounts of the substance in the raw material or as the result of the process; variations in the use of cleaners, algicides, solvents, etc.; effects of chemical reactions taking place in waste streams; and other factors.

With good sampling and analytical practices, the maximum margin of error resulting from the first two sources of variation above should be no more than ±100%. Since all of the Agency's studies of variability to date are based on actual samples, this margin of error is largely subsumed within the variability factors described below.

The Agency has analyzed in depth the long and short term variability of pollutant levels in the discharges of each of four plants in the pesticides industry. Table IV presents the variability factors developed in this study demonstrating the relationship between the daily maximum and the long-term average values for several pollutants. The number of observations is in parentheses.

Table IV.—Variability Factors in the Pesticides Industry

[Relationships between daily maximum and long-term average values]

	BOD	COD	TSS	Pesticide chemicals
Plant:				
3	———	———	———	9.4 (244)
21	7.7(354)	———	5.4 (360)	8.9 (341)
28	———	1.8 (62)	———	12.2 (62)
41	2.8 (96)	1.5 (121)	2.5 (122)	———
Weighted average	4.6 (106)	1.8 (213)	4.7 (482)	7.8 (877)

The samples used to develop the above data were collected on a 24-hour basis. The test requirements for determining limits for organic pollutants for the purpose of § 122.68(a) will be a 72-hour Composite sample (or 3 consecutive 24-hour samples), which should have a substantial mitigating effect upon the variability factors for pesticides described above.

An analysis of the discharges of the same plants to determine the relationship between the long-term average and the 30-day average yielded variability factors of 1.1 to 1.5 for BOD, COD, and TSS and of 1.3 to 1.6 for the pesticides.

The Agency has frequently used multipliers in the past to describe plant-to-plant variations in developing effluent guidelines. Typically, effluent guidelines contain daily maximum limits which are several times the mean of the results of samples collected and analyzed from several plants in the subcategory. These multipliers are selected so that the discharge on any particular day may be predicted with a high degree of confidence to be below the daily maximum limits.

Multipliers in most of the guidelines promulgated to date have been in the range of 1½ to 3, which generally have been used to set daily maximum limits for traditionally regulated pollutants. Specific organic pollutants are often subject to the wider ranges of variability. Therefore, the multipliers of 1½ to 3 are almost certainly too low for purposes of proposed § 122.68(a)(2).

It should be noted, however, that the function of a multiplier in effluent guidelines is slightly different than its function in proposed § 122.68(a)(2). On the one hand, guidelines are based upon analyses of several samples, allowing a smaller multiplier to be used than is justified by the minimum requirement of one single sample used by an applicant. On the other hand, guideline multipliers must account for variability between plants so that a single limit may be made uniformly applicable throughout a subcategory, while proposed § 122.68(a)(2) need only account for the variability of a pollutant in a single waste stream. Overall, this latter difference implies the use of a smaller multiplier in proposed § 122.68(a)(2) than is used in developing effluent guidelines.

After considering the above, and after consultation with industrial groups, environmental groups, and with Federal and State permit writers, the Agency determined that a multiplier of five is appropriate to describe the normal variation of pollutants in most waste streams.

While the Agency has selected the multiplier of five based upon the best available data for the purpose of this proposal, it recognizes that its data base is incomplete. The Agency solicits comments and data on waste stream variability in various industries and on the question of whether different multipliers should be applied to different industries. Comments are also solicited on the question of whether different multipliers should be applied depending upon the reported levels (e.g., a higher multiplier when pollutants are reported at low concentrations and a lower multiplier when pollutants are reported at high concentrations).

In any case, the Agency recognizes that certain waste streams may be so variable that the reported levels may be exceeded by more than the finally promulgated multiplier. If the applicant believes that this may be the case, §122.68(a)(3) of today's proposal provides an opportunity to demonstrate through testing and statistical analysis that a higher multiplier is appropriate.

In developing an alternative multiplier, proposed § 122.68(a)(3) requires the submission of ten data points (24-hour samples analyzed for the pollutant of concern), and a statistical analysis to develop a limit representing an upper 99% confidence bound for the pollutant. Based on the ten data points, an acceptable computation of the upper confidence bound is:

$$L = \exp(\bar{Y} + 2.96S),$$

where

$$L = \exp(\bar{Y} + 2.96S),$$

where

$$\bar{Y} = \frac{1}{10} \sum_{i=1}^{10} \ln X_i;$$

$$S^2 = \frac{1}{9} \sum_{i=1}^{10} (\bar{Y} - \ln X_i)^2;$$

L is the upper 99% confidence bound;

L is the upper 99% confidence bound;
X is the pollutant concentration of each data point;
ln is the natural logarithm; and
exp( ) is the antilogarithm.

The statistical interpretation of L is that a future concentration measurement of the particular pollutant will not exceed L with a confidence of 99%.

The equation described above is based on the classic two-sample statistical confidence region where the underlining distribution is lognormal and the first sample has size ten and the second has size one. The result of the equation is a confidence region with expectation being 99%. This general approach has been the basis of many effluent limitations guidelines and many limitations in negotiated permits [i.e.,

those for which no effluent guidelines existed) for the past five years. Over this period of time, the two major assumptions most closely examined in this methodology have been: (1) The assumption of lognormality; and (2) the size of the confidence associated with the region.

The Agency's experience in analyzing the data for each of the effluent guidelines it has promulgated has shown that in all cases the plant effluent data was lognormal or that the lognormal distribution overestimated the variability of actual plant effluent data. Thus, even where the data was not lognormal, the assumption of lognormality benefited the permittee.

Historically, the 99% level has been shown to be conservative enough to act as a control of the permittee's treatment system and liberal enough to allow normal operating variability without the risk of violation, except in the most severe cases. In addition, the risk to the permittee has been further reduced by the recent promulgation of a new "upset" provision in the NPDES regulations (§ 122.14(1) of the NPDES regulations, renumbered as § 122.66(c) in the proposed consolidated permit regulations which appear elsewhere in today's Federal Register). This provision provides permittees with an affirmative defense to enforcement actions brought for noncompliance with permit limits, based on factors beyond the control of the permittee. Thus the risk of being held liable for violations due to normal variations in effluents has been reduced to well beneath one per cent.

The Agency is also considering other procedures for demonstrating an alternative multiplier. We request comments on the methodology described here, and invite suggestions on other mechanisms to minimize the number of samples required and to make the most efficient use of this data to accomplish the goals of proposed § 122.66(a).

VI. Monitoring and Reporting

A. *Typical Monitoring Scheme*

Specific monitoring requirements are not contained in the NPDES program regulations promulgated on June 7, 1979. These regulations require in § 122.22 (renumbered as § 122.14 in the proposed consolidated regulations) that monitoring requirements be established in permits, but leave the permit writer the discretion to establish the type and frequency of monitoring requirements which are most appropriate to the particular discharger (although it should be noted that future effluent guidelines may specify monitoring requirements).

Similarly, today's proposal, while clarifying in proposed § 122.71(a)(1) that monitoring requirements may be set for pollutants controlled by application-based limits, does not set specific monitoring requirements. However, for the purpose of demonstrating the range of choices available to permit writers under the new permitting strategy, a typical monitoring scheme (assuming the absence of a monitoring requirement specified by an effluent guideline) is presented below.

Typically, permittees will be required to monitor all pollutants which are specifically limited in the permit on a periodic basis to insure compliance with the permit limits. This conforms to existing practices. Monitoring costs will thus be substantially the same as at present except in those situations where a permit contains limits for specific organic toxics which require GC or GC/MS analysis.

Where the indicator approach is used, the permittee may be required to occasionally analyze for some or all of the toxic pollutants to insure that the treatment equipment is being operated and maintained properly and is adequately removing the toxics, and to help insure compliance with the application-based limit of § 122.66(a)(2). This monitoring will usually (but not always) be required only for those pollutants reported as present at significant levels in the application. Monitoring for the organic toxics might be based upon 24-hour composite samples for this purpose, resulting in lower costs than the 72-hour application sampling requirement imposes.

Permits might also make waste characterization requirements contingent upon other events. For example, as discussed in the next section of this preamble, a violation of a certain permit limit may be used to trigger a requirement to monitor for some or all toxic pollutants.

Another type of monitoring which may be required of permittees is biological monitoring, such as acute aquatic toxicity LC_{50} tests (appropriate test methods are contained in EPA's *Methods for Measuring the Acute Toxicity of Effluents to Aquatic Organisms*, EPA–600/4–78–012). These acute toxicity tests are generally less expensive than waste characterizations for organic pollutants. Therefore, some permit writers may require waste characterizations only sparingly but require acute toxicity tests on a more frequent basis. If the results of such tests indicate that a discharge is acutely toxic, the Director may then require the permittee to conduct a full waste characterization or take some other necessary action to detect the source of the toxicity. This authority is provided by section 308 of the CWA or similar State authority (see the Decision of EPA's General Counsel, January 11, 1979).

B. *Additional Monitoring When Indicator Limits are Violated*

One of the problems with using limits on indicator pollutants to control discharges of toxics is that a violation of a limitation on one or more indicator pollutants is not necessarily linked to an increased discharge of toxic pollutants. The response of the permitting authority and the discharger to any permit violation depends on the seriousness of the violation, which is not immediately apparent when a limitation on an indicator is violated. A violation that is accompanied by an increased discharge of toxics will require corrective action much greater in speed and extent than a violation of the indicator pollutant alone.

The Agency is considering addressing this problem by establishing a general regulation requiring permittees to conduct additional monitoring when they violate permit limitations on indicator pollutants. Under this requirement, each permit would contain a clause which would trigger a monitoring progam when certain permit limits are violated. This program would include monitoring appropriate for each site to determine the cause of the violation, necessary corrective measures, and the extent to which the violation resulted in discharges of toxic pollutants. Monitoring requirements might include an analysis for specific toxic pollutants, an effluent scan, or biological monitoring tests for acute toxicity. Under this scheme, each violation of an indicator limit would be evaluated on a case-by-case basis by the permitting authority to determine whether or not the additional monitoring program is necessary.

The authority to require additional monitoring is already available under section 308 of the CWA or similar State authority. However, the scheme outlined above would establish a monitoring program for each permittee at the time the permit is issued, rather than at the time the violation occurs. Because the monitoring program is clearly laid out and agreed to in advance, the permittee will be prepared to put it into effect as soon as the permitting authority determines that it is necessary.

The information generated by the monitoring program will allow an in-depth assessment of the seriousness of

the violation. A large discharge of toxic pollutants might cause a relatively small violation of a limit for an indicator pollutant, while a much greater violation might be accompanied by no increase in toxic pollutants. Information on the toxicity of the effluent will enable the permitting authority to decide the extent of further action needed to mitigate the effects of the violation and to determine whether additional permit limits are necessary to prevent future violations.

A regulation establishing this monitoring requirement has not been proposed in today's Federal Register (although a similar provision will appear in the proposed effluent limitations guidelines for the leather tanning industry), because the Agency has not yet developed a detailed scheme for implementing this provision. The Agency intends to determine precisely which monitoring techniques will be required and what criteria permitting authorities will use to determine whether a violation should trigger the monitoring. During this process, the Agency will consider how the information will be used and what the costs will be.

The Agency requests comments on the potential value of the scheme outlined above, and asks for suggestions on the most practical way to implement such a scheme.

VII. Economic and Resource Impacts of Application Reporting Requirements

A. *Unit Costs of Sampling and Analysis*

The incremental costs imposed by the new sampling and analysis requirements consist of the following two elements: (1) Costs imposed by the new requirement that certain applicants sample and analyze certain wasted streams for 115 organic toxic pollutants, and (2) costs imposed by the revision of existing reporting requirements for pollutants other than the organic toxics, including additions to and deletions from the current list of pollutants which must be reported and changes in the nature of reporting for certain pollutants retained on the list.

1. *Sampling and analysis of 115 organic toxics.* Sampling consists of 72-hour composites (and a series of grab samples for volatile organics). Analysis consists of either GC/MS screening (identification) followed by GC (or in the case of polynuclear aromatic hydrocarbons, LC) quantification, or GC/MS quantification alone.

Cost data was developed from a variety of sources, which yielded figures over a relatively large range. The rapidly declining trend of these costs, resulting from laboratories' increased usage of and familiarity with the analytical methods, suggests that the costs estimated in this proposal will decrease by the time the revised application requirements become effective. However, the Agency's costs estimates are based upon present-day unit prices, as of Spring 1979. The discussion below provides a brief review of available data followed by the Agency's estimates.

(a) *Sampling Costs.* Sampling costs will vary significantly, depending upon the choice of personnel involved in the operation. While some applicants will have in-house sampling capability (or at least partial capability), others may have to rely completely on the use of more expensive independent contractors.

The analysis below assumes that sampling will be performed manually rather than by automation. Manual sampling is more labor-intensive and costlier than automated sampling, but it is necessary in certain situations where automated equipment cannot be used (e.g., where flammable or explosive vapors may be present or where very large samples are required). Since automated sampling can be used in many cases, the total cost of sampling is overestimated here.

Using current prices, the approximate sampling cost breakdown in the case of complete reliance upon independent contractors (assuming the use of a 4-person sampling team for a 4-day sampling trip) is as follows:

Technicians @$60/day, shifts = $240 × 4	× 3	sampling $960
Supervisor @$120/day = 120 × 4		480
Reports (1 person-day, supervisor)		120
Overhead on contract salaries (150%)		2340
Equipment set up on site, 2 man-days		160
Disposable equipment, sample container preparation		130
Sample air transport		100
Subtotal, less personnel air fares, local travel and per diem		4290
Personnel air fare (estimated average) = $600/ea.		600
Personnel per diem/local travel = $50/day/person		800
Total		5690

Costs in a number of these categories, such as salaries, overhead rates and travel distances may vary significantly. However, the Agency believes that $5690 is a reasonable estimate of the discharger's cost to have an independent 4-man team to undertake a 4-day sampling trip.

The situation described above is the most expensive case. By using an experienced contract supervisor (and possibly contract sampling equipment) together with in-house technicians, sampling costs may be reduced by approximately $2650 because of reduced overhead, travel, and per diem expenses. (The presence of the supervisor will insure that the sampling results are sufficiently reliable for purpose of the application, offsetting a potential lack of experience by house technicians in this type of sampling.) This leaves a net sampling cost of approximately $3200 per 72-hour manual composite sample.

A sampling team can sample at least two (and possibly three) outfalls (or an intake plus one or two outfalls) simultaneously, depending on their proximity and on the sampling techniques required for each. While equipment costs must be duplicated, personnel-related costs need not be. Thus, the estimated cost per sample for two outfalls is $1600. If three outfalls can be sampled simultaneously, sampling costs per outfall decline further. For the purpose of computing the total incremental cost of complying with the proposed application requirements (section VII–C below), an average sampling cost of $2500 per sample will be assumed.

(b) *Cost of Analysis of GC/MS Screening Followed by GC Quantification.* For the purpose of determining GC/MS screening and GC quantification costs, it is assumed that applicants will forward their samples to independent laboratories for analysis.

The Agency has received data on GC/MS screening costs from several sources. Unit costs for over 2,000 analyses conducted as part of the effluent guidelines development have been decreasing steadily and presently start at a large-volume price of approximately $700. Industry estimates range widely ($400 to $4,000) due to differing assumptions concerning the "average" complex effluent, the degree of quality control which they anticipated might be required by the application requirements, standardization procedures and other factors. Independent laboratories have most frequently cited figures in the range of $1,000 to $2,000. Manufacturers of GC/MS equipment contend that recent improvements in technology, such as reductions of the time required to perform an analysis, have reduced the cost to as low as $400 per sample.

The above data, together with the fact that increased volume and improved technology have been steadily reducing costs, indicate that $750 may be a reasonable estimate of GC/MS screening costs. However, the Agency is assuming, for purposes of assessing the impact of its reporting requirements, that the cost will be $1,000.

Unlike GC/MS screening, which has a relatively fixed cost regardless of the number of pollutants analyzed (although

moderate cost reduction is obtainable by eliminating entire classes of pollutants from the analysis). GC or LC quantification costs are roughly proportional to the numbers of pollutants to be analyzed, as described below.

Ten to fifteen different GC or LC procedures may be needed to analyze for all 115 organic toxic pollutants. It is not possible to predict in advance how many of these organic pollutants will be found in a given effluent and how many of these could be analyzed by the same procedure.

The plant surveys which EPA has conducted as part of its project to develop new BAT effluent guidelines for toxic pollutants in 34 industries indicate that the number of organic toxic pollutans found in a given effluent varies widely (0–50), averaging about 5 organic toxic compounds per waste stream. Information is insufficent to allow assumption as to how many of these might in a particular situation be analyzed by using the same GC or LC procedures. It is therefore assumed that each of five pollutants would have to be determined by a different procedure at a cost ranging from $50 to $100 each (based upon sources of information similar to those used to generate GC/MS cost data). The Agency has assumed $75 per pollutant. Thus, for example, if five organic toxics have been identified by the GC/MS screening, about $375 must be expended to quantify those pollutants using GC and LC methods.

(c) *Cost of Analysis by GC/MS Quantification.* GC/MS Quantification may be approximately twice as expensive as GC/MS screening due to a need to repeat certain portions of the analysis using reference standards. The Agency assumes that the method used will require duplicate analyses and thus estimates the cost of GC/MS quantification as $2,000 (double the qualitative cost).

GC/MS screening followed by GC or LC quantification is less expensive than GC/MS quantification whenever the applicant's waste stream contains relatively few organic toxic pollutants. based on the above GC or LC estimate of $75 per pollutant, whenever GC/MS screening identifies more than 13 organic toxic pollutants, then GC/MS quantification becomes more cost-effective than GC or LC quantification. For example, treated discharges will, in most instances, be less expensive to analyze than those which are untreated or inadequately treated. The method of quantification selected by the applicant may depend on its assessment of how complex its waste stream is.

For purposes of computing the total incremental cost of complying with the proposed application requirements (section VII–C below), it will be assumed that all applicants will use quantitative GC/MS at $2,000 per analysis. Adding $2,000 for analysis to the assumed average sampling cost of $2,500, the average cost of sampling and analyzing the toxic organics will be assumed to be $4,500 per outfall.

2. *Sampling and analysis of pollutants other than the organic toxic pollutants.* The methods for analyzing for most of the pollutants other than the organic toxics (e.g., metals, ammonia, and other inorganic pollutants) are well established. Cost data for these pollutants is therefore more certain than the cost data for organic pollutants.

For sampling, today's proposal will result in little or no incremental cost for the inorganic pollutants over the cost of existing application requirements. Although certain pollutants formerly reported on a qualitative basis will now be required to be reported quantitatively, sampling techniques and their associated costs will remain substantially the same. Further, sampling for both the organic toxic pollutants and the other reported pollutants will usually be done at the same time and involve similar methods of collection (although a shorter interval and different preservation methods will be used for the inorganic pollutants). Therefore, any differences in sampling costs for the pollutants other than the organic toxics will be easily accounted for within the range of variability associated with the more expensive sampling costs for the organic toxic pollutants.

For analysis, the cost will increase somewhat from present requirements for the inorganic pollutants. These result from requirements that applicants analyze for certain pollutants (BOD, COD, TSS, total cyanide, and total phenols), whereas the old application allowed submission of estimates (although it should be noted that for these parameters, applicants usually submitted analytical data). In addition, new analytical costs will be incurred from a requirement to test for two pollutants not required to be reported by the present application, TOC And TKN. This increase in cost will be more than offset by the deletion of reporting requirements for certain other pollutants (algicides, calcium, chloride, chlorinated organic compounds, organic nitrogen, potassium, settleable matter, sodium, and specific conductance), and by the use of estimates instead of actual testing for certain other pollutants which presently are required to be tested.

The Agency estimates that incremental sampling and analysis costs for pollutants other than the organic toxics will range from $180 to $400. For purposes of computing the total incremental economic impacts in section VII–C below, an incremental cost of $300 is assumed.

B. *Unit Reporting Costs*

The preparation of the information which is required by proposed § 122.64(d) will require staff time, resulting in costs in addition to the analytical testing costs. These reporting costs include data development, collection and compilation by various levels of the applicant's staff (clerical, administrative and professional) and review by legal advisors, professional supervisors and managers.

The unit reporting costs will vary, depending on the nature and extent of the applicant's relevant activities and on the applicability of various reporting requirements to the applicant.

The chief factors are:

1. Group I dischargers will expend greater effort to study waste stream variability (including an examination of processes and raw materials) than Group II dischargers. Many Group I dischargers will also carefully study their waste streams and sites for potential discharges, leaks or spills of toxic pollutants in order to obtain exclusions from section 311 liabilities and requirements. Group II applicants, who are not generally expected to have significant pollutant discharges beyond the more traditional parameters, will be relatively unconcerned by these considerations.

2. Major dischargers will generally have more complex operations than minor dischargers. For major dischargers, large numbers of different processes may create complex waste streams which are then discharged through several outfalls. These considerations will require major dischargers to expend significantly more resources than minor dischargers.

The unit reporting costs of the new application form are summarized in Table V.

Table V.—*Unit Reporting Costs of New Application Form*

[Hours/source]

Type of question	Group I discharger		Group II discharger	
	Major	Minor	Major	Minor
General information	3	2	3	2
Environmental engineering data	22	8	16	6
Analysis of effluents	34	26	21	6
Graphics	4	4	4	4
Discharges not from outfalls	13	7	9	2
Variability analysis	26	14	4	2
Section 311 discharges	26	10	4	3
Total	128	71	61	25

In order to assess the incremental reporting impact of the new form over the old form, the total unit reporting costs of the old form were also assessed. It should be noted that the reporting cost assessments performed for Office of Management and Budget on the original NPDES application form indicated an unusually low unit cost of completing that form. This low original baseline cost is attributable to the fact that a large portion of the NPDES application requirements would be fulfilled in many cases by submitting applications completed under the old Refuse Act Permit Program (RAPP) administered by the U.S. Army Corps of Engineers. When the NPDES program came into being, these RAPP applications were often accepted as NPDES applications, so that the reporting costs of the original form were reported as incremental costs. For this reason, the total cost of the old form was recalculated.

These recalculated unit reporting costs are summarized in Table VI.

Table VI.—*Unit Reporting Cost of Old Application Form*

[Hours/source]

Type of question	Group I discharger		Group II discharger	
	Major	Minor	Major	Minor
General information	3	2	3	2
Environmental engineering data	44	18	36	18
Analysis of effluents	17	7	14	4
Graphics	4	4	4	4
Discharges not from outfalls	0	0	0	0
Variability analysis	0	0	0	0
Section 311 discharges	0	0	0	0
Total	68	31	57	28

The reporting burdens imposed by the proposed application requirements are comparable to those imposed by the expiring form. A number of unnecessary and burdensome requirements in the expiring application form have been deleted, but these deletions are largely offset by expanded requirements in some cases (such as projections of the variability of waste streams), and by new requirements in others (such as the optional requirement for reporting hazardous substances to gain exemptions from section 311).

Table VII.—*Incremental Unit Costs of New Application Form*

	Group I discharger		Group II discharger	
	Major	Minor	Major	Minor
Old form cost	$1,855	$795	$1,520	$665
New form cost	3,690	1,990	1,625	560
Incremental cost	1,835	1,224	105	105

The hourly reporting costs shown in Tables V and VI were translated into dollars by determining the time spent answering each type of question shown in those tables by three levels of personnel: Clerical (assumed to be $10/hour), mid-level business and technical ($25/hour), and professional, legal and managerial ($50/hour).

Based on the above, the incremental unit reporting cost of the new form is presented in Table VII.

Table VII illustrates that while the unit reporting cost of the new form is generally greater than the cost for the old form, the new form focuses reporting requirements on those industries with the greatest potential for toxic discharges (Group I). Note, however, that the incremental cost savings shown above for Group II minor dischargers is probably overstated since many of these dischargers completed a special "short form" rather than the complete NPDES application form analyzed above.

C. *Total Incremental Costs of Complying With the Proposed Application Requirements*

This section discusses the total additional costs imposed by the application requirements of proposed § 122.64(d) over those imposed by existing requirements. Section VIII of this preamble will also discuss other reporting costs which are not imposed by the proposed application requirements, including (1) the extra costs incurred by applicants who choose to analyze for section 311 hazardous substances, and (2) new monitoring costs (after permit issuance) which permit writers might be expected to impose, on a case-by-case basis, as a result of the new emphasis on the control of toxic pollutants.

The Agency has computed the total incremental costs of its new requirements by multiplying the unit costs derived in sections VII–A and VII–B above by the number of applicants or activities which are expected to incur those costs. The facts, estimates and assumptions used to compute the total incremental costs of the form are summarized in Table VIII.

Table VIII.—*Basis For Calculating Incremental Costs*

	Group I dischargers		Group II dischargers		Total
	Major	Minor	Major	Minor	
Number of dischargers	2,767	11,600	1,548	27,862	43,777
Number of intakes tested	1,383	5,800	672	13,931	21,886
Number of process wastewater outfalls	4,150	5,800	1,716	13,931	25,597
Number of process wastewater outfalls	5,534	11,600	2,580	27,862	47,576

1. *Number of applicants.* The number of existing industrial dischargers who will use the new application form is based upon the Agency's records of dischargers who presently have permits and may be expected to reapply upon permit expiration.

It should be noted that some dischargers will have had their effluents tested by EPA as part of EPA's effluent guidelines development program. Where such testing was consistent with the proposed application requirements, those test results may be reported and the applicants need not perform the analyses on its own. However, the analysis below assumes all applicants will do their own testing so that the estimated total cost is probably overestimated.

2. *Number of outfalls per applicant.* The Agency has estimated the average number of outfalls per discharger, based upon information received from EPA's Regional offices and from State offices. Major dischargers have, on the average, two nonprocess wastewater outfalls and one and a half process wastewater outfalls (i.e., 50% of major dischargers have one process wastewater outfall, and the remainder have two). On the average, minor dischargers have one nonprocess wastewater outfall and one half of a process wastewater outfall each. These are averages used for computation of total impacts; particularly plants may differ significantly. For example, certain major dischargers have as many as 20 process wastewater outfalls.

3. *Number of intakes to be tested by applicants.* In addition to sampling and analyzing outfalls, some applicants will be examining their intakes to obtain credit for pollutants in their intakes under § 122.70(g) of the consolidated permit program regulations. This credit is available only under certain circumstances, e.g., where the intake source is the same body of surface water (as opposed to a well, piped-in supply or other source) that receives the discharge for which the credit is sought. Another factor tending to reduce the total number of influent analyses is that plants with many outfalls generally have only one source of surface water influent (e.g., a single adjacent stream or lake). In light of the above considerations, the Agency has estimated that one half of all applicants will sample and analyze one intake point.

Based on the number of dischargers, tested intakes, process wastewater outfalls and nonprocess wastewater outfalls summarized above, Table IX sets forth subtotals and totals of all the costs imposed by the regulations over the next five years.

Table IX.—*Total Incremental Costs of Proposed Application*

	Group I dischargers		Group II dischargers		Total
	Major	Minor	Major	Minor	
Cost of sampling and analyzing for organic toxics	$84,600,000	$33,600,000	0	0	$78,440,000
Incremental cost of sampling and analyzing for pollutants other than organic toxics	3,000,000	7,140,000	$1,374,000	$16,232,000	27,746,000
Incremental reporting cost					16,994,000
Total incremental cost					123,139,000

The total incremental cost of complying with the proposed application requirements is approximately $123 million. The annualized cost (spreading the application costs over the five year duration of NPDES permits) is approximately $24.6 million per year.

While most small businesses subject to the NPDES program will be minor dischargers sustaining minimal reporting burdens, some will have highly toxic, variable or complex discharges which will increase the difficulty of preparing applications. While the Agency has concluded that these application requirements will not force closures (see section VII–D below), certain small businesses may find the proposed requirements burdensome. As described in section IV of this preamble, the Agency has sought to minimize burdens consistent with the requirements of the CWA (particularly the 1977 amendments). Comments are solicited on how reporting requirements for small businesses may be reduced without sacrificing the objectives and requirements of the CWA.

D. *Economic Impacts Upon Selected Industries*

The Agency conducted an analysis of the economic impact of the revised application reporting requirements upon Group I dischargers with process wastewater discharges (upon whom the chief burden of the new requirements fall). The analysis focused primarily on those facilities which will be most affected: Marginal, small volume facilities in Group I industries. The analysis was conducted for five industries—leather tanning, wood preserving, electroplating, foundries, and iron and steel. The first four industries were selected because many of the plants are small and thus more sensitive to newly imposed cost burdens than other industries. The iron and steel industry was selected to examine the analytical costs of a typical plant which contains a large number of process wastewater outfalls, resulting in correspondingly large analytical costs. No industry was discovered which consisted predominantly of small firms with more than one process wastewater outfall.

Costs vary significantly from plant to plant depending on the number of outfalls at a particular plant. The combined analytical and reporting costs for a plant with one process wastewater outfall will be small, on the order of $5,000, while the cost to a steelmaking facility with 10 process wastewater outfalls may be as high as $25,000.

The impact on prices, profits, and plant closures should be small for most industries although impacts may be significant in individual cases. The key economic indicators that were examined to estimate economic impacts are the ratios of testing costs to sales, to profits, and to total pollution control investment. The ratio of testing cost to sales indicates impact on price increases while the ratio of testing cost

to profit provides a rough indication of impact on profits and even closures. Table X summarizes the results for average small plants in each industry analyzed during the year that the permit application is submitted.

Table X.—*Economic Impacts of Testing Costs*

(figures in percentages)

Industry	Ratio of testing costs to—		
	Sales	Profits	Pollution control cost
Small tanneries	0.11	6	1.4
Wood preservers	3	N/A	0.7
Electroplaters (1–4 person job shops)	5.6	70	N/A
Foundries (10 person shops)	2	40	N/A
Iron and Steel	N/A	N/A	1–2

The economic data for the leather tanning, wood preserving, and foundry industries were obtained from economic impact analyses which have been or which are being prepared in support of forthcoming BAT effluent guidelines. Data for the steel and electroplating industries were taken from an earlier estimate developed when BPT guidelines and secondary treatment guidelines respectively were promulgated. The data is the best which the Agency currently has at its disposal.

One shortcoming of the Agency's data and analysis is the inability to separate direct dischargers from indirect dischargers in most of the industries. Since our data base includes direct dischargers and the data indicates a possible impact on some small dischargers, the Agency decided to use this data in its analysis. Economic impacts will be overstated since many small facilities are not direct dischargers, and thus are not subject to NPDES requirements. In addition, many small facilities do not discharge process wastewater, and thus are not affected by these application requirements. The Agency requests additional information of economic impacts on small facilities, and on alternatives for minimizing these impacts.

1. *Leather Tanning Industry.* In 1977, the leather tanning industry consisted of 400 plants, of which 186 had effluent discharges. Of these, only 18 were direct dischargers; 170 were indirect dischargers. All but a few of these dischargers have only one process wastewater outfall. The average value of sales per establishment was about $3.5 million in 1977. The pretax return on sales has varied between 4.5 and 6.5 percent over the last several years. The direct dischargers are considerably larger than the average plant in the industry. For example, a small cattlehide chrome tannery has sales of $5 million. Although the new BAT guidelines have not yet been promulgated, it appears that BAT investment costs for this plant will be between $350,000 and $450,000. In this context, the application cost is small when viewed against either sales (0.11%) or BAT investment costs (1.4%). These percentages decrease significantly for larger facilities with sales of $16 million and BAT investment costs of about $675,000.

The effect on profits will be more noticeable. After-tax profits will be reduced by about 6 percent for a small tannery during the year that the permit application is submitted. Larger tanneries will be affected much less, with a profit reduction of about 1.5 %, although profit reductions are smaller by a factor of five if the application costs are spread over a five-year period. In all cases, the costs of waste stream testing will not affect the Agency's preliminary analysis for its forthcoming effluent guidelines that all existing direct discharges for the leather tanning industry are financially viable and should not close as a result of environmentally related expenditures.

2. *Wood Preserving Industry.* The wood preserving sector of the timber products processing industry contains only one direct discharger; thus the impact of the new requirements on this sector is slight. However, the Agency has developed considerably more economic data on this industry than for other similarly sensitive industries. Therefore, the Agency has studied the impact which the new reporting requirements would have upon wood preservers if they were direct dischargers. This analysis will serve with the foundry and electroplater analyses as an indication of the impact of the testing requirements upon small direct dischargers in other industries for which economic data bases are not as fully developed by the Agency.

The wood preserving industry also provides a good example of the impact of the testing requirements on a potential closure candidate. The industry has one highly vulnerable plant, based on a survey conducted in preparation of the Agency's BAT effluent guidelines. The testing costs for that plant are about 30% of sales and actually exceed expected profits. However, the testing costs are about 0.7% of the cost of pollution control investment. Thus, the dominant investment decision is whether to install the pollution control equipment, not whether to test the waste stream for toxic pollutants. On the other hand, these decisions are somewhat independent because the testing costs must be incurred at an earlier time and because business loans are less likely to be available to finance testing costs.

3. *Electroplating Industry.* The electroplating industry has a large number of small facilities. The average value of sales was $650,000 per establishment in 1977. According to a job shop survey which the Agency performed in 1977, 40% of the 3,000 job shops covered by Agency regulations were facilities with one to four employees. 90% of these discharge to POTW's. Since we were not able to separate indirect from direct dischargers, the assumption was made that direct dischargers are distributed among the different size groups in similar proportions to indirect dischargers. Based on a limited survey, it was concluded that average sales of facilities with one to four employees are about $89,000 while average profits are about $7,000. The application cost is thus about 5.6% of sales and 70% of profits for these small shops during the year that the permit application is submitted. Larger electroplaters will be affected much less, although there may also be significant impacts on sales and profits of some of the large facilities.

4. *Foundry Industry.* An analysis of the foundry industry also indicates that some smaller facilities may have difficulty absorbing the application cost. The Agency's financial data is only preliminary, but what is available shows that facilities with 10 or fewer employees (about 20% of the industry) have average sales of $250,000 and average profits of $12,400. The foundry industry is similar to the electroplating industry in that a large proportion (about 50%) of foundries discharge to POTW's, so that no application costs will be incurred for these facilities. Further, foundries with fewer than 10 employees rarely discharge process waste water, so that most facilities will not be required to test for toxic pollutants. Because of this, impacts are overstated, but for some of these smaller facilities, the application costs are about 2% of sales and 40% of profits during the year that the permit application is submitted.

5. *Steel Industry.* The Agency also examined the impact of the application form on the steel industry since some plants in the industry have a large number of process wastewater outfalls which must each be tested. Waste stream testing costs appear to be between 1 and 2% of BAT pollution control investment for a steel making

facility with 20 process waste water outfalls. Note that this is a worst case assumption; almost all steel facilities have less than ten process waste water outfalls, and most have three or less. Waste stream testing costs relative to pollution control should not be a significant factor in either plant closings or price increases in the industry, but the cost of waste stream testing could place a burden on small marginal facilities with numerous process wastewater outfalls.

The Agency is actively seeking information to more accurately characterize the overall sales, profits, pollution control investments, and typical numbers of process wastewater outfalls at plants in order to more accurately project impacts for the industries examined above. We also seek additional information on availability of loans to businesses to help finance testing costs, and on the aibility of applicants to pass through these costs.

The Agency also invites comments and data on the impacts of the testing requirements on industries other than those discussed above:

E. Impact of Reporting Requirements Upon Independent Laboratory Capability

Several commenters upon the August 21, 1978 proposed NPDES regulations suggested that the analytical requirements to implement the NPDES strategy would exceed laboratory capacity. The comments referred specifically to capacity to perform GC/MS analysis, since GC/MS is a fairly recent technological development. The Agency has investigated this matter and concluded that laboratory GC/MS capacity be sufficient to meet expected demand. However, current supply appears to be tight, and some delays in obtaining analytical services from laboratories may occur.

The application will require analysis by either quantitative GC/MS (for which we are assuming two runs through the machine), or by qualitative GC/MS (one run) followed by quantitative GC. Since the number of process wastewater outfalls and intakes to be tested for the Group I applicants is estimated to be 17,433, the number of GC/MS runs should be somewhere between 17,000 and 35,000. Analysis of the permit expiration dates for the Group I applicants indicates that the majority of GC/MS tests will be performed between October 1979 and December 1980. The average demand rate for GC/MS tests is projected to be between 1200 and 2300 analyses per month over this period.

Current laboratory experience indicates that a GC/MS instrument can perform at least 20 sample analyses per month on single shifts and 40 per month on double shifts. A recent manufacturer's survey of available laboratories identified 98 GC/MS systems in 55 laboratories which are capable of performing the required analyses. Current laboratory capacity potential thus appears to be about 2,000 analyses per month on a single shift basis and 4,000 analyses per month on a double shift basis. This capacity is in addition to the in-house GC/MS capacity which many industries and universities have for research and other purposes.

Thus, existing capacity exceeds expected demand. Further, some growth can be anticipated; GC/MS capability in service laboratories has doubled over the past two years. This swift increase is also a reflection of how easily additional laboratory capacity can become available to meet demand.

Thus, sufficient capacity appears to exist, especially if the existing equipment is used on a double shift basis. The Agency solicits comments on the current availability of laboratories with GC/MS capability and on the level of capacity growth which may occur over the next few years.

VIII. Miscellaneous Cost Estimates for Reporting Which is Not Required By Proposed Requirements

A. Optional Application Reporting of Hazardous Substance Discharges

Reporting of section 311 hazardous substances is optional; only those seeking exemptions from the requirements and penalties of section 311 will analyze or estimate levels of discharges of these substances. Although such reporting is not required by the proposed application requirements, the Agency has considered the associated costs to provide applicants with an estimate of what such optional reporting will cost.

The Agency has designated 299 hazardous substances (40 CFR Part 117, published at 43 FR 10474, March 13, 1978 and at 44 FR 10022, February 16, 1979). Many of these are also listed under section 307(a) as toxic pollutants. Since proposed § 122.64(d)(16) will require toxic pollutants to be analyzed and reported by all applicants who are likely to have such pollutants in their waste streams, it is assumed for this analysis that no incremental costs from the section 311 exemption option will result with respect to hazardous substances on the toxic pollutants list.

The remaining hazardous substances include many substances which dissociate into ions in water. Of these ions, all but about thirty will be required to be reported by proposed § 122.64(d)(16). If an applicant sought an exemption for all of the remaining thirty ions, the incremental cost for sampling and analysis would be approximately $150.

Seventy-four hazardous substances are not on the toxics list and do not dissociate. Virtually all of these are organics and may be analyzed by GC and GC/MS techniques. For the purpose of analytical cost estimation, the Agency assumes that these substances will be present at significant levels only in the process wastewater discharges from Group I industries.

Thirty-six of the 74 hazardous substances may be analyzed by straightforward extension of the GC/MS protocol which will be proposed in the near future. Significant modifications (e.g. chromatographic column changes or extraction solvent changes) might be required in order to analyze the remaining 38 compounds by the GC/MS method.

Also, 45 of the 74 compounds may be effectively decomposed during conventional secondary biological treatment and 7 more compounds are likely to be effectively removed from the effluent during secondary treatment by adsorption onto other materials. (Only 13 of the compounds which are not decomposed or adsorbed during secondary treatment cannot be detected by the GC/MS method.) A large percentage of industrial dischargers met BPT by installation of some form of conventional biological treatment, so the prospects that these substances will appear in an effluent meeting BPT permit limits due to unanticipated, but routine, low-level sources appear to be low. The Agency is therefore assuming that most applicants will not analyze for all hazardous substances, especially since estimates are acceptable for these substances in the application form. Rather, the discharger most likely will analyze for a few materials known to be involved in some phase of its operations plus an even smaller number of suspected low-level contaminants.

By rough analogy to the average of 5 toxic pollutants found in process wastewater outfalls from primary industries (although the number found has ranged up to 50 in some cases), the Agency is assuming that an industrial discharger may suspect that an average of 3 of the non-dissociated hazardous substances and 4 of the dissociated ions may be present in a given effluent and

elect to analyze for them in order to seek an exemption from section 311 liabilities.

The discharger may analyze for the non-dissociated pollutants by using either GC or GC/MS techniques. The use of quantitative GC methods for 3 pollutants at a cost of $75 per pollutant leads to an overall cost of $225. If the suspected pollutants are among those analyzable by the GC/MS method, the added cost should be no more than 10% greater than that for the organic toxic pollutants because the additional analysis can be done at the same time. The total projected analytical cost for the organic toxics required to be analyzed by the application form plus the additional non-dissociated hazardous substances is about $2,200 per sample, using quantitative GC/MS. The incremental cost of analyzing for the hazardous substances (including ions) is about $300.

Since sampling for the hazardous substances will also usually be conducted in conjunction with sampling for the organic toxic pollutants, the Agency projects little or no incremental sampling cost for the hazardous substances.

If it is assumed that one half of Group I dischargers test their process waste water outfalls for hazardous substances and that one half of these also test their intakes in order to obtain credit under § 122.70(g), the optional reporting of hazardous substances will result in a total incremental analytical cost of $3,715,000.

Some additional reporting costs will also be incurred by these applicants, which have been included in section VII–B above.

The Agency has begun to examine the incremental treatment costs for those seeking to comply with section 402 and avoid section 311 liability. Preliminary investigation indicates that, in the majority of cases, the same treatment used to control the toxic pollutants in a particular discharge will also be capable of controlling the hazardous pollutants in that discharge. In such cases, the incremental treatment costs for the hazardous substance would be insignificant. When the hazardous substance regulations which were proposed on February 18, 1979 are finally promulgated, they will contain an expanded discussion of these incremental treatment costs.

B. *Compliance Monitoring Costs*

As mentioned in the discussion on monitoring (section VI above), no specific compliance monitoring requirements are set forth in either the NPDES program regulations promulgated on June 7, 1979 or in the regulations proposed today. However, it is anticipated that the new emphasis on toxics will result in new permit requirements to periodically monitor for certain toxic pollutants. Even where indicator pollutants are used to regulate toxic pollutants, occasional waste characterizations will generally be useful to insure the proper control of toxic pollutants and to support the application-based limit of § 122.66(a)(2).

It is not possible to predict the extent to which permit writers will require monitoring of toxics in permits. This monitoring will be required on a case-by-case basis and will depend largely on the nature of the permittee's waste stream (especially as revealed by the data reported in the application).

If it is assumed that all Group I majors are issued permits requiring annual organic toxics monitoring as described above and that one-half of these permittees monitor one intake each in order to obtain credit under § 122.70(g), then the total incremental annual monitoring cost will be $24,806,5000 ($4500 times 4150 process wastewater outfalls and 1383 intakes).

Note.—Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107 require the preparation of economic impact statements for major regulations, defined as those with incremental annual impacts exceeding one hundred million dollars. As demonstrated in this preamble, the Environmental Protection Agency has examined costs and economic impacts as part of its decision-making process. It has determined, based on this analysis, that this document does not constitute a major regulation requiring the preparation of a separate economic impact statement. However, it believes that the detailed analysis contained in section VII of this preamble complies with the spirit and purpose of the executive orders and OMB circular.

Dated: June 4, 1979.

Douglas M. Costle,
Administrator.

PART 122—THERMAL DISCHARGES

§ 122.64 [Amended].

1. Section 122.64 is amended by renumbering paragraphs (d), (e), (f), and (g) as (e), (f), (g), and (h), respectively, and by adding a new paragraph (d) as follows:

* * * * *

(d) Existing manufacturing, commercial, mining, and silvicultural dischargers applying for NPDES permits shall provide the following information to the Director, using the application form provided by the Director:

[*Comment*—Permit application requirements for POTW's, new sources and new dischargers will be developed and proposed for addition to this paragraph at a future date.]

(1) Name, address, and telephone number of the applicant and the facility for which the application is submitted, if different.

(2) Identity and telephone number of applicant's authorized agent for the facility.

(3) Type of facility ownership (e.g. State, Federal, private).

(4)Up to four SIC codes which best reflect the principal products or services provided by the facility.

(5) A brief description of the nature of the business.

(6) A listing of all permits or construction approvals received or applied for under any of the following permit programs:

(i) NPDES permit program.

(ii) Underground injection control (UIC) permit program.

(iii) Hazardous waste permit program.

(iv) Prevention of significant deterioration (PSD) permit program.

(v) Air new source—nonattainment permit program.

(vi) National Emission Standards for Hazardous Pollutants (NESHAPS) preconstruction approval.

(vii) Ocean dumping permits.

(viii) Other relevant environmental permits, including State permits.

(7) A topographic map depicting the facility and each of its intake and discharge structures, each of its hazardous waste treatment, storage, or disposal facilities, each well where fluids from the facility are injected underground, and all known wells, springs, and surface water bodies in the area. The topographic map shall extend to at least one mile beyond the property boundaries of the source.

(8) The average and maximum daily rate of production or material used where applicable effluent guideline limitations promulgated under section 304 of the CWA are based on products, raw materials, or some other measure of operation. The units reported must be consistent with the units used in the applicable effluent guideline, and the data reported must reflect the actual operation of the plant as required by § 122.70(a)(2).

(9) A line drawing of the water flow through the facility indicating each source of intake water, each process, operation, or production area contributing to each discharge, and each treatment unit in place. A water balance must be indicated on the line drawing, showing intake and discharge flows, and

losses to process, atmosphere, or elsewhere.

(10) A listing of the average and maximum flows contributed by each type of waste stream to each outfall (including, but not limited to, sewage, noncontact cooling water, process wastewater, and storm runoff).

(11) A description of discharges which do not occur from an outfall and which contain toxic pollutants listed under section 307(a) or hazardous substances listed under section 311 which are or may be discharged as a result of unchanneled plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw materials storage. The description of such discharges shall include the source of the discharge, the estimated flow of the discharge, the receiving water, an identification of the toxic or hazardous pollutants, and estimated concentrations of each such pollutant.

(12) If the discharges described in subparagraphs (d) (10) and (11) are not continuous as defined in § 122.70(c), a description of the volume and frequency of each discharge occurrence (except for storm runoff and spillage or leaks).

(13) A copy of the applicant's Best Management Practices Plan, as required by § 125.104(c).

(14) For each outfall, a description of each process, operation, or production area which contributes to the effluent and a description of the treatment the resulting effluent receives.

(15) A description of any compliance schedules to which the facility is subject for construction, upgrading or operation of waste treatment equipment, including identification of abatement schedules, a description of each project, and a description of the present status of compliance with the schedule.

(16) A description of pollutant characteristics of the effluent discharged from outfalls (and the intake water where credit is desired under § 122.70(g) for pollutants present in the intake) as follows:

(i) for every applicant, quantitative data collected in accordance with analytical methods specified in 40 CFR Part 136 for every outfall for the following pollutants:

Biochemical Oxygen Demand (BOD_5).
Temperature (both winter and summer)
Chemical Oxygen Demand
Total Organic Carbon
pH
Total Suspended Solids
Total Cyanide
Total Phenols (4AAP)
Total Kjeldahl Nitrogen (as N)(TKN).

(ii) In addition, for all applicants in all industrial categories listed in Appendix A to this part and for all applicants in the asbestos industry (SIC 3292 and 3293) and in the ferroalloys industry (SIC 3313), quantitative data collected in accordance with analytical methods specified in 40 CFR Part 136 for all outfalls containing process wastewater for all pollutants on the section 307(a) list of toxic pollutants, except for cyanide, asbestos, and 2,3,7,8, Tetrachlorodibenzo-p-dioxin (TCDD).

(iii) In addition, for every applicant, data collected in accordance with analytical methods specified in 40 CFR Part 136 or on the basis of the applicant's best estimate for every outfall for the following pollutants:

Ammonia (as N), Asbestos, Barium, Total, Boron, Total, Bromide, Chlorine, Total Residual, Color, Fecal Coliform, Fluoride, Nitrate (as N), Nitrite (as N), Oil and Grease, Phosphorus (as P), total, Radioactivity, Sulfate (as SO_4), Sulfide (as S), Sulfite (as SO_3), Surfactants, Aluminum, Total, Cobalt, Total, Iron, Total, Magnesium, Total, Molybdenum, Total, Manganese, Total, Tin, Total, Titanium, Total.

2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD)

Any pollutant specified in paragraph (d)(16)(ii) of this section for all waste streams not required to be tested by that subparagraph. Any pesticide not required to be tested elsewhere by this paragraph for which an analytical method is specified in 40 CFR Part 136.

(iv) The name, address, and telephone number of each contract laboratory or consulting firm which performed any of the analyses required by this subparagraph.

(17) A description and a summary of results of biological monitoring tests, if any, which have been conducted within the last five years upon the discharge or upon the receiving water in relation to the facility.

(18) A description of any additional data of which the permittee is aware concerning the presence or levels in its discharges of any pollutants which are in addition to those pollutants reported under paragraphs (d)(11) and (d)(16) of this section.

(19) At the applicant's option, information required by 40 CFR 117.12(b)(2)(i) to obtain exclusions from the requirements and penalties of section 311 of the CWA.

(20) Such other information as the Director may require to assess the discharges of the facility and to determine whether to issue an NPDES permit.

[*Comment*—Such additional information may include biomonitoring tests to assess the relative toxicity of discharges to fish and other aquatic life, and requirements to determine the cause of such toxicity].

* * * * *

§ 122.66 [Amended].

2. Section 122.66 is amended by deleting the comment following paragraph (a) and by revising paragraph (a) to read as follows:

(a) (1) No permittee shall discharge any pollutant at a level which exceeds any specific permit limitation for that pollutant.

(2) Except as provided in § 122.66(a)(3), if a permittee has reported or has been required to report the level of any pollutant concentration in its application and the permit does not specifically limit that pollutant, discharges of that pollutant shall be limited to:

(i) Five times the average value reported in the application; or

(ii) If the pollutant was not detected or not reported as required, five times the highest of the following concentrations:

(A) Ten micrograms per liter;

(B) The detection limit (or lowest appropriate concentration) specified in the applicable analytical method specified in 40 CFR Part 136; or

(C) A detection limit for the applicable analytical method as determined by the permittee. For the purposes of this paragraph, the detection limit shall be the lowest concentration with a signal-to-noise ratio of five to one or less, in accordance with any generally accepted procedure for determining the level of background noise. The determination of this detection limit may be based on either a laboratory standard or an individual sample.

[*Comment*—The level of background noise is measured as the net difference in instrument response between the highest and lowest peaks in the baseline response of the instrument. The instrument's baseline is found where there is nothing causing an overall increase or decrease in instrument response. The level of signal is measured as the net response above the median baseline level.]

(3)(i) For the purposes of § 122.66(a)(2), an applicant may apply to the Director for application-based limitations reflecting a factor other than five. Each such application shall include the following:

(A) Ten 24-hour composite samples analyzed for the pollutant in accordance with methods specified in 40 CFR Part 136;

(B) An appropriate statistical analysis providing an upper 99% confidence bound for the concentration of each pollutant of concern; and

(C) such other data as may be required to determine the variability of the pollutant in an effluent.

(ii) Each such demonstration shall be submitted within 180 days following the date of submission of an NPDES application form. Prior to the Director's approval of any factor other than five, the requirements of § 122.68(a)(2) shall apply.

* * * * *

§ 122.70 [Amended].

3. Section 122.70 is amended by revising paragraph (c)(1) to read follows:

* * * * *

(c) * * *

(1) Maximum daily and average monthly discharge limitations for all dischargers other than publicly owned treatment works (although limitations established under § 122.68(a) (2) and (3) shall apply only as a maximum daily discharge limitation; and

* * * * *

§ 122.70 [Amended].

4. Section 122.70 is amended by revising paragraph (d) by replacing the period at the end of paragraph (d)(2) with "; or", and by adding a new paragraph (d)(3) to read as follows:

* * * * *

(d) * * *

(3) Limitations established by §§ 122.68(a) (2) and (3), which shall be applied on the basis of concentration.

* * * * *

§ 122.71 [Amended].

5. Section 122.71 is amended by revising paragraph (a)(1) to read as follows:

(a) * * *

(1) The amount, concentration, or other measurement specified in § 122.70 for each pollutant specified in the permit, including, where additional monitoring is specified in the permit, pollutants limited under § 122.68(a)(2);

* * * * *

PART 123—STATE CERTIFICATION OF ACTIVITIES REQUIRING A FEDERAL LICENSE OR PERMIT

§ 123.73 [Amended].

6. Section 123.73 is amended by revising paragraph (a) to read as follows:

* * * * *

(a) Section 122.64 (d), (f), (g)—(Applications for permits and variances);

* * * * *

PART 125—NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

§ 125.3 [Amended].

7. Section 125.3 is amended by adding new paragraphs (c)(4) and (g) to read as follows:

* * * * *

(c) * * *

(4) Limitations developed under paragraph (c)(2) of this section may be expressed, where appropriate, in terms of toxicity (e.g. "Permittee's LC_{xx} shall not be less than X": *Provided* That it is shown that the limits reflect the application of the appropriate technological or other standard as required by section 301(b) of the CWA.

* * * * *

(g) The Director may set a permit limit for a conventional pollutant at a level more stringent than the best conventional pollutant control technology (BCT), or a limit for a nonconventional pollutant, which limit shall not be subject to modification under section 301 (c) or (g) of the CWA where:

(1) Effluent limitations guidelines specify the pollutant as an indicator for a toxic pollutant; or

(2)(i) The limitation reflects BAT-level control of discharges of one or more toxic pollutants which are present in the waste stream, and a specific BAT limitation upon the toxic pollutant(s) is not feasible for economic or technical reasons;

(ii) The permit identifies which toxic pollutants are intended to be controlled by use of the limitation; and

(iii) The statement of basis or fact sheet required by § 124.8 or § 124.9 sets forth the basis for the limitation, including a finding that compliance with the limitation will result in BAT-level control of the toxic pollutant discharges identified in subparagraph (2) of this paragraph and a finding that it would be economically or technically infeasible to directly limit the toxic pollutant(s).

[*Comments.*—Toxic pollutants identified under this subparagraph remain subject to the application-based limits of § 122.68(a)(2). The authority of this paragraph is in addition to that established by sections 208(e), 301(b)(1)(C), 302, 401, and 510 of the CWA.]

Part IV

National Transportation Safety Board

Transportation Accidents; Investigations, Hearings and Reports

NATIONAL TRANSPORTATION SAFETY BOARD

49 CFR Parts 831 and 845

Investigations, Hearings and Reports on Transportation Accidents/Incidents

AGENCY: National Transportation Safety Board.

ACTION: Final Rule.

SUMMARY: Part 831 of the Board's Rules of Practice is revised to limit its scope to aircraft accident/incident investigation procedures. In order to accomplish that change, Subparts C, D and E of Part 831 have been removed from that Part and relocated in Subparts B, C, and D of Part 845. As revised, Part 845 contains a common set of rules for accident/incident hearings and reports applicable to both aircraft and surface accidents/incidents.

EFFECTIVE DATE: June 14, 1979.

FOR FURTHER INFORMATION CONTACT: Fritz L. Puls, General Counsel, National Transportation Safety Board, 800 Independence Avenue, S.W., Washington, D.C. 20594, 202-472-6033.

SUPPLEMENTARY INFORMATION: Part 831 presently contains the Board's rules applicable to aircraft accident investigations, including the field investigation, public hearings, and Board reports. Part 845 contains the Board's rules for surface transportation accident hearings. The Board has concluded that it should have one set of rules for all of its accident hearings and reports. To this end, the provisions of Subparts C, D, and E of Part 831 have been combined with Part 845 in revised Part 845.

Nearly all of the changes in existing language are made for the purpose of clarification. The current provisions of Subpart B of Part 831, Field Investigation, will be retained with minor modifications and be the single subject of revised Part 831. The regulation will be applicable to both the investigation of accidents and incidents. Revised § 831.9, Parties to the field investigation, now makes it clear that designations, if made, are limited to those types of organizations listed therein. By the insertion of a note, it is emphasized that passengers and insurers (in air transportation) are not eligible to be parties to a field investigation. In time, when surface field investigation procedures become more standardized, it is anticipated that Part 831 will be amended to include references to the other modes of transportation.

The only new provision included in revised Part 845 is found in Subsection D, namely, § 845.23 concerning prehearing conferences. The Board recognizes that surface accidents may on occasion require expedited hearings. In such situations, all the requirements concerning availability of exhibits, witness lists, and areas of questioning may not be available at the time of the prehearing conference. Authority is therefore granted the Chairman of the Board of Inquiry for an expedited hearing to modify, as appropriate, such requirements.

Because these amendments relate solely to corrections and minor procedural matters, the Board has found that notice and public procedure thereon are unnecessary.

Accordingly, Parts 831 and 845 of Title 49 of the Code of Federal Regulations are amended, effective June 14, 1979, as follows:

1. By revising Part 831 to read as follows:

PART 831—AIRCRAFT ACCIDENT/INCIDENT INVESTIGATION PROCEDURES

Sec.

831.1 Applicability of part.
831.2 Responsibility of Board.
831.3 Authority of Director.
831.4 Nature of investigation.
831.5 Request to withold information.
831.6 Right of representation.
831.7 Investigator-in-charge.
831.8 Authority of Board representatitves.
831.9 Parties to the field investigation.
831.10 Access to and release of aircraft wreckage, records, mail, and cargo.
831.11 Flow and dissemination of accident information.
831.12 Recommendations.

Authority: Title VII, Federal Aviation Act of 1958, as amended, 72 Stat. 781, as amended by 76 Stat. 921 (49 U.S.C. 1441 et seq); and the Independent Safety Board Act of 1974, Pub. L. 93-633, 88 Stat. 2166 et seq. (49 U.S.C. 1901 et seq.).

§ 831.1 Applicability of part.

Unless otherwise specifically ordered by the National Transportation Safety Board (Board), the provisions of this part shall govern all aircraft accident or incident investigations, conducted under the authority of Title VII of the Federal Aviation Act of 1958, as amended, and the Independent Safety Board Act of 1974. Rules applicable to aircraft accident hearings and reports are set forth in Part 845.

§ 831.2 Responsibility of Board.

(a) The Board is responsible for the organization, conduct and control of all accident investigations involving civil aircraft, or civil and military aircraft, within the United States, its territories and possessions. It is also responsible for investigation of accidents which occur outside the United States, and which involve U.S. civil aircraft or civil and military aircraft, at locations determined to be not in the territory of another state (i.e., in international waters).

(b) Certain field investigations are conducted by the Federal Aviation Administration (FAA), pursuant to a request to the Secretary of the Department of Transportation, effective February 10, 1977 (see appendix to Part 800 of this chapter),[1] but the Board determines the probable cause of such accidents. Under no circumstances shall investigations conducted by the Board be considered joint investigations in the sense of sharing responsibility. However, in the case of an accident or incident involving civil aircraft of U.S. registry or manufacture in a foreign state which is a signator to Annex 13 to the Chicago Convention of the International Civil Aviation Organization, the state of occurrence is responsible for the investigation. If it occurs in a foreign state which is not bound by the provisions of Annex 13 to the Chicago Convention, the conduct of the investigation shall be in consonance with any agreement entered into between the United States and the foreign state.

§ 831.3 Authority of Director.

The Director, Bureau of Accident Investigation, subject to the provisions of § 831.2, may order an investigation into any accident or incident involving a civil aircraft.

§ 831.4 Nature of investigation.

Aircraft accident or incident investigations are conducted by the Board in order to determine the facts, conditions, and circumstances relating to each accident or incident and the probable cause thereof and to ascertain measures which will best tend to prevent similar accidents or incidents in the future. The investigation includes the field investigation, report preparation, and, where ordered, the public hearing.

§ 831.5 Request to withhold information.

Any person may make written objection to the public disclosure of information contained in any report or document filed, or of information obtained by the Board, stating the grounds for such objection. The Board,

[1] The authority of a representative of the Federal Aviation Administration during such field investigations shall be the same as that of a Board investigator under this part.

on its own initiative or if such objection is made, may order such information withheld from public disclosure when, in its judgment, the information can be withheld under the provisions of an exemption to the Freedom of Information Act (Pub. L. 93-502, amending 5 U.S.C. 552) and its release is not found to be in the public interest (see Part 801).

§ 831.6 Right of representation.

Any person interrogated by an authorized representative of the Board during the field investigation shall be accorded the right to be accompanied, represented, or advised by counsel or by any other duly qualified representative.

§ 831.7 Investigator-in-charge.

The designated investigator-in-charge organizes, conducts, and controls the field phase of investigation. He shall assume responsibility for the supervision and coordination of all resources and of the activities of all personnel, both Board and non-Board, involved in the onsite investigation.

§ 831.8 Authority of Board representatives.

Upon demand of an authorized representative of the Board and presentation of credentials issued to such representative, any Government agency, air carrier, airman, or person engaged in air commerce or in any phase of aeronautics, and any other person having possession or control of any aircraft, aircraft engine, propeller, appliance, air navigation facility, equipment or any pertinent records and memoranda, including all documents, papers, and correspondence now or hereafter existing and kept or required to be kept, shall forthwith permit inspection, photographing, or copying thereof by such authorized representative for the purpose of investigating an aircraft accident, overdue aircraft, study, or investigation pertaining to safety in air navigation or the prevention of accidents. Authorized representatives of the Board may interrogate any person having knowledge relevant to an aircraft accident/incident, overdue aircraft, study, or special investigation.

§ 831.9 Parties to the field investigation.

(a) The investigator-in-charge may, on behalf of the Director, Bureau of Accident Investigation, designate parties to participate in the field investigation. Parties to the field investigation shall be limited to those persons, Government agencies, companies, and associations whose employees, functions, activities, or products were involved in the accident or incident and who can provide suitable qualified technical personnel to actively assist in the field investigation.

(b) Participants in the field investigation shall be responsive to the direction of the appropriate Board representative and may be relieved from participation if they do not comply with their assigned duties or if they conduct themselves in a manner prejudicial to the investigation.

(c) No party to the field investigation designated under § 831.9(a) shall be represented by any person who also represents claimants or insurers. Failure to comply with this provision shall result in loss of status as a party.

(d) Section 701(g) of the Federal Aviation Act of 1958, as amended, provides for the appropriate participation of the Administrator in Board investigations. Thus, the FAA will normally be a party to field investigations and will have the same rights and privileges and be subject to the same limitations as other parties.

§ 831.10 Access to and release of aircraft wreckage, records, mail, and cargo.

(a) Only the Board's accident investigation personnel and persons authorized by the investigator-in-charge or the Director, Bureau of Accident Investigation, to participate in any particular investigation, examination or testing shall be permitted access to aircraft wreckage, records, mail, or cargo which is in the Board's custody.

(b) Aircraft wreckage, records, mail, and cargo in the Board's custody shall be released by an authorized representative of the Board when it is determined that the Board has no further need of such wreckage, mail, cargo, or records.

§ 831.11 Flow and dissemination of accident information.

(a) Release of information during the field investigation, particularly at the accident scene, shall be limited to factual developments, and shall be made only through the Board Member present at the accident scene, the representative of the Board's Office of Public Affairs, or the investigator-in-charge.

(b) All information concerning the accident or incident obtained by any personnel participating in the field investigation shall be passed to the investigator-in-charge, through appropriate channels. Upon approval of the investigator-in-charge, parties to the investigation may relay to their respective organization information which is necessary for purposes of prevention or remedial action. Under no circumstances shall accident information be released to, or discussed with, unauthorized persons whose knowledge thereof might adversely affect the investigation.

§ 831.12 Recommendations.

Any person, Government agency, company, or association whose employees, functions, activities, or products were involved in an accident under investigation may submit to the Board, prior to its determination of probable cause, recommendations as to the proper conclusions to be drawn from the evidence produced during the course of the accident investigation.

2. By revising Part 845 to read as follows:

PART 845—RULES OF PRACTICE IN TRANSPORTATION; ACCIDENT/INCIDENT HEARINGS AND REPORTS

Sec.

845.1 Applicability.
845.2 Nature of hearing.
845.3. Sessions open to the public.

Subpart A—Initial Procedure

845.10 Determination to hold hearing.
845.11 Board of inquiry.
845.12 Notice of hearing.
845.13 Designation of parties.

Subpart B—Conduct of Hearing

845.20 Powers of chairman of board of inquiry.
845.21 Hearing officer.
845.22 Technical panel.
845.23 Prehearing conference.
845.24 Right of representation.
845.25 Examination of witnesses.
845.26 Evidence.
845.27 Recommendations by parties.
845.28 Stenographic transcript.
845.29 Payment of witnesses.

Subpart C—Board Reports

845.40 Accident report.
845.41 Requests for reconsideration and modification.

Subpart D—Public Record

845.50 Public docket.
845.51 Investigation to remain open.

Authority: Sec. 304(b) of the Independent Safety Board Act of 1974, Pub. L. 93-633, 88 Stat. 2169 (49 U.S.C. 1903(b)).

§ 845.1 Applicability.

Unless otherwise specifically ordered by the National Transportation Safety Board (Board), the provisions of this part shall govern all transportation accident investigation hearings conducted under the authority of section 304(b) of the Independent Safety Board Act of 1974 (49 U.S.C. 1903(b)) and accident reports issued by the Board.

§ 845.2 Nature of hearing.

Transportation accident hearings are convened to assist the Board in determining cause or probable cause of an accident, in reporting the facts, conditions, and circumstances of the accident, and in ascertaining measures which will tend to prevent accidents and promote transportation safety. Such hearings are factfinding proceedings with no formal issues and not adverse parties and are not subject to the provisions of the Administrative Procedure Act (Pub. L. 89–554, 80 Stat. 384 (5 U.S.C. 554)).

§ 845.3 Sessions open to public.

(a) All hearings shall normally be open to the public (subject to the provision that any person present shall not be allowed at any time to interfere with the proper and orderly functioning of the board of inquiry).

(b) Sessions shall not be open to the public when evidence of a classified nature or which affects national security is to be received.

Subpart A—Initial Procedure

§ 845.10 Determination to hold hearing.

The Board may order a public hearing as part of an accident investigation whenever such hearing is deemed necessary in the public interest: *Provided* that if a quorum of the Board is not immediately available in the event of a catastrophic accident, the determination to hold a public hearing may be made by the Chairman of the Board.

§ 845.11 Board of inquiry.

The board of inquiry shall consist of a member of the Board who shall be chairman of the board of inquiry, a hearing officer, the Director of the Bureau of Accident Investigation, or his designee, and, where appropriate, the General Counsel or his designee. Assignment of a member to serve as the chairman of each board of inquiry shall be determined by the Board. The board of inquiry shall examine witnesses and secure, in the form of a public record, all known facts pertaining to the accident or incident and surrounding circumstances and conditions from which cause or probable cause may be determined and recommendations for corrective action may be formulated.

§ 845.12 Notice of hearing.

The chairman of the board of inquiry shall designate a time and place for the hearing which meets the needs of the Board. Notice to all known interested persons shall be given.

§ 845.13 Designation of parties.

(a) The chairman of the board of inquiry shall designate as parties to the hearing those persons, agencies, companies, and associations whose participation in the hearing is deemed necessary in the public interest and whose special knowledge will contribute to the development of pertinent evidence.

(b) No party shall be represented by any person who also represents claimants or insurers. Failure to comply with this provision shall result in loss of status as a party.

Subpart B—Conduct of Hearing

§ 845.20 Powers of chairman of board of inquiry.

The chairman of the board of inquiry, or his designee, shall have the following powers:

(a) To designate parties to the hearing and revoke such designations;

(b) To open, continue, or adjourn the hearing;

(c) To determine the admissibility of and to receive evidence and to regulate the course of the hearing;

(d) To dispose of procedural requests or similar matters; and

(e) To take any other action necessary or incident to the orderly conduct of the hearing.

§ 845.21 Hearing officer.

The hearing officer, upon designation by the Chairman of the Board, shall have the following powers:

(a) To give notice concerning the time and place of hearing;

(b) To administer oaths and affirmations to witnesses; and

(c) To issue subpenas requiring the attendance and testimony of witnesses and production of documents.

§ 845.22 Technical panel.

The Director, Bureau of Accident Investigation, shall designate members of the Board's technical staff to participate in the hearing and initially develop the testimony of witnesses.

§ 845.23 Prehearing conference.

(a) Except as provided in paragraph (d) of this section for expedited hearings, the chairman of the board of inquiry shall hold a prehearing conference with the parties to the hearing at a convenient time and place prior to the hearing. At such prehearing conference, the parties shall be advised of the witnesses to be called at the hearing, the areas in which they will be examined, and the exhibits which will be offered in evidence.

(b) Parties shall submit at the prehearing conference copies of any additional documentary exhibits they desire to offer. (Copies of all exhibits proposed for admission by the board of inquiry and the parties shall be furnished to the board of inquiry and to all parties, insofar as available at that time.)

(c) A party who, at the time of the prehearing conference, fails to advise the chairman of the board of inquiry of additional exhibits he intends to submit, or additional witnesses he desires to examine, shall be precluded from introducing such evidence unless the chairman of the board of inquiry determines for good cause shown that such evidence should be admitted.

(d) *Expedited hearings.* When time permits, the chairman of the board of inquiry may hold a prehearing conference. In the event that an expedited hearing is held, the requirements in paragraphs (b) and (c) of this section concerning the identification of witnesses, exhibits or other evidence may be waived by the chairman of the board of inquiry.

§ 845.24 Right of representation.

Any person who appears to testify at a public hearing shall be accorded the right to be accompanied, represented, or advised by counsel or by any other duly qualified representative.

§ 845.25 Examination of witnesses.

(a) Witnesses shall be initially examined by the board of inquiry or its technical panel. Following such examination, parties to the hearing shall be given the opportunity to examine such witnesses.

(b) Materiality, relevancy, and competency of witness testimony, exhibits, or physical evidence shall not be the subject of objections in the legal sense by a party to the hearing or any other person. Such matters shall be controlled by rulings of the chairman of the board of inquiry on his own motion. If the examination of a witness by a party is interrupted by a ruling of the chairman of the board of inquiry, opportunity shall be given to show materiality, relevancy, or competency of the testimony or evidence sought to be elicited from the witness.

§ 845.26 Evidence.

The chairman of the board of inquiry shall receive all testimony and evidence which may be of aid in determining the cause of accident. He may exclude any testimony or exhibits which are not pertinent to the investigation or are merely cumulative.

§ 845.27 Recommendations by parties.

Any party may submit proposed conclusions and recommendations to be drawn from the testimony and exhibits submitted at the hearing. Such recommendations shall be submitted within the time specified by the presiding officer at the close of the hearing, and shall be made a part of the public file. Parties to the hearing shall serve copies of such recommendations on all other parties to the hearing.

§ 845.28 Stenographic transcript.

A verbatim report of the hearing shall be taken. Copies of the transcript may be obtained by any interested person from the Board or from the court reporting firm preparing the transcript upon payment of the fees fixed therefor. (See Part 801, Appendix—Fee Schedule.)

§ 845.29 Payment of witnesses.

Any witness subpenaed to attend the hearing under this part shall be paid such fees for his travel and attendance as shall be certified by the hearing officer.

Subpart C—Board Reports

§ 845.40 Accident report.

(a) The Board will issue a detailed narrative accident report in connection with the investigation into those accidents which the Board determines to warrant such a report. The report will set forth the facts, conditions and circumstances relating to the accident and the probable cause thereof, along with any appropriate recommendations formulated on the basis of the investigation.

(b) The probable cause and facts, conditions, and circumstances of all other accidents will be reported in a manner and form prescribed by the Board.

§ 845.41 Requests for reconsideration or modification.

(a) Requests for reconsideration or modification of the Board's findings and determination of probable cause by parties to an investigation or hearing or other persons having a direct interest in the accident investigation will be entertained only if based on the discovery of new evidence or on a showing that the Board's findings, as to the facts, conditions, and circumstances of the accident, are erroneous. Such requests shall be in writing. Requests which are repetitious of recommendations made pursuant to § 845.27, or of positions previously advanced, and requests by parties to the hearing who fail to submit recommendations pursuant to § 845.27 will not be entertained. Any such requests based on the discovery of new matter shall: Identify the new matter; shall contain affidavits of prospective witnesses, authenticated documents, or both, or an explanation of why such substantiation is unavailable; and shall state why such new matter was not available prior to Board's adoption of its findings. Requests based on the claim of erroneous findings shall set forth in detail the grounds relied upon.

(b) If a request for reconsideration or modification is filed by a party to a hearing, designated under § 845.27, copies of such request and any supporting documentation shall be served on all other parties similarly designated.

Subpart D—Public Record

§ 845.50 Public docket.

(a) The public docket shall include all factual information concerning the accident. Recommendations submitted pursuant to § 845.27 by interested persons, and requests for reconsideration and modification submitted pursuant to § 845.41 and the Board's rulings thereon, shall also be placed in the public docket.

(b) The docket shall be established as soon as practicable following the accident, and material shall be added thereto as it becomes available. Where a hearing is held, the exhibits will be introduced into the record at the hearing.

(c) A copy of the docket shall be made available to any person for review at the Washington office of the Board. Copies of the material in the docket may be obtained, upon payment of the cost of reproduction, from the Public Inquiries Section, Bureau of Administration, National Transportation Safety Board, Washington, D.C. 20594.

§ 845.51 Investigation to remain open.

Accident investigations are never officially closed but are kept open for the submission of new and pertinent evidence by any interested person. If the Board finds that such evidence is relevant and probative, it shall be made a part of the docket and, where appropriate, parties will be given an opportunity to examine such evidence and to comment thereon.

Approved by the National Transportation Safety Board on June 5, 1979.

James B. King,

Chairman.

[FR Doc. 79-18077 Filed 6-13-79; 8:45 am]

BILLING CODE 4910-58-M

NATIONAL TRANSPORTATION SAFETY BOARD

[49 CFR Part 830]

Proposed Limitation of Accident Reporting Requirements

AGENCY: National Transportation Safety Board.

ACTION: Extension of comment period.

SUMMARY: This action extends the time for filing comments on proposed amendments to Part 830 that would revise the Board's requirements for reporting aircraft accidents and incidents and certain other occurrences in the operation of aircraft, when they involve civil aircraft of United States registry. The extension is from the current July 2, 1979, deadline to August 3, 1979.

DATE: Comments must be received on or before August 3, 1979.

ADDRESS: Written comments may be submitted to the General Counsel, National Transportation Safety Board, 800 Independence Ave., S.W., Washington, D.C. 20594.

FOR FURTHER INFORMATION CONTACT: Fritz L. Puls, General Counsel, National Transportation Safety Board, 800 Independence Avenue, S.W., Washington, D.C. 20594. 202–472–6034.

SUPPLEMENTARY INFORMATION: On May 3, 1979, the Safety Board issued a notice of proposed rulemaking, 44 FR 25889, proposing to revise Part 830 of its rules pertaining to the notification and reporting of aircraft accidents or incidents and overdue aircraft. Proposed amendments to Part 830 included a change in the definition of the term "fatal injury," the inclusion of a definition of the term "incident," and the addition of five types of incidents for which the Board must receive notifications.

On May 11, 1979, the editor of *Business and Commercial Aviation*, a publication that serves the general aviation community, requested an extension of the comment period to August 3 in order to provide readers of the publication with information on the NPRM that would enable them to submit informed and meaningful comments. The editor pointed out that the copy lead time on many monthly publications is 30 days.

The Safety Board believes that a substantive interest in increasing the amount of informed public participation in this rulemaking effort has been shown and that the comment period should be extended to August 3 in order to benefit from that interest. The Board also believes that an extension of the comment period is consistent with the public interest.

Therefore, the period for submission of comments in response to the proposals at 44 FR 25889 is extended to August 3, 1979.

Approved by the National Transportation safety Board on June 5, 1979.

James B. King,
Chairman.

Federal Register

Part V

Department of Energy

Procurement; Research and Development, Construction and Other Products and Services

DEPARTMENT OF ENERGY

41 CFR Ch. 9

Procurement of Research and Development, Construction and Other Products and Services.

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: The Department of Energy establishes the Department of Energy Procurement Regulation (DOE–PR) as a final rule with this notice. The DOE–PR is a comprehensive body of regulations governing the Department's procurement of Research and Development, Construction and other products and services. The DOE–PR follows the Federal Procurement Regulations, implementing and supplementing them as necessary to accomplish the Department's mission. The DOE–PR applies as prescribed in § 9–1.004, thereof, except for those procurement actions in progress and too far along to permit implementation of these regulations.

This notice sets forth a summary of revisions to the DOE–PR as proposed on April 14, 1978 and announces the availability of the final DOE–PR. A copy of the DOE–PR has been filed with the Office of the Federal Register, and the full text will soon be published in *the Code of Federal Regulations* (CFR).

EFFECTIVE DATE: June 30, 1979.

ADDRESS: Please address requests for copies of the DOE–PR to Thomas Ruppert, Procurement Policy Branch (PR–211), Procurement and Contracts Management Directorate, Room 308 RB, 400 1st Street NW., Washington, D.C. 20585. Please mark "Request for DOE–PR," on the outside of the envelope.

FOR FURTHER INFORMATION CONTACT:

Thomas Ruppert, Procurement Policy Branch (PR–211), Policy and Procedures Division, Procurement and Contracts Management Directorate, Department of Energy, 400 1st Street NW., Washington, D.C. 20585, Room 308 RB, Telephone 202–376–1759.

Robert Forst, Office of General Counsel, AGC for Procurement, Germantown, Maryland, Department of Energy, Washington, D.C. 20545, Telephone 301–353–4394.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Statutory and Regulatory Requirements.
III. Availability of the Procurement Regulation.
IV. Summary, by Major Category, of the Public Comments Received and Responses Thereto.
V. Summary of Revisions to the DOE–PR As Proposed on April 14, 1978.

I. Background

Under Section 644 of the Department of Energy Organization Act (hereinafter referred to as the Act) (Pub. L. 95–91, 91 Stat. 565, 42 U.S.C. 7254), the Secretary of the Department is authorized to prescribe such procedural rules and regulations as he may deem necessary or appropriate to effectuate the functions vested in him. Additionally, public notice of such rules and regulations is required by the Act (42 U.S.C. 7191) in accordance with the Administrative Procedure Act, as amended (5 U.S.C. 551, et. seq.).

On April 14, 1978, the Department published in the Federal Register (43 FR 15853) the proposed Procurement Regulations in their entirety.

II. Statutory and Regulatory Requirements

Pursuant to Section 501 of the Department of Energy Organization Act (42 U.S.C. 7191) relating to the opportunity for oral presentations on proposed regulations, the Department has determined that no substantial issues of fact or law exists and that this procurement regulation is unlikely to have a substantial impact on the nation's economy, or large numbers of individuals or businesses, such as would warrant the oral presentation of views. This is so because the DOE–PR primarily follows the Energy Research and Development Administration Procurement Regulations (ERDA–PA), which were made effective in September 1977. The ERDA–PR has been the primary procurement regulation since the Department of Energy's activation on October 1, 1977 due to the fact that most of DOE's procurement activities are carried out to perform functions transferred from ERDA. One significant change is Subpart 9–1.54 of the DOE–PR entitled "Organizational Conflict of Interest," which has been revised in its entirety to conform to the Organizational Conflict of Interest final rule, published on Janurary 11, 1979 (44 FR 2556).

Approximately 130 public comments were received from nineteen organizations and/or individuals. Of these, only one requested an oral exchange of views. We believe that little purpose would be served by an oral exchange and that adequate public participation has been assured through the consideration of written comments.

Note.—The Department has determined that this regulation does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821, as amended, and OMB Circular A–107. The Department has also determined that the regulation will not affect the quality of the environment and that the requirements of section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93–275, does not apply.

The DOE–PR is not a significant regulation likely to have a major impact within the meaning of Department of Energy Order 2030, 12/18/78, paragraph 9, because, among other things, the regulation, modified as described herein, has essentially been in effect as the ERDA–PR to govern ERDA procurement functions transferred to DOE since activation of DOE on October 1, 1977. A major purpose of the DOE–PR is to extend regulatory coverage to the comparatively less extensive procurement activities transferred to DOE from agencies other than ERDA.

III. Availability of the Procurement Regulation

The Department of Energy will offer free distribution of the DOE–PR to all subcribers to the Federal Register who make application within 45 days of the date of publication of the notice in the Federal Register and to the general public at nominal cost. Federal Register subscribers should furnish their Federal Register mailing label along with their requests. Please address requests for copies of the DOE–PR to Thomas Ruppert, Procurement Policy Branch (PR–211), Procurement and Contracts Management Directorate, Room 308 RB, 400 1st Street NW., Washington, D.C. 20585. Please mark "Request for DOE–PR," on the outside of the envelope.

The Department of Energy has filed a full text copy of the DOE–PR with the Office of the Federal Register where it may be inspected or copied.

IV. Summary, by Major Category, of the Public Comments Received, and Responses Thereto

Approximately 130 comments were received on the proposed rulemaking from trade associations, industry, universities and other interested members of the general public. All comments received were categorized, reviewed and analyzed relative to their applicability and appropriateness for adoption. The distribution of the comments were generally as follows:

40% of the comments received were related to Part 9–50 and 9–15.50 "Operating and On-Site Service Contracts," and "Contract Cost Principles and Procedures."

35% of the comments received were related to Part 9–9 "Patents, Data and Copyrights."

The remaining 25% of the comments were spread over several parts.

The following is a summary of the major comments received in each of those categories and their disposition:

Part 9-50 and 9-15.50 "Operating and On-Site Service Contracts" and "Contract Cost Principles and Procedures":

Comment: 9-50.104(g) would require Government owned laboratories and other on-site contractors, to publicize proposed procurement actions of $100,000 and above in the Commerce Business Daily. The cost-effectiveness of this requirement is questioned, if applied in every case.

Response: 9-50.104(g) has been reserved pending review of the OFPP implementation of Pub. L. 95-507, Amending the Small Business Act and the Small Business Investment Act of 1958.

Comment: It is not appropriate to mandate use of GSA supply sources by DOE cost-type contractors.

Response: Not adopted. 9-50.505 and 9-5.902 require that contractors meet their requirements from Government sources when it is economically advantageous. This is a mandate only when economically advantageous and is considered to provide appropriate flexibility.

Comment: Under 9-50.704-2(a), delete the requirement for submission of a safety and health management implementation plan. Universities are already subject to OSHA and Federal radiation protection standards.

Response: Not adopted. The specific reporting requirements are not duplicative and are designed to assure the protection of personnel in the performance of specific projects, which involve potentially hazardous situations.

Comment: Several comments were received concerning the applicability of the cost principles and procedures published as Subpart 9-15.50 in the April 14, 1978 Federal Register.

Response: To clarify this point the cost principles and procedures were transferred to 9-50.15 and are applicable only to operating and on-site service contracts. The coverage now contained in Subpart 9-15.50 contains cost principles and procedures to be used as guidance by Government contracting personnel in the negotiation and administration of contracts. The basic cost principles for commercial contractors and educational institutions are contained in applicable parts of FPR 1-15.2 and FPR 1-15.3 as supplemented and modified by DOE-PR 9-15.2 and DOE-PR 9-15.3. A new paragraph was added as DOE-PR 9-15.205-80 which provides that Facilities Capital Cost of Money (CAS-414) is not an allowable cost under DOE contracts, since DOE has elected not to change its previous pricing policies for CAS-414 as authorized by FPR Temporary Regulation #40.

Comment: Several comments were received concerning the definition of an operating contract, which includes Government-owned laboratories and facilities located on University-owned sites, and operated by the University. The comments recommended that the definition be clarified to clearly exclude those contracts which provide for the operation of, what Universities identify as, an Organized Research Unit.

Response: Further clarification is not considered necessary, as DOE-PR 9-50.001 is considered quite clear as to what an operating contract is, and when the provisions of DOE-PR 9-50 are applicable.

Comment: Several comments received recommended that contracts with educational institutions use the cost principles contained in OMB Circular A-21, in lieu of the coverage in DOE-PR 9-50 for the operation of Government-owned laboratories and facilities by educational institutions.

Response: Not adopted. These laboratories and facilities are, normally, not units which are an integral part of a campus, but rather are autonomous units which stand alone. Since the Government is, normally, reimbursing the total allowable cost of the operation, special cost treatment is considered necessary, as set forth in DOE-PR 9-50.

Comment: Few Universities have the capability to audit subcontractors, as required in DOE-PR 9-50.704-9.

Response: It is pointed out that this clause also provides that the prime contractor may arrange, through the contracting officer, to have the Government provide such audit services, if the circumstances warrant. Therefore, no change has been made in this clause.

Comment: Some educational institutions commented that bid and proposal costs should not be considered as unallowable costs, as set forth in DOE-PR clause 9-50.794-12(a)(3).

Response: Under an operating contract, the workload of the facility is controlled by the Government, and the operating contractor is not required to search out work to be performed. The cost of preparing any proposals required by the contract, are considered as an allowable cost to the contract.

Comment: The Government should not have the right to direct the contractor to commence legal action or take over any suits affecting the contractor, as provided for in 9-50.794-31.

Response: This contract provision covers operating contracts which are normally on a cost reimbursement basis, where the Government is paying the total cost. This particular clause concerns claims filed against the contractor or which the contractor may have against others and, therefore, is a matter for appropriate cognizance of the contracting officer.

Comment: A comment was received to the effect that is was not considered feasible to establish a separate and distinct financial system to administer a single contract per DOE-PR 9-50.704-6.

Response: This clause does not intend that a separate "system" be established, but only that a "separate and distinct set of accounts, records and documents" be maintained to identify the costs under a contract. The system, employed by the contractor, must be satisfactory to DOE, and be in accordance with generally accepted accounting principles and consistently applied.

Comment: Comments were received covering DOE-PR 9-50.704-30, Limitation of Price and Contractor Performance (multi-year contracts), and DOE-PR 9-50.704-40 cancellation (multi-year contracts), recommending further clarifications of the provisions.

Response: After review of these two clauses it was determined, that the clauses be dropped from the regulation, therefore, no clarification is required.

Part 9-9 "Patents, Data and Copyrights":

Comments on Part 9-9, "Patents, Data and Copyrights," were directed to both substantive and procedural aspects. In general, the comments regarding substance were similar in subject matter to those received in response to ERDA proposed regulations on "Patents, Data and Copyrights," issued on October 15, 1975, 40 FR 48308. These comments were published in ERDA Report 76-10, January 1976 (available from the Superintendent of Documents, Government Printing Office, price $1.05). About 40% of the comments, then as now, suggested changes which cannot be accommodated because they conflict with the statutory provisions which govern DOE patent policy, § 152 of the Atomic Energy Act of 1954, as amended, and § 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (Nonnuclear Act), and because they conflict with the patent provisions of the Federal Procurement Regulations (FPR) which DOE is required to follow to an extent not inconsistent with these statutes.

Another 40%, or so, of the comments both then and now, relate to substantive matters such as licensing of background patents and proprietary data, and the extent of the contractor's minimum license rights. The comments pertaining to those matters were carefully considered in connection with the issuance of the final regulations on "Patents, Data and Copyrights" on July 13, 1977, 42 FR 36120. Those final regulations adopted or accommodated a number of substantive and procedural suggestions from the public.

The final regulations on "Patents, Data and Copyrights" issued on July 13, 1977 by ERDA, were republished verbatim in the proposed DOE-PR issued on April 14, 1978. This elicited the comments on substance duplicative of earlier comments referred to above, and in addition, brought forth comments on procedural aspects. Some of the procedural comments have been adopted or accommodated in the regulations being issued in the final rule. For example, the suggestion to permit university contractors having DOE-approved technology transfer programs and written procedures for reviewing papers to prescreen such papers for patentable subject matter, was implemented in DOE Procurement Letter 79-5 of February 28, 1979, and are incorporated in § 9-9.109-6(h)(6). Also, the suggestion to delay submittal of confirmatory licenses or assignments until waivers are acted upon has been adopted. See § 9-9.109-6(i)(5)(ii)(c).

Editorial changes have been made to clarify the language. For example, in § 9-9.109-6(d)(1) a waiver determination is now stated to be initiated when the written request provides the detailed information set forth in § 9-9.109-6(e). The language in § 9-9.109-6(d)(2) has been clarified to provide that a new waiver request covering a contract modification or extension will be required in those contracts where, through the modification or extension, the purpose, scope, cost, or other factors upon which the original waiver was granted have been substantially changed.

Other changes include § 9-9.107-4(a)(7)—clarification to reflect the practice that provisions of the type used in access permits (10 CFR Part 725) may be applicable to contractors as well as other persons requiring restricted data in their contracts, business, trade or profession; § 9-9.202-3(e)(2)(f)—deletion of language referring to optional paragraph (g) to clarify that proprietary data withheld under paragraph (e) of the "Rights in Technical Data" (long form) clause may be inspected, even though proprietary data was either not furnished or required to be furnished under optional paragraph (g) of the "Rights in Technical Data" (long form) clause.

Comments on other parts:

Comment: A university objected to numerous provisions, related to operating contracts, of the proposed rulemaking on the basis that they provide for unilateral Government direction or control (e.g. 9-50.704-2—stop work for safety and health and 9-50.801—termination for default). In view of the university, such provisions are inconsistent with the desired Government-University partnership in the conduct of work statement missions.

Response: It is considered appropriate to employ the referenced provisions which provide for unilateral Government direction particularly in operating contracts where Government is responsible for all of the costs.

Comment: To avoid misinterpretation, replace § 9-4.5106 with the following sentence:

"Compensation for personal services of professional staff, must be in accordance with the Office of Management and Budget Circular A-21, revised."

Response: Adopted.

Comment: To be consistent with Part 25 CFR, Title 31 (42 FR 62927), change the minimum amount of annual support necessary to justify a letter of credit from $250,000 to $120,000.

Response: Adopted.

Comment: Section 9-4.52 "Federal Contract Research Centers," inappropriately distinguishes between Federally Funded Research and Development Centers (FFRDC's) and Federal Contract Research Centers (FCRC's).

Response: Section 9-4.52 was deleted in its entirety.

Comment: It was recommended that a special set of clauses be developed, specifically, for research and development cost-reimbursement contracts with educational institutions.

Response: Not adopted. Universities must compete with the private sector for such contracts. There is considered to be no appropriate basis for special treatment in terms of contract clauses.

Comment: Two commentators expressed concern over DOE cost-sharing provisions as set forth in 9-4.59, "Cost Participation." In one case, the concern was cost sharing requirements in various stages of multi-phase projects. In the second case, the concept of cost sharing was objected to in its entirety.

Response: Not adopted. The present coverage, in 9-4.59, provides adequate flexibility to address varying cost sharing arrangements in multi-phase projects. DOE believes that cost sharing is entirely appropriate where the principal purpose of research, development and demonstration efforts is ultimate commercialization or industrial utilization, and when there are reasonable expectations that the performer will receive present or future economic benefit beyond the instant contract.

Comment: In 9-10.250 "Corporate Co-Sureties," eliminate the bar to Reinsurance Agreements in connection with construction contracts.

Response: Adopted.

Comment: Revise Subpart 9-23, "Subcontracting Policies and Procedures" to provide for mutual agreement on changes in subcontract approval levels under cost type contracts.

Response: Not adopted. The approval of a contractor's purchasing system is a Government prerogative where Government money is essentially being spent. It is essential that the contracting officer have the authority to adjust subcontract approval levels, as necessary, to assure proper expenditure of public funds. There were some comments received that were not considered appropriate for adoption because they are of a non-substantive nature, and pertain to subject matter which is considered to be: (i) Adequately covered in the DOE-PR as drafted, or in the Federal Procurement Regulations; (ii) not in consonance with the established policies of DOE, other Federal agencies or the legislation governing DOE's predecessor organizations; or (iii) a procedural matter which would be more appropriately reflected in DOE Handbooks or other issuances.

A summary of revisions to the DOE-PR as proposed on April 14, 1978 follows:

Summary of Revisions to the DOE-PR as Proposed on April 14, 1978

Part Affected, and Summary of Revisions

9-1.003—Cites the Headquarters officials with whom coordination is affected in more general terms by deleting the specific reference to the "Controller, and interested program personnel" and replacing it with "* * * and any other appropriate Headquarters Officers".

9-1.004—Clarifies applicability of the regulation by specifically excluding "real property". Also excluded are the DOE "assistance programs" which are

governed by the DOE Assistance Regulations, 10 CFR Part 600 and procurements made with non-appropriated funds. In cases of procurements which obligate non-appropriated funds the FPR & DOEPR are used for guidance. The subsection has been revised by the addition of a new paragraph which defines DOE assistance instruments.

9-1.805(a)—Cites cross reference to FPR 1-1.805(a) as a basis for exclusion of subject matter which bears a security classification from the requirements of certain DOE policies and procedures.

9-1.808(a)—Parenthetical reference to "counsel", "controller" and "interested program personnel" has been deleted to expand the meaning of the phrase "other officials".

9-1.808-2—Limits the HPA's deviation authority to deviations which do not involve the cost principles contained in Parts 9-15, 9-50.15 and 9-50.704. Deviations which involve cost principles require approval of the Senior Procurement Official, Headquarters. The requirement for mandatory coordination with the "controller" has been deleted and text has been clarified to require request for deviations to be submitted "by letter".

9-1.951—The subparagraph has been amended to reflect change made in 9-1.003.

9-1.954—The term "Procurement Letters" has been replaced; the term "Acquisition Policy Letters" and a subparagraph has been added to indicate the type of guidance set forth in such letters. Change in the designation has been made to prevent confusion of the abbreviation for Procurement Letters, PL with the abbreviation of Public Law. The subsection has also been revised to reflect the change in coordination requirements addressed in 9-1.003 above. The requirement to distribute Procurement Handbooks to all recipients of the DOE-PR has been deleted to permit distribution on an as needed basis.

9-1.955—The listing of DOE organizational elements designated as "procuring activities" and their corresponding HPAs has been deleted. Internal documents will be issued to identify the various HPAs. The subsection has been revised to reflect this change by deleting all text following the first sentence.

9-1.956—Subparagraph (c) revised by deleting "and grant officers" to reflect the exclusion of financial assistance matters from the DOE-PR.

9-1.302-3—Adds a new section which establishes the DOE approval procedures which must be complied with prior to entering into a contract with Government employees or business concerns substantially owned or controlled by Government employees.

9-1.313—This subsection has been revised to indicate that information relative to essential contract file documents is contained in the current Acquisition Policy Letters. The subsection as revised requires file documents to contain the information and supporting data identified in the Acquisition Policy Letters.

9-1.317—Paragraph has been added to set forth the agency (DOE) procedures for processing suspected cases of collusive bidding or false certification as contemplated by FPR 1-1.317(f).

9-1.354(a)—Subsection has been revised to delete the reference to close-out requirements for "grants" and "cooperative agreements" to reflect the exclusion of financial assistance matters from the DOE-PR.

9-1.404-1—Subsection has been revised by deletion of subparagraphs (a) through (c) and revision of the last sentence in the introductory paragraph to indicate that the appointment of Contracting Officers will be in accordance with the requirements of current Acquisition Policy Letters.

9-1.404-2—Subsection has been deleted. Information relative to Contracting Officer designation is now covered in current Acquisition Policy Letters.

9-1.405—Subparagraph (a) has been revised to clarify that the Government is not generally bound by commitments made to "contractors" as well as prospective contractors by persons to whom procurement authority has not been delegated.

9-1.452—The reference set forth in this subsection has been corrected to read 10 CFR Part 1040.

9-1.602—The phrase "suspended, or declared ineligible" has been inserted in the first sentence of the subparagraph to more clearly indicate the requirements for establishment and maintenance of the DOE Consolidated List of Debarred, Ineligible, and Suspended Contractors.

9-1.606-53—Procedural guidance has been added which more succinctly sets forth the information which must be included in a "notice of proposed debarment".

9-1.606-54—The citation referenced in this subsection has been changed to 10 CFR 708.117, "Hearings" to more closely align the reference to the subject matter of the subsection. Also the term "agency" has been inserted between the words "final" and "authority."

9-1.7—This Subpart has been reserved to permit review of the recently issued Office of Federal Procurement Policy implementation of PL 95-507.

9-1.8—The Subpart on Labor Surplus Areas has been expanded to set forth the basic DOE policy with regard to awards of contracts to LSA concerns.

9-1.807—Reporting requirements applicable to awards to LSA concerns have been clarified by making specific reference to the DOE reporting forms, and describing their application. The subsection has been revised to specifically indicate that Department offices shall maintain records of awards made to labor surplus area concerns.

9-1.901—The phrase "and shall be applied to cost-type contractor procurement" has been deleted because it is covered in the remaining text.

9-1.1003—Adds a subsection which makes specific reference to the synopses requirements stipulated in FPR 1-1.1003-2.

9-1.1004—Adds a requirement for synopses of awards of classified contracts where such contract awards can be described with sufficient information of an unclassified nature to be of advantage to industry or to the Government.

9-1.1204—The cross reference to "9-1.313(b)(6)" has been eliminated and the phrase "the contract file shall" has been inserted in lieu thereof to conform to the change made in 9-1.313.

9-1.13—The subpart has been reserved for the same reasons as stated under 9-1.7.

9-1.50—This subpart has been deleted; the subject matter contained therein is planned for inclusion in a Department Handbook.

9-1.51—The title of this subpart has been changed to read "Consideration in Selecting Award Instrument-Procurement Contract, Grant or Cooperative Agreement" and the text has been completely modified to reflect the requirements of the Federal Grant and Cooperative Agreement Act of 1977 (P.L. 95-224) and to incorporate the DOE policies on Financial Assistance as set forth in the DOE Assistance Regulations (10 CFR 600 et. seq.).

9-1.5300—A cross reference to subpart 9-16 has been added for clarification.

9–1.54—This subpart has been completely revised to incorporate the DOE policies on Organizational Conflicts which was published as a final rule on January 11, 1979 (44 FR 2556).

9–2.1—A new Subpart entitled "Use of Formal Advertising" has been added.

9–2.106—Adds a new subsection which vests responsibility for the establishment and maintenance of a procurement management assistance review program with the Director, Procurement and Contracts Management Directorate.

9–2.201—The suggested language for an option provision has been deleted from this subsection and the percentage guidelines formerly set forth have been replaced with a statement that the option quantity should bear a reasonable relationship to the initial firm quantity. A cross reference has been added which refers to the option coverage in 9–1.5303.

9–2.202–50—Deleted—FPR is considered to contain sufficient guidance.

9–2.203–3—Subsection title has been changed to more clearly reflect the subject matter set forth therein. "Trade Journals" has been added as a category requiring written authority prior to inserting paid advertising therein.

9–2.406–3—Second sentence has been revised to make specific reference to alleged mistakes in bids and to indicate the authority of Senior Procurement Official to redelegate his authority in this area.

9–2.5—New subpart added to establish the HPA as the approval authority for the use of the two-step formal advertising method of procurement.

9–3.150–1—The subparagraph has been revised to provide "unsolicited proposals" the same level of protection which is provided to other proposals.

9–3.150–2a—Provides instructions on procedures proposers are to follow to ensure the protection of confidential proposal information.

9–3.150–2(b)—Subparagraph has been revised to delete the definition of "Proprietary data." The definition is set forth in 9–9.201(b).

9–3.150–4(b)—Approval levels changed for the determination to use outside agencies to assist with proposal evaluations.

9–3.150–5—Subsection title has been changed to more clearly reflect the subject matter set forth therein. Provides for debriefings to be normally held after announcement of the selection decision and prior to award of the contract.

9–3.204—Incorporates a cross reference to the negotiation procedures applicable to architect-engineer services.

9–3.212—Subsection has been deleted.

9–3.215—Subpart has been clarified with respect to the use of the authority of Section 162 of the Atomic Energy Act of 1954, as amended.

9–3.303—Approval authority for the execution of determinations and findings pursuant to section 30d(c)(11) (FPR 1–3.211) has been changed to Senior Procurement Official, Headquarters.

9–3.404–50—A new subparagraph (a) has been added to designate the Senior Procurement Official, Headquarters as the approval official for Lump Sum A–E contracts which provide for reimbursement of certain costs. Subsequent paragraphs have been redesignated "b" through "h" vs "a" through "g." A cross reference has also been added to the end of this subsection which refers to 9–3.806–2.

9–3.405—A section heading has been added to indicate subject matter of the subsections.

9–3.405–5(b)—Exemptions to the statutory fee limitations available to DOE are limited to former AEC type functions and those of the Bonneville Power Administration.

9–3.405–50(a)—The reference to "negative" fees has been deleted from subparagraph (1) and the need to seek contractor comments on evaluation findings has been eliminated.

9–3.405–50(c)—Subparagraph has been revised to make specific reference to the fee "schedules" set forth in the Procurement Handbook. FPR 1–3.407–2 is referenced for fee limitations. The use of Weighted Guidelines (WGL) is authorized for contracts performed in commercial facilities.

9–3.405–50(g)—Subparagraph reworded to state that the contractor should be given an opportunity to present matters to the board or fee determination official on its own behalf. The requirement for agreement by the parties on a specific number of days constituting reasonable notice has been deleted.

9–3.406—The first sentence of paragraph (b) of the subsection was reworded to delete the statement pertaining to definitization of letter contracts within 120 days. DOE policies relative to letter contract definitizatien are set forth in paragraph (c) of the subsection.

9–3.600—The scope of the Subpart on small purchases procedures has been revised to reflect the requirements of Public Law 95–507. Subsection 9–3.603–1 and 9–3.603–2 have been reserved for the reasons set forth in 9–1.7. A new subsection 9–3.601 is added reserving procurements under $10,000 for small business except in certain circumstances. Subsection 9–3.603–3 has been redesignated as 9–3.604–3.

9–3.604—A new subsection heading is set forth for proper identification.

9–3.605—A new subsection heading is set forth for proper identification.

9–3.805—Subparagraphs (c), (d) and (e) of this subsection have been substantially revised to be consistent with current selection procedures specified in internal directives.

9–3.805–50—Subparagraph (a)(1) has been revised to clearly indicate that dollar thresholds for Source Selection procedures will be based upon the anticipated total sum of all awards, all phases or options, an all cost shares regardless of derivation. The terms "grants" and "cooperative agreements" have been deleted for the reasons stated in 9–1.354(a).

Subparagraph (b) has been revised to clarify the use and applicability of SEB procedures on contracts which are expected to exceed $5 million.

Subparagraph (f) has been revised to permit the use of consultants, and contractors as selection advisors when deemed appropriate.

9–3.805–51—Subparagraph (b) has been revised to be consistent with FPR and to recognize the separate justification procedures provided for certain recompetitions or extensions, unsolicited proposals and Special Research Contracts (SRCs). Also recognized is the fact that Program Opportunity Notices and Program Research and Development Announcements are competitive solicitations.

Subparagraph (c)(1) has been modified to state that small purchase procedures should be used in the case of justification for non-competitive procurement for small purchases.

In subparagraph (d) coordination and approval requirements for the justification to enter into noncompetitive procurements have been streamlined by deletion of the requirement that the controller concur in such determinations when the estimated value of the proposed procurement is in excess of $500.

In addition, approval levels under (d)(1) C and D have been changed.

9–3.807–1—This subparagraph authorizing HPAs to approve the findings required by FPR 1–3.807–1 (b)(1), has been deleted.

9–3.807–3—The certification requirements for current cost or pricing data have been clarified relative to on-site services contractors and educational institution contracts covered by OMB Circular A–21 or FPR 1–1.53.

9–3.809–2—Cross references have been added to identify the parts of the FPR and DOE–PR which set forth statutory limitations on fees applicable to cost-type contracts and architect-engineer contracts. The applicability of the "fee curve" to on-site contractors for performance of support reviews has also been clarified.

9–3.814–1—The requirements that the Head of the Procuring Activity obtain the coordination of appropriate Headquarters officials prior to authorizing a waiver to FPR 1–3.814 on transactions involving foreign governments or agencies thereof has been deleted.

9–3.901 The last sentence of paragraph (c) of the subsection has been revised to more clearly indicate that the provisions of the subsection apply only to those functions being performed by DOE which were formerly performed by AEC.

9–3.1210—Subsection has been added to require the submission of a consolidated Cost Accounting Standards Board report.

9–4.4—Adds a new subpart to part 9–4 which provides guidance on the procurement of utility services for GOCO facilities. The subject matter of this new subpart was formerly covered in subpart 9–50, subsection 9–50.401. The subpart has been modified to except telecommunications from utility services covered, and specifies that proposed contracts for utility services which meet certain criteria are to be submitted to the utility element in the Directorate of Administration for Headquarters' review and approval.

The approval threshold for utility services agreements which require Headquarters review has been increased from $5,000 to $10,000.

Subparagraph 9–4.411–3(a) has been reserved, pending determination of authority with respect to all elements of DOE.

9–4.901—Deletes in its entirety since adequately covered in the FPR.

9–4.902—Adds the term "unique" to make consistent with the FPRs.

9–4.904—Deletes definition of "Unsolicited Proposals" and type of information not considered to constitute unsolicited proposals, i.e. advertising material, commercial product offerings, commercial service offerings, contributions, technical correspondence, and capability statements. The purpose for the deletions is to conform the definition of unsolicited proposals to the FPR. There is no change from the April 14, 1978 version of the DOE-PR regarding the treatment of unsolicited proposals falling under the provisions of Subpart 9–4.51, Special Research Contracts with Educational Institutions.

9–4.905—Deletes in its entirety since adequately covered in the FPR.

9–4.906—Deletes in its entirety since adequately covered in the FPR.

9–4.908—Adds a paragraph (b) to indicate the mailing address to which unsolicited proposals should be sent.

9–4.909—Adds "Receipt" to Title to make consistent with FPR. The section has been revised to delete information pertaining to receipt, review, evaluation factors, and evaluation of unsolicited proposals which is adequately covered in FPR 1–4.909. Revises the designation of the activity which must approve decisions to support unsolicited proposals which involve support services. Paragraph 9–4.909(g) (1) (ii) has been revised to delete the requirement for controller concurrence with justification for acceptance of an unsolicited proposal since funds availability is determined based upon the "FUNTS" system. Paragraph 9–4.909(i) is expanded to add "absent any specific delegation" to the beginning of the second sentence to indicate that there may be circumstances where such authority is vested in the field through the delegation process.

9–4.952—Title expanded to include data and copyright as well.

9–4.1000—Deletes statement that this subpart does not apply to the procurement of professional architect-engineer services by DOE contractors since the intention is that they will, in fact, so apply.

9–4.1004–1—Adds to general policies and procedures for selection as contained in the FPR, policies concerning selection of contractors by board process as contained in internal DOE Directives. The purpose is to provide awareness of the FPR implementation process within DOE.

9–4.1004–3(a)—Deletes 9–4.1004–3(a)(7) "adequacy of firms accounting system" § 9–4.1004–3(a)(9) "willingness to grant the Government principals or exclusive rights in resulting inventions" since they are considered either inappropriate or too restrictive to be included among the general qualification criteria.

9–4.1004–52—The phrase "and management data" was added to the type of information which may be requested from A-Es during initial discussions which lead toward A-E selection.

9–4.1004–53—The title of the section was revised to read "Use of requests for supplemental information" in order to more clearly reflect the subject matter of the section. Also the first paragraph was revised to indicate that supplemental information may be solicited as a means of initiating the discussion phase of the A-E selection process.

9–4.1004–54—A requirement has been added that the selection official provide complete documentation of the selection decision in the event a firm other than the highest ranked firm is selected. Provision has also been included for the discarding of SF 255s received from firms with which written or oral discussions were not held 90 days after award.

9–4.1004–55—The title of the subsection has been revised to read "Late submission of qualification and performance data." Also the term "submission" has been substituted for the word "proposal" in the first line of the paragraph. This is to recognize that the procedures governing late proposals do not apply to the selection process governing architect-engineer services.

9–4.1005–50—The last sentence of the paragraph has been revised to more clearly indicate that the waiver from the six percent A–E fee limitation is granted only for those DOE functions which were formerly performed by AEC or BPA.

9–4.51—Subpart title has been changed to "Special Research Contracts with Educational Institutions" vs "Special Research Agreements with Educational Institutions," and the terms "agreements" and "support agreements" have been changed to the term "contract" where appropriate. These modifications reflect the requirements of Public Law 95–224.

9–4.5100—Dollar ceiling has been changed from $500,000 to $1,000,000 and procedural guidance has been added relative to the use of grants or cooperative agreements under Public Law 95–224.

9–4.5106–2(a)—Subparagraphs (a) (1) and (a) (2) have been revised to delete the reference to "support." The terms "funded" and "funding" have been used instead.

9–4.5106–3—Cross reference to 9–3.150–4 has been added to subparagraph (a)

and a new subparagraph (d) has been included to make specific reference to the policies for avoidance of organizational conflicts when reviews are conducted by nongovernment employees.

9–4.5106–4—This section has been revised in its entirety. Guidelines for calculation of compensation for professional employees have been deleted and OMB Circular A–21, as amended, has been referenced in lieu thereof.

9–4.5106–5—The reference to "support" has been replaced with the terms "fund" or "funding" wherever appropriate.

9–4.5106–6—The reference to "support" has been replaced with the terms "fund" or "funding" wherever appropriate. Also paragraph (c) has been revised to delete the requirement that contracts transferred between field offices be renumbered in accordance with 9–52.100, since Part 9–52 has been reserved.

9–4.5107–1—The dollar ceiling has been changed from $500,000 to $1,000,000. The term "support" is deleted throughout the text and replaced by "funding", "fund" or "Government" as appropriate.

9–4.5108—The procedures for transfer of title to equipment to nonprofit educational or research institutions have been revised to reflect the changes promulgated by Public Law 95–224.

9–4.5108–3—A new subsection has been added to delineate the requirements for the reporting of excess Government property.

9–4.5109–1—The reference to "support" has been replaced with the term "funding".

9–4.5109–2—Procedures for reporting of Energy R&D projects have been revised to reflect a change in the form used to make such reports and report distribution requirements. The title of the paragraph has been redesignated as "Notice of Energy R&D Projects."

9–4.5109–5—A sentence has been added which requires consideration of the relative value of special reports vs the anticipated cost of such reports. The section has been clarified to indicate that special reports must be requested through the Contracting Officer.

9–4.5109–7(a)—The submission due date for the final report has been redefined as "three months after completion of the work" vs "when the contract is completed." In addition the number of copies to be distributed has been changed.

9–4.5111—The title of the section has been changed to "Extension of Contracts" vs "Extension of Agreement".

9–4.5111–1—Submission requirements for renewal proposals have been revised. Renewal proposals are to be transmitted to the DOE field office which has jurisdiction over the contract rather than to the Senior Procurement Officer, Headquarters. The restriction against DOE personnel requesting or informally stimulating renewal requests has been deleted. Renewal proposals are to be submitted not later than "4 months" before the date of contract expiration rather than "3 months." If a renewal proposal has not been received 4 months prior to the contract expiration date, the Contracting Officer is to determine status and take appropriate action. The term "cumulative DOE support ceiling" has been replaced by the term "cumulative Government ceiling."

9–4.5111–3—The references to "support" have been replaced by the terms "funding" and "Government", as appropriate.

9–4.5112–2—Paragraph (d) of this subsection has been revised to update references by incorporation of a reference to Public Law 95–224.

9–4.5112–3—The dollar threshold for the use of letter of credit procedures has been reduced from $250,000 to $120,000. The reference to the Treasury Fiscal Requirements Manual has also been corrected.

9–4.5112–4—Subparagraph (a)(4) has been clarified to exclude the purchase of general-purpose equipment with a cost of less than $500.00 from the notification requirements.

9–4.5112–5(a)—Responsibilities for the conduct of audits has been clarified by revising the first sentence of the subparagraph as follows: ". . . auditing of participating contractors shall be initiated by the Contracting Officer administering the contract."

9–4.52—Deletes the Subpart on Federal Contract Research Centers (FCRCs) in its entirety since adequate policy guidance is considered available without creating a separate Subpart for this category of contractors.

9–4.5402(c)—Deletes reference to the Senior Procurement Official, Headquarters since this authority has been delegated to the head of the procuring activity.

9–4.5505—The instructions for use of price escalation provisions with multiyear contracts have been clarified by indicating that such provisions "may" be used when "unreasonable" contingencies are likely to be included for labor and material cost.

9–4.5700—This section has been revised to clarify the applicability of the Subpart. The phrase "of competitive concept proposals" has been deleted and the phrase "for award or support of proposal" added to provide the flexibility for using either a procurement contract or assistance instrument, i.e. grant or cooperative agreement depending on its purpose as defined in Public Law 95–224.

9–4.5701—The reference to "not-for-profit or nonprofit organizations" has been deleted since there is no distinction for purposes of this Subpart. The term "pilot plants" has also been deleted since its definition is already encompassed in the term "Demonstration Projects". The last sentence of this section has been revised to exclude nuclear energy resources from the applicability of this subpart since this subpart is restricted to non-nuclear energy sources.

9–4.5702–1—The need to give special attention in synopsis notices to small business and minority business concerns is highlighted by the addition of the phrase ". . . and socially and economically disadvantaged concerns". This treatment is in consonance with Public Law 95–224 as implemented by the Office of Federal Procurement Policy in the April 20, 1979 Federal Register.

9–4.5702–3—Subparagraph (f) has been deleted since financial capabilities of the potential participants are not considered an appropriate Federal support criteria. The subsequent subparagraphs (g) through (i) have been redesignated as (f) through (h).

9–4.5702–5—A new subparagraph (d) has been added to include submission of applicable "representations and certifications" with proposals. The former subparagraph (d) was redesignated as subparagraph (e).

9–4.5702–6—A new paragraph has been added to provide for the use of "Alternate procedures for consideration of late proposals," as set forth in FPR 1–3.802–2. The late proposal provision permits consideration of late proposals if among other things the proposal offers a significant cost or technical advantage to the Government.

9–4.5703–1(a)(7)—The subsection on cooperative agreement has been expanded to describe the various types of instruments, i.e. procurement contracts, grants or cooperative agreements that may be awarded and/or supported depending on the

intended relationship and the purpose to be accomplished. This is in accordance with Public Law 95-224. The subsection describes the appropriate regulations to be followed depending on the specific circumstances involved.

9-4.5704(b)(1)—Adds "aggregate of expected award values, plus costs shared by the contractor and/or other parties" and deletes "when an individual proposal" to reflect the realistic value of the proposed award and/or support and to subject it to the appropriate selection procedures commensurate with its anticipated value.

9-4.5704(b)(2)—Adds the requirement to utilize the SEB Handbook procedures under certain circumstances when anticipated award and/or support is not expected to exceed the SEB dollar threshold for the purpose of insuring impartial, equitable and thorough evaluation of each proposal.

9-4.5704(c)—Adds a criterion for cost realism and probable cost to the Government.

9-4.5704(e)—Deletes the paragraph concerning selection official and refers to the provisions of 9-3.805-50 which details who the selection official will be depending on dollar threshold of the anticipated award and/or support.

9-4.5800—Adds a paragraph (b) to describe the various types of instruments, e.g., procurement contracts, grants or cooperative agreements that may be awarded and/or supported depending on the intended relationship and the purpose to be accomplished. This is in accordance with Pub. L. 95-224. The subsection describes the appropriate regulations to be followed depending on the specific circumstances involved.

9-4.5802-4(a)(11)—Deletes "commit" in second line and adds "obligate" to emphasize the role required of the signatory authority.

9-4.5803 and 9-4.5803-1—Deletes entire section regarding "forms of assistance and participation", since restated and amplified in new Section 9-4.5800(b).

9-4.5803-2—Renumbered as 9-4.5803.

9-4.5804(a)(2)—Expands this subsection to emphasize the availability for use of alternate late proposal procedures as provided for in FPR 1-3.802-2 when large number of awards are anticipated. This is in recognition of the fact that many small concerns may not be totally familiar with Government regulations in the area of submission of proposals and may be precluded from consideration for award even though they have an advantageous proposal unless this procedure is utilized.

9-4.5804(b)—"Selection panel" replaces "evaluation criteria" as 9-4.5804(b) and "evaluation criteria" becomes new 9-4.5804(c). Adds reference to the required approvals and procedures contained in Sections 9-3.150-4 and 9-3.805-50(f), when engaging prime management or operating contractor personnel in the selection process. This reemphasizes confidentiality of their involvement in the process and further, forbids the use of this information for improper purposes.

9-4.5804(c)—Adds several new illustrations of evaluation elements that may be considered as evaluation criteria, e.g., cost realism and probable cost to the government to assure that potential proposors have performed adequate analysis and review in their proposal preparation.

9-4.5804(d)—"Program policy factors" is renumbered from 9-4.5804(c) to 9-4.5804(d) and couched in more positive terms, e.g., that factors will be predetermined in the notice to accomplish greater clarity in the intent of this subsection.

9-4.5804(e)—Deletes subsection on "Selection Official" and refers to DOE-PR 9-3.805-50. As herein, selection officials are designated based on dollar threshold.

9-4.5804(f)(1)—Revises this section by deleting "receiving office" and adding "selection panel" in its place to reflect the use of panels in this process.

9-4.5804(f)(2)—Adds this subsection to prescribe procedures to be employed if a proposal does not meet predetermined requirements.

9-4.5901—Deletes 9-4.5901(a) since 9-4.5901(b) adequately describes the types of situations in which cost participation may be required.

9-4.5901(e)—Deletes the term "pilot plant" since the terminology is adequately defined under "demonstration" technologies programs, etc.

9-5.902—A cross reference has been added to the appropriate provisions of the DOE PMR. Also a provision has been added which states that the authority for authorization to use GSA sources of supply may be redelegated to the level of Contracting Officer.

9-5.1001(a)—Part 101-14 of the Federal Property Management Regulations has been reentitled as "National Stockpile" vs "Strategic Critical and Other Materials" to reflect the change made in the referenced document.

9-5.3—This subpart has been added and states the policy pertaining to the use of excess personal property is contained in referenced FPR provisions.

9-5.5106-1—The following sentence was added to clarify the applicable provisions of the Economy Act. "Such work on services will be performed by other government agencies unless it can be shown that it can be performed more conveniently or more cheaply by private industry, in which case it would be performed by competitive solicitation."

9-5.5106-5—The previously cited temporary Comptroller General Decision reference has been replaced with the permanent citation. Also, reference to a modifying Comp Gen decision has been added.

9-5.5201-2—Subparagraph has been revised to update references to standards and Public Law. Cross references have been added to FPMR 101-38.9 and DOE PMR 109-38.51.

9-5.5201-2(a)—Reference to applicable provisions of the DOE PMR has been added. Under paragraph (b) of this citation, the last sentence has been revised to enumerate the specific types of Vehicles covered and the previously cited temporary regulation, G-28, has been replaced with the citation Pub. L. 94-163. Under paragraph (c) of this citation the following has been added: "Requisition for sedans, station wagons and certain types of light trucks shall be submitted through Headquarters as outlined in 9-5.5201-6. Requisitions for all other types of vehicles may be submitted directly to GSA." In paragraph (d), a reference to DOE PMR 109-38.9 has been added.

9-5.5201-3—The individual identified to receive a copy of the waiver request has been changed. The procedures for direct purchase of vehicles has been clarified by the addition of a new penultimate sentence which indicates that the head of the procurement agency may authorize direct purchase of general purpose trucks by DOE contractors. Also the term "clearance" has been replaced with the word "waiver" throughout the subsection. A reference to DOE PMR 109-38.51 was also added.

9-5.5201-5—Authority to make arrangements for obtaining forfeited or abandoned vehicles from GSA has been assigned to the Chief, Property and Equipment Management Branch, Headquarters vs. the Senior Procurement Official, Headquarters.

9-5.5201-6—Various revisions were made to update and improve clarity. A cross reference to DOE PMR was added. Subparagraph establishes

requisite procedural guidance for acquisition of fuel-efficient vehicles and identifies the responsibilities of the Chief, Property Management Branch, Headquarters. A Requirement for submission of forecast of needed vehicles by October 15th of each year was added.

9–5.5202–3—A cross reference to the DOE PMR was added. The reference to DOE EM 0260 was updated to read DOE Order 1340.

9–5.5206–5(b)—Cross reference to DOE PMR 109–25.302.2 has been added to the penultimate sentence.

9–5.5206–5(a)—Same as 9–5.5206–5(b) above.

9–5.5206–9—New subparagraph (d) has been added which makes cross reference to DOE PMR 109–38.3 and 109–38.6.

9–5.5206–11—Subparagraph (c) of the subsection has been revised to reflect a change in the mailing address of the Hq. U.S. Army Materiel Development and Readiness Command.

9–5.5206–15—A cross reference to the DOE PMR has been added.

9–5.5207–1—The phrase "for a given program" has been added to clarify the authority of the "Senior Program Official or designee."

9–6.1—The paragraph reference numbers have been changed to correspond with those contained in the FPR.

9–7.102–50—The phrase "whether incorporated by reference or otherwise" has been inserted after the phrase "or other provisions of the contract," and the phrase beginning with "contractor's technical proposal" has been identified as subpart "(e)" of the clause.

9–7.102–52—The word "appropriate" has been inserted between the phrase "Insert the" and the "clause set forth." Also the reference to section "9–9.103–1" has been revised to read "section 9–9.103."

9–7.102–53—The contract clause entitled "Notice and assistance regarding patent and copyright infringement" has been deleted from the required clauses and has been re-established as a clause to be used when applicable under 9–7.103–4.

9–7.103—The intent of the introductory paragraph to the "clauses to be used when applicable" has been clarified by indicating that the clauses listed thereunder shall be used when applicable in addition to "or in place of counterpart clauses in FPR 1–7.103."

9–7.103–4—See note pertaining to 9–7.102–53 above.

9–7.103–54—The clause entitled "Organizational conflicts of interest" has been deleted in favor of the clauses set forth in the new section 9–1.54. This change was made throughout this subpart 9–7.

9–7.103–56—The clauses entitled "Preservation of individual occupational radiation exposure records," as set forth under 9–50.704–41, has been added as a clause to be used when applicable.

9–7.104–50—The applicability of the "Priorities, Allocations, and Allotments" clause has been clarified.

9–7.2 through 9–7.8—The order in which the clauses appear in these subsections has been changed to make their order consistent with the arrangement of the clauses in the other sections of this subpart 9–7.

9–7.202–4—Provides instructions for modification of paragraph (a)(1)(i) the clause entitled "Allowable cost, fee and payment" by insertion of the phrase "as supplemented or modified by 9–15.2 (41 CFR 9–15.2) after the reference (41 CFR 1–15.2). "Cross references have also been made to the DOE or FPR sections which pertain to on-site service contracts, contracts with educational institutions and on-site construction and architect-engineer contracts.

9–7.202–59—The "Stop work order" clause has been included as one of the required clauses to be used in cost reimbursable cost-type contracts.

9–7.203–57—See comment pertaining to 9–7.103–56 above.

9–7.303–56—See comment pertaining to 9–7.103–56 above.

9–7.403–74—See comment pertaining to 9–7.103–56 above.

9–7.603–57—See comment pertaining to 9–7.103–56 above.

9–7.603–58—The clause entitled "Safety and Health," as set forth in 9–50.704–2, has been added as a clause to be used when applicable.

9–7.603–59—Instructions have been added to insert the clause entitled "Privacy Act" (FPR 1–1.327–5) when appropriate.

9–7.604–52—A clause entitled "Wage Determinations" has been added. The clause may be added to the SF19 when applicable.

9–7.704–50—The "limitation of price and contractor performance (multi-year contract)" clause has been added. Clause is patterned after the clause in the DAR.

9–7.704–51—The clause entitled "Cancellation (multi-year contracts)" has been added. As in the case above, the clause is patterned after the DAR.

9–7.704–53—See comment pertaining to 9–7.103–56 above.

9–7.704–54—See comment pertaining to 9–7.603–58 above.

9–7.802–18—The clause entitled "Payment of interest on architect-engineer claims" has been redesignated as 9–7.802–14 and the paragraph number has been reserved.

9–7.802–19—The clause entitled "Utilization of minority business enterprises" has been deleted and the paragraph number has been reserved for the reason set forth in 9–1.7.

9–7.803–5—The clause entitled "Small business subcontracting program" has been deleted and the paragraph number has been reserved for the reason set forth in 9–1.7.

9–7.803–6—The clause entitled "Minority business enterprises subcontracting program" has been deleted and the paragraph number reserved for the reason set forth in 9–1.7.

9–7.803–54—See comment at 9–7.103.56 above.

9–7.803–55—See comment at 9–7.603–58 above.

9–7.804–3.—A new subparagraph has been added to set forth administrative data which is to be included as part of Item 6 of the Standard Form 252. The information depicted under this new subparagraph is procedural in nature.

9–7.804–51—See comment at 9–7.606–59 above.

9–8—Subsection titles have been added to paragraphs 9–8.211, 9–8.212, 9–8.307, 9–8.404, 9–8.501, 9–8.503 and 9–8.504. The subsection titles correspond to those set forth in the FPR.

9–8.206—A new heading was added: "Fraud and Other Criminal Conduct." Paragraph has been added to advise government personnel that "any evidence of fraud or other criminal conduct in connection with the settlement of a terminated contract" must be reported in accordance with 9–1.605–50.

9–8.404—Provision added which addresses Procedures after invoices or vouchers are discounted.

9–8.501–2—The approval authority to authorize sale of termination inventory to DOE has been raised to the level of the HPA.

9–8.601—A cross reference has been added to FPR 1–8.601.

9–8.700–2(a)—Cross references have been added to 9–7.802–4 and 9–8.751.

9–8.751—The term "contractor" has been changed to the term "architect-engineer" where applicable in the clause entitled "Termination article for cost-plus-a-fixed-fee architect-engineer contracts." Also the first sentence of paragraph (b) has been revised through the addition of the phrase "and does not cure such failure within a period of 10 days (or such larger period as the Contracting Officer may authorize in writing) after receipt of notice from the Contracting Officer specifying such failure."

9–8.751(d)(4)—The last sentence has been revised to read as follows: If performance of the work under the contract is terminated for the default of the architect-engineer, no further payment beyond that amount due on completed work with appropriate fee payment shall accrue on account of the fixed-price.

9–9.107–4(a)—Subparagraph (7) has been clarified to reflect the practice that provisions of the type used in access permits (10 CFR 725) may be applicable to contractors as well as other persons requiring restricted data in their contracts, business, trade or profession.

9–9.107–5—The definition of "subject inventions" has been modified to conform with the definition of that term as set forth in FPR 1–9.107–5(a). Subparagraph 9–7.107–5(d)(2)(i) has been clarified by the insertion of the phrase "patent application" between the phrase "after the filing" and "or within 2 months after submission," and the requirement for preparation of a written decision with respect to first use of an invention or its reduction to practice has been revised.

9–9.107–6—Subparagraph (g) of the Patent Rights clause, short-form, has been amended to stipulate a period of time by which DOE Patent Counsel must respond and rule on a request for publication. The maximum delay which is authorized is 160 days unless a longer period is mutually agreed to. The change reflects policies expressed in Procurement Letter 78–11, dated June 30, 1978.

9–9.109–6(d)(1)—The first sentence of the paragraph has been clarified by making specific reference to the information set forth in paragraph 9–9.109–6(e). A waiver determination is now stated to be initiated when the written request provides the detailed information set forth in 9–9.109–6(e).

9–9.109–6(d)(2)—The language has been clarified to provide that a new waiver request covering a contract modification or extension will be required in those contracts where, through the modification or extension, the purpose, scope, cost or other factors upon which the original waiver was granted have been substantially changed.

9–9.109–6(h)—A new paragraph 9–9.109–6(h)(6) has been added to permit university contractors having DOE-approved technology transfer programs and written procedures for reviewing papers, to prescreen such papers for patentable subject matter. The procedure stipulated in this new paragraph was implemented by DOE Procurement Policy Letter 79–5 dated February 28, 1979.

9–9.109–6(i)(5)(ii)(C)—Language has been added to this paragraph which permits delay of a submittal of confirmatory licenses or assignments until a pending waiver request has been acted upon.

9–9.202–3(e)(2)(f)—The language which referred to optional paragraph (g) has been deleted to clarify that proprietary data withheld under paragraph (e) of the "Rights in Technical Data" (Long Form) clause may be inspected even though proprietary data was either not furnished or required to be furnished under optional paragraph (g) of the "Rights in Technical Data" (Long Form) clause.

9–10.109—The requirement for a legal sufficiency review as to the acceptability of the surety and adequacy of the bond has been clarified. Also paragraph (b) has been revised to require receipt of bonds prior to award of contract.

9–10.5012—Subsection has been added to provide procedural guidance for the use of service type insurance policies.

9–12.100—Editorial changes have been made to this subsection by deletion of the phrase "in appropriate circumstances" from the first sentence and deletion of the phrase "and which may be applied pursuant to the provisions of such contracts" from the last sentence of the subsection.

9–12.102—Subsection has been added to provide procedural guidance for the approval of overtime, extra pay shifts and multishift work, and to more clearly indicate that the policies expressed in FPR1–12.102 are applicable to all DOE contracts including construction and procurements by operating and other on-site contractors.

9–12.604—Subsection has been added to indicate that challenges to the Contracting Officers determination relative to eligibility under the Walsh-Healey Act will be processed in accordance with agency protest against award procedures except that, depending upon the size of the business, the matter shall be submitted to the Department of Labor or the Small Business Administration for final resolution.

9–12.800—The subsection has been revised to indicate that the scope of subpart 9–12.8 also applies to DOE subcontracts and that it may be adapted to programs involving Federal assistance.

9–12.805–1—This subsection has been revised to reflect the transfer of responsibility for monitorship of labor compliance. In accordance with Executive Order 12086, dated Oct. 5, 1978, the Director of Federal Contract Compliance, DOL, has been designated the responsibility for carrying out the requirements of Executive Order 11246, as amended, and as implemented by 41 CFR Chapter 60.

9–12.805–51—Procedures for requesting pre-award compliance checks have been updated to reflect the change in monitorship responsibilities discussed above. Also the applicability of the requirement for conduct of pre-award labor clearance checks has been clarified by making specific reference to "modifications of existing contracts which constitute a new effort," "basic ordering agreements," "indefinite delivery contracts," and "letter contracts."

9–15—The Subpart has been revised by deleting the contract cost principles and procedures applicable to Operating and On-Site Services Contracts from this subpart. Contract cost principles and procedures as they relate to Operating and On-Site Services Contracts are now covered under § 9–50.15. This change was made in recognition of the fact that the cost principles related to the operation of DOE plants or laboratories differs considerably from the cost principles applicable to DOE's other contracts. The subsections deleted from this part and transferred to 9–50.15 are: 9–15.5004 through 9–15.5005–5, 9–15.5007–1 through 9–15.5007–3, 9–15.5008 through 9–15.5009–5, 9–15.5010–1 through 9–15.5010–4, 9–15.5010–7, 9–15.5012–13 and 9–15.5012–14. Subsections for which guidance is included under both § 9–15 and § 9–50.15 are 9–15.5006, 9–15.5007, 9–15.5010, 9–15.5010–5, 9–15.5010–6, 9–15.5010–8 through 9–15.5010–11 and 9–15.5010–14 through 9–15.5010–20. The subsection reference numbers have been changed as follows:

Former reference No.	New reference No.	New reference No.
	§ 9-15	§ 9-50.15

Part Affected, and Summary of Revisions

9-15.000—The subsection has been redrafted to clarify the scope of the Subpart and to reflect the changes enumerated above.

9-15.101—Added to clarify applicability of DOE-PR 9-15 and FPR 1-15.

9-15.103—Retitled and revised to clarify what cost principles cover operating contracts with educational institutions. The guidance pertaining to the determination of overhead rate (subparagraphs 9-15.103 (b) and (c) has been transferred to 9-15.307.

9-15.205-60—A subsection has been added to indicate that DOE does not consider Facilities Capital Cost of Money as an allowable cost, i.e., DOE has selected Option 1 under the FPR Temporary Regulation #40.

9-15.307—Adds paragraph which includes prior language of 9-15.103 on overhead for educational institutions as well as adds reference to OMB Circular A-21.

9-15.50—As indicated in the introductory summary to § 9-15, the coverage of cost principles and procedures as they relate to Operating On-Site service contracts has been transferred to 9-50.15. The title of the subpart has been changed to "Contract Cost Principles and Procedures."

9-15.5000—The subsection has been revised to reflect the changes made to the section with respect to the deletion of cost principles as they relate to operating and on-site services contractors.

9-15.5001—The definition for "operating contract" and "on-site architect-engineer contract" have been deleted from the subsection, also the definition of "research and development contracts" has been clarified.

9-15.5002—The "Senior Procurement Official, Headquarters" has been assigned the responsibility for developing and revising the policy and procedure for the determination of allowable costs.

9-15.5003—The consultation and coordination requirements for approval of deviations from the subpart have been revised to reflect the authority of the Senior Procurement Official verus that of the Controller. Consultation with the Controller is no longer mandatory.

9-15.5004—The subject matter formerly set forth under § 9-15.5006 has been inserted under this subsection number.

9-15.5005—The subsection has been re-entitled "Direct and Indirect Costs" and establishes a cross reference to FPR 1-15.202 and 203. Information formerly set forth under the subsection has been relocated as indicated above.

9-15.5006—As indicated in the introductory summary to Subpart 9-15 this subsection now contains the information formerly set forth under 9-15.5010. Such information, to the extent that it is applicable to non operating and on-site service contracts has been transferred without change. Editorial corrections have been made to delete the references and cross references to operating and on-site service contracts.

9-16.804-4—A subsection has been added to identify the processing requirement for Small Business/Labor Surplus Set-Aside Review Form, DOE Form PR-415.

9-16.808—Relocates the Certificate of Appointment for Contracting Officers to the end of Part 16.

9-16.5000—The applicability of the subsection has been clarified by making specific reference to "contracts." The word "support" has been deleted throughout the subpart and replaced with the words "fund", "funding" or "Government" as appropriate. This has been done for consistency with Pub. L. 95-224.

9-16.5002-1—The title of the subsection has been changed to read "Special research contracts (SRC) with educational institutions" and the term "agreement" has been replaced with the term "contract" wherever it appeared through the subsection.

9-16.5002-1—Article I(a): The phrase "to the best of its ability" has been deleted from the first sentence.

9-16.5002-1—Article AII(a): Raises threshold for classifying an item as equipment from $200 to $300.

9-16.5002-1—Articles B-II and B-XXIX: Adds reference to FPR 1-15.3 for clarification.

9-16.5002-1—Article B-XVIII: Revises second sentence for clarification.

9-16.5002-1—Articles B-XXV and B-XXVI: The Articles have been reserved for future use.

9-16.5002-1—Article B-XXIX: A cross reference to FPR 1—15.3 has been added to footnote 2 of paragraph (a).

9-16.5002-1—Article B-XXX: Adds to the definition of "general-purpose equipment" the qualification that the item cost $500 or more.

9-16.5002-1—Article B-XXXVII: The clause entitled "Preservation of Individual Occupational Radiation Exposure Records" as set forth in 9-50.704-41 is to be inserted when appropriate.

9-16.5002-2—Paragraph 3(d) of outline: The coverage on insurance has been clarified by indicating that the contractor shall waive any right of action against the Government for loss covered by insurance.

9-16.5002-3—Article III Paragraph (d): The coverage on insurance has been clarified by indicating that the lessor shall waive any right of action against the contractor or the Government for loss covered by insurance.

9-16.5002-3—Adds Article XIV on equal opportunity and cross references to FPR 1-12.803-2.

9-17.101(b)(2)—DOE management currently has under consideration the extent of the delegation to be given to the Board of Contract Appeals under Public Law 85-804. Until a management decision is made, Board jurisdiction shall be limited to cases in this area arising out of former ERDA programs. This limitation preserves the present jurisdiction without extending it to other programs.

9-17.102 through 9-17.207-2—The term "Department" has been substituted for the word "agency" wherever the latter word appeared.

9-17.206-50—The reference to "10 CFR Part 703" has been deleted since the cite does not apply to DOE. Also the phrase "otherwise provides" has been added to the second sentence of paragraph (a) to more clearly indicate the type of hearing to which parties directly affected by the Act are entitled.

9-17.206-51—The reference to the "Board of Contract Appeals and Adjustments" has been changed to read "Contract Adjustments Board."

9-18.111—Subsection has been deleted.

9-18.112—The cross reference to Subpart 9-1.54 has been changed to assure compatibility with the revisions made to the organizational conflict of interest coverage.

9-18.283-1—The maximum charge for reproducing invitations, plans and specifications has been raised from $25 to $100; and a solicitation provision has been added for use when fees are non-refundable.

9-18.306-50(a)—The introductory sentence to the subsection has been revised to more clearly indicate the need for Government estimates.

9-18.701-51(a)(6)—The exception to the Davis-Bacon and Copeland Acts as it relates to demolition has been clarified.

9-18.701-51(a)(7)—Adds reference to FPR 1-18.703-2 for clarification and deletes the parenthetical reference to subcontracts.

9-18.701-52(a)(3)—The reference to work or services of a typical or recurring nature has been deleted and the subsequent paragraphs have been renumbered to fill the gap.

9-18.701-52(a)(4)—The subparagraph has been revised to clarify exemptions from the provisions of the Davis-Bacon Act.

9-18.701-52(a)(6)—Revised to more clearly show the work excluded from the "emergency work" category.

9-18.702-50—The subsection pertaining to Department of Labor approval has been deleted in its entirety, and Subsection 9-18.702 has been reserved.

9-18.704-3—The addressee for receiving wage determination requests has been changed from the regional officer of the Employments Standards Division, DOL to the Wage and Hour Division, Employment Standards Administration, DOL, Washington, D.C.

9-18.750-2(b)—The paragraph has been revised to exclude recurring maintenance such as patching surfaces.

9-18.750-2(e)—Revised for clarification of rehabilitation of facilities.

9-18.750-2(f)—Revised to more clearly indicate applicability of the Act to Printing.

9-18.750-2(g)(4)—The subsection has been retitled and revised to limit the example to telephone and utility systems.

9-18.750-2(h)(1)—The subsection has been revised to more specifically indicate that the erection of structures which are public works are covered even if such work is part of set-ups of device and/or processes.

9-18.51—A Subpart has been added to set forth DOE's policies relative to inspection services performed by A-E's. The subpart implements and supplements FPR 1-14 and establishes a requirement for providing written instructions to contractors who are delegated inspection authority.

9-23.104(b)—The criteria for initiation of a Contractor's Procurement System Review (CPSR) has been revised to indicate that such reviews will be initiated if it is expected that the contractor will during a 12-month period issue over $5,000,000 in subcontracts, utilizing Government funds, on a basis other than fixed-price, competitively awarded contracts.

9-23.104(c)—The approval authority for waiving CPSR has been changed to the Director, Office of Procurement Management.

9-23.104(e)—The reference to the DOE Handbook for Conduct of Contractor Procurement System Reviews has been deleted and the phrase "appropriate agency directives and guides" has been inserted.

9-23.104(f)—The addressee for receipt of "outlines of proposed CPSR reviews has been changed to the Director, Office of Procurement Management.

9-23.106(a)—The reference to the DOE Guide for Performance of CPSR has been changed to "appropriate DOE directives and guides."

9-23.107—Requirements for review of CPSR reports have been changed and the approval level for such reports has been changed to the Director, Office of Procurement Management. Also, the number of copies to be submitted has been changed to two and additional information pertaining to subcontract approval thresholds has been added.

9-23.106(b)—Subparagraph (5) has been redesignated as § 9-23.106(a) and (6) through (8) have been redesignated as (5) through (7), and the former paragraphs (c) through (f) have been redesignated as (d) through (g).

9-23.106(d)(i)—Deletes "notwithstanding 9-3.901."

9-23.106(e)—Information set forth in 9-23.109(b) has been transferred to explain procedures for safeguarding and distributing reports of Contract Procurement System Reviews.

9-23.109(b)—Information transferred to 9-23.106(e).

9-30.000—The phrase "for functions transferred to DOE from the agencies referred to in the FPR" has been deleted from the subsection.

9-30.102(c)(2)—Clarifies a policy governing exercise of the DOE loan guarantee authority by including "other DOE programs" as part of the criteria to be considered in authorizing loan guarantees.

9-30.501—Added to address authorizing progress payments based on percentage or stage of completion.

9-30.505—Added to address processing procedures for unusual progress payments.

9-30.517—Revised to show that the Senior Procurement Official, Headquarters, now approves contract financing office clearances.

9-30.701 (a) and (b)—Deletes reference to "defense" and "interest of national defense financing," respectively.

9-50.001(a)(1)(iii)—The subparagraph has been redrafted to enhance definition of "operating contracts" by deleting reference to construction contractor.

9-50.001(a)(2)—A parenthetical statement has been added to indicate that contracts for "management support reviews," "technical evaluations," etc., would not normally be considered as "on-site service contracts."

9-50.104—The subsection has been deleted.

9-50.108—The subsection has been revised to set forth DOE's policies with regard to Labor Surplus Area Concerns as it pertains to operating and on-site service contracts.

9-50.201(b)(4)—Revises correction of mistake procedure for clarification.

9-50.302-3(e)—The subsection has been deleted, since the subject is adequately covered in other sections of the DOE-PR. Subparagraphs (f) through (j) have been redesignated as (e) through (i).

9-50.302-3(i)—This subsection has been deleted.

9-50.302-5(a)(5)—The approval level for authorizing subcontract threshholds higher than $100,000 has been transferred to the Director, Office of Procurement Management.

9-50.303(a)—New paragraph (a) added to establish applicability. Existing paragraphs are redesignated (b) and (c).

9–50.304(a)—New paragraph (a) added to establish that the provisions of 9–50.303(a) apply. Existing paragraphs are redesignated (b) (c) and (d).
9–50.402—The Subpart has been retitled "Nuclear Material Transfers," and the reference to "source and special" has been deleted from subparagraph (a) of the subsection.
9–50.504(a)—The title of FPMR Part 101–14 has been corrected to read "National Stockpile."
9–50.506–3—Updates the reference to read "DOE Order 1340."
9–50.506–6(m)(1)—The reference to the FPMR has been corrected.
9–50.703–2—The subsection has been deleted and the Subsection number has been reserved. The revised Disputes clause is set forth in the FPR.
9–50.703–3—The former Subsection has been deleted and is now reserved.
9–50.704–2—Revised clause on "Safety and Health." Contracting Officer must notify the contractor of any noncompliance in writing.
9–50.704–2(b)—A requirement has been added for contractors to submit a management program and implementation plan to the contracting officer.
9–50.704–6(d)(3)(iii)—The period of time for which a waiver shall be in effect has been increased to a maximum of 20 years.
9–50.704–6(h)—The subparagraph of the clause has been revised to indicate that the obligations of DOE with respect to nuclear hazards indemnity will be unaffected by completion, termination, or expiration of the contract.
9–50.704–8(c)—Subparagraph has been restructured for clarification.
9–50.704–9—Provides new alternative for auditing subcontractors' records. May now arrange for an audit by the cognizant government audit agency.
9–50.704–12(b)—The term "work has been substituted for the term "contract" in the last sentence of this paragraph.
9–50.704–13(d)(8)—Expanded to explain the purpose of the personnel appendix and the modification procedures thereto. The dollar amount of employee compensation which requires Contracting Officer approval (§ 9–50.2002) has been raised to a maximum of $40,000.
9–50.704–14—Modifies title to focus on on-site service contracts. Also, as in 9–50.704–13, the dollar amount has been increased to $40,000. (§ 9–50.2002)
9–50.704–15—Deletes in its entirety and reserves.
9–50.704–16(d)(5)—Expanded to explain the purpose of the personnel appendix and the modification procedures thereto. The dollar amount requiring Contracting Officer approval has been raised to a maximum of $40,000 (§ 9–50.2002)
9–50.704–16(d)(19) & (20)—Deletes in their entirety and reserves.
9–50.704–16(e)(25)—Revised to read "Bidding expenses and costs of proposals" are unallowable costs.
9–50.704–17—The title of the clause has been revised by deletion of the parenthetical phrase.
9–50.704–18(b)—Clarifies treatment of accrued pension costs.
9–50.704.21—A new subparagraph (i) has been added to the Property clause which makes specific reference to the requirements of the DOE Property Management Regulations. The paragraph has been added to highlight the applicability of DOE's existing property management requirements.
9–50.704–22(b)—The reference to 9–3.850 has been changed to 9–50.704–24.
9–50.704–26—Expands requirements for nuclear safety. Includes a requirement for periodic training and qualification of personnel, coverage on operating and decommissioning facilities, a requirement for a comprehensive safety review and a requirement to submit plans for disposing of a facility and any associated nuclear/hazardous materials.
9–50.704–27(b)—The restriction on performing consulting services for more than one DOE contractor have been expanded by deletion of the word "atomic" and substituting the phrase "same or related" in its stead.
9–50.704–32—The clause entitled "Required bonds and insurance—exclusive of Government property" (cost-type contracts) has redrafted to make specific reference to the "Insurance Liability to Third Persons" clause and to delete the requirement that bonds and insurance policies be submitted to the Contracting Officer for approval. The clause now states that "the terms and conditions of any such bonds and insurance shall conform to the directions of the Contracting Officer".
9–50.704–41—Adds a clause on "Preservation of individual occupational radiation exposure records."
9–50.704–42—Adds a clause on "Key personnel."
9–50.704–48—The clause entitled "Small Business Subcontracting Program Reporting" has been added to reflect the DOE procedures for reporting contracts awarded to Small Business.
9–50.1200—Expands scope of "Labor Relations" to include subcontractors.
9–50.1205–1—Updates coverage to include current policy and organizational responsibilities for equal opportunity in employment.
9–50.1205–2—Revises to reflect change in 41 CFR Chapter 60.
9–50.1205–2(b)—Requires Contracting Officers to add solicitation notice in 41 CFR 60–4.2(d) and 4.3.
9–50.1207—Clarifies circumstances when subcontracts are applicable to the Service Contract Act of 1965.
9–50.1210–8—Revised to reflect correct title of the Office.
9–50.1212–1—The phrase "DOE contractors managing, operating, maintaining or constructing Government-owned facilities" has been replaced with the phrase "DOE on-site service and operating contractors."
9–50.1500—Coverage of cost principles and procedures relocated from 9–15.50. This change recognizes that the operation of a DOE plant or laboratory is significantly different from the normal educational institution research and development contract.
9–50.1503—Deletes consultation with the Controller on deviation actions.
9–50.1505–1(d)—Deletes the fourth sentence concerning "indirect cost" to ensure consistency with CAS 401.
9–50.1505–3—Adds a definition for allowable and reasonable costs (subparagraph (b)) and redesignates subsequent subparagraphs; also the parenthetical phrase in subparagraph 3(d) has been deleted and adds a subparagraph 3(f), "Cost accounting standards, if applicable."
9–50.1505–4(b)—Deletes reference to "DOE cost principles."
9–50.1506(i)—Revised to indicate the purpose of the personnel appendix.
9–50.1507–2—The title of the subsection has been revised. Examples of indirect costs have been deleted.
9–50.15—The conditions under which severance pay should not be offered have been clarified by stipulating that payments should not be made in the event an employee is offered employment with a replacement contractor where continuity of employment, with credit for length of service is preserved. Also subparagraph (e) has been deleted since the reference to educational institutions is no longer necessary.
9–50.1510–14(b)—Expanded to clarify the use of a personnel appendix and the allowability of compensation for personal services. The dollar amount of employee compensation which requires Contracting Officer approval has been increased to $40,000.
9–50.1801.3—Deleted in its entirety.
9–50.1804–1—Deletes the previous subpart and adds a statement on "Contract clauses."
9–51.101(a) (1) & (2)—Revised to indicate communications will be "through" certain offices en route to the Senior Procurement Official, Headquarters.
9–51.101(b)—Revised to clarify the DOE review process for contract actions.
9–51.102 (a) & (b)—Revised to further explain contract actions requiring advance Headquarter's review and approval.
9–51.103 (1) & (2)—Modifies the instructions for obtaining Headquarters advance approval by pointing to compliance with current Headquarters directives.
9–51.103–5—Modified for clarification.
9–51.301—Deletes the guidance pertaining to basic research lump sum contracts with foreign educational institutions.
9–51.602–2—Deletes previous coverage on justification of reported contracts.
9–52—Deleted in its entirety and reserved pending issuance of updated coverage on "Business Instrument Numbers and Procurement Request Numbers."
9–53—Deleted in its entirety and reserved pending issuance of updated coverage on "Contract Reporting."

Accordingly, the title of Chapter 9 in Title 41 CFR is revised to read, "Department of Energy".

In 41 CFR Chapter 9, the procurement regulations are adopted.

For the Department of Energy.

Dated: May 18, 1979.

M. J. Tashjian,

Director, Procurement and Contracts Management Directorate.

Part VI

Department of Transportation

Coast Guard

New and Existing Tank Barges; Proposals for Prevention of Oil Pollution

V44/116 JE14 79 UMI

DEPARTMENT OF TRANSPORTATION

Coast Guard

[46 CFR Parts 30, 32, and 35]

[CGD 75-083]

Proposed Design Standards for Tank Barges to Prevent Oil Pollution

AGENCY: Coast Guard, DOT.

ACTION: Proposed Rule; withdrawal of prior proposed rule.

SUMMARY: the Coast Guard proposes to amend the tank vessel regulations to require double hull construction for all new tank barges designed to carry oil in bulk on the navigable waters of the United States and to prohibit these barges from carrying oil in the void spaces of their double hulls. A study sponsored by the Coast Guard shows that approximately 80 percent of the oil pollution caused by tank barges could have been prevented if these barges had double hull construction. Double hull construction on new tank barges will reduce the number of accidental discharges of oil due to hull damage.

DATES: 1. Written comments must be received on or before September 30, 1979. 2. The public hearings will be held on August 2, 1979, August 15, 1979, August 23, 1979, and September 7, 1979.

ADDRESSES: Written comments should be submitted to Commandant (G-CMC/81) (CGD 75-083), U.S. Coast Guard, Washington, D.C. 20590.

Comments will be available for examination at the Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590. Studies referred to in this document are appendixes to the Regulatory Analysis and Environmental Impact Statement (Regulatory Analysis) summarized in this document. Copies of the Regulatory Analysis are available for examination at this address.

The Coast Guard will hold 4 public hearings concerning this proposal in conjunction with the public hearings on the advance notice of proposed rule making appearing elsewhere in this issue of the Federal Register (See table of contents for page number). The first will be held on August 2, 1979, beginning at 9:00 a.m., in Room 2230, 400 7th Street, SW., Washington, DC 20590. The second will be held on August 15, 1979, beginning at 9:00 a.m., in the Olympic Hotel, Williamsburg Room, Fourth and Seneca Streets, Seattle, WA 98111. The third will be held on August 23, 1979, beginning at 9:00 a.m., in the Holiday Inn Superdome Downtown, Russel B. Long Room, 1111 Gravier Street, New Orleans, LA 70122. The Fourth will be held on September 7, 1979, beginning at 9:00 a.m., in the Stouffers Riverfront Towers, Jefferson A and B Rooms, 200 South Fourth Street, St. Louis, MO 63102.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Eugene K. Johnson, Merchant Marine Technical Division (G-MMT-1/82), U.S. Coast Guard, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-4431).

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rule making by submitting written views, data, or arguments. Each comment should include the name and address of the person submitting the comment, reference the docket number (CGD 75-083), identify the specific section of the proposal to which each comment applies, and include sufficient detail to indicate the basis on which each comment is made. All comments received before expiration of the comment period will be considered before final action is taken on this proposal. Interested persons are invited to attend the hearings and present oral or written statements on this proposal. It is requested that anyone desiring to make an oral statement notify Captain Philip J. Danahy, at the address listed under ADDRESSES, at least 10 days before the scheduled date of the public hearing and specify the approximate length of time needed for the presentation. Oral statements at the public hearing will normally be scheduled to be heard in the order that requests are received. It is urged that a written summary or copy of the oral statement be included with that request.

Drafting Information

The principal persons involved in drafting this proposed rule are Lieutenant Commander Eugene K. Johnson, Project Manager, Office of Merchant Marine Safety, and Mr. Stanley M. Colby, Project Attorney, Office of Chief Counsel.

Discussion

Background and Withdrawal of Prior Proposed Rule

In the December 24, 1971 issue of the Federal Register (36 FR 24960), the Coast Guard published a notice of proposed rule making which, along with many other proposals, contained design standards to prevent pollution from tank barges on inland routes. One of these proposals called for double walls on the sides and ends of tank barges but not for double bottoms. The inland barge industry entered strong objection to the proposed requirement for double wall construction. The basis of the objection was that the Coast Guard had not adequately investigated the cost nor had it established a case that double walls would significantly reduce oil pollution. Due to these comments, the proposed requirement for double walls on inland tank barges was not included in the final rules published on December 21, 1972 (37 FR 28250) and this document withdraws that proposal (proposed § 155.305).

The Coast Guard, in cooperation with the Maritime Administration, entered into a study of costs and alternatives available to reduce oil pollution caused by tank barge hull damage. The joint Maritime Administration/U.S. Coast Guard "TANK BARGE STUDY," NTIS # COM-75-10284/AS, was completed in October 1974. As a basis for this study, a survey of tank barges damaged in a one year period was conducted and a fleet profile of the sizes and types of construction used for existing barges was developed. Data from the Pollution Incident Reporting System, established by the Coast Guard in December 1971 to implement Section 311 of the Federal Water Pollution Control Act, was used to determine the amount of oil spilled by tank barges in the inland waters.

Various alternative designs for preventing oil pollution from tank barges were developed by the Coast Guard for several size categories. These alternatives were evaluated for both new tank barges and retrofitting of existing tank barges.

The effectiveness of the various alternatives was evaluated by two methods. As the first method, the damage survey from the study was compared against each alternative to determine if pollution would be prevented by that alternative. The conclusion reached by this method was that double hulls with a 24 inch separation of the inner and outer hulls would be 96 percent effective in preventing pollution due to hull damage. As the second method, field reports for tank barges in the Coast Guard Merchant Vessel Casualty File were analyzed for the same time period used in the first method. Only reports of damage with ensuing pollution were used. The conclusion reached by this method was that double hulls would be 95% effective in preventing pollution due to hull damage. The second method also showed that bottom damage is important and has to be considered for effective design.

As a part of the 1974 Tank Barge Study, the life-cycle costs of the various alternatives were investigated by an outside contractor under a contract to the Maritime Administration. The Maritime Administration has updated these costs to 1978 levels and has calculated the additional costs for double hulls on ocean and coastwise tank barges.

Much of the information used in the joint study was supplied by the barge industry. Ample opportunity for comment on the results of the study was given by presenting most of the information in a paper, "Alternative Inland Tank Barge Designs for Pollution Avoidance", presented at the spring meeting of the Society of Naval Architects and Marine Engineers in May 1974 at Chicago, Illinois before the report was finished. Criticism of the study was that it used only a 1 year data base and that the pollution data was not good. The Pollution Incident Reporting System had been in operation only about 2 years at the time of the study. As with any new data system, problems occurred during implementation of the reporting procedures and early data in this system ranged from "not good" to "inadequate."

To identify the magnitude of oil pollution from tank barges and to determine the causes of that pollution, a contract was awarded by the Coast Guard to Automation Industries, Inc. on July 13, 1977. The final report, CG-M-2-78 "Tank Barge Oil Pollution Study," was submitted to the Coast Guard in February 1978. The following Coast Guard maintained data and file systems were used in the study: the Pollution Incident Reporting System (PIRS), Commercial Vessel Casualty Reporting System, Inspected Barge File, and District Penalty Files, for the years 1974 through 1976. The PIRS data was verified by sampling penalty files maintained in Coast Guard field offices and was found to be adequate, probably due to the maturity of the Pollution Incident Reporting System and the increased emphasis placed on pollution prevention in recent years.

For this 3 year period, the volume of oil spilled from tank barges was 173,971 barrels. This compares to a total of 288,704 barrels of oil spilled from tankships for the same period of which 178,571 barrels were spilled in a single incident, the ARGO MERCHANT. The oil spilled by tank barges occurred in the inland waters, harbors and near coastal waters of the U.S. These waters are ecologically very sensitive to oil pollution and are highly visible to the public.

Of the oil spilled by barges, approximately 85% of the total volume was spilled in a relatively small number of incidents which occurred during the barge transport of oil and usually involved hull damage. Based on the 1974 study, approximately 80% of the volume of tank barge oil pollution can be eliminated by a double hull construction standard with a 24 inch separation of hulls. The analysis discussed in the following paragraph established that the effectiveness of double hulls may be as high as 89% in reducing the volume of oil pollution from tank barges.

For the years 1973 through 1977, an analysis of the Pollution Incident Reporting System data and the Commercial Vessel Casualty Reporting System data has been performed by the Coast Guard. Of 184 hull damage incidents having spills of 500 gallons or greater which have a total volume of 178,500 barrels, 94% of the total volume for the period, 91 casualty reports were identified. These reports were analyzed to determine if the routes for which tank barges are certificated has an impact on the pollution potential of tank barges, and the analysis disclosed that the route for which a tank barge is certificated does not appear to influence the pollution potential.

Proposed Regulations

The regulations proposed in this document would be codified in 46 CFR Subchapter D (Tank Vessels) in a new Subpart 32.64. While the proposed regulations are intended to prevent pollution and could have been placed in 33 CFR Part 157, the regulations are design standards and should be in Subchapter D. The proposed regulations would only apply to tank barges that carry oil. The definitions of oil and crude oil are included in the proposal for facilitation in applying the regulations, since these definitions are not now contained in Subchapter D.

The proposed regulations would apply to new tank barges, which are defined as those constructed or converted under a contract awarded after December 31, 1979, or in the absence of a contract, where the actual construction or conversion of the barge begins after December 31, 1979. The December 31, 1979, proposed date was selected by the Coast Guard based on the time frame anticipated for publishing this notice, holding hearings and receiving written comments, evaluating all the comments and publishing final rules. This date will be changed if substantial delays are encountered.

Since the analyses performed indicate that double hulls are necessary for all barges regardless of the route they are certificated for, the proposed regulations would apply to inland and seagoing barges. However, it is proposed to limit the application of the requirements to product carriers of less than 30,000 DWT and crude oil carriers of less than 20,000 DWT. Since the pollution prevention regulations for tank vessels (33 CFR Part 157) apply to both tank ships and tank barges, they are considered sufficient to meet the environmental mandate of Congress for any tank ships and tank barges larger than the proposed tonnage limits. Tank barges of this size are limited to the same areas of operation as tankships due to their size.

The proposed regulations would require that cargo tanks be located a minimum of 24 inches from the hull of the barge. This separation was chosen based on the expected effectiveness of this separation developed in the 1974 Tank Barge Study and the Coast Guard's opinion that this is the minimum separation that would permit inspection of the spaces between the cargo tanks and the hull. A review of representative plans for existing double hull barges has shown that most of these barges are now built with cargo tanks located 24 to 30 inches from the hull even though present regulations would allow 15 inches. However, the 15 inch minimum now allowed for double bottoms was originally established for independent cylindrical tanks and not for a full double bottom.

In the void spaces between the hull and cargo tanks the internal structures would have to be arranged so that the spaces can be inspected. Sounding devices to detect leakage into the spaces and a means of pumping out the spaces would be required. An access to enter the space would also be required. If vents are installed, even though not required under § 32.55-45(b), the proposed regulations would require flame screens in the vents. This is considered necessary for safety reasons because of the possibility of cargo leakage into the spaces.

The proposed regulations would require that the double hull tank barges meet a minimum stability standard. If the space between the cargo tanks and the hull is not subdivided properly, a barge could sink or capsize with only minor damage to the hull. The proposed standard would require that the subdivision of the space be arranged so that the barge will remain afloat and not capsize after holing the hull anywhere except on a transverse watertight bulkhead. 33 CFR Part 157 (Subpart B)

also contains stability requirements for certain seagoing tank barges.

The proposed regulations would prohibit the carriage of oil in the spaces between the cargo tanks and the hull of the barge. However, for larger barges where ballast may be needed in the unloaded condition, these spaces could be used for ballast water. This prohibition would only apply to new tank barges if this becomes a rule but a similar prohibition for existing tank barges is being considered in the advance notice appearing elsewhere in this separate Part VI in today's Federal Register (see table of contents for page number).

Section 30.01–5 of Subchapter D would be revised to require foreign tank barges operating on the navigable waters of the United States to meet the requirements of Subpart 32.64. There does not appear to be any significant trade at this time that would be affected should this become a rule. The change is considered necessary to prevent the development of a new trade to avoid these proposed regulations.

In addition to the proposal in this document, an Advance Notice of Proposed Rulemaking, appearing in this issue of the Federal Register, solicits ideas on how the existing single hull tank barges may be regulated to (1) reduce oil pollution due to hull damage while these barges are in service; and (2) hasten the retirement of single hull tank barges from the fleet so that transition to a double hull tank barge fleet can be accomplished in a timely manner.

This proposal has been reviewed under Department of Transportation's "Regulatory Policies and Procedures" (44 FR 11034, February 26, 1979). A Draft Evaluation has been prepared, and is included in the public docket.

Economic Impact

The major economic impact of a requirement for double hulls on new tank barges is the increase in cost for double hull construction over single hull construction. The costs have been calculated for inland and seagoing tank barges. A trend to double hull construction for inland tank barges exists; therefore, the total additional cost for double hull construction for inland tank barges that might otherwise have been single hull construction is approximately 2.8 million dollars for the period 1979 to 1983 in 1978 present value dollars. By 1983 it is assumed from current trends that all inland tank barges would have been built double hull regardless of these regulations.

Seagoing tank barges would not have been built to double hull standards without these regulations. The cost per barge for a double hull ocean barge is considerably greater than for an inland tank barge. It is estimated that 7 single hull seagoing tank barges will be built in 1979. The estimated additional cost for double hulls on these 7 barges is about 7.1 million dollars. The total 1978 present value additional cost for double hulls on seagoing tank barges, to replace all existing single hull seagoing tank barges by 1999 is approximately 144.0 million dollars.

A detailed discussion of the costs is included as Chapter 4 of the Regulatory Analysis. The effects of the proposed regulations on the transport of oil and the reduction of oil pollution are also evaluated.

Summary of Regulatory Analysis

A single draft Regulatory Analysis and Environmental Impact Statement has been prepared for this notice of proposed rulemaking and the advance notice of proposed rulemaking for existing tank barges. This was done so that the scope of the Coast Guard's regulatory action to prevent oil pollution from barges is clearly presented and all applicable information is available to the public in a single document. All the major background studies are included as appendixes to the Regulatory Analysis.

The Regulatory Analysis establishes the need for regulations by carefully analyzing pollution and casualty data. The double hull design was selected based on effectiveness for preventing pollution due to hull damage which was established in the 1974 Tank Barge Study. The alternatives to double hull design are discussed and the reasons for the Coast Guard rejecting these alternatives are presented. Alternatives considered were:

(a) Publish no additional standards. (No action)

(b) Publish less stringent regulations than those proposed which included heavier scantlings either in selected areas or overall, double sides and ends, or tank size limits.

(c) Publish regulations more stringent than those proposed by requiring the carriage of oil in Type I or Type II barge hulls as currently defined in Coast Guard regulations.

(d) Reduce oil consumption or reduce the amount of oil transported by tank barges.

(e) Use a different mode of transportation for the movement of oil.

In consideration of the foregoing, it is proposed to amend Subchapter D of Title 46, Code of Federal Regulations, as follows:

PART 30—GENERAL PROVISIONS

1. By revising § 30.01–5(e) to read as follows:

§ 30.01–5 Application of regulations—TB/ALL.

* * * * *

(e) This subchapter applies to each foreign flag vessel that carries combustible or flammable liquid cargoes on the navigable waters of the United States, except if the vessel has on board a current and valid Safety Equipment Certificate, issued under its Government that is signatory to the International Convention for the Safety of Life at Sea, 1960 (16 UST 185, TIAS 5780), or a current and valid certificate of inspection, issued under its Government having reciprocal vessel inspection arrangements with the United States and vessel inspection laws similar to the inspection laws of the United States, the vessel must only meet the following:

(1) Subpart 32.64.

(2) Sections 35.01–1 and 35.01–60.

(3) If the vessel is involved in a marine casualty or accident when on the navigable waters of the United States, Subpart 35.15.

(4) Subpart 35.30, except § 35.30–15.

(5) Subpart 35.35.

* * * * *

PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS

2. By adding a new Subpart 32.64 to follow Subpart 32.63 and to read as follows:

Subpart 32.64—Hulls for New Tank Barges—B/ALL

Sec.
32.64–3 Definitions.
32.64–5 Applicability.
32.64–10 Hull structure.
32.64–15 Subdivision and stability.

Authority: R.S. 4417a (46 USC 391a, as amended by Pub. L. 95–474, Port and Tanker Safety Act of 1978); 49 CFR 1.46(n)(4)

§ 32.64–3 Definitions.

As used in this Subpart:

"New tank barge" means a non-self-propelled vessel that carries oil in bulk and that is—

(a) Constructed or undergoes a major conversion under a contract awarded after December 31, 1979; or

(b) In the absence of a contract—

(i) Has the keel laid or is at a similar stage of construction after December 31, 1979; or

(ii) Major conversion is begun after December 31, 1979.

"Oil" includes oil of any kind or in any form, including, but not limited to, petroleum, fuel oil, sludge, oil refuse, and oil mixed with wastes other than dredged spoil.

"Major conversion" means a conversion of an existing vessel which substantially alters the dimensions or carrying capacity of the vessel; or changes the type of vessel; or substantially prolongs its life; or which otherwise so alters the vessel that it is essentially a new vessel.

"Crude Oil" means any liquid hydrocarbon mixture occurring naturally in the earth, whether or not treated to render it suitable for transportation, and includes crude oil from which certain distillate fractions may have been removed, and crude oil to which certain distillate fractions may have been added.

§ 32.64–5 Applicability.

This subpart applies to new tank barges of less than 30,000 DWT except new tank barges of 20,000 DWT or more that carry only crude oil.

§ 32.64–10 Hull structure.

Each tank barge to which this subpart applies must be designed and constructed having—

(a) The outer boundary of each cargo tank at least 60 cm (24 inches) from the inner surface of the side, bottom, and fore and aft end hull plating; and

(b) In the spaces between the cargo tanks and the hull of the barge—

(1) Sufficient clearance between the internal structures to allow a person of average height and weight to inspect the hull;

(2) Sounding devices meeting § 56.50–90 of this chapter;

(3) Bilge pumps meeting § 56.50–55 of this chapter;

(4) An access of at least 38 cm. by 46 cm. (15" by 18") that may not be on a cargo tank boundary; and

(5) If vents are installed, flame screens, as defined in § 30.10–25 of this subchapter.

§ 32.64–15 Subdivision and stability.

The hull of each new tank barge under this subpart must be designed to retain, under any condition of loading, positive buoyancy and stability, 51 mm (2 inches) of positive metacentric height, after the bottom or side shell plating of the outer hull is holed anywhere on its girth except in way of a transverse watertight bulkhead.

Note.—There are additional requirements for seagoing tank barges in 33 CFR Part 157 (Subpart B).

PART 35—OPERATIONS

3. By adding a new § 35.01–60 to follow § 35.01–50 and to read as follows:

§ 35.01–60 Oil in void spaces of new tank barges—B/ALL.

A new tank barge under Subpart 32.64 of this subchapter may not carry oil as cargo in the void spaces between the hull and the cargo tanks.

(R. S. 4417a (46 USC 391a, as amended by Pub. L. 95–474, Port and Tanker Safety Act of 1978); 49 CFR 1.46(n)(4))

R. H. Scarborough,
Vice Admiral, U.S. Coast Guard, Acting Commandant.

June 11, 1979.

[46 CFR Chapter I, Subchapter D and O]

[CGD 75–063a]

Proposal for Existing Tank Barges To Prevent Oil Pollution

AGENCY: Coast Guard, DOT.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard is proposing to accelerate the normal attrition of certain single hull tank barges certificated to carry oil and to reduce the number of oil pollution incidents resulting from hull damage to these barges while they continue in operation. A study sponsored by the Coast Guard has shown that approximately 80 percent of the oil pollution caused by tank barges could have been prevented if these barges had complete double hull construction. Analysis of the tank barge fleet profile indicates that normal attrition of single hull tank barges from the operating fleet would delay the total realization of this dramatic reduction in oil pollution until some time beyond the year 2020. This advance notice is intended to complement proposed design standards for new tank barges to reduce oil pollution in the navigable waters of the United States.

DATES: 1. Written comments must be received on or before September 30, 1979.

2. The public hearings will be held on August 2, 1979, August 15, 1979, August 23, 1979 and September 7, 1979.

ADDRESSES: Written comments should be submitted to Commandant (G–CMC/81), (CG 75–063a), U.S. Coast Guard, Washington, D.C. 20590. Comments will be available for examination at the Marine Safety Council (G–CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590. Studies referred to in this document are appendices to the Regulatory Analysis and Environmental Impact Statement (Regulatory Analysis) summarized in this document. Copies of the Regulatory Analysis are available for examination at this address.

The Coast Guard will hold four public hearings on this advance notice of proposed rulemaking in conjunction with the public hearings on the notice of proposed rulemaking appearing elsewhere in this issue of the Federal Register. The first will be held on August 2, 1979 beginning at 9:00 AM, in Room 2230, 400 Seventh St., S.W., Washington, D.C. 20590. The second will be held on August 15, 1979 beginning at 9:00 AM, in the Olympic Hotel, Williamsburg Room, Fourth and Seneca Sts., Seattle, WA 98111. The third will be held on August 23, 1979 beginning at 9:00 AM, in the Holiday Inn Superdome Downtown, Russel B. Long Room, 1111 Gravier Street, New Orleans, LA 70122. The fourth will be held on September 7, 1979 beginning at 9:00 AM, in the Stouffers Riverfront Towers, Jefferson A and B Rooms, 200 South Fourth Street, St. Louis, MO 63102.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Kenneth A. Rock, Merchant Vessel Inspection Division (G–MVI–2/83), U.S. Coast Guard, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590, (202) 426–2190.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Each comment should include the name and address of the person submitting the comment, reference the docket number (CGD 75–063a), identify the specific section of the proposal to which each comment applies, and include sufficient detail to indicate the basis on which each comment is made. All comments received before expiration of the comment period will be considered before further action is taken on this proposal. Interested persons are invited to attend the hearings and present oral or written statements on this proposal. It is requested that anyone desiring to make an oral statement notify Captain Philip J. Danahy at the address listed under ADDRESSES at least ten days before the scheduled date of the public hearing and specify the approximate length of time needed for the presentation. Oral statements at the

public hearing will normally be scheduled to be heard in the order that requests are received. It is urged that a written summary or copy of the presentation be included with the request.

Draft Information

The principal persons involved in drafting this advanced notice are: Lieutenant Commander Theodore J. Sampson, Lieutenant Commander Kenneth A. Rock, Project Managers, Office of Merchant Marine Safety, and Mr. Stanley M. Colby, Project Attorney, Office of the Chief Counsel.

Background

Tank barges exist in a variety of configurations. Some are little more than compartmentized boxes having only a single layer of steel at any point on their hull. Others have end voids, full or partial double sides or bottoms, independent cargo tanks, or various combinations of these features. For the purpose of this advance notice, only a tank barge that has at least a complete double hull, including the end voids and double walls and bottoms, (but without a double deck) is considered a "double hull barge." All others are referred to as "single hull barges."

The current profile of the tank barge fleet shows that approximately 2130 single hull tank barges exist. Some are newly constructed while others were built in the early 1900's. Normal attrition of these tank barges from the fleet would find more than 50 percent still active in 1986, 25 percent still active in 2000, with total replacement not likely until after 2020. If the double hull tank barge construction requirements for new barges, proposed elsewhere in this issue of the **Federal Register** are to have a timely, appreciable effect on reducing the current volume of oil spilled by barges, it is clear that single hull tank barges will have to be removed from service at an accelerated pace.

In a notice of proposed rulemaking issued December 24, 1971, (36 FR 24960) this same problem was discussed. The accelerated phaseout of existing single hull barges would have been provided by a preclusion of the "rebuilding" of these vessels to original conditions, but allowing individual plate renewal or repair of damaged areas. As an alternate approach, the possibility of specifying a termination date for the use of single hull barges was proposed.

Numerous comments on the proposed approach and its alternatives were received. Comments from representatives of the barge operators, while supporting the intent of the regulations to prevent pollution, decried effecting the phaseout by proscribing the "rebuilding" of single hull barges. The alternate approach of a termination date found equal opposition. It was argued that existing single hull vessels should be allowed to continue in operation until no longer serviceable due to the economic effects upon individual companies and the inability to move the required amount of petroleum products without a tank barge fleet of adequate size.

Two commenters suggested that a joint committee of local Coast Guard and industry representatives be established in each port to act as judges of when a vessel was to be considered no longer serviceable. Such a committee is not a viable approach in that it would not provide equitable treatment nationwide for the various operators involved. Further, such a committee would be dilution of the responsibility vested by the Port and Tanker Safety Act of 1978 (92 Stat. 14800, 46 U.S.C. 391a) in the Secretary of Transportation and subsequently delegated to the Coast Guard.

Unfortunately no comments were received which offered alternate approaches to the accelerated retirement of single hull barges.

The methods of handling single hull barges which were published in that notice of proposed rulemaking were not without support. The new construction standards and "rebuild" phaseout mechanism were regarded by numerous private citizens and commenters representing environmental organizations as long overdue. The input received from Coast Guard field offices unanimously supported the phaseout of single hull barges, preferring the use of a termination date.

The suppositions of the commenters that accelerated attrition of existing tank barges could not be effected without severe economic impact on the industry and its ability to transport the nation's oil had to be examined. Both of these questions have been addressed in the Regulatory Analysis.

Since that proposed rule was published in 1971, many studies have been conducted that addressed the problem of oil pollution from tank barges. These studies have clearly shown a need to accelerate the normal attrition of single hull tank barges to achieve a timely realization of the potential reduction in oil pollution that a double hull tank barge fleet would provide. These studies have also shown that the considerable amount of oil pollution resulting from minor hull damage incidents requires mitigating action while awaiting the removal of single hull barges from service.

Discussion of the Proposals

This advance notice contains a comprehensive proposal affecting existing single hull tank barges. The Coast Guard is committed to reducing, in a timely fashion, the amount of oil pollution resulting from tank barges. However, the Coast Guard has made no firm commitment to the proposals advanced in this document. These proposals represent an initial effort to find a means to more rapidly realize the environmental benefits which will result from a double hull tank barge fleet, while not creating an undue burden upon the tank barge industry. Many assumptions and projections had to be made to evaluate the efficacy of this approach.

It is possible that some alternatives have been overlooked or that some assumptions are not valid. If these can be pointed out, this approach will then provide the starting point for improvement or refinement. If the comments received can identify an alternate method to achieve a total double hull tank barge fleet at an acceptable pace, and provide an equivalent reduction in oil pollution incidents from the single hull barges allowed to operate during the transition, this approach can be discarded in its entirety or the proposals herein can be modified accordingly. Comments are particularly requested with respect to benefits and feasibility of phasing out single hull barges within a time frame of less than twenty (20) years.

The first objective of this advance notice is to suggest a mechanism to accelerate the normal attrition of single hull tank barges from oil service. Single hull tank barges that are more than twenty years old would not be certificated for the carriage of oil after 1985. Exceptions would be made as follows:

1. Barges that have been constructed with end voids and double sides, or end voids and double bottoms, or independent cargo tanks would continue in normal, unrestricted operations until the vessel is no longer serviceable.

2. Barges converted to meet the construction provisions of paragraph 1, before the barge is twenty years old and before December 31, 1985, would be allowed the same privileges.

3. Existing single hull barges would be allowed to continue in operation without the conversion proposed in paragraph 2 until the vessel is no longer serviceable, provided the operator could demonstrate to the satisfaction of the Commandant of the Coast Guard that:

a. The properties of the particular cargo or cargoes to be carried would preclude or significantly retard, at the ambient temperatures anticipated on the vessel's route, the outflow of the product if the hull was breeched; and

b. The temperature of the product during transport would not exceed that critical for retaining the properties demonstrated in paragraph "a" above.

4. The Officer in Charge, Marine Inspection (OCMI) could grant exemptions to individual single hull barges for the carriage of oil if:

a. The vessel is a permanently moored barge; or

b. The vessel's operation is restricted to areas of little commercial vessel traffic where the vessel would not be exposed to any of the following rigors or hazards:

(i) Locking operations;

(ii) Fleeting operations;

(iii) Midstream operations;

(iv) Possible collision with a breakaway from an upstream barge fleeting operation or mooring area;

(v) Any navigational hazard or condition where improper operation or loss of control of the tank barge could likely result in a casualty that would breach the hull.

For example: A vessel would not be certificated to operate in an area having a hard or rocky bottom where even low energy groundings would be expected to penetrate the hull. Or, a vessel would not be certificated to operate in an area having fast currents, where any loss of vessel control could be expected to result in high energy groundings or collisions.

The second objective of this advance notice is to suggest a means to reduce the number of oil pollution incidents that are expected to result from minor hull damage to single hull tank barges. Therefore, it is proposed that no exisitng tank barges would be permitted to carry oil in rake ends, corner voids, or double wall or bottom voids after December 31, 1980.

As an incentive for barge operators to more rapidly convert to double hull barge fleets, the requirements of Title 46 CFR Subchapter O would be changed to make internal inspections of double hull tank barges coincide with drydocking inspections. This would generally have the effect of lengthening the interval between internal inspections. Additionally, inspection of void spaces on externally structured integral tanks could be used by the OCMI as justification for extending the required interval of both drydocking and internal inspections. This would eliminate the need for some gas-freeing operations currently required.

Considerations in Developing Regulations Proposed

Because the need to address tank barges as a significant source of pollution was questioned in 1971 when regulations were first proposed, valuable time has been lost to make a gradual transition to an environmentally safer tank barge fleet by 1985 (The Congressional target date for elimination of polluting discharges, mentioned in the Federal Water Pollution Control Act Amendments of 1972 (86 Stat. 816, 33 U.S.C. 1251)). From a practical viewpoint, it is unacceptable to impose 1985 as the limit for use of all single hull barges. The impact on the nation's ability to transport oil and upon the economic viability of the many operators of single hull barges could not be justified by the expected environmental gains. The date of 1985 has therefore been used as the point after which the environmental benefits of a double hull barge fleet will be increasingly noticeable. To achieve this, single hull barges beyond twenty years of age should be barred from oil service.

The age of twenty years was chosen for several reasons. The transition to a double hull tank barge fleet can be 75 percent completed within a six year period which is not significantly beyond the Congressional target date for elimination of water pollution. The number of barges which would require replacement as a result of this age selection would not exceed the capabilities of today's shipbuilding industry. Approximately 1,000 vessels would be eliminated from service in 1985. But, sufficient time would be provided during the six years between the publication date of the regulations and 1985 to build all needed replacements.

The number of barges to be constructed as replacements for those retired from service in each year after 1985 could also be attained and the number of replacements needed should decrease gradually. Thus, the shipbuilding industry would not have to gear up for a short-lived massive barge production effort. Further, operators of single hull tank barge fleets would be given time to recover capital invested in recently acquired single hull tank barges. Finally, transport related pollution incidents could be reduced significantly by removing vessels from service when they reach the age where analysis of pollution data has shown the likelihood of their becoming involved in a pollution incident is significantly greater than that of newer vessels.

Including the provisions to allow some vessels to continue in service, if they have double sides, double bottoms, or independent tanks would accommodate the 403 vessels so configured. The data analyzed from the Coast Guard Pollution Information Reporting System showed that these configurations, while not reducing the possibility of a transport pollution incident to a level acceptable for an entire tank barge fleet, do reduce the risk significantly when compared only with single hull tank barges.

A joint study by the Coast Guard and the Maritime Administration indicated that the cost of retrofitting vessels was not an economically feasible alternative for the entire single hull tank barge fleet. However, since that study was completed in 1974, there have been some vessels which have been retrofitted to provide double sides. Apparently this is, for some operators, an economically acceptable undertaking. Provision would be made, therefore, to allow this as an additional alternative to the proposed phase out.

It is recognized that there are some products, defined as oil, which have physical or chemical properties that make the probability of large spills occurring as a result of hull damage less likely. It appears that there may be an appreciable number of products which, with the proper precautions or operational procedures, could be safely transported in single hull barges. With adequate input from industry, it may be possible to generate a list of these products and then project the number of tank barges that are more than twenty years of age that could be used in such service. This could ease the economic impact by providing for barges more than twenty years old a value in excess of scrap value.

Similarly, an alternate use could be provided by allowing single hull vessels to be exempted by the OCMI if certificated for limited service. The low pollution incident ratios of some of the oldest barges indicate that some service may be allowed with little environmental risk when the vessels are restricted to certain limited operations.

The proposal prohibiting the carriage of oil in rake ends and void spaces would allow an early realization of the pollution prevention benefits that these empty spaces have been shown to provide. In view of the high incidence of damage to these areas that the various studies have shown, the carriage of oil in these spaces should be curtailed as soon as possible.

The revision of the internal inspection standards for double hull tank barges would ensure that the single hull tank barges (which have the greatest potential for becoming involved in a transport related oil pollution incident) would receive the most frequent examinations. This would also provide an economic incentive for more rapidly converting to a double hull fleet.

Economic Impact

The cost of the proposed regulations discussed in this document was basically computed by assessing the early replacement cost of single hull tank barges. A normal attrition curve was projected based upon recent retirement trends. The cost of barge replacement under normal conditions was compared with the cost of barge replacement under the imposed attrition of the proposal. Assumption were made that should assure that the projected costs will be greater than actual costs.

These proposals are estimated to cost approximately $222 million dollars, or a 31 percent increase over normal expenses for the tank barge industry. A detailed discussion of the costs, as well as the benefits, is included in chapter 4 of the Regulatory Analysis. The assessment of the benefits has been difficult to make in terms of a dollar figure that would offset the cost. Information concerning current costs to the tank barge industry incurred by response, recovery, and cleanup of tank barge oil spills is solicited. Likewise, comments concerning projection of the costs associated with the regulatory suggestions are welcome.

A single draft Regulatory Analysis and Environmental Impact Statement has been prepared for this advance notice of proposed rulemaking and the notice of proposed rulemaking for new tank barge construction appearing elsewhere in this issue of the Federal Register. This was done so that the scope of the Coast Guard's regulatory action to prevent oil pollution from barges is clearly presented and all applicable information is available to the public in a single document. All the major background studies are included as appendices to the Regulatory Analysis.

The Regulatory Analysis establishes the need for regulations by carefully analyzing pollution and casualty data. The double hull design was selected based on effectiveness for preventing pollution due to hull damage, which was established in the 1974 Tank Barge Study. The alternatives to double hull design are discussed and the reasons for the Coast Guard rejecting these alternatives are presented. Alternatives and considerations in developing the proposals for existing single hull tank barges are also detailed.

The impacts of these rulemakings on the industries' economies, on the nation's environment, and the nation's ability to transport oil are also addressed.

(R.S. 4417a (46 U.S.C. 391a, amended by Pub. L. 95-474, Port and Tanker Safety Act of 1978) 49 CFR 1.46(n)(4))

Dated: June 11, 1979.

R. H. Scarborough,

Vice Admiral, U.S. Coast Guard, Acting Commandant.

Part VII

Office of Management and Budget

Cumulative Report on Rescissions and Deferrals; June 1979

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals; June 1979

June 11, 1979.

This report is submitted in fulfillment of the requirements of Section 1014(e) of the Impoundment Control Act of 1974 (Public Law 93-344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This month's report gives the status as of June 1, 1979, of 11 rescissions and 57 deferrals contained in the first nine special messages of FY 1979. These messages were transmitted to the Congress on October 2, November 30, December 7, December 12, 1978, January 31, February 14, March 15, April 4, and April 28, 1979.

Rescissions (Table A and Attachment A)

Congressional action has been completed on all FY 1979 rescission proposals. Table A summarizes the status of rescissions proposed by the President as of June 1, 1979, while Attachment A shows the history and status of each rescission proposed during FY 1979.

Deferrals (Table B and Attachment B)

As of June 1, 1979, $2,768.0 million in 1979 budget authority was being deferred from obligation and another $2.4 million in 1979 obligations was being deferred from expenditure. Table B summarizes the status of deferrals reported by the President, and Attachment B shows the history and status of each deferral reported during FY 1979.

Information From Special Messages

The special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the Federal Register of:

Wednesday, October 11, 1978 (Vol. 43, No. 197, Part III).
Wednesday, December 6, 1978 (Vol. 43, No. 235, Part III).
Wednesday, December 13, 1978 (Vol. 43, No. 240, Part VI).
Monday, December 18, 1978 (Vol. 43, No. 243, Part VI).
Monday, February 5, 1979 (Vol. 44, No. 25, Part VI).
Wednesday, February 21, 1979 (Vol. 44, No. 36, Part VII).
Tuesday, March 20, 1979 (Vol. 44, No. 55, Part VIII).
Monday, April 9, 1979 (Vol. 44, No. 69, Part VI).
Tuesday, May 1, 1979 (Vol. 44, No. 85, Part V).

James T. McIntyre, Jr.,
Director.

FOOTNOTES

a. These funds are included in a deferral (D79-55) transmitted to the Congress on April 26, 1979.

b. Public Law 96-7.

c. This amount was initially deferred (D79-29) in a special message transmitted to the Congress on October 2, 1978.

d. $1.0 million of the $9.0 million proposed for rescission is included in a deferral (D79-29A) transmitted to the Congress on April 26, 1979.

e. In addition to these amounts, rescissions totalling $51.0 million were rejected by the Congress, but are now included in deferrals D79-55 and D79-29A (as indicated under footnotes a and d).

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
DOT/UMTA*	MSPB/OPM		DOT/UMTA*	MSPB/OPM
DOT/FRA*	LABOR		DOT/FRA*	LABOR
CSA	HEW/FDA		CSA	HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

*NOTE: As of June 14, 1979, the Urban Mass Transportation Administration and Federal Railroad Administration, Department of Transportation, will publish on the Monday/Thursday schedule.

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going Into Effect Today

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

Food and Drug Administration—

28323 5-15-79 / Hydrogenated fish oil; affirmation of GRAS status as indirect human food ingredient

LABOR DEPARTMENT

Mine Safety and Health Administration—

28588 5-15-79 / State grants; procedures and requirements for applying for, receiving, and administering

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last Listing June 12, 1979

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2½ hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between Federal Register and the Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.

WASHINGTON, D.C.

WHEN: July 6 at 9 a.m.
WHERE: Office of the Federal Register, Room 9409, 1100 L Street NW., Washington, D.C.
RESERVATIONS: Call Mike Smith, Workshop Coordinator, 202-523-5235.

LOS ANGELES, CALIFORNIA

WHEN: June 28 and 29 at 9:00 a.m. (identical sessions).
WHERE: Federal Building, Army Corps of Engineers Conference Room 7412, 300 N. Los Angeles Street
RESERVATIONS: Federal Information Center, 213-688-3800.

SAN FRANCISCO, CALIFORNIA

WHEN: June 28 and 29 at 9:00 a.m. (identical sessions).
WHERE: Federal Building, Room 2[illegible] 450 Golden Gate Avenue
RESERVATIONS: Call Mike Modena or Judy Barbee, Federal Executive Board, 415-556-0250.

Federal Register

Book 1 of 2 Books
Friday, June 15, 1979

Highlights

34468 **Residual Fuel Oil** DOE/ERA adopts amendment to domestic crude oil allocation program, holds hearing, and requests comments; comments by 10-1-79, hearing 8-15-79, request to speak by 8-2-79

34603 **Gaseous Emissions** EPA gives additional information, holds hearing and extends comment period on proposed rules for 1983 and later model year heavy-duty engines; comments by 8-29-79, hearing 7-16 and 7-17-79

34472, 34473, 34475, 34511 **Natural Gas** DOE/FERC proposes amendments and promulgates other rules relating to lawful prices; (4 documents)

34605 **Medicaid Quality Control** HEW/HCFA proposes to amend rules to specify time periods for completion of case reviews

34479 **Social Security Benefits** HEW/SSA publish final rules regarding requirements to become entitled to benefits; effective 6-15-79

34606 **Financial Assistance Programs** HEW/SSA plans to amend rules regarding quality control system

34651 **Juvenile Justice and Delinquency Prevention** Justice requests comments on draft guideline on Youth Advocacy Initiative; comments by 8-14-79

FEDERAL REGISTER Published daily, Monday through Friday (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Area Code 202-523-5240

Highlights

34784 **National Pollutant Discharge Elimination System** EPA establishes criteria for applications for permits which modifies requirements of secondary treatment under Clean Water Act; effective 6-22-79 (Part IV of this issue)

34754, 34780 **Day Care** HEW/Secy proposes revisions and holds meetings regarding services provided to children outside their homes, except the Headstart program; comments by 9-21-79, meetings in July and September 1979 (Part III of this issue) (2 documents)

34856 **Nursery Stock, Plants, and Seeds** USDA/APHIS proposes rules and holds hearing concerning prohibitions and restrictions regarding importation; comments by 9-13-79, hearing 8-21 and 8-22-79 (Part VII of this issue)

34840 **Glass Manufacturing Plants** EPA proposes rules and holds hearing on standards of performance for new stationary sources; comments by 8-14-79, hearing 7-9-79, request to speak by 6-29-79 (Part VI of this issue)

34466 **Irradiated Reactor Fuel** NRC establishes requirements for physical protection of spent fuel in transit; effective 7-16-79

34515 **Blood and Blood Components** HEW/FDA proposes to relieve restrictions on performance checks and calibrations of certain related equipment; comments by 8-14-79

34618 **Child Nutrition Programs** USDA/FNS publishes income poverty guidelines for determining eligibility for free and reduced-price meals and free milk; effective 7-1-79

34606 **Indochinese Refugee Assistance** HEW/SSA plans to develop rules on eligibility requirements, services for cash assistance, social services, employment services and training

34892 **Certain Toys** CPSC classifies as banned hazardous substances certain toys and other articles intended for use by children under 3 years of age (Part IX of this issue)

34698 **Sunshine Act Meetings**

Separate Parts of This Issue

Rules and Regulations

Federal Register
Vol. 44, No. 117
Friday, June 15, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 317

Appointment, Reassignment, Transfer and Development in the Senior Executive Service

AGENCY: Office of Personnel Management.

ACTION: Amendment to interim regulation.

SUMMARY: The amended interim regulations implement Sec. 413 of Title IV of the Civil Service Reform Act of 1978. They cover the conversion of employees to the Senior Executive Service.

DATES: Effective Date: June 15, 1979, and until final regulations are issued. Comment Date: August 14, 1979.

ADDRESS: Send written comments to the Associate Director, Executive Personnel and Management Development, Office of Personnel Management, Room 6R54, 1900 E Street, N.W., Washington, D.C. 20415.

FOR FURTHER INFORMATION CONTACT: Jack Vincent, (202) 632-6820.

SUPPLEMENTARY INFORMATION: Subpart B of Part 317 is being revised to cover appointment, reassignment, transfer, and development in the Senior Executive Service. Subpart B of Part 317 was issued on March 30, 1979 as an interim regulation. Comments on the interim regulations indicated that certain excepted service employees were not being given equitable conversion offers. The amendments to Subpart B set forth below extend the entitlement to a career appointment in the Senior Executive Service to excepted service employees currently in noncareer-type positions who previously had substantial career-oriented service under a career-type appointment and define career-type appointment.

1. In each of the following subsections:
317.302(a)(1)(v)
317.302(a)(1)(vi)
317.305(b)(3)
317.306(b)(3)
add: "or, as determined by the Office of Personnel Management, have substantially career-oriented service under career-type appointments as defined in § 317.304(a)(2).

2. At the end of each of the following subsections:
317.305(b)(3)(i)
317.306(b)(3)(i)
add: "The name of the individual and basis for approving the request must be published in the Federal Register."

3. In § 317.306(a)(3) following the words "served under a career appointment" add: "or career-type appointments."

4. In § 317.306(a) replace paragraph 2 with the following:

(2) A similar type of appointment ("career-type" appointment) in an excepted service position, as determined by the Office.

A career-type appointment is an appointment in the excepted service other than an appointment:

(i) To a Schedule C position established under Part 213 of this chapter;

(ii) To a position authorized to be filled by noncareer executive assignment under Part 305 of this chapter;

(iii) To a position authorized to be filled by noncareer executive assignment; or

(iv) To a position where the incumbent is traditionally changed upon a change in Presidential administrations.

Office of Personnel Management.

Beverly M. Jones,
Issuance Systems Manager.

Accordingly, Subpart B of Part 317 is revised to read as follows:

Subpart B—Regulatory Requirements of the Office of Personnel Management

§ 317.201 Regulatory requirements.

This subpart contains the regulations of the Office of Personnel Management which implement subchapter VIII of chapter 33 of title 5, U.S.C. and section 413 of title IV of the Civil Service Reform Act of 1978.

§ 317.301 Conversion coverage.

(a) *When applicable.* These conversion provisions apply during:

(1) The initial conversion to the Senior Executive Service to be completed by July 13, 1979; and

(2) Conversion to the Senior Executive Service following revocation of a Presidential exclusion under 5 U.S.C. 3132(e).

(b) *Employees covered.* This subpart covers:

(1) An employee serving in a position at the time it is designated a Senior Executive Service position;

(2) An individual appointed or reinstated to a position after it has been designated a Senior Executive Service position;

(3) An employee transferred, promoted, voluntarily reassigned or voluntarily demoted to a position after it has been designated a Senior Executive Service position;

(4) An employee involuntarily reassigned or involuntarily demoted to a position after it has been designated a Senior Executive Service position; and

(5) An employee serving in a position which meets the grade level but not the functional criteria for designation as a Senior Executive Service position.

(c) *Employees excluded.* The following employees are excluded from coverage of this subpart and are not entitled to conversion to the Senior Executive Service.

(1) An employee in a position designated as Senior Executive Service who is serving under a time limited appointment which will terminate before the operational date of the Senior Executive Service.

(2) An employee serving under a temporary promotion, detail, or temporary assignment in a position designated as Senior Executive Service unless the position which the employee encumbered on a permanent basis just prior to the current temporary action has been designated as Senior Executive Service.

§ 317.302 Conversion procedures.

(a) *Employees appointed prior to designation; employees involuntarily reassigned or demoted after designation—(1) Notice.* Each employee covered by this subpart who was

appointed prior to the designation of his or her position as a Senior Executive Service position, or who was involuntarily reassigned or involuntarily demoted to a position after it was designated a Senior Executive Service position, shall be given a written notice which includes the following information:

(i) A statement that the employee's position has been designated as either "general" or "career reserved";

(ii) A statement that the employee is being offered an appointment under the Senior Executive Service or that the employee is not being offered an appointment under the Senior Executive Service but will be separated from the civil service pursuant to § 317.305(b)(4) or § 317.306(b)(4); If the employee is offered conversion, the notice shall also include:

(iii) A statement that the employee has 90 calendar days from the date of receipt of the written notice to elect either to join the Senior Executive Service or to remain in his or her current appointment system;

(iv) Identification of the position, SES pay rate, and kind of appointment which the employee will receive if the employee elects to convert to the Senior Executive Service;

(v) For excepted appointees who have reinstatement eligibility to a position in the competitive service, or, as determined by the Office of Personnel Management, have substantial career-oriented service under career-type appointments as defined in § 317.304(a)(2), a statement that the employee may request conversion to career appointment;

(vi) For employees under limited executive assignment who have reinstatement eligibility to a position in the competitive service or, as determined by the Office of Personnel Management, have substantial career-oriented service under career-type appointments as defined in § 317.304(a)(2), and who are covered under § 317.306(b)(3), a statement that the employee may request conversion to career appointment;

(vii) A summary of the features of the Senior Executive Service (this can be accomplished by appending descriptive material prepared by the Office);

(viii) A statement that the employee must submit his or her decision with regard to paragraphs (a)(1) (iii), (v) and (vi) of this section, in writing, on or before the end of the notice period; and

(ix) A statement of the employee's right to appeal an action under this subpart to the Merit Systems Protection Board.

An employee whose involuntary reassignment or involuntary demotion to a designated position occurs less than 90 days before the operational date of the Senior Executive Service, shall be given this notice at the time of the personnel action. The employee shall have 90 calendar days from the date of receipt of the notice to make an election on conversion.

(2) *Pay.* Pay shall be set at an authorized SES pay rate. The pay rate given to an employee upon conversion shall not be less than the employee's basic payable salary just prior to conversion. An employee's payable salary upon conversion is subject to pay limitations, if any, imposed by chapter 53 of title 5, United States Code, or other statutes.

(3) *Freedom of choice.* The employee shall decide whether he or she accepts conversion to the Senior Executive Service. The employing agency shall not attempt to influence the employee's decision through coercion, intimidation or duress.

(4) *Employee's election.* On or before the end of the notice period, the employee shall signify in writing his or her decision to accept or to decline an appointment under the Senior Executive Service. An excepted or limited assignment employee covered under § 317.305(b)(3) or § 317.306(b)(3), respectively, shall also indicate whether he or she request conversion to career appointment. Failure to respond shall be deemed declination.

(b) *Employees receiving appointments after designation but before the operational date of the Senior Executive Service.*—(1) *Condition of appointment.* Each individual appointed, reinstated, transferred, promoted, voluntarily reassigned or voluntarily demoted to a position after it has been designated a Senior Executive Service position shall be required to accept conversion to the Senior Executive Service. The agency shall advise the individual of this requirement prior to the appointment or other personnel action. The individual shall signify his or her acceptance of conversion in writing at the time of the personnel action.

(2) *Notice.* At the time of the personnel action, or 90 days before the Senior Executive Service becomes operational, whichever is later, the agency shall give the employee a written notice which identifies the position, SES pay rate, and kind of appointment the employee will receive under the Senior Executive Service.

(3) *Pay.* Pay shall be set at an authorized SES pay rate. The pay rate given to a Federal employee who enters the Senior Executive Service without a break in service shall not be less than the employee's basic payable salary just prior to his or her entry into the Senior Executive Service. An employee's payable salary under the Senior Executive Service is subject to pay limitations, if any, imposed by chapter 53 of title 5, United States Code, or other statutes.

(c) *Employees whose positions are not designated Senior Executive Service positions. Notice.* Each employee covered by § 317.301(b)(5) shall be given a written notice advising the employee that his or her position is not designated a Senior Executive Service position; that the employee is not entitled to conversion to the Senior Executive Service; and that the employee has a right to appeal an action under this subpart to the Merit Systems Protection Board.

§ 317.303 Status of employees who decline voluntary conversion to the Senior Executive Service.

(a) An employee who declines conversion pursuant to § 317.302(a)(4) shall remain in his or her current appointment and pay system, and shall retain the grade, seniority, and other rights and benefits associated with such type of appointment and pay system. The employee may continue in the current SES position or be reassigned to another position within or outside the Senior Executive Service.

(b) The assignment of an employee who declines conversion under this subpart shall not result in the separation or reduction in grade of any other employee in the agency.

(c) Nothing in these regulations affects an agency's right to terminate a limited executive appointment pursuant to Civil Service Rule IX.

§ 317.304 Conversion of career and career-type appointees.

(a) *Coverage.* This section covers employees serving under:

(1) A career or career-conditional appointment; or

(2) A similar type of appointment ("career-type" appointment) in an excepted service position as determined by the Office.

A career-type appointment is an appointment in the excepted service other than an appointment:

(i) To a Schedule C position established under Part 213 of this chapter;

(ii) To a position authorized to be filled by noncareer executive assignment under Part 305 of this chapter;

(iii) To a position which meets the same criteria as a Schedule C position or a position authorized to be filled by non-career executive assignment; or

(iv) To a position where the incumbent is traditionally changed upon a change in Presidential Administrations.

(b) *Senior Executive Service appointment.* An employee covered by this section shall be converted to a Senior Executive Service career appointment. The employee may be assigned to either a "general" or a "career reserved" position.

§ 317.305 Conversion of excepted appointees.

(a) *Coverage.* This section covers employees serving under an excepted appointment in a position:

(1) In Schedule C of Subpart C of Part 213 of Title 5, Code of Federal Regulations;

(2) Filled by noncareer executive assignment under subpart F of Part 305 of Title 5, Code of Federal Regulations;

(3) In the Executive Schedule under subchapter II of chapter 53 of title 5, United States Code, other than a career Executive Schedule position; or,

(4) Filled under an authority equivalent to paragraph (a) (1), (2), or (3) of this section.

(b) *Senior Executive Service appointment.* An employee covered by this section shall be subject to one of the following actions.

(1) If the employee's position is designated a "general" position, the agency may convert the employee to a Senior Executive Service noncareer appointment. The employee may be assigned only to a "general" position.

(2) If the employee's position is designated a "career reserved" position, the agency may convert the employee to a Senior Executive Service noncareer appointment and assign the employee to a "general" position. The employee cannot remain in a "career reserved" position.

(3) If the employee has reinstatement eligibility to a position in the competitive service, or, as determined by the Office of Personnel Management, had substantial career-oriented service under a career-type appointment as defined in § 317.304(a)(2), the employee may request conversion to a career appointment. Such request must be made on or before the end of the notice period.

(i) If the request is approved by the Office, the agency will convert the employee to a Senior Executive Service career appointment. The employee may be assigned to a "general" or a "career reserved" position. The name of the individual and basis for approving the request must be published in the Federal Register.

(ii) If the employee's request for conversion to career is not approved by the Office, or if the employee elects not to make such a request, the agency will convert the employee to a Senior Executive Service noncareer appointment. The employee may be assigned only to a "general" position.

(4) In lieu of action under paragraph (b) (1), (2), or (3) of this section, the agency may separate the employee from the civil service.

§ 317.306 Conversion of employees under time limited appointments.

(a) *Coverage.* This section covers employees serving under:

(1) A limited executive assignment under Subpart E of Part 305 of Title 5, Code of Federal Regulations; or

(2) A similar type of time limited appointment in an excepted service position.

(b) *Senior Executive Service appointment.* An employee covered by this section shall be subject to one of the following actions.

(1) If the position in which the employee is serving under a limited executive assignment or similar type of time limited appointment will terminate within three years from the date of the proposed conversion action, the agency may convert the employee to a Senior Executive Service limited term appointment.

(2) If the position in which the employee is serving under a limited executive assignment or similar type of time limited appointment will not terminate within three years from the date of the proposed conversion action, the agency may convert the employee to a Senior Executive Service noncareer appointment and assign the employee to a "general" position.

(3) If the employee under a limited executive assignment has reinstatement eligibility to a position in the competitive service, or, as determined by the Office of Personnel Management, had substantial career-oriented service under a career-type appointment as defined in § 317.304(a)(2), and if immediately prior to the limited executive assignment and without a break in service the employee served under a career appointment or career-type appointment in a position now being designated a Senior Executive Service position then the employee may request conversion to a career appointment. Such request must be made on or before the end of the notice period.

(i) If the employee requests conversion to career, the agency will convert the employee to a Senior Executive Service career appointment. The employee may be assigned to a "general" or a "career reserved" position. The name of the individual and basis for approving the request must be published in the Federal Register.

(ii) If the employee does not request conversion to career, the agency will convert the employee as provided for in paragraphs (b) (1) and (2) of this section.

(4) In lieu of action under paragraph (b) (1), (2), or (3) of this section, the agency may separate the employee from the civil service.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

7 CFR 729

[Amendment 1]

Peanuts; Acreage Allotments, Marketing Quotas, and Poundage Quotas for 1978 and Subsequent Crops

AGENCY: Agricultural Stabilization and Conservation Service, Department of Agriculture.

ACTION: Final rule.

SUMMARY: This amendment redefines peanut undermarketings to provide that all segregation 1 peanuts marketed or considered marketed from a farm will be considered in determining undermarketing credit for a farm and announces the basic penalty rate for the 1979 crop of peanuts. The revised definition of undermarketings is being made to prevent abuse of the undermarketing provision where all segregation 1 peanuts are marketed under contract rather than as quota peanuts.

EFFECTIVE DATE: June 15, 1979.

FOR FURTHER INFORMATION CONTACT: Paul P. Kume, Production Adjustment Division, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013 (202) 447-4695.

SUPPLEMENTARY INFORMATION: Since producers have planted their 1979 crop of peanuts and are now entering into contracts with handlers under chapter 1446 of this title for the marketing of

additional peanuts and need to know the definition of undermarketing, I have determined that compliance with the notice of proposed rulemaking and public procedure of 5 U.S.C. 553 and the requirements of Executive Order 12044 is impracticable and contrary to the public interest. Accordingly, this notice is being issued without compliance with such procedure and requirements.

Final Rule

Accordingly, 7 CFR 729.3 (11)(1) is amended and 7 CFR 729.46(c) is added, effective for the 1979 and subsequent crops of peanuts, to read as follows:

1. Subparagraph (1) of paragraph (11) of § 729.3 is revised to read as follows:

§ 729.3 Definitions.

* * * * *

(11) *Undermarketings.*

(1) *Actual undermarketings.* The pounds by which the effective farm poundage quota exceeds the larger of (1) the total production of segregation 1 peanuts on the farm or (2) the marketing of quota peanuts from the farm.

* * * * *

2. Paragraph (c) is added to § 729.46 to read as follows:

§ 729.46 Penalty rate.

* * * * *

(c) *1979–80 Marketing Year.* The basic support price for quota peanuts for the 1979–80 marketing year is $420 per ton. Therefore, the basic penalty rate for the 1979 crop of peanuts is $504 per ton or 25.2 cents per pound.

(Secs. 301, 358, 358a, 359, 361–368, 373, 375, 377, 52 Stat. 38, as amended, 55 Stat. 88, as amended, 61 Stat. 658, 55 Stat. 90, as amended, 52 Stat. 62, as amended, 63, as amended, 64, 65, as amended, 66, as amended, 70 Stat. 206, as amended (7 U.S.C. 1301, 1358, 1358a, 1359, 1361–1368, 1372, 1373, 1375, 1377) and Secs. 801, 802, 803, 804, 805, 806, 91 Stat. 944 (7 U.S.C. 1358, 1358a, 1359, 1373, 1377).)

Note.—This regulation has been determined not significant under the USDA criteria implementing Executive Order 12044. These provisions are required to announce the basic penalty rate, which is based on the basic support rate announced February 15, 1979, for which an approved impact statement is available.

Signed at Washington, D.C., on June 11, 1979.

Ray Fitzgerald,

Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc. 79-18628 Filed 6-14-79; 8:45 am]

BILLING CODE 3410-05-M

7 CFR Part 760

Indemnity Payment Programs; Beekeeper Indemnity Payment Program (1978–1981) (Amendment 1)

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to amend the Beekeeper Indemnity Payment Program Regulations to provide that payment of indemnity claims filed after the effective date of this amendment will be conditioned upon there being funds available to the Department for the payment thereof.

EFFECTIVE DATE: June 15, 1979.

FOR FURTHER INFORMATION CONTACT: Robert M. Cook, Emergency and Indemnity Programs Division, ASCS, USDA, Room 4095, South Building, Washington, D.C. 20013, Telephone: (202) 447–7997.

SUPPLEMENTARY INFORMATION: The Beekeeper Indemnity Payment Program is authorized pursuant to section 804 of the Agriculture Act of 1970, as amended. The Food and Agriculture Act of 1977 extended authority for the program through September 30, 1981. It is not mandatory that this program be conducted.

The program is funded by separate annual appropriations. Unless further appropriations are made for this program, sufficient funds may not be available for indemnification under this program of bee losses.

Executive Order 12044 (43 FR 12661, March 24, 1978) requires at least a 60-day public comment period on proposed significant regulations except where the Agency determines that this is not possible or in the best interests of the producers. Since the period of extensive pesticide use has begun which will result in bee losses and funds are currently not available to indemnify such losses, it is in the best interests of beekeepers to publish this regulation immediately. Therefore, I have determined that compliance with the notice of proposed rulemaking and public procedure requirements of 5 U.S.C. 553 and the requirements of Executive Order 12044 is impossible and contrary to the public interest. Accordingly, this notice is issued without compliance with such procedure and requirements.

Final Rule

Accordingly, 7 CFR Part 760 is amended by adding a new § 760.119, effective for calendar year 1979 and subsequent years, to read as follows:

§ 760.119 Availability of funds.

Payment of indemnity claims filed after (effective date of amendment) will be contingent upon availability of funds to the Department to pay such claims.

(Sec. 804, 84 Stat. 1382 (7 U.S.C. 135b note); sec. 1(27), 87 Stat. 237 (7 U.S.C. 135b note); and sec. 207, 91 Stat. 921 (7 U.S.C. 135b note).)

Note.—This regulation has been determined to be not significant under the USDA criteria implementing Executive Order 12044. An approved impact analysis on the program regulations is available from Robert M. Cook (ASCS) (202) 447–7997.

Signed at Washington, D.C. on June 5, 1979.

Weldon B. Denny,

Acting Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410-05-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 203]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period June 17–23, 1979. Such action is needed to provide for orderly maketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: June 17, 1979.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, 202–447–5975.

SUPPLEMENTARY INFORMATION: Findings. This regulation is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee, and upon other information. It is hereby found that this action will tend to effectuate the declared policy of the act. This regulation has not been determined significant under the USDA criteria for implementing Executive Order 12044.

The committee met on June 12, 1979, to consider supply and market conditions and other factors affecting the need for regulation and

recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons continues good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.503 Lemon Regulation 203.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period June 17, 1979, through June 23, 1979, is established at 320,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: June 14, 1979.

Charles R. Brader,

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Parts 911 and 944

[Lime Regulation 20, Amendment 1; Lime Regulation 7, Amendment 1]

Limes Grown in Florida and Fruits, Import Regulations; Grade and Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: These amendments extend minimum grade and size requirements for limes grown in Florida, and for limes imported into the United States through April 30, 1980. Unless extended, these requirements would expire June 17, 1979. Extension of these requirements is designed to assure the continued shipment and importation of supplies of limes of acceptable grades and sizes for the rest of the 1979–80 season, in the interest of producers and consumers.

DATES: Effective June 18, 1979, through April 30, 1980.

FOR FURTHER INFORMATION CONTACT: Melvin R. McGaha, (202) 447–5975.

SUPPLEMENTARY INFORMATION: Findings. The amendment to the Florida lime regulation currently in effect (§ 911.341 Lime Regulation 20; 44 FR 24561) is issued under the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911; 43 FR 30319), regulating the handling of limes grown in Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The amendment to the lime import regulation currently in effect (§ 944.200 Lime Regulation 7; 44 FR 24561) is issued under § 8e (7 U.S.C. 608e–1) of this act. The grade and size requirements applicable to Florida lime shipments were recommended by the Florida Lime Administrative Committee, which locally administers this marketing order program. Notice of these proposed amendments was published in the May 10, 1979, issue of the Federal Register (44 FR 27424). No comments were received during the 25 days provided in the notice. It is hereby found that these actions will tend to effectuate the declared policy of the act. These amendments have not been determined significant under the USDA criteria for implementing Executive Order 12044.

These grade and size requirements reflect the Department's appraisal of the need for regulating limes during the period June 18, 1979, through April 30, 1980, based on the available supply and market demand conditions. Production of Florida limes for the 1979–80 season is expected to amount to a record 1,800,000 bushels, a level which indicates a complete recovery from the 1977 freeze. About 900,000 bushels of Florida limes are expected to be shipped to fresh markets in 1979–80, with the remainder of the crop being utilized in processing. Mexico is expected to continue supplying substantial quantities of limes to the U.S. market, during the 1979–80 season. More than adequate supplies of limes should be available to fill domestic fresh market demands.

Under these amendments, both Florida limes and imported limes would need to continue meeting the following minimum requirements: *True "seeded" limes*—U.S. No. 2 grade, except as to color, with no minimum size; and *Persian "seedless" limes*—U.S. Combination, Mixed Color, except that stem length is not considered a factor of grade, and a minimum diameter of 1⅝ inches. Florida limes shipped within the production area would be exempted from the grade requirements, if they have at least 42% juice content and are in containers not authorized for shipment of Florida limes out of the production area. Appropriate packing tolerances, with respect to the minimum size requirement, for limes smaller than 1⅝ inches apply. The requirements for imported limes are consistent with § 8e of the act. This section requires that when specified commodities, including limes, are regulated under a federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity.

The language in these amendments relating to the application of tolerances has been modified slightly for clarification purposes from that in the current regulations and in the notice. Such modifications are not substantive, and are intended to make such provisions easier to interpret and apply.

After consideration of all relevant matter presented, including the proposals in the notice and other available information, it is found that amendment of the regulations, as hereinafter set forth, is necessary to establish and maintain orderly marketing conditions, and that such action is in accordance with this marketing agreement and order, and will tend to effectuate the declared policy of the act.

It is hereby further found that it is impracticable and contrary to the public interest to postpone the effective date of this amendment until 30 days after publication in the Federal Register (5 U.S.C. 553), and good cause exists for making the provisions hereof effective as hereinafter set forth in that (1) shipments of Florida limes and imported limes are currently regulated by grade and size through June 17, 1979, and these regulatory requirements will expire at such time unless extended; (2) the Florida lime and lime import regulations should be extended to cover, insofar as practicable, all of this season's shipments of Florida limes, as well as all limes imported into the United States over a corresponding period, in order to effectuate the declared policy of the act; (3) notice of the proposed extension of the current regulations for limes grown in Florida and for limes imported into the United States was published in the May 10, 1979, issue of the Federal Register (44 FR 27424), and no comments

relating to the proposed amendments or their effective date were received during the 25 days provided; (4) the recommendations upon which the current regulation and this amendment for Florida limes are based were developed by the committee at an open meeting on April 4, 1979, after due notice thereof, and all interested persons present were given an opportunity to express their views; (5) the regulatory requirements herein specified for Florida limes and imported limes are the same as those in the proposed amendments, except for minor changes made for clarification purposes in the language relating to application of tolerances; (6) the requirements of the amended import regulation are imposed pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), which makes such import requirements mandatory; (7) such amendment to the import regulation imposes the same grade and size requirements on imports of limes as are being made applicable to the shipment of limes grown in Florida under the amendment to Lime Regulation 39, which is also to become effective June 18, 1979; (8) such amendments to the domestic and import regulation should become effective at as near the same time as is reasonable practicable; and (9) three days notice thereof, the minimum prescribed by said § 8e, is given with respect to this amendment to the import regulation.

Accordingly, it is found that § 911.341 Lime Regulation 39, and § 944.206 Lime Regulation 7, should be and are amended to read as follows:

§ 911.341 Lime Regulation 39.

(a) During the period June 18, 1979, through April 30, 1980, no handler shall handle:

(1) Any limes of the group known as true "seeded" limes (also known as Mexican, West Indian, and Key limes and by other synonyms), grown in the production area, which do not meet the requirements of at least U.S. No. 2 Grade for Persian (Tahiti) Limes, except as to color: *Provided*, That true limes, grown in the production area, which fail to meet the requirements of such grade may be handled within the production area, if such limes meet all other applicable requirements of this section and the minimum juice content requirement prescribed in the U.S. Standards for Persian (Tahiti) Limes, and are handled in containers other than the containers prescribed in § 911.329 for the handling of limes between the production area and any point outside thereof;

(2) Any limes of the group known as large-fruited or Persian "seedless" limes (including Tahiti, Bearss, and similar varieties) which do not grade at least U.S. Combination, Mixed Color: *Provided*, That stem length shall not be considered a factor of grade, and tolerances for fruit affected by decay and for fruit failing to meet the requirements for such grade in the U.S. Standards for Persian (Tahiti) Limes shall apply: *Provided further*, That Persian limes, grown in the production area, which fail to meet the requirements of such grade may be handled within the production area, if such limes meet all other applicable requirements of this section and meet the same minimum juice content requirement prescribed in the U.S. Standards for such limes and are handled in containers other than the containers prescribed in § 911.329 for the handling of limes between the production area and any point outside thereof; or

(3) Any limes of the group known as large-fruited or Persian "seedless" limes (including Tahiti, Bearss, and similar varieties) which are of a size smaller than 1¾ inches in diameter: *Provided*, That not more than 10 percent of the limes, by count, in any lot of containers may fail to meet the minimum size requirement: *Provided further*, That not more than 15 percent of the limes, by count, in any individual container containing more than four pounds of limes may fail to meet the minimum size requirement.

(b) Terms used in this section shall have the same meaning as in the marketing order, and terms relating to grade and diameter shall have the same meaning as in the U.S. Standards for Persian (Tahiti) Limes (7 CFR 2851.1000–1016).

§ 944.206 Lime Regulation 7.

(a) *Applicability to imports.* Pursuant to § 8e of the act, Part 944—Fruits; Import Regulations, the importation into the United States of any limes is prohibited during the period June 18, 1979, through April 30, 1980, unless such limes meet the minimum grade and size requirements specified in § 911.341 Lime Regulation 39.

(b) The Federal or Federal-State Inspection Service, Fruit and Vegetable Quality Division, Food Safety and Quality Service, United States Department of Agriculture, is designated as the governmental inspection service for certifying the grade, size, quality, and maturity of limes that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of limes, is required on all imports. The inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 2851) and in accordance with the Procedure for Requesting Inspection and Designating the Agencies to Perform Required Inspection or Certification (7 CFR Part 944; 43 FR 19340).

(c) *Minimum quantity exemption.* Any person may import up to 250 pounds of limes exempt from the requirements specified in this section.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: June 12, 1979, to become effective June 18, 1979.

D. S. Kuryloski,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 73

Physical Protection of Irradiated Reactor Fuel in Transit

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Interim final rule.

SUMMARY: The U.S. Nuclear Regulatory Commission has decided to establish requirements for protection of spent fuel in transit. A recent study suggests that the sabotage of spent fuel shipments has the potential for producing serious radiological consequences in areas of high population density. It will be some time before confirmatory research relative to the estimated consequences resulting from a successful act of sabotage on spent fuel can be completed. In the meantime, the Commission believes that interim requirements for the protection of such shipments should be issued immediately. This rule is subject to reconsideration or revision based on public comments received subsequent to its publication. Concurrently, the NRC is issuing guidance documentation (NUREG–0561) to assist licensees in the implementation of these requirements. The Public is invited to submit its views

and comments on both the Rule and the Guidance.

EFFECTIVE DATE: July 16, 1979.

DATE: Comment period expires August 17, 1979.

ADDRESSES: Written comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

FOR FURTHER INFORMATION CONTACT: Mr. L. J. Evans, Jr., Regulatory Improvements Branch, Division of Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Phone (301) 427–4181.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission is amending 10 CFR 73 of its regulations to provide interim requirements for the protection of spent fuel in transit. This amendment is being published in effective form without benefit of public comment in the interest of the public health and safety.

Previous studies (NUREG–0194, Calculations of Radiological Consequences from Sabotage of Shipping Casks for Spent Fuel and High-Level Waste, February 1977; NUREG–0170, FES on the Transportation of Radioactive Material by Air and Other Modes, December 1977), estimated the health effects of a radiological release in a non-urban area resulting from a high-explosive assault on a spent fuel cask. The estimated risks were not considered so substantive as to warrant regulatory action. A subsequent study by Sandia Laboratories includes a chapter on the sabotage of spent fuel in urban areas of high population density (SAND–77–1927, Transport of Radionuclides in Urban Environs: A working Draft Assessment). This study suggests that the sabotage of spent fuel shipments has the potential for producing serious radiological consequences in areas of high population density. The Commission has concluded that, in order to protect health and to minimize danger to life and property (Sections 161b and 161i(3) of the Atomic Energy Act of 1954, as amended), it is prudent and desirable to require certain interim safeguards measures for spent fuel shipments. The interim rule would be in effect until the results of confirmatory research are available and analyzed.

The focus of concern is on possible successful acts of sabotage in densely populated urban areas. Because of the possibility that spent fuel shipments could be hijacked and moved from low population areas to high population areas, the interim requirements apply to all shipments even though the planned shipment route may not pass through densely populated urban areas.

Prior to publication of this rule, informal contact was made with the carriers primarily involved in spent fuel shipments as well as with other interested parties, and their comments are known to the staff. It was ascertained that the imposition of these requirements would probably double the cost per mile rate for these shipments for an increase of approximately $200,000 per year for the estimated 200 annual shipments involved.

Because spent fuel shipments are on-going and the time of sabotage cannot be predicted, the Commission is of the opinion that time is of the essence in this matter, and that health and safety considerations override the necessity for public comment before issuance of an effective rule. Accordingly, the Commission, for good cause, finds that notice and public procedure are unnecessary and contrary to the public interest.

Although this rule is being published in effective form without a prior public comment period, the public is invited to submit its views and comments. After reviewing these views and comments, the Commission may reconsider or modify the interim rule as it deems necessary.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of Title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 73, are published as a document subject to codification.

1. Section 73.1 of 10 CFR Part 73 is amended by adding a new paragraph (b)(5) as follows:

§ 73.1 Purpose and scope.

* * * * *

(b) * * *

(5) This part also applies to shipments of irradiated reactor fuel of any quantity which has a total external radiation dose rate in excess of 100 rems per hour at a distance of 3 feet from any accessible surface without intervening shielding.

2. A new § 73.37 is added to 10 CFR Part 73 to read as follows:

§ 73.37 Requirements for physical protection of irradiated reactor fuel in transit.

(a) *General requirements.* Each licensee who transports or delivers to a carrier for transport irradiated reactor fuel in any amount that is exempt from the requirements of §§ 73.30 through 73.36 in accordance with § 73.5 shall make arrangements to assure that:

(1) The Nuclear Regulatory Commission is notified in advance of each shipment in accordance with § 73.72 of this Part, and that NRC has approved the route in advance of the shipment,

(2) Arrangements have been made with law enforcement agencies along the route of shipments for their response to an emergency or a call for assistance,

(3) The route is planned to avoid, where practicable, heavily populated areas,

(4) The shipment is scheduled where practicable without any intermediate stops except for refueling and obtaining provisions, and that at all stops at least one individual maintains surveillance of the transport vehicle,

(5) Individuals serving as escorts have successfully completed a training program in accordance with Appendix D of this Part,

(6) Procedures for coping with threats and safeguards emergencies have been developed.

(b) *Shipments by road.* For shipments by road, the licensee shall make arrangements to assure that:

(1) Each shipment is accompanied by (i) at least one driver and one escort in the transport vehicle, or (ii) at least one driver in the transport vehicle and two escorts in a separate vehicle,

(2) The transport or separate vehicle is equipped with a radiotelephone and CB radio or approved equal communications equipment and that calls are made at least every 2 hours to a designated location to advise of the status of the shipment,

(3) The transport vehicle is equipped with features that permit immobilization of the cab or the cargo-carrying portion of the vehicle.

(c) *Shipments by rail.* For shipments by rail, the licensee shall assure that:

(1) Each shipment is accompanied by at least one escort in the shipment car or in a separate car that will permit observation of the shipment car,

(2) Two-way voice communication capability is available and that calls are made at least every 2 hours to a designated location to advise of the status of the shipment,

(3) At least on escort maintains visual surveillance of the shipment car during periods when the train is stopped on sidings or in rail yards.

(d) If it is not possible to avoid heavily populated areas, the Commission may require, depending on individual circumstances of the shipment, additional protective measures.

(e) A period of 60 days from the effective date of the rule is allowed for the implementation of requirements that involve equipment modification or training.

3. A new Appendix D is added to 10 CFR Part 73 to read as follows:

Appendix D—Physical Protection of Irradiated Reactor Fuel in Transit, Training Program Subject Schedule.

Pursuant to the provision of § 73.37 of 10 CFR Part 73, each licensee who transports or delivers to a carrier for transport irradiated reactor fuel is required to assure that individuals used as shipment escorts have completed a training program. The subjects that are to be included in this training program are as follows:

Security Enroute

—Route planning and selection
—Vehicle operation
—Procedures at stops
—Detours and use of alternate routes

Communications

—Equipment operation
—Status reporting
—Contacts with law enforcement units
—Communications discipline
—Procedures for reporting incidents

Radiological Considerations

—Description of the radioactive cargo
—Function and characteristics of the shipping casks
—Radiation hazards
—Federal, State and local ordinances relative to the shipment of radioactive materials
—Responsible agencies

Response to Contingencies

—Accidents
—Severe weather conditions
—Vehicle breakdown
—Communications problems
—Radioactive "spills"
—Use of special equipment (flares, emergency lighting, etc.)

Response to Threats

—Reporting
—Calling for assistance
—Use of immobilization features
—Hostage situations
—Avoiding suspicious situations.

Effective date: July 16, 1979.

(Sec. 53, 161b, 161i, Pub. L. 83–703, 68 Stat. 930, 948, 949; Sec. 201, Pub. L. 93–438, 88 Stat. 1242–1243 (42 U.S.C. 2073, 2201, 5841))

Dated at Washington, D.C. this 12th day of June, 1979.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 212

[Docket No. ERA-R-78-01]

Mandatory Petroleum Allocation Regulations; Amendments to Extend Current Provisions of Entitlements Program Relating to Residual Fuel Oil

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final Rule and Notice of Hearing and Request for Further Comments.

SUMMARY: On October 17, 1978, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) adopted amendments to the domestic crude oil allocation ("entitlements") program with respect to residual fuel oil in order to implement Congressional policy. These amendments, which were made effective for the period July 1, 1978 through June 30, 1979, provided for automatic reversion on July 1, 1979 to the residual fuel oil entitlements provisions previously in effect. We are hereby adopting amendments, effective July 1, 1979, which will extend through December 31, 1979 the effects of the current provisions of the entitlements program providing that imports of residual fuel into the East Coast market or the State of Michigan receive 50 percent of the per barrel entitlements runs credit and that an entitlement penalty ("reverse entitlements") shall only apply to domestically refined residual fuel oil which is transported by foreign flag tankers for sale or use in those markets. We are requesting further comments as to what entitlements provisions, if any, should be in effect with respect to residual fuel after December 31, 1979.

DATES: Further comments by October 1, 1979, 4:30 p.m.; requests to speak by August 2, 1979, 4:30 p.m.; hearing: August 15, 1979, 9:30 a.m.

ADDRESSES: All comments and requests to speak to: Department of Energy, Economic Regulatory Administration, Office of Public Hearing Management, Docket No. ERA-R-78-01B, Room 2313, 2000 M Street, NW., Washington, D.C. 20461. Hearing location: Room 2105, 2000 M Street, NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background
II. Amendments Adopted
III. Comment Procedures
IV. Other Matters

I. Background

On June 15, 1978 (43 FR 26551, June 20, 1978) we issued a further notice of proposed rulemaking and public hearing to amend the residual fuel oil provisions of the entitlements program. The proposed amendments generally would have provided for elimination of the reverse entitlements rule applicable to domestically refined residual fuel oil sold into the East Coast and would have increased entitlement benefits for residual fuel oil imported into the East Coast market. This proposal was cast as a further notice of proposed rulemaking, since three alternative amendments on the residual fuel oil progam had been proposed on December 23, 1976 (41 FR 56821, December 30, 1976).

A public hearing on the June 1978 proposal was held July 26 through 28, 1978 in Washington, D.C. Commenters representing a broad range of interests which might be affected by the proposed amendments presented their views at the hearing. We also received written comments on the proposal through August 25, 1978.

While we were considering the comments submitted in response to the June 1978 proposal, Congress initiated legislative proceedings on the subject of entitlements for residual fuel oil. These proceedings resulted in the inclusions of requirements under section 307 of the Act Making Appropriations for the Department of Interior and Other Related Agencies for the Fiscal Year Ending September 30, 1979 ("1979 Appropriations Act," Pub. L. 95–465) which in effect mandated the DOE to amend the entitlements program.

On October 17, 1978, we issued a final rule adopting amendments to implement the provisions of section 307. These

amendments provide for three changes in the residual fuel oil entitlements provisions to be in effect during the period July 1, 1979 through June 30, 1979: First, domestically refined residual fuel oil is not subject to an entitlement penalty unless transported by foreign flag tankers into the East Coast market; second, the entitlement benefit issuable for imports of residual fuel into the East Coast market is increased from 30 percent to 50 percent of the per barrel entitlements runs credit; and third, the scope of the residual fuel oil entitlements program is expanded, by amending the definition of East Coast market, to include the State of Michigan. The October 1978 final rule also provided for automatic reversion on July 1, 1979 to the residual fuel oil entitlements provisions which were in effect immediately prior to adoption of the rule.

Since the amendments described under section 307 were required to be implemented within 30 days of the 1978 Appropriations Act's date of enactment, opportunity for public comment prior to the adoption of the October 1978 final rule was impracticable. However, in the preamble to the final rule we announced our intent to keep open our pending rulemaking proceeding regarding entitlements for residual fuel oil in order to receive further comments through February 1, 1979. We requested that comments discuss the performance of the market under the October 1978 amendments and any further action which might be necessary or appropriate in view of the June 30, 1979 expiration date of the October 1978 amendments.

We received 33 comments in response to the October 1978 notice. After reviewing these comments, we determined that the provisions of section 307 of the 1979 Appropriations Act had been fully implemented. Therefore, we issued on February 14, 1979 a notice that no further action would be taken with respect to implementation of that statutory provision (44 FR 10702, February 19, 1979). We also indicated at that time our intention to continue our review of residual fuel oil market factors in order to determine whether any further action should be taken in this rulemaking proceeding to prevent automatic reversion on July 1, 1979 to the residual fuel oil entitlements provisions in effect prior to adoption of the October 1978 amendments.

Since the closing on February 1, 1979 of the period for further public comment in this rulemaking proceeding, several significant events have occurred. First, prices for imported crude oil have escalated rapidly, resulting in a reversal in the decline in the value of an entitlement runs credit. Second, the President has suspended fees and duties on all petroleum imports for the period April through June 1979 and delegated to the Secretary of Energy authority to extend this suspension for two additional 3-month periods. Finally, the President has announced the gradual deregulation of crude oil prices by September 30, 1981.

In view of the above considerations, we believe reversion on July 1, 1979 to the residual fuel oil entitlements provisions in effect prior to adoption of the October 1978 final rule could threaten the ability of historically import-dependent consumers to obtain adequate supplies of residual fuel oil in the current world market environment. It is our further belief that, in view of the relatively short time they have been in effect, the current residual fuel oil entitlements provisions should be extended through December 31, 1979 to provide continuity and stability during the present tight world market supply situation. In addition, extension of the current provisions beyond June 30, 1979 will permit opportunity for public comment as to any further action which may be necessary or appropriate after December 31, 1979.

II. Amendments Adopted

Under the amendments adopted today, imports of residual fuel oil into the Bureau of Mines East Coast Refining District and the State of Michigan will continue during the period July 1, 1979 through December 31, 1979 to be eligible to earn 50 percent of the per barrel entitlements runs credit. In addition, domestic refiners will continue during this period to receive 100 percent of an entitlements runs credit for each barrel of residual fuel oil it produces for sale into the East Coast market or the State of Michigan which is not shipped in a foreign flag tanker.

These changes are effectuated through the following specific amendments to the current entitlements program regulations:

We are eliminating the definition of "East Coast market" in 10 CFR 211.62 and adding a definition of "eligible market" which will include the Bureau of Mines East Coast Refining District and the State of Michigan. References elsewhere in the regulations to the term "East Coast market" are amended to read "eligible market" where appropriate.

The defined term "eligible product" is amended to continue the restriction that residual fuel oil which is processed in the refinery located in the U.S. Virgin Islands and then imported into the eligible market is not considered to be an "eligible product" and, therefore, is not eligible for imported product entitlements issuances. In contrast, residual fuel oil refined abroad, rather than in the U.S. Virgin Islands, and imported into the East Coast market by a U.S. Virgin Islands refiner will continue to qualify as an "eligible product" through December 31, 1979.

The definition of "national domestic crude oil supply ratio" is amended to provide for a 50 percent entitlement benefit for imports of eligible products during the period July 1, 1979 through December 31, 1979.

The reporting requirements in § 211.66 are amended to continue to make importers of record which are the ultimate consumers of the residual fuel oil, as well as those importing for resale, subject to this reporting requirement.

Section 211.67(a)(3) is amended to provide that for the period July 1, 1979 through December 31, 1979, the benefits granted to imported residual fuel oil will continue to be 50 percent of the per barrel crude oil entitlements runs credit. Subparagraph (d)(4) of that section is amended to continue the elimination of the exemption of the first 5,000 barrels per day of domestically produced residual fuel oil from the 50 percent entitlement penalty and to continue to provide for application of the 50 percent entitlement penalty only in that situation where residual fuel oil processed by a domestic refiner is transported by a foreign flag tanker for sale or use in the eligible market.

III. Comment Procedures

A. *Written Comments.* You are invited to participate in this proceeding by submitting data, views or arguments with respect to any matters relevant to this notice. All comments should be submitted by 4:30 p.m., e.s.t., October 1, 1979 to the appropriate address indicated in the "Addresses" section of this preamble and should be identified on the outside envelope and on documents submitted with the designation "Amendments to the Entitlements Program with Respect to Residual Fuel Oil," Docket No. ERA-R-78-01B. Ten copies should be submitted. All comments received by the ERA will be available for public inspection in the DOE Freedom of Information Office, Room GA-152, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

You should identify any information or data considered by you to be confidential and submit it in writing, one copy only. We reserve the right to determine the confidential status of the information or data and to treat it according to our determination.

B. *Public Hearing.* 1. *Procedure for requests to make oral presentation.* The time and place for the hearing are indicated in the "Dates" and "Addresses" sections of this preamble. If necessary to present all testimony, the hearing will resume at 9:30 a.m. on the next business day following the first day of the hearing.

You may make a written request for an opportunity to make an oral presentation. If so, you should describe the interest concerned; if appropriate, state why you are a proper representative of a group or class of persons that has such an interest; and provide a concise summary of the proposed oral presentation and a phone number where you may be contacted through the day before the hearing. If you are selected to be heard at the hearing, we will notify you before 4:30 p.m., August 7, 1979. You will be required to make 100 copies of your statement available in Room 2214, 2000 M Street, NW., Washington, D.C. 20461 by 4:30 p.m., August 14, 1979.

2. *Conduct of the hearing.* We reserve the right to select the persons to be heard at the hearing (in the event there are more requests to be heard than time allows), to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based upon the number of persons requesting to be heard.

An ERA official will be designated to preside at the hearing. This will not be a judicial-type hearing. Questions may be asked only by those conducting the hearing. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

You may also submit questions to be asked of any person making a statement at the hearing to the address indicated above for requests to speak by 4:30 p.m., August 7, 1979. If you wish to ask a question at the hearing, you may submit the question, in writing, to the presiding officer. The ERA or, if the question is submitted at the hearing, the presiding officer will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made. The entire record of the hearing, including the transcript, will be retained by the ERA and made available for inspection in the DOE Freedom of Information Office, Room GA-152, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., and in the ERA Office of Public Information, Room B-110, 2000 M Street, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript from the reporter.

IV. Other Matters

A regulatory analysis of the potential impacts of the October 1978 amendments currently in effect was prepared and made publicly available on October 20, 1978. Since today's actions will continue the effectiveness of the current entitlements provisions relating to residual fuel oil, today's rule will not result in any significant changes in current prices or competitive factors in the marketplace. However, we have reviewed our October 1978 findings and are making revised findings publicly available in the ERA Office of Public Information, Room B-110, 2000 M Street, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

We have concluded that today's actions do not constitute a major federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act and, therefore, that the preparation of an Environmental Impact Statement for this proposal is not required under 10 CFR Part 208.

Section 553(d) of the Administrative Procedure Act requires that a substantive rule not become effective less than thirty days after its publication unless the agency promulgating the rule finds good cause to waive this requirement and publishes this finding together with the rule. As discussed above, we believe the current residual fuel oil entitlements provisions should be extended through December 31, 1979 to provide continuity and stability during the present tight world market supply situation. We believe such action is especially important to prevent the interruption of adequate supplies of residual fuel oil for historically import-dependent consumers. Therefore, we have determined that good cause is found to waive the section 553(d) requirement in order to make today's amendments effective July 1, 1979.

(Emergency Petroleum Allocation Act of 1973, 15 U.S.C. § 751 *et seq.*, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, 15 U.S.C. § 787 *et seq.*, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385, Pub. L. 95-70, and Pub. L. 95-91; Energy Policy and Conservation Act, 42 U.S.C. 6201 *et seq.*, Pub. L. 94-163, as amended, Pub. L. 94-385, and Pub. L. 95-70; Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95-91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations is amended as set forth below, effective July 1, 1979. These amendments shall remain in effect through December 31, 1979.

Issued in Washington, D.C., June 10, 1979.

David J. Bardin,

Administrator, Economic Regulatory Administration.

1. Section 211.62 is amended by deleting the definition of "East Coast market"; revising the definitions of "eligible firm," "eligible product," and "national domestic crude oil supply ratio"; and adding a definition of "eligible market" in appropriate alphabetical order to read as follows:

§ 211.62 Definitions.

* * * * *

"Eligible firm" means any firm that imports an eligible product into the Bureau of Mines East Coast Petroleum Refining District or the State of Michigan for sale or use in those market areas, that is the importer of record under a license issued pursuant to Part 213 of this chapter and that owns the eligible product at the time of importation thereof pursuant to that license. Importation for the purpose hereof shall be as defined in paragraph (j) of § 213.27 of Part 213 of this chapter.

* * * * *

"Eligible market" means the geographical area coextensive with the Bureau of Mines East Coast Petroleum Refining District and the State of Michigan.

* * * * *

"Eligible product" means residual fuel oil imported into the eligible market in the period July 1, 1979 through December 31, 1979 except that an import of residual fuel oil into United States customs territory which has been processed in the U.S. Virgin Islands shall not be considered an eligible

product: *And provided,* That, Canadian residual fuel oil imported into the State of Michigan will qualify as an eligible product.

* * * * *

"National domestic crude oil supply ratio" means, for a particular month, the volume of deemed old oil (as defined in § 211.67(b)) included in the aggregate adjusted crude oil receipts of all refiners, decreased by a number of barrels of deemed old oil equal to the number of entitlements issuable to small refiners under § 211.67(e) and the number of entitlements issuable under §§ 211.67(a)(4) and 211.67(a)(5), divided by the sum of the total volume of the crude oil runs to stills for all refiners for that month and fifty percent (50%) of the total volume of imports of eligible products by eligible firms for that month. The calculation of the national domestic crude oil supply ratio for each month shall take into account entitlement purchase or sale requirements resulting from the correction of reporting errors pursuant to paragraph (j) of § 211.67.

* * * * *

2. Section 211.66 is revised in paragraph (j) to read as follows:

§ 211.66 Reporting requirements.

* * * * *

(j) *Monthly report by eligible firms.* On or prior to the fifth day of each month, commencing with the month of April 1979, each eligible firm that has imported an eligible product in the second month preceding that month shall file with the ERA a report certifying the following:

(1) The identity, volumes and ports of origin and entry of any eligible products imported by the eligible firm in that preceding month.

(2) That the eligible product was imported for sale or use in the eligible market.

(3) Such other information as the ERA may request.

* * * * *

3. Section 211.67 is revised in subparagraph (3) of paragraph (a) and in subparagraph (4) of paragraph (d) to read as follows:

§ 211.67 Allocation of domestic crude oil.

(a) *Issuance of entitlements.* * * *

(3) For each month in the period July 1, 1979 through December 31, 1979, each eligible firm that has imported an eligible product in that month shall be issued a number of entitlements equivalent to fifty percent (50%) of the number of entitlements that would be received by a refiner (without giving effect to the provisions of § 211.67(e)) in that month with respect to inclusion of a number of barrels of crude oil in that refiner's crude oil runs to stills equal to a number of barrels of that eligible product imported by that eligible firm. An eligible product is imported for purposes of this paragraph (a)(3) in the month, as specified on Customs Forms 7501 and 7505, as appropriate, in which importation takes place.

* * * * *

(d) *Adjustments to volume of crude oil runs to stills.* * * *

(4) For the period July 1, 1979 through December 31, 1979, paragraph (a)(1) of this section and the calculations for the national domestic crude oil supply ratio (but not for purposes of paragraph (e) of this section), the volume of crude oil runs to stills of any domestic refinery attributable to production of residual fuel oil transported in foreign flag tankers for sale (whether directly for consumption or for resale) or use in the eligible market (as defined in § 211.62) shall be reduced by fifty (50%) percent. Any export sales of residual fuel oil giving rise to a deduction under paragraph (d)(2) above shall not be considered as residual fuel oil production for purposes of this paragraph (d)(4).

Federal Energy Regulatory Commission

18 CFR Parts 101, 104, 141, 201, 204 and 260

[Docket Nos. R-424 and R-448]

Order Establishing Interim Procedures

AGENCY: Federal Energy Regulatory Commission (FERC).

ACTION: Interim procedures.

SUMMARY: The United States Court of Appeals for the District of Columbia circuit remanded Order No. 530–B (41 FR 28474) to the FERC for further action not inconsistent with its opinion. Order No. 530–B set forth a rule which, *inter alia,* permitted tax normalization treatment for deferred taxes of regulated companies. This order continues the effectiveness of Order No. 530–B pending a final order by the Commission on remand.

EFFECTIVE DATE: June 8, 1979.

FOR FURTHER INFORMATION CONTACT: Kenneth F. Plumb, (202) 275–4166, Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. (Reference Docket Nos. R–424 and R–448).

SUPPLEMENTARY INFORMATION:

In the matter of Part 101—Uniform System of Accounts For Public Utilities and Licensees (Class A and Class B); and Part 104—*Uniform System of Accounts For Public Utilities and Licensees (Class C and Class D);* and Part 141—Statements and Reports (Schedules); and Part 201—Uniform System of Accounts Prescribed for Natural Gas Companies Subject to the Provisions of the Natural Gas Act (Class A and Class B); and Part 204—Uniform System of Accounts Prescribed for Natural Gas Companies Subject to The Provisions of the Natural Gas Act (Class C and Class D); and Part 260—Statement and Reports (Schedules).

By Order No. 530–B, issued July 6, 1978, in these proceedings, the Federal Power Commission [1], *inter alia,* set forth a rule permitting tax normalization treatment for deferred taxes of regulated companies. On appeal, the United States Court of Appeals for the District of Columbia Circuit remanded Order No. 530–B to the Commission for further action not inconsistent with its opinion,[2] which found (mimeo, p. 14) that the Commission orders before it "fail to (1) assess the consequences of its action for the industry, and (2) indicate fully and carefully the purposes behind the order".

The court's remand would require this Commission to further consider its action on the subject of tax normalization of the items contained in Order No. 530–B. The Commission is presently determining whether to seek further judicial review or, if not, remand to determine:

> how, in light of internal organizational considerations, it may best proceed to develop the needed evidence and how its prior decision should be modified in light of such evidence as develops. . . .[3]

In the interim, presiding law judges and participants in rate proceedings may be uncertain as to the proper standard to be followed regarding interperiod tax allocation in ongoing or prospective hearings. The court's remand did not reverse Order No. 530–B and, while we are not here anticipating the result that might ultimately be

---

[1] This proceeding was commenced before the FPC. By the joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the FERC. The term "Commission", when used in the context of action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

[2] *Public Systems, et al. v. FERC,* —— F2d ——, CADC Nos. 78-1268, *et al.,* issued February 16, 1979, rehearing denied, March 20, 1979.

[3] *FPC v. Transcontinental Gas Pipe Line Corp., et al.,* 423 U.S. 326, 331–33 (1976).

reached on remand, we believe that maintenance of the *status quo* under Order No. 530–B will be the most orderly administrative way to proceed during the interim period.

Unless and until the Commission changes its position on remand, we believe that it would be administratively wasteful to *require* all utilities seeking normalization of tax items, in accordance with Order No. 530–B, to file evidence to demonstrate that a tax deferral rather than a tax savings would occur under tax normalization. However, a utility will be *permitted* to introduce such evidence. Only in the event that the utility submits evidence on the issue will the Intervenors or Staff be allowed to submit evidence in support of or in opposition to such a showing, or will cross-examination on the issue be permitted.

Any final decision which requires a refund of amounts otherwise in excess of the just and reasonable rate level shall not require a refund of that portion of the rate related to interperiod tax allocation. That portion shall continue in effect, subject to refund, pending a final order in these dockets.

The Commission orders: Order No. 530–B shall remain in effect, as qualified above, as the Commission's interim policy regarding interperiod tax allocation (tax normalization) pending further judicial review of *Public System, supra,* or Commission action on remand.

By the Commission.

Lois D. Cashell,

Acting Secretary.

18 CFR Part 270

[Docket No. RM79–22; Order No. 23–A]

Regulated Sales of Natural Gas; General Rules and Definitions

AGENCY: Federal Energy Regulatory Commission.

ACTION: Interpretive rule.

SUMMARY: Although the Natural Gas Policy Act of 1978 (NGPA) sets maximum lawful prices for first sales of natural gas, the NGPA does not supersede or nullify the effectiveness of the price established under existing contracts. This interpretive rule states that the NGPA does not prohibit the amendment of an existing contract to collect any applicable NGPA rate.

DATES: Effective June 12, 1979.

ADDRESSES: All filings should reference Docket No. RM79–22 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Philip Yates, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 (202) 275–0427

Introduction

This interpretive rule addresses the extent to which existing contracts for the sale of natural gas may be amended to provide for the payment of some or all of the prices established under the NGPA. The Commission has considered this question in Docket No. RM79–22, the proceeding which resulted in Order No. 23, relating to the effect of the NGPA on price escalator clauses. In a proposed rule issued February 13, 1979, we took the same substantive position on contract modifications as we now adopt. The comments on the proposed rule which were relevant to this subject did not, as a general matter disagree with that position. Rather, the comments were directed at the related question of pipeline pass-through discussed below.

General Rule

Section 101(b)(5) of the NGPA provides that if any natural gas qualifies under more than one maximum lawful price, the highest price for which the gas is eligible becomes the applicable maximum lawful price. The Commission believes contractual amendments consistent with this section are permitted in both interstate and intrastate contracts. The most common, though not the only example of situations arising under the NGPA which illustrates this principle is when natual gas from a well subject to an existing contract is subsequently determined to be eligible for a higher price under sections 102, 103, 107 or 108 of the Act. If this occurs, the NGPA does not preclude parties from negotiating for and executing amendments providing for the payment of the higher price. This is true without regard to whether the contract was an "interstate" or "intrastate" contract.

Although the rule stated above applies in all cases, special attention should be given to contracts governed by section 105(b)(1) of the NGPA. That section applies to intrastate contracts under which the contract price on November 9, 1978, did not exceed the new gas price established in section 102 of the Act. For these contracts the maximum lawful price is the price under the terms of the contract as such contract was in effect on November 9, 1978.

With respect to these contracts, amendments may only be executed to provide for payment of any higher maximum lawful price for which natural gas sold under the contract is determined to be eligible. For example, assume that on November 9, 1978, natural gas was sold under an existing intrastate contract for $1.50/MMBtu, (or any price less than $2.06, the new natrural gas price in November). Since under section 105(b)(1), the price under the terms of the contract, ($1.50 per MMBtu) is the maximum lawful price, no contractual amendment could provide for a higher price. But if subsequent to enactment a well covered by the contract was determined to be a stripper well, under section 101(b)(5) the gas from that well would be eligible under both sections 105(b)(1) and 108. In that case the applicable mixiumum lawful price would be the stripper well price. Accordingly, an amendment providing for the payment of that higher price would be permitted. The same result would occur any time gas sold under the contract was determined to be eligible for any price higher than $1.50 per MMBtu (e.g., 102 new natural gas or 103 new onshore production well gas).

The operation of the rule on contracts governed by section 105(b)(2) of the Act is also worth noting. In these cases, the contract price exceeded the section 102 price on November 9, 1978, and the applicable maximum lawful price exceeded $2.06. Under section 105(b)(2), the ceiling price is the contract price plus the monthly inflation adjustment. Accordingly, if the contract did not already permit it, amendments to contracts subject to the maximum lawful price in 105(b)(2) could be executed to provide for the payment of the inflation adjustment. Also, amendments could be executed to provide for payment of the stripper well price established in section 1208 of the NGPA, if wells covered by the contract were determined to be eligible for that price.

Other general examples may be helpful. If contractual authorization does not exist in an interstate contract to collect the inflation adjustment provided in section 104 of the Act, the NGPA does not preclude an amendment providing for its payment. Similarly, the NGPA does not preclude amendments to interstate contracts to provide for the payment of prices under sections 102, 103, 107 and 108 if natural gas under the contract qualifies for those prices.

Two associated points should be noted. First, since collection of the higher price may be contractually authorized, amendments providing for the interim collection of such prices,

pursuant to Part 273 of the regulations, are similarly permissible. Second, for the same reasons, all contracts may be amended to provide for a clause authorizing the payment of the highest NGPA price for which any natural gas sold under the contract may become eligible, i.e., both interstate and intrastate contracts may be amended to include escalator clauses which reference the highest applicable NGPA prices.

Pass-through of NGPA Prices

In the preamble to the February 13, 1979, proposal, we indicated that pass-through of increased gas purchase costs resulting from contract modifications providing for a price not in excess of the maximum lawful price is permissible in the absence of fraud, abuse, or similar grounds. We also indicated that pass-through would not be precluded if modifications were negotiated in an arms length transaction.

A number of participants in Docket No. RM79–22 suggested that the Commission affirmatively state that contract modifications must be supported by additional consideration. Other comments suggested that the Commission define arms-length bargaining. Upon consideration of these comments, we have determined that it is neither useful nor necessary to impose the requirement or define that term. We note particularly the difficulties of defining arms-length bargaining because of the wide diversion of views expressed on this part. Accordingly, we are convinced that we should abandon our previous reference to that test.

Section 601(c)(2) of the NGPA provides that the Commission may not deny an interstate pipeline the recovery of maximum lawful prices paid by the pipeline unless ". . . the Commission determines that the amount paid was excessive due to fraud, abuse, or similar grounds." The Joint Statement (pg. 124) indicates that "[t]he conferees do not intend to guarantee passthrough of costs of natural gas purchases in cases of fraud or abuse as *determined by the Commission.*" [emphasis supplied] A number of comments requested that we define the term "fraud, abuse or similar grounds."

The statute and the statement quoted would permit the Commission to make the determination on a case-by-case basis, or to prescribe general rules defining in part or fully the phrase "fraud, abuse or similar grounds." We are aware that general guidance as to the circumstances that would constitute grounds for a determination of fraud abuse or similar grounds would be desirable. However, we believe that if such guidance or general rules can be developed, they must emerge from a number of individual cases in which the Commission considers this issue. Until sufficient experience under the law is acquired we believe that general statements concerning the application of the standard cannot be formulated with sufficient precision to assist those pipelines concerned with its application.

The Commission will revise section 270.205 of its regulations by adding a paragraph entitled "Modification of existing contracts." This paragraph will summarize the foregoing discussion.

(Natural Gas Act, as amended, 15 U.S.C. 717 *et. seq.*, Natural Gas Policy Act of 1978, Pub. L. 95–621, 92 Stat. 3350, Department of Energy Organization Act, Pub. L. 95–91, E. O. 12009, 42 FR 46267)

In consideration of the foregoing Part 270 of Subchapter H, Chapter I, Title 18, Code of Federal Regulations, is amended as set forth below. Because this is an interpretive rule, deferral of the effective date of the rule is not required. Accordingly, the rule will be effective immediately.

By the Commission. Commissioner Sheldon voted present.

Kenneth F. Plumb,
Secretary.

Section 270.205 is amended by redesignating paragraph (c) as paragraph (d) and by adding a new paragraph (c) to read as follows:

§ 270.205 Contractual authorization to collect NGPA rates.

* * * * *

(c) *Modification of existing contracts.* The NGPA does not prohibit the parties to an existing contract for the first sale of natural gas from amending or modifying such contract to permit the seller to charge and collect any applicable NGPA rate. If natural gas sold under such contract is subject to section 105(b)(1) of the NGPA and qualifies for no higher maximum lawful price under any other provision of the NGPA, no amendment or modification of such contract may provide authorization for a seller to charge and collect a price which exceeds the price under the terms of the contract as in effect on November 9, 1978.

BILLING CODE 6450-01-M

18 CFR Part 271

[Docket No. RM79–3]

Ceiling Prices; High-Cost Natural Gas

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission promulgates final regulations implementing section 107(a) of the Natural Gas Policy Act of 1978, which deals with the maximum lawful price for deep, high-cost natural gas.

DATES: June 13, 1979.

ADDRESSES: All findings should reference Docket No. RM79–3 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Philip Yates, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, 202–275–4212.

SUPPLEMENTARY INFORMATION: On December 1, 1978, the Federal Energy Regulatory Commission issued Interim Regulations in Docket No. RM79–3 implementing the Natural Gas Policy Act of 1978 (NGPA). (43 FR 56448). Subpart G of Part 271 set forth regulations implementing section 107(a) of the NGPA, to provide incentive prices for deep, high-cost natural gas.

Section 107(b)(2)–(4) also authorized the Commission to establish incentive prices for gas from geopressured brine, occluded natural gas produced from coal seams, gas from Devonian shale, as well as gas produced from other conditions which have been determined by the Commission to present extraordinary risks or costs. However, due to statutory deadlines imposed by the NGPA, the Commission did not promulgate regulations to implement section 107(b).

During the 60-day comment period on the interim regulations, ten comments were received addressing the issuance of section 107(b) regulations. Some made general requests for expeditious promulgation, others suggested specific definitions for the particular categories listed in section 107(c).

The comments in favor of rapid implementation of section 107(b) took the position that incentive prices are required to maximize natural gas production. However, one comment indicated that the maximum lawful prices allowable under other provisions of the NGPA may provide sufficient incentives to produce adequate natural

gas supplies. Further, the comment suggested that it may be exceedingly difficult to determine what is "necessary" incentive pricing, and what is a windfall to a producer.

Concurrently with this final rulemaking, the Commission is issuing a notice of inquiry, requesting comments to assist it in a policy examination of rules implementing section 107(b) and (c) of the Natural Gas Policy Act of 1978. Additionally, we are requesting comments on a notice of proposed rulemaking issued today, in which we set forth proposed definitions for those categories specifically listed in section 107. The issues raised by the comments on the proposed definitions will be considered together with the responses to the notice of inquiry.

Eleven other comments were received on Subpart 271 G. Three made reference to the Commission's statement in the order of December 1, 1978, in Appalachian Exploration and Development, Inc., *et al.*, Docket No. CI76-590, *et al.*, that it intended to issue, in the near future, a "transitional rule governing the processing of all optional procedure cases [18 C.F.R. § 275] filed before December 1, 1978." On February 7, 1979, the Commission issued an Order Granting Rehearing For Purposes of Further Consideration in Docket No. CI76-590. We expect to consider a transitional rule in the near future.

Several comments requested that measurement of well depth in § 271.704 be made from the top of the "Kelly bushing" [1] rather than "surface of the ground." One rationale for this proposed change is that well logs refer to this point. More importantly for offshore wells the reference to the Kelly bushing will include the depth of the water in the measurement of the 15,000 foot depth.

Section 107 does not establish a cost-based maximum lawful price for deep wells. However, the costs involved in producing gas from deep wells is a factor which the Commission may consider in implementing the section. Recognizing the costs of constructing offshore drilling platforms, we believe that it is reasonable to conclude that it is consistent with the statute to include in the measurements of well depth, the depth of the water in which a producer must drill. In order to effectuate this conclusion, the Commission by this order amends § 270.102(6), which defines "surface location." Pursuant to this order, "surface location" will remain the same for onshore wells; i.e., the earth's surface. However, for wells drilled in permanent surface waters, the "earth's surface" means "the mean elevation of the surface of the water." In conformance with this amendment, § 271.704 is amended to require measurement of depth for section 107(a) purposes to be "from the surface location to the highest perforation point in the completion location."

Two other comments addressed the use of "true *vertical* depth" in § 271.704. It is asserted that all wells tend to corkscrew as they are drilled. Also, offshore wells are drilled directionally, to allow more undersea acreage to be tapped from one drilling platform. Since the cost of a well is determined by the length of the bore, and not the vertical depth of the highest penetration, these comments recommend replacing "true vertical depth" with a reference to actual well bore length.

There is validity to these statements regarding costs. However, Congress has explicitly adopted the standard of "true vertical depth" in section 101(b)(1) of the NGPA. Thus, the Commission is precluded from adopting a different standard in § 271.704.

The Joint Explanatory Statement of the Committee on Conference, at page 88, anticipated that "some new wells will produce from depths close to 15,000 feet, and some reentries will produce from depths below 15,000 feet, both possibly involving costs greater than normal . . ." The Statement went on to acknowledge that "[t]he Commission may determine that such wells should receive special price treatment under this section. . . ."

It appears that the wells described in the comments, like the wells described in the Statement, may qualify under section 107(c)(5), as natural gas "produced under such other conditions as the Commission determines to present extraordinary risks or costs." Accordingly, these comments will be considered in the notice of inquiry concerning section 107(c)(5), issued today. The Commission invites additional comments addressing this issue.

One other comment addressed § 271.704 of the interim regulations, requesting that the Commission's definition of deep, high-cost natural gas include wells begun before February 19, 1977, if redrilling the well entails substantial expense. Alternatively, the comment suggested such redrilled deep wells be classified as high-cost gas under section 107(c)(5). The Commission will not amend § 271.704 in the manner suggested; it is contrary to the plain language of section 107(a) and (c)(1), and inconsistent with the intent of the section as evidenced by the above quoted passage from The Joint Explanatory Statement of the Committee on Conference. The comment's alternative suggestion will be examined with comments elicited by the notice of inquiry addressing section 107(c)(5).

The regulations in Subpart G of Part 271 were originally proposed for comment in November of 1978 and issued as interim regulations on December 1, 1978 (43 FR 56448 (Dec. 1, 1978)). For 60 days thereafter comments were received and during that period public hearings were held on these regulations. By this process the Commission complied with the provisions of section 502(b) of the NGPA which requires that "[t]o the maximum extent practicable," an opportunity for the oral presentation of data, views, and arguments be afforded for certain regulations under the NGPA.

The amendments to Subpart G of Part 271 contained in this order rest upon considerations given to the information received during the above described, comment, and hearing process. Accordingly, the Commission finds that further notice and public procedure on these rules are unnecessary and impractical and that good cause exists to dispense with additional notice and procedure. Subpart G of Part 271, as amended, will be effective in 30 days as final regulations.

(Natural Gas Act, as amended, 15 U.S.C. 717, et seq.; Energy Supply and Environmental Coordination Act, 15 U.S.C. 791, *et seq.*; Natural Gas Policy Act of 1978, Pub. L. 95-621, 92 Stat. 3350; Department of Energy Organization Act, Pub. L. 95-91, E.O. 12009, 42 FR 46267)

In consideration of the foregoing, Subpart G of Part 271 of Subpart H, Chapter I, Title 18, Code of Federal Regulations, issued as interim regulations (43 FR 56448 (December 1, 1978)), are promulgated as final regulations and amended as set forth below, effective 30 days from the issuance of this order.

By the Commission.

Kenneth F. Plumb,

Secretary.

1. § 270.102 is amended by revising subparagraph (6) of paragraph (b) to read as follows:

§ 270.102 Definitions.

* * * * *

(b) * * *

(6) "Surface location" means the point on the Earth's surface from which drilling of a well is commenced except that in the case of a well drilled in

[1] The "Kelly bushing" is that part of the drilling rig which transfers the power from the rotary table to the pipe in the ground. For onshore wells, it may be as high as 20 feet from the surface of the ground.

permanent surface waters, "the Earth's surface" means the mean elevation of the surface of the water.

* * * * *

2. Section 271.704 is amended by revising it to read as follows:

§ 271.704 Special rule.

For purposes of determining depth under this subpart and section 107(c)(1) of the NGPA, measurement shall be the true vertical depth from the surface location to the highest perforation point in the completion location.

[Docket No. RM79-3]

Commission Determinations and Review of Jurisdictional Agency Determinations

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rules.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is issuing final regulations implementing section 503 (b) and (d) of the Natural Gas Policy Act of 1978 (NGPA) which deals with Commission review of jurisdictional agency determinations of the NGPA pricing category for natural gas.

EFFECTIVE DATE: July 16, 1979.

ADDRESSES: All filings should reference Docket No. RM79-3 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Philip Yates, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, (202) 275-4212.

I. Background

On December 1, 1978, the Federal Energy Regulatory Commission (Commission) issued interim regulations implementing the Natural Gas Policy Act of 1978 (NGPA) (43 F.R. 56448). In the 60-day comment period on the interim regulations, 28 comments were received on Part 275; some of the suggestions made by the comments have been incorporated into the final rule.

II. Discussion of Comments

Part 275 generally describes the procedures by which the Commission will review jurisdictional agency determinations. It reflects section 503 of the NGPA in setting forth the grounds on which determinations may be reversed or remanded. It also provides a 15-day protest procedure under which persons may object to determinations and submit documentary evidence relative to the determination. Finally, it establishes procedures for reopening and possibly vacating determinations on the basis of material facts which were either untrue or omitted from the record before the jurisdictional agency. Section 275.201 of the interim regulations provides that the Commission will publish a notice in the Federal Register of the receipt of a jurisdictional agency's determination, and specifies the contents of that notice. One comment requested that the notice contain the following additional information:

1. The rate schedule number, so that interested parties can inspect the producer's contract,
2. A summary by the state agency of information in its files inconsistent with its determination, and
3. The price sought and the statutory regulatory authority sought to be invoked.

The comment indicated that the rate schedule number is necessary so that interested parties may inspect contracts in the Commission's files to ascertain, "among other things, the nature of the contractual authority for the price sought." The inclusion of the rate schedule number will not be included at this time. However, the Commission is actively engaged in preparing an order establishing the proper procedure for examining questions of contractual authority. This issue will be more fully discussed in that order.

The comment's second request, for the publication of a summary by the jurisdictional agency of information inconsistent with its determination, is more properly addressed in connection with § 274.104, which contains the requirements of the jurisdictional agency's notice to the Commission. Section 274.104 does not presently require such a summary. The comment will be considered with other comments on that section.

However, if such a summary is required to be sent to the Commission, we do not believe that it should be included in the notice published in the Federal Register. The published notice is designed to bring to the attention of interested persons, through a synopsis of the basic facts, that a particular well has been determined to qualify for a certain NGPA pricing category. The notice itself, by definition, does not provide the public with enough information to permit a complete analysis. That information is available in the public files for inspection. For the Commission to provide in the notice the amount of information suggested for the thousands of jurisdictional agency determinations would be administratively infeasible and would place an impossible burden upon the Commission and the Federal Register.

The third request, for the price charged, is also unnecessary. The section of NGPA under which the determination is made is included in the notice. Reference to that NGPA section will show what price can be charged, assuming contractual authority exists to collect that price.

Section 275.201(d) of the interim regulations provides that the notice in the Federal Register shall provide that protests may be filed within 15 days of the Commission's public notice. Some comments recommended that this time limit be reduced from 15 days to 10 days, with an additional 10-day period provided for the filing of responses to protests.

The time period for protests was originally set by attempting to balance the need for adequate time for interested persons to review the determination and make filings, against the statutory requirement that the Commission act on determinations within 45 days. Since no protests have yet been received, and the comments are not based on arguments that the time limits are unreasonable, there is no reason to change this requirement. As more experience is gained under this section, we may determine that some adjustment in the time and procedures for protests may be necessary. At present, the 15-day period will not be changed; however, to make the regulations clearer, the 15-day limit has been made explicit in § 275.203(a).

One comment suggested that Part 275 be amended to provide that notice of a preliminary finding or a reopening of a determination be sent by all those persons who are purchasing gas at the wellhead to all those to whom the purchaser tenders payment for the gas. The concern underlying this request is valid. A subsequent purchaser of a well may not receive notice of a preliminary finding or reopening because the Commission will not be aware that the person who filed for the pricing determination is no longer the owner of the well.[1] However, without reaching the question of the Commission's legal authority to require such notice, we conclude that this is a matter to be

[1] Section 503(b)(3) requires that the notice be sent to "those parties identified in the notice [sent] to the Commission of [the pricing] determination.

resolved between the buyer and seller of a natural gas well. Thus, the Commission declines to require wellhead purchasers of natural gas to supply the notice requested by the comment.

Two comments suggested that the Commission include additional grounds for issuing a preliminary finding. One suggested that the Commission issue a preliminary finding if the Commission believes the jurisdictional agency determination may be unreasonable. Another suggested that a preliminary finding issue on the grounds of absence of contractual authority for the determination.

A preliminary finding is a required step under our regulations, before the Commission can issue an order reversing or remanding a jurisdictional agency determination. The statutory grounds for a reversal or remand are clear: (1) a reversal is required if the Commission finds that a determination is not supported by substantial evidence in the record upon which the determination was made. (Section 503(b)(1)(A)); and (2) a remand may occur if the Commission finds that its files contain information inconsistent with a determination. (Section 503(b)(1)(B)). A preliminary finding will not issue unless the Commission concludes that one of the statutory grounds for reversal or remand may exist. Neither of the comments' suggested grounds are included in the statutory grounds for remand or reversal. Thus, a preliminary finding cannot be issued solely because the Commission feels that a jurisdictional agency determination is unreasonable or that contractual authorization is lacking to collect the highest price allowable under an NGPA pricing category.

Several comments addressed the 45-day period in which the finding under § 275.202(b) may be made that the notice of the determination sent by the jurisdictional agency to the Commission is incomplete. One suggested that the 45-day period begin on the date the notice of determination is published in the **Federal Register**. Some indicated that such a finding could be made in a shorter time, others felt that the period was unnecessary, given the certification which must be filed under § 274.104(a)(5), stating that all required information has been supplied. Still others expressed the opinion that tolling the 45-day statutory time period by issuing an incomplete notice is an unwarranted intrusion by the Commission into state jurisdiction and that this provision is subject to administrative abuse.

The full 45-day period will be retained, beginning upon the receipt of the determination by the Commission. The full period is required because it is estimated that 40 to 50 thousand jurisdictional agency determinations will be filed in the first year of the NGPA. The beginning date for the 45-day period is statutorily required under section 503(b)(1)(B). The tolling provision is required because the certification required by § 274.104(a)(5) may not be accurate; the Commission must have time to reach its own conclusion as to the adequacy of the information filed by the jurisdictional agency. Finally, all the information required to be filed may be necessary for the Commission to make a "substantial evidence" determination, as required by section 503(b)(1)(A). If the information is not supplied, the jurisdictional agency's determination may not be supported by substantial evidence;[2] unless a tolling provision is provided, filings by jurisdictional agencies which lack material information would require reversal.

It is anticipated that once state agencies become familiar with the determination process, this section will be little used. However, at present, our experience has shown it to be necessary. It would be foolish to expect state agencies, in making their first determinations, to do so completely without error. In fact, it is remarkable how well most are performing.

One comment suggested that informal conferences after preliminary findings be eliminated because of the possibility of *ex parte* communication; instead, the commentor would allow only written filings. This suggestion is rejected; *ex parte* problems will be no more substantial in this context than in any other informal conference with staff.

Several comments address § 275.202(e), indicating confusion with respect to the procedures to be followed if the Commission makes a preliminary finding on its own motion. These comments are well taken. Section 275.202(e) is amended to make clear that the procedures which the Commission will follow after a preliminary finding are the same without regard to whether or not a protest has been filed. The only difference is that the Commission will issue a final order in any case in which both a protest was filed and a preliminary finding was made, whereas if the preliminary finding is made by the Commission on its own motion, the issuance of a final order is not required. If none is issued, § 275.202(e)(3) states that the jurisdictional agency determination will become final 120 days after the date of the preliminary finding.

A number of comments suggested that protests should be made under oath and that protestors should be limited to those persons who participated in the state agency proceeding, absent a showing of good cause for failure to participate. The Commission addressed both of these issues in the preamble to the interim regulations. We indicated that if the protest procedure was being abused, the oath requirement could be imposed. We also indicated that the Commission could not prescribe procedures applicable to jurisdictional agency determinations, and that the limited time within which the Commission must act would not allow for resolution of controversies over good cause for failure to appear before the jurisdictional agency. Again, until experience dictates the need for these types of changes, the position previously articulated in the preamble will be maintained.

Two commeats suggested that a preliminary finding not issue if a protest raises only harmless error. We believe that section 503(b)(2) now provides this discretion. Thus, there is no need for the regulation to be amended, because § 275.202(a)(1)(ii) tracks the language of the statute.

One jurisdictional agency suggested that it is inconsistent with the NGPA to permit protestors to submit information with their protest, and have that information become part of the "public records of the Commission," within the meaning of section 503(b)(1)(B). The Commission believes that it is not only consistent with the statute but is required by the framework of the NGPA. Section 501(a) requires the Commission to "issue . . . such rules and orders as it may find necessary or appropriate to carry out its functions under this Act." One of those functions is the review of jurisdictional agency determinations. It would be unreasonable for the Commission not to consider reliable evidence submitted by a protestor, within the 45-day statutory period, in reviewing a determination. Consequently, § 275.203(b)(3) will be retained.

Two comments would have the Commission remand all determinations that are required to be reopened, rather than have the Commission take initial jurisdiction of the matter. It is indicated that section 503 of the NGPA contemplates that initial jurisdiction for

[2] Although our practice has not been to declare a filing incomplete for a minor technical deficiency, the final rule in § 275.202(b)(1) has been amended to make clear that an incomplete notice will not be issued unless the deficiency is material.

pricing determinations lies with the jurisdictional agency.

Section 503(d) states that jurisdictional agency determinations, if no longer subject to review by the Commission or the courts, "shall thereafter be binding." However, the determination is *not* binding if it was based on (1) any untrue statement of material fact or (2) a misleading omission of material fact. The section does not indicate the procedure which should be utilized to ascertain whether the determination was based on such misinformation. Pursuant to the authority granted in section 501(a), the Commission has set out in § 275.205 what it considers to be the appropriate procedure for "reopening" jurisdictional agency determinations. Section 275.205(d) has been amended slightly to clarify the effect of an order vacating a jurisdictional agency determination.

The procedure set out entails four distinct steps: (1) an initial finding by the Commission, on its own motion or in response to a petition, that a material misstatement or omission may have occurred; (2) an opportunity for a presentation of views on that issues; (3) a determination by the Commission, based on the information supplied by all interested parties, whether the misstatement or omission occurred, and if so whether the determination should be vacated because the misstatement or omission was relied upon by the jurisdictional agency, and (4) if the determination is vacated, the Commission must then decide how much of the producer collections were in excess of the otherwise applicable maximum lawful price, and if appropriate, order that amount refunded.

In the process described above, the Commission will not make determinations which section 503(a)(1) assigns to jurisdictional agencies; we will merely vacate a determination based on a material misstatement or omission. The procedure will be free at that point to apply to the jurisdictional agency for a determination. Consequently, the flexibility of § 275.205(d) will be retained.

One comment would have the Commission preclude reopening a pricing determination if the material misinformation was supplied in good faith, to provide producers with truly final determinations. This suggestion is contrary to the statutory provisions of section 503(d), which make no reference to good faith, and is rejected.

The 10-day period in the last sentence of § 275.206(b) has been reduced to 5 days, because 10 days is the maximum time that is allowed for the processing of requests under the Freedom of Information Act, 5 U.S.C. § 522. The Commission requires some time to make the initial determination that the information will be released before notice of the release is given.

Finally, § 275.201(b) has been amended to delete the reference to "Part I" of FERC Form No. 121, since that form does not have a "Part I."

III. Public Procedures and Effective Date

The regulations in Part 275 were originally proposed for comment in November 1978 and issued as interim regulations on December 1, 1978 (43 FR 56448 (Dec. 1, 1978)). For 60 days thereafter comments were received and during that period public hearings were held on these regulations. By this process the Commission complied with the provisions of section 502(b) of the NGPA which requires that "[t]o the maximum extent practicable," an opportunity for the oral presentation of data, views, and arguments be afforded for certain regulations under the NGPA. The amendments to Part 275 contained in this order rest upon considerations given to the information received during the above described notice, comment, and hearing process. Accordingly, the Commission finds that further notice and public procedure on these rules is unnecessary and impractical and that good cause exists to dispense with additional notice and procedure, and to make Part 275, as amended, effective in 30 days as final regulations.

(Natural Gas Act, as amended, 15 U.S.C. 717, *et seq.*; Energy Supply and Environmental Coordination Act, 15 U.S.C. 791, *et seq.*; Natural Gas Policy Act of 1978, P.L. 95-621, 92 Stat. 3350; Department of Energy Organization Act, Pub. L. 95-91, E.O. 12009, 42 FR 46267)

In consideration of the foregoing, Part 275 of Subchapter H, Chapter I, Title 18, Code of Federal Regulations, issued as interim regulations (43 FR 56448 (Dec. 1, 1978)), are promulgated as final regulations and amended as set forth below, effective 30 days from the date of issuance of this final order.

By the Commission.

Kenneth F. Plumb,
Secretary.

1. Section 275.201(b) is amended by revising paragraph (b) to read as follows:

§ 275.201 Publication of notice from jurisdictional agency.

* * * * *

(b) certain information contained in FERC Form No. 121;

2. Section 275.202 is amended by revising subparagraph (b)(1), and revising paragraph (e) to read as follows:

§ 275.202 Commission review of final determination.

* * * * *

(b)(1) The notice forwarded to the Commission pursuant to Subpart A of Part 274 does not contain all the material information required in § 274.104(a) (4) and (5); and

* * * * *

(e) *Final orders*

(1) In any case in which a protest was filed with the Commission pursuant to this subpart and a preliminary finding was issued, the Commission shall issue a final order within 120 days after issuance of the preliminary finding.

(2) In any case in which no protest was filed with the Commission pursuant to this subpart, and a preliminary finding was issued, the Commission may issue a final order within 120 days after issuance of the preliminary finding.

(3) A final order issued under subparagraphs (1) or (2) shall either affirm, reverse, or remand the determination of the jurisdictional agency. Such order shall state the specific basis for the Commission's action. Notice of the issuance of such order shall be given to the jurisdictional agency, to participants in the proceeding before the jurisdictional agency, and to participants in the proceeding before the Commission under paragraph (d) of this section and under § 275.203.

(4) In the event that the Commission fails to issue a final order within 120 days after issuance of the preliminary finding, the determination of the jurisdictional agency shall become final.

3. § 275.203 is amended by revising paragraph (a) to read as follows:

§ 275.203 Protests to the Commission.

(a) *Who may file.* Any person may file a protest with the Commission with respect to a determination of a jurisdictional agency within 15 days after the publication of notice of that determination pursuant to § 275.201 of this subpart.

* * * * *

4. § 275.205 is amended by revising paragraph (d) to read as follows:

§ 275.205 Procedure for reopening determinations.

(d) *Final order of Commission.* Within 150 days after issuance of the notice under paragraph (c)(1) of this section, the Commission shall issue a final order. If the Commission finds that the grounds referred to in paragraph (a) of this

section exist, it shall vacate the determination, and if appropriate, order refund or other action. The right to collect the previously determined maximum lawful price shall terminate on the date of the order vacating the determination.

5. Section 275.206 is amended by revising the last sentence of paragraph (b) to read as follows:

§ 276.206 Confidentiality.

* * * * *

(b) * * * Before making any information public under this paragraph, the Commission shall provide at least 5 days notice to the person who submitted the information.

BILLING CODE 6450-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

[T.D. 79-169]

General Provisions; Changes in the Customs Field Organization; Section 101.3, Customs Regulations, Amended

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document changes the field organization of the Customs Service by: (1) Extending the existing port limits of the Puget Sound, Washington, port of entry to include Renton Municipal Airport and Seaplane Base on Lake Washington; (2) extending the existing port limits of the Buffalo-Niagara Falls, New York, port of entry to include the townships of Porter, Lewiston, and Wheatfield, located in Niagara County, New York; (3) extending the existing port limits of the Providence, Rhode Island, port of entry to include the townships of East Greenwich and North Kingstown, Rhode Island; and (4) abolishing the present port of entry of South Bend-Raymond, Washington, and extending the existing port limits of the port of entry of Aberdeen, Washington, to include the territory currently encompassed by the port of South Bend-Raymond.

EFFECTIVE DATE: July 16, 1979.

FOR FURTHER INFORMATION CONTACT: Robert Schenarts, Inspection and Control Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8151).

SUPPLEMENTARY INFORMATION:

Background

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public, on December 14, 1978, Customs published a notice in the **Federal Register** (43 FR 58383), proposing to make the following changes in its field organization:

1. To extend the existing port limits of the Puget Sound, Washington, port of entry (Region VIII), to include Renton Municipal Airport and Seaplane Base on Lake Washington.

2. To extend the existing port limits of the Buffalo-Niagara Falls, New York, port of entry (Region I), to include the townships of Porter, Lewiston, and Wheatfield, located in Niagara County, New York.

3. To establish a combined port of entry of Owensboro-Paducah, Kentucky (Region IX), to include the corporate limits of both cities and the connecting highway known as Green River Parkway, south from Owensboro to the junction of the Western Kentucky Parkway, west to U.S. Highway 62, and west to Paducah, all in the State of Kentucky.

4. To extend the existing port limits of the Providence, Rhode Island, port of entry (Region I), to include the townships of East Greenwich and North Kingstown, Rhode Island.

5. To abolish the present port of entry of South Bend-Raymond, Washington (Region VIII), and extend the existing port limits of the Aberdeen, Washington, port of entry to include the territory currently encompassed by the port of South Bend-Raymond.

Comments

Interested parties were given until February 12, 1979, to submit comments regarding these proposed changes. No comments were received. After review of the proposal, it has been determined that to expedite the extensions of the existing Customs ports of entry, it would be advisable to separate the proposal to establish the new combined port of entry of Owensboro-Paducah, Kentucky, from the other proposed changes. Establishment of the Owensboro-Paducah, Kentucky, combined port of entry will be the subject of a separate document published in the Federal Register.

Changes in the Customs Field Organization

Under the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR 1949-1953 Comp., Ch. II), and pursuant to authority provided by Treasury Department Order No. 101-5 (44 FR 31057), the following changes in the Customs field organization are adopted:

Puget Sound, Wash.

The limits of the Puget Sound, Washington, port of entry (Region VIII), are extended to include Renton Municipal Airport and Seaplane Base. As extended, the geographical boundaries of the Puget Sound, Washington, port of entry include the following:

The ports of Seattle, Anacortes, Bellingham, Everett, Friday Harbor, Kenmore Air Harbor (sections 1, 2, 12, and 13 of Township 26 North, Range 3 East, West Meridian, and sections 1 to 18, inclusive, of Township 26 North, Range 4 East, West Meridian), Neah Bay, Olympia, Port Angeles, Port Townsend; Renton Municipal Airport and Seaplane Base (sections 7 and 18, Township 23 North, Range 5 East, West Meridian); and the territory in Tacoma beginning at the intersection of the westernmost city limits of Tacoma and The Narrows and proceeding in an easterly, then southerly, then easterly direction along the city limits of Tacoma to its intersection with Pacific Highway (U.S. Route 99), then proceeding in a southerly direction along Pacific Highway to its intersection with Union Avenue Extended and continuing in a southerly direction along Union Avenue Extended to its intersection with the northwest corner of McChord Air Force Base, then proceeding along the northern, then western, then southern boundary of McChord Air Force Base to its intersection, just west of Lake Mondress, with the northern boundary of the Fort Lewis Military Reservation, then proceeding in an easterly direction along the northern boundary of the Fort Lewis Military Reservation to its intersection with Pacific Avenue, then proceeding in a southerly direction along Pacific Avenue to its intersection with National Park Highway, then proceeding in a southeasterly direction along National Park Highway to its intersection with 224th Street, East, then proceeding in an easterly direction along 224th Street, East, to its intersection with Meridian Street, South, then proceeding in a northerly direction along Meridian Street to the northern boundary of Pierce County, then proceeding in a westerly direction along the

northern boundary of Pierce County to its intersection with Puget Sound, then proceeding in a generally southwesterly direction along the banks of the East Passage of Puget Sound, Commencement Bay, and The Narrows to the point of intersection with the westernmost city limits of Tacoma; including all points and places on the southern boundary of the Juan de Fuca Strait from the eastern port limits of Neah Bay to the western port limits of Port Townsend, all points and places on the western boundary of Puget Sound, including Hood Canal, from the port limits of Port Townsend to the northern port limits of Olympia, all points and places on the southern boundary of Puget Sound from the port limits of Olympia to the western port limits of Tacoma, and all points and places on the eastern boundary of Puget Sound and contiguous waters from the port limits of Tacoma north to the southern port limits of Bellingham, all in the State of Washington.

Buffalo-Niagara Falls, N.Y.

The limits of the Buffalo-Niagara Falls, New York, port of entry (Region I), are extended to include the townships of Porter, Lewiston, and Wheatfield, located in Niagara County, New York. As extended, the geographical boundaries of the Buffalo-Niagara Falls, New York, port of entry include the following:

All the territory within the corporate limits of the cities of Buffalo, Niagara Falls, Lewiston, Lackawanna, Tonawanda, and North Tonawanda, and the townships of Grand Island, Tonawanda, Amherst, Cheektowaga, Hamburg, West Seneca, and Orchard Park in the county of Erie, and the townships of Porter, Lewiston, Wheatfield, and Niagara, in the county of Niagara, all in the State of New York.

Providence, R.I.

The limits of the Providence, Rhode Island, port of entry (Region I), are extended to include the townships of East Greenwich and North Kingstown, Rhode Island. As extended, the geographical boundaries of the Providence, Rhode Island, port of entry include the following:

All the territory within the corporate limits of the city of Providence and the townships of Central Falls, Cranston, East Providence, Barrington, Pawtucket, Warwick, Woonsocket, Cumberland, Johnston, North Smithfield, Smithfield, Lincoln, West Warwick, East Greenwich, and North Kingstown, all in the State of Rhode Island.

South Bend-Raymond and Aberdeen, Washington

The South Bend-Raymond, Washington, port of entry (Region VIII), is abolished. The limits of the Aberdeen, Washington, port of entry (Region VIII), are extended to include the territory currently encompassed by the port of South Bend-Raymond. As extended, the geographical boundaries of the Aberdeen port of entry include the following:

The corporate city limits of Aberdeen, Hoquiam, and Cosmopolis; all the territory within the corporate limits of South Bend and Raymond; all points on the Willapa River lying between the corporate limits of South Bend and Raymond; and that part of U.S. Highway 101 which connects the city limits of Aberdeen, Hoquiam, and Cosmopolis to the corporate limits of South Bend and Raymond, all in the State of Washington.

Amendments to the Regulations

To reflect these changes, the table in § 101.3(b), Customs Regulations (19 CFR 101.3(b)), is amended by:

1. Substituting "T.D. 79–169." for "T.D. 78–241." in the column headed "Ports of entry" in the Seattle, Washington, Customs district (Region VIII).

2. Substituting "(T.D. 79–169)." for "(T.D. 56512)." in the column headed "Ports of entry" in the Buffalo, New York, customs district (Region I).

3. Substituting "T.D. 79–169." for "T.D. 67–3." in the column headed "Ports of entry" in the Providence, Rhode Island, Customs district (Region I).

4. Deleting "South Bend-Raymond (T.D. 53578)." from the column headed "Ports of entry" in the Seattle, Washington, Customs district (Region VIII).

5. Substituting "T.D. 79–169." for "T.D. 56228." in the reference to "Aberdeen, including territory described in * * *" in the column headed "Ports of entry" in the Seattle, Washington, Customs district (Region VIII).

Inapplicability of Executive Order 12044

This document is not subject to the Treasury Department directive (43 FR 52120) implementing Executive Order 12044, "Improving Government Regulations", because the regulation was in the process of development before May 22, 1978.

Drafting Information

The principal author of this document was Lawrence P. Dunham, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: May 29, 1979.

Richard J. Davis,

Assistant Secretary of the Treasury.

BILLING CODE 4810-22-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration

20 CFR Part 404

Old-Age, Disability, Dependents' and Survivors' Insurance Benefits; Period of Disability

AGENCY: Social Security Administration, HEW.

ACTION: Final rule.

SUMMARY: These final regulations reorganize and restate in simpler language the rules on what is required to become entitled to social security benefits, when benefits begin and end, and how benefit amounts are determined. Also included are the rules we use to determine family relationships when benefits are sought as the worker's dependent or survivor. The relationship rules were formerly set out separately in Subpart L. Also included in these final regulations are two changes resulting from the 1977 Amendments to the Social Security Act and two changes resulting from court decisions interpreting the benefit entitlement provisions of the Act.

EFFECTIVE DATE: These amendments are effective June 15, 1979.

FOR FURTHER INFORMATION CONTACT: Ray Worley, Operational Policy and Procedures, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, 301–594–6813.

SUPPLEMENTARY INFORMATION:

Background

This final regulation is a recodification of the rules stating what entitles a person to social security benefits, when these benefits begin and end, how the benefit amounts are determined, and how we decide what family relationship a person has to the worker. The proposed recodification of these rules was published in the Federal Register with a Notice of Proposed Rulemaking on November 14, 1978 (43 FR 52936–52950). The primary purpose of this recodification is to restate the rules so that they will be easier for the public to understand and use. Other changes reflect two statutory amendments to the Social Security Act and two court decisions interpreting the Act.

One statutory amendment, reflected in section 404.336 of the final regulations, permits widows and widowers who remarry at age 60 or later to receive full widow's or widower's benefits after remarriage, instead of the one-half benefit reduction that was required

before the Act was amended. The other statutory amendment, reflected in sections 404.331 and 404.336 of the final regulations, permits divorced spouses to qualify for spouse's or surviving spouse's benefits if they were married to the worker for at least 10 years, instead of 20 years as formerly required. Both of these statutory changes are effective for months after December 1978.

Sections 404.331 through 404.333 of the final regulations reflect the June 1977 court decision in *Oliver* v. *Califano*. This decision requires that husband's benefits be provided for divorced husbands under the same rules as benefits are provided for divorced wives under the Act. Section 404.361 of the final regulations reflects the June 1976 Supreme Court decision in *Mathews* v. *Lucas*. This decision stated that a worker's natural child born out of wedlock who could inherit his or her personal property under applicable State law should be considered dependent upon the worker. The changes due to the court decisions apply as of the dates of the decisions.

Response to Public Comments

We received 49 comments: 16 from State government agencies, 5 from legal aid and civil rights groups, 8 from other public and private groups, and 20 from individuals. Virtually all of the comments were favorable. Several commenters, while commending the recodification effort, raised questions or made suggestions that resulted in our making a number of nonsubstantive changes in the final rules. These changes are intended to make the rules clearer and more readable.

Discussion of Major Comments

1. *Eliminate gender-based distinctions.* Several commenters pointed out that gender-based distinctions affecting benefit entitlement remained in the proposed regulations and recommended that they be removed. Specifically, the commenters recommended that husband's benefits be provided for the husband of an entitled individual who has a child of the individual in his care and that widower's benefits be provided for a surviving divorced husband. It was the view of the commenters that the Supreme Court decisions in *Weinberger* v. *Wiesenfield* and *Califano* v. *Goldfarb*, and the court decision in *Oliver* v. *Califano* require the payment of these benefits. We do not agree that these decisions provide authority for the payment of these additional benefits, and until the existing law is changed, we are unable to extend benefits as suggested by the commenters. We are aware that several gender-based distinctions remain in the Social Security Act, and as a matter of policy we have recommended the enactment of legislation which would eliminate these differences.

2. *Redefine contributions for support.* A commenter for a legal assistance organization recommended removing two provisions that were contained in proposed § 404.366(a) defining contributions for support. First, the commenter felt that the requirement that contributions must be made regularly and must be large enough to provide an important part of a claimant's ordinary living costs created an unnecessarily stringent standard for determining entitlement to child's benefits under section 216(h)(3)(C) of the Act. This statutory provision is reflected in § 404.355(d) of the final regulations. When it is necessary under this section of the Act to determine whether the insured had been contributing to the support of his child, we believe it is reasonable and appropriate to take into consideration the frequency of the contributions and the extent to which they provided assistance in meeting the costs of the child's support. For this reason we have not deleted this requirement from the final regulations.

The commenter also recommended removing the provision which stated that routine household services performed by the insured when the insured lives in the same household as the claimant are not contributions for support. It was felt that this provision was vague and that it discriminated against working mothers of children seeking benefits under section 216(h)(3)(C) of the Act. In reviewing the statute, we believe that the regulatory provision is unnecessary. The dependency test is met if the claimant was living with the insured at the appropriate time. See sections 404.355(d), 404.361, and 404.365. In those situations, the claimant does not have to show that contributions for support were received from the insured. For this reason, the sentence has been removed.

3. *Provide effective dates.* A commenter asked that the effective date of the regulatory provisions be included in the text of the regulations. This practice was followed in the past, but given the frequent changes in the Social Security Act, we decided not to retain this information. We believe that the regulations will be easier to use and more understandable if they reflect only the current rules. In situations where it is necessary to know the effective date of a rule, the information is readily available from other sources. We have, however, continued to provide the effective date of new rules in the preamble that accompanies proposed and final rulemaking documents.

A related comment indicated that there was some misunderstanding about the changes due to the *Oliver* decision. We stated in the Notice of Proposed Rulemaking that the changes would apply as of the date of the decision. The commenter has incorrectly concluded from this statement that we were not implementing that part of the June 1977 decision which affected a class of persons whose application for divorced husband's benefits had been denied after August 28, 1976. Because this part of the decision affected a relatively small number of identified individuals, its implementation is reflected only in our operating instructions.

4. *Permit oral applications.* A commenter recommended that the regulations and a long-standing SSA policy be changed to permit oral applications. Subpart G of the regulations sets out the rules we follow regarding applications, and we will consider this comment as part of the recodification of that subpart. So that persons reading Subpart D on benefits may more easily refer to the subpart on applications, a cross reference to that subpart has been included in section 404.302 of the final regulations.

Discussion of Miscellaneous Comments

1. *Definition of living with the insured.* A commenter pointed out that the proposed definition of living with the insured differed from the definition found in the former regulations in that it did not contain a reference to the right a parent may have to exercise parental control and authority. No change in the definition was intended, and in the final regulations we have revised § 404.366(c) to include this provision, which was inadvertently omitted from the proposed rule.

2. *Duration of marriage.* A commenter noted that the rules concerning the exemptions to the 9-month duration of marriage requirement for widow's and widower's benefits and for establishing relationship as a stepchild were not fully explained in the proposed regulations. Accordingly, §§ 404.335(a)(2) and 404.357 of the final regulations have been revised by inserting a statement explaining that the exceptions apply only if, at the time of the marriage, the insured was reasonably expected to live for nine months.

3. *Editorial comments.* In response to comments recommending that we use simpler language, shorter, single-subject

sections, and fewer cross-references, we have made a number of editorial changes in the final regulations. We have, for example, included three separate sections to explain who may be entitled to wife's or husband's benefits as a divorced spouse and who may be entitled to widow's and mother's benefits as a surviving divorced wife. We have also simplified the language in several sections and reviewed the use and need for cross-references. A number of commenters found proposed § 404.304 concerning the general rules used to determine benefit amounts difficult to understand. In the final regulations this section has been revised, and to clarify these rules we have included a definition of the term primary insurance amount.

4. *Comments beyond the scope of the Notice.* A number of comments were received that went beyond the scope of the Notice of Proposed Rulemaking or beyond the scope of our authority. These included:

(a) State the requirement for Supplementary Security Income benefits;

(b) Revise the retirement test; and

(c) Provide old-age benefits for the month in which the insured died.

Accordingly, the final rule is adopted as set forth below.

(Secs. 205 and 1102 of the Social Security Act, 53 Stat. 1368; 49 Stat. 647; 42 U.S.C. 405 and 1302.)

Dated: May 9, 1979.

Stanford G. Ross,

Commissioner of Social Security.

Approved: June 1, 1979.

Joseph A. Califano, Jr.,

Secretary of Health, Education, and Welfare.

Part 404 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

Subpart L [Reserved]

1. Subpart L is deleted and reserved.

2. Subpart D is revised to read as follows:

Subpart D—Old-Age, Disability, Dependents' and Survivors' Insurance Benefits; Period of Disability

General

Sec.
404.301 Introduction.
404.302 Other regulations related to this subpart.
404.303 Definitions.
404.304 General rules on benefit amounts.
404.305 When you may not be entitled to benefits.

Old-Age and Disability Benefits

404.310 Who is entitled to old-age benefits.
404.311 When entitlement to old-age benefits begins and ends.
404.312 Old-age benefit amounts.
404.315 Who is entitled to disability benefits.
404.316 When entitlement to disability benefits begins and ends.
404.317 Disability benefit amounts.
404.320 Who is entitled to a period of disability.
404.321 When a period of disability begins and ends.
404.322 When you may apply for a period of disability after a delay due to a physical or mental condition.

Benefits for Spouses and Divorced Spouses

404.330 Who is entitled to wife's or husband's benefits.
404.331 Who is entitled to wife's or husband's benefits as a divorced spouse.
404.332 When wife's and husband's benefits begin and end.
404.333 Wife's and husband's benefit amounts.
404.335 Who is entitled to widow's or widower's benefits.
404.336 Who is entitled to widow's benefits as a surviving divorced wife.
404.337 When widow's and widower's benefits begin and end.
404.338 Widow's and widower's benefit amounts.
404.339 Who is entitled to mother's or father's benefits.
404.340 Who is entitled to mother's benefits as a surviving divorced wife.
404.341 When mother's and father's benefits begin and end.
404.342 Mother's and father's benefit amounts.
404.344 Your relationship by marriage to the insured.
404.345 Your relationship as wife, husband, widow, or widower under State law.
404.346 Your relationship as wife, husband, widow, or widower based upon a deemed valid marriage.
404.347 "Living in the same household" defined.
404.348 When a child living with you is "in your care."
404.349 When a child living apart from you is "in your care."

Child's Benefits

404.350 Who is entitled to child's benefits.
404.351 Who may be reentitled to child's benefits.
404.352 When child's benefits begin and end.
404.353 Child's benefit amounts.
404.354 Your relationship to the insured.
404.355 Who is the insured's natural child.
404.356 Who is the insured's legally adopted child.
404.357 Who is the insured's stepchild.
404.358 Who is the insured's grandchild or stepgrandchild.
404.359 Who is the insured's equitably adopted child.
404.360 When a child is dependent upon the insured person.
404.361 When a natural child is dependent.
404.362 When a legally adopted child is dependent.
404.363 When a stepchild is dependent.
404.364 When a grandchild or stepgrandchild is dependent.
404.365 When an equitably adopted child is dependent.
404.366 "Contributions for support," "one-half support," and "living with" the insured defined.
404.367 When are you a "full-time student."
404.368 When may you be considered a full-time student during a period of non-attendance.

Parent's Benefits

404.370 Who is entitled to parent's benefits.
404.371 When parent's benefits begin and end.
404.373 Parent's benefit amounts.
404.374 Parent's relationship to the insured.

Special Payments at Age 72

404.380 General.
404.381 Who is entitled to special age 72 payments.
404.382 When special age 72 payments begin and end.
404.383 Special age 72 payment amounts.
404.384 Reductions, suspensions, and nonpayments of special age 72 payments.

Lump-Sum Death Payment

404.390 General.
404.391 Who is entitled to the lump-sum death payment as a widow or widower.
404.392 Who is entitled to the lump-sum death payment when there is no eligible widow or widower.
404.393 Who is entitled to the lump-sum death payment when burial expenses are paid from the deceased's funds.
404.394 Who is not entitled to the lump-sum death payment.

Authority: Subpart D is issued under sections, 202, 205, 216, 223, 228, 1102 of the Social Security Act, 49 Stat. 623, 53 Stat. 1368, 64 Stat. 492, 70 Stat. 815, 80 Stat. 67, 49 Stat. 647; Section 5, reorganization Plan No. 1 of 1953, 67 Stat. 631; 42 U.S.C. 402, 405, 416, 423, 428, and 1302; and 5 U.S.C. Appendix.

Subpart D—Old-Age, Disability, Dependents' and Survivors' Insurance Benefits; Period of Disability

General

§ 404.301 Introduction.

This subpart sets out what requirements you must meet to qualify for social security benefits, how your benefit amounts are figured, when your right to benefits begins and ends, and how family relationships are determined. These benefits are provided by title II of the Social Security Act. They include—

(a) *For workers,* old-age and disability benefits and benefit protection during periods of disability;

(b) *For a worker's dependents,* benefits for a worker's wife, divorced wife, husband, divorced husband, and child;

(c) *For a worker's survivors,* benefits for a worker's widow, widower, divorced wife, child, and parent, and a lump-sum death payment; and

(d) *For uninsured persons age 72 or older,* special payments.

§ 404.302 Other regulations related to this subpart.

This subpart is related to several others. Supart H sets out what evidence you need to prove you qualify for benefits. Subpart P describes what is needed to prove you are disabled. Subpart E describes when your benefits may be reduced or stopped for a time. Subpart G describes the need for and the effect of an application for benefits. Part 410 describes when you may qualify for black lung benefits. Part 416 describes when you may qualify for supplemental security income. Also 42 CFR Part 405 describes when you may qualify for hospital and medical insurance if you are aged, disabled, or have chronic kidney disease.

§ 404.303 Definitions.

As used in this subpart:

"Apply" means to sign a form or statement that the Social Security Administration accepts as an application for benefits under the rules set out in Subpart G.

"Eligible" means that a person would meet all the requirements for entitlement to benefits for a period of time but has not yet applied.

"Entitled" means that a person has applied and has proven his or her right to benefits for a period of time.

"Insured person" or "the insured" means someone who has enough earnings under social security to permit payment of benefits on his or her earnings record. The requirements for becoming insured are described in Subpart B.

"Permanent home" means the true and fixed home (legal domicile) of a person. It is the place to which a person intends to return whenever he or she is absent.

"Primary insurance amount" means an amount that is determined from the average monthly earnings creditable to the insured person. This term and the manner in which it is computed are explained in Subpart C.

"We" or "Us" means the Social Security Administration.

"You" means the person who has applied for benefits or the person for whom someone else has applied.

§ 404.304 General rules on benefit amounts.

This subpart describes how the highest monthly benefit amount you ordinarily could qualify for under each type of benefit is determined. However, the highest monthly benefit amount you could qualify for may not be the amount that you actually are paid each month. In a particular month, your benefit amount may be reduced or not paid at all. Under some circumstances, your benefit amount may be increased. The most common reasons for a change in the amount of your benefit payments are listed below:

(a) *Reductions based on age or earnings.* As explained in §§ 404.410–404.413, your old-age, wife's, husband's, widow's, or widower's benefits may be reduced if you choose to receive them before age 65. Also, as explained in §§ 404.415–404.417, deductions may be made from your benefits if your earnings or the insured person's earnings go over certain limits.

(b) *Overpayments and underpayments.* Your benefits may be increased or decreased for a time to make up for any previous overpayment or underpayment that was made on the insured person's record. For more information about this, see Subpart F.

(c) *Sole survivors.* If you are the only person entitled to a survivor's benefit on the insured's earnings record, the amount of your benefit may be increased. If you are entitled to child's or parent's benefits, the amount of your benefit will be increased to an amount equal to the minimum primary insurance amount. If you are entitled to widow's or widower's benefits, the amount of your benefit will be no less than $84.50 reduced for any months you were entitled before you became 62 years old.

(d) *Family maximum.* As explained in § 404.403, there is a maximum amount set for each insured person's earnings record that limits the total benefits payable on that record. If you are entitled to benefits as the insured's dependent or survivor, your benefits may be reduced to keep total benefits payable to the insured's family within these limits.

(e) *Government pension offset.* If you are entitled to wife's, husband's, mother's, father's, widow's or widower's benefits and receive a Government pension for work that was not covered under social security, your benefits may be reduced by the amount of that pension. Special age 72 payments are also reduced by the amount of a Government pension. For more information about this, see § 404.408(a) which covers benefits and § 404.384(c) which covers special age 72 payments.

§ 404.305 When you may not be entitled to benefits.

In addition to the situations described in § 404.304 when you may not receive a benefit payment, there are special circumstances when you may not be entitled to benefits. These circumstances are—

(a) *Waiver of benefits.* If you have waived benefits on religious grounds as described in § 404.1086, no one may become entitled to any benefits or payments on your earnings record and you may not be entitled to benefits on anyone else's earnings record; and

(b) *Insured's death by homicide.* You may not become entitled to any survivor's benefits or payments on the earnings record of a person if you were finally convicted of a felony for intentionally causing his or her death.

Old-Age and Disability Benefits

§ 404.310 Who is entitled to old-age benefits.

You are entitled to old-age benefits if—

(a) You are at least 62 years old;

(b) You have enough social security earnings to be "fully insured" as defined in § 404.109; and

(c) You apply; or you are entitled to disability benefits up to the month you become 65 years old. At age 65, your disability benefits automatically become old-age benefits.

§ 404.311 When entitlement to old-age benefits begins and ends.

(a) You are entitled to old-age benefits beginning with the first month covered by your application in which you meet all the other requirements for entitlement. (b) Your entitlement to benefits ends with the month before the month of your death.

§ 404.312 Old-age benefit amounts.

(a) If your old-age benefits begin at age 65, your monthly benefit is equal to the primary insurance amount. (b) If your old-age benefits begin after you become 65 years old, your monthly benefit is your primary insurance amount plus an increase for retiring after age 65. See § 404.282 for a description of these increases. (c) If your old-age benefits begin before you become 65 years old, your monthly benefit amount is the primary insurance amount minus a reduction for each month you are entitled before you

become 65 years old. These reductions are described in §§ 404.410–404.413.

§ 404.315 Who is entitled to disability benefits.

You are entitled to disability benefits while disabled before age 65 if—

(a) You have enough social security earnings to be "insured for disability," as described in § 404.116;

(b) You apply;

(c) You have a disability, as defined in § 404.1501, or you are not disabled, but you had a disability that ended within the 12-month period before the month you applied; and

(d) You have been disabled for 5 consecutive months. This 5-month waiting period begins with a month in which you were both insured for disability and disabled. Your waiting period can begin no earlier than the 17th month before the month you apply—no matter how long you were disabled before then. No waiting period is required if you were previously entitled to disability benefits or to a "period of disability" under § 404.320 anytime within 5 years of the month you again became disabled.

§ 404.316 When entitlement to disability benefits begins and ends.

(a) You are entitled to disability benefits beginning with the first month coverd by your application in which you meet all the other requirements for entitlement. If a waiting period is required, your benefits cannot begin earlier than the first month following that period. (b) Your disability benefits end with the earliest of these months: (1) the month before you become 65 years old; (2) the second month after the month your disability ends; or (3) the month before the month of your death.

§ 404.317 Disability benefit amounts.

Your monthly benefit is equal to the primary insurance amount. This amount is computed under the rules in Subpart C as if it were an old-age benefit, and as if you were 62 years old at the beginning of the 5-month waiting period mentioned in § 404.315(d). If the 5-month waiting period is not required because of your previous entitlement, your primary insurance amount is figured as if you were 62 years old when you become entitled to benefits this time. Your monthly benefit amount may be reduced if you receive workmen's compensation payments before you become 62 years old as described in § 404.408. Your benefits may also be reduced if you were entitled to other retirement-age benefits before you became 65 years old.

§ 404.320 Who is entitled to a period of disability.

(a) *General.* A period of disability is a continuous period of time during which you are disabled. If you become disabled, you may apply to have our records show how long your disability lasts. You may do this even if you do not qualify for disability benefits. If we establish a period of disability for you, the months in that period of time will not be counted in figuring your average earnings. If benefits payable on your earnings record would be denied or reduced because of a period of disability, the period of disability will not be taken into consideration.

(b) *Who is entitled.* You are entitled to a period of disability if you meet all the following conditions:

(1) You have or had a disability as defined in § 404.1501(b).

(2) You are "insured for disability", as defined in § 404.116 in the calendar quarter in which you became disabled, or in a later calendar quarter in which you were disabled.

(3) You file an application while disabled, or no later than 12 months after the month in which your period of disability ended. If you were unable to apply within the 12-month period after your period of disability ended because of a physical or mental condition as described in § 404.322, you may apply not more than 36 months after the month your disability ended.

(4) At least 5 consecutive months go by from the month in which your period of disability begins and before the month in which it would end.

§ 404.321 When a period of disability begins and ends.

(a) Your period of disability begins at the start of the first calendar quarter in which you were both disabled and insured for disability. Your period of disability may not begin after you become 65 years old. (b) Your period of disability ends on the last day of the month before the month in which you become 65 years old or, if earlier, the last day of the second month following the month in which your disability ended.

§ 404.322 When you may apply for a period of disability after a delay due to a physical or mental condition.

If because of a physical or mental condition you did not apply for a period of disability within 12 months after your period of disability ended, you may apply not more than 36 months after the month in which your disability ended. Your failure to apply within the 12-month time period will be considered due to a physical or mental condition if during this time—

(a) Your physical condition limited your activities to such an extent that you could not complete and sign an application; or

(b) You were mentally incompetent.

Benefits for Spouses and Divorced Spouses

§ 404.330 Who is entitled to wife's or husband's benefits.

You are entitled to benefits as the wife or husband of an insured person who is entitled to old-age or disability benefits if—

(a) You are the insured's wife or husband based upon a relationship described in §§ 404.345–404.346 and one of the following conditions is met:

(1) Your relationship to the insured as a wife or husband has lasted at least 1 year;

(2) You and the insured are the natural parents of a child; or

(3) In the month before you married the insured you were entitled to, or if you had applied and been old enough you could have been entitled to, any of these benefits or payments: Wife's, husband's, widow's, widower's, or parent's benefits; disabled child's benefits; or annuity payments under the Railroad Retirement Act for widows, widowers, parents, or children 18 years old or older;

(b) You apply;

(c) You are 62 years old or older; or you are the insured's wife and have "in your care", as defined in §§ 404.348–404.349, his child who is entitled to benefits on his earnings record and the child is either under 18 years old or disabled; and

(d) You are not entitled to an old-age or disability benefit based upon a primary insurance amount that is equal to or larger than the full wife's or husband's benefit.

§ 404.331 Who is entitled to wife's or husband's benefits as a divorced spouse.

You are entitled to wife's or husband's benefits as the divorced wife or divorced husband of an insured person who is entitled to old-age or disability benefits if—

(a) You are the insured's divorced wife or divorced husband and—

(1) You were validly married to the insured under State law as described in § 404.345; and

(2) You were married to the insured for at least 10 years immediately before your divorce became final;

(b) You apply;

(c) You are not married;

(d) You are 62 years old or older; and

(e) You are not entitled to an old-age or disability benefit based upon a primary insurance amount that is equal to or larger than the full wife's or husband's benefit.

§ 404.332 When wife's and husband's benefits begin and end.

(a) You are entitled to wife's or husband's benefits beginning with the first month covered by your application in which you meet all the other requirements for entitlement under § 404.330 or § 404.331.

(b) Your entitlement to benefits ends with the month before the month in which one of the following events first occurs:

(1) You become entitled to an old-age or disability benefit based upon a primary insurance amount that is equal to or larger than the full wife's or husband's benefit.

(2) You are the wife or husband and are divorced from the insured person unless you meet the requirements for benefits as a divorced wife or divorced husband as described in § 404.331.

(3) You are the divorced wife or divorced husband and you remarry. Your benefits will not end if your remarriage is to someone entitled to benefits as a widow, widower, father, mother, parent, or disabled child. If your remarriage is to someone entitled to benefits as a disabled child and the person recovers from the disability, your benefits will end with the same month as his or her benefits end.

(4) If you are under 62 years old, the child who was in your care is no longer entitled to child's benefits.

(5) The insured person dies or is no longer entitled to old age or disability benefits.

(6) If your benefits are based upon a deemed valid marriage, you marry someone other than the insured or someone else becomes entitled to the same benefits as described in § 404.346.

(7) You die.

§ 404.333 Wife's and husband's benefit amounts.

Your wife's or husband's monthly benefit is equal to one-half the insured person's primary insurance amount. The amount of your monthly benefit may change as explained in § 404.304.

§ 404.336 Who is entitled to widow's or widower's benefits.

You may be entitled to benefits as the widow or widower of a person who was fully insured when he or she died. You are entitled to these benefits if—

(a) You are the insured's widow or widower based upon a relationship described in §§ 404.345–404.346, and one of the following conditions is met:

(1) Your relationship to the insured as a wife or husband lasted for at least 9 months immediately before the insured died.

(2) Your relationship to the insured as a wife or husband did not last 9 months before the insured died, but at the time of your marriage the insured was reasonably expected to live for 9 months, and—

(i) The death of the insured was accidental. The death is accidental if it was caused by an event that the insured did not expect; it was the result of bodily injuries received from violent and external causes; and as a direct result of these injuries, death occurred not later than 3 months after the day on which the bodily injuries were received. An intentional and voluntary suicide will not be considered an accidental death;

(ii) The death of the insured occurred in the line of duty while he or she was serving on active duty as a member of the uniformed services as defined in § 404.1013(f) (2) and (3); or

(iii) You had been previously married to the insured for at least 9 months.

(3) You and the insured were the natural parents of a child; or you were married to the insured when either of you adopted the other's child or when both of you adopted a child who was then under 18 years old.

(4) In the month before you married the insured you were entitled to, or if you had applied and been old enough could have been entitled to, any of these benefits or payments: widow's, widower's, father's, mother's, wife's, parent's, or disabled child's benefits; or annuity payments under the Railroad Retirement Act for widows, widowers, parents, or children 18 years old or older;

(b) You apply, except that you need not apply again if—

(1) You are entitled to wife's or husband's benefits for the month before the month in which the insured dies and you are 65 years old or you are not entitled to either old-age or disability benefits; or

(2) You are entitled to mother's or father's benefits for the month before the month in which you become 65 years old;

(c) You are at least 60 years old; or you are at least 50 years old and have a disability as defined in § 404.1501(a) and—

(1) The disability started not later than 7 years after the insured died or 7 years after you were last entitled to mother's or father's benefits or to widow's or widower's benefits based upon a disability (which occurred last); and

(2) Your disability continued during a waiting period of 5 full consecutive months. This waiting period may begin no earlier than the 17th month before you applied; the fifth month before the insured died; or if you were previously entitled to mother's, father's, widow's, or widower's benefits the 5th month before your entitlement to benefits ended. If you were previously entitled to widow's or widower's benefits based upon a disability, the waiting period is not required;

(d) You are not entitled to an old-age benefit that is equal to or larger than the insured person's primary insurance amount; and

(e) You are unmarried unless you are a widow who has remarried after you became 60 years old; or if you are a widower, you have not remarried since the insured's death unless you remarried after you became 60 years old.

§ 404.336 Who is entitled to widow's benefits as a surviving divorced wife.

You may be entitled to widow's benefits as the surviving divorced wife of a person who was fully insured when he died. You are entitled to these benefits if—

(a) You are the insured's surviving divorced wife and—

(1) You were validly married to the insured under State law as described in § 404.345; and

(2) You were married to the insured for at least 10 years immediately before your divorce became final;

(b) You apply, except that you need not apply again if—

(1) You are entitled to wife's benefits for the month before the month in which the insured dies and you are 65 years old or you are not entitled to old-age or disability benefits; or

(2) You are entitled to mother's benefits for the month before the month in which you become 65 years old;

(c) You are at least 60 years old; or you are at least 50 years old and have a disability as defined in § 404.1501(b) and—

(1) The disability started not later than 7 years after the insured died or 7 years after you were last entitled to mother's benefits or to widow's benefits based upon a disability, whichever occurred last; and

(2) Your disability continued during a waiting period of 5 consecutive months. This waiting period may begin no earlier than the 17th month before you applied; the fifth month before the insured died; or if you were previously entitled to mother's, father's, widow's, or

widower's benefits, the 5th month before your previous entitlement to benefits ended. If you were previously entitled to widow's or widower's benefits based upon a disability, the waiting period is not required.

(d) You are not entitled to an old-age benefit that is equal to or larger than the insured person's primary insurance amount; and

(e) You are unmarried.

§ 404.337 When widow's and widower's benefits begin and end.

(a) You are entitled to widow's or widower's benefits under § 404.335 or § 404.336 beginning with the first month covered by your application in which you meet all the other requirements for entitlement.

(b) Your entitlement to benefits ends at the earliest of the following times:

(1) The month before the month in which you remarry except your benefits will not end if—

(i) You are the widow or widower and remarry when you are 60 years old or older; or

(ii) You marry someone entitled to: wife's, widow's, widower's, father's, mother's, parent's, or disabled child's benefits. However, if you are the widow or surviving divorced wife and marry a person entitled to disabled child's benefits and his disabled child's benefits end because he recovers from his disability, your benefits will end with the same month his benefits end.

(2) The month before the month in which you become entitled to an old-age benefit that is equal to or larger than the insured's primary insurance amount.

(3) If your widow's or widower's benefit is based upon a disability, the month before the third month after you recover from your disability (unless you are 65 years old then and would still be eligible by meeting the other requirements for these benefits).

(4) If you are entitled to benefits based upon a deemed valid marriage, the month before the month in which another person becomes entitled to the same benefits as described in § 404.346.

(5) The month before the month in which you die.

§ 404.338 Widow's and widower's benefits amounts.

Your widow's or widower's monthly benefit is equal to the insured person's primary insurance amount. The amount of your monthly benefit may change as explained in § 404.304. In addition, your monthly benefit will be reduced if the insured person had been entitled to old-age benefits that were reduced for age because he or she chose to receive them before becoming 65 years old. In this instance, your benefit is reduced, if it would otherwise be higher, to either the amount the insured would have been entitled to if still alive or 82½ percent of his or her primary insurance amount, whichever is larger.

§ 404.339 Who is entitled to mother's or father's benefits.

You may be entitled as the widow or widower to mother's or father's benefits on the earnings record of someone who was fully or currently insured when he or she died. You are entitled to these benefits if—

(a) You are the widow or widower of the insured and meet the conditions described in § 404.335(a)(1);

(b) You apply for these benefits; or you were entitled to wife's benefits for the month before the insured died;

(c) You are unmarried;

(d) You are not entitled to widow's or widower's benefits, or to an old-age benefit that is equal to or larger than the full mother's or father's benefit; and

(e) You have "in your care" the insured's child who is entitled to child's benefits because he or she is under 18 years old or is disabled. Sections 404.348 and 404.349 describe when a child is "in your care."

§ 404.340 Who is entitled to mother's benefits as a surviving divorced wife.

You may be entitled to mother's benefits as the surviving divorced wife of someone who was fully or currently insured when he died. You are entitled to these benefits if—

(a) You were validly married to the insured under State law as described in § 404.345(a) but the marriage ended in a final divorce and—

(1) You are the mother of the insured's child; or

(2) You were married to the insured when either of you adopted the other's child or when both of you adopted a child and the child was then under 18 years old;

(b) You apply for these benefits; or you were entitled to wife's benefits for the month before the insured died;

(c) You are unmarried;

(d) You are not entitled to widow's benefits, or to an old-age benefit that is equal to or larger than the full mother's benefit; and

(e) You have "in your care" the insured's child who is entitled to child's benefits because he or she is under age 18 or disabled and this child is your natural or adopted child who is entitled to child's benefits on the insured person's record. Sections 404.356 and 404.359 describe when a child is "in your care."

§ 404.341 When mother's and father's benefits begin and end.

(a) You are entitled to mother's or father's benefits beginning with the first month covered by your application in which you meet all the other requirements for entitlement.

(b) Your entitlement to benefits ends with the month before the month in which one of the following events first occurs:

(1) You become entitled to a widow's or widower's benefit or to an old-age benefit that is equal to or larger than the full mother's or father's benefit.

(2) The child in your care is no longer entitled to child's benefits.

(3) You remarry. Your benefits will not end if your remarriage is to someone entitled to old-age, disability, wife's, husband's, widow's, widower's, father's, mother's, parent's, or disabled child's benefits. If your remarriage is to someone entitled to disability or disabled child's benefits and the person recovers from the disability, your benefits will end with the same month his or her benefits end.

(4) If you are entitled to benefits based upon a deemed valid marriage, another person becomes entitled to benefits as the widow or widower as described in § 404.346(d).

(5) You die.

§ 404.342 Mother's and father's benefit amounts.

Your mother's or father's monthly benefit is equal to 75 percent of the insured person's primary insurance amount. The amount of your monthly benefit may change as explained in § 404.304.

§ 404.344 Your relationship by marriage to the insured.

You may be eligible for benefits if your are related to the insured person as a wife, husband, widow, or widower. To decide your relationship to the insured, we look first to State laws. The State laws that we use are discussed in § 404.345. If your relationship cannot be established under State law, you may still be eligible for benefits if your relationship as the insured's wife, husband, widow, or widower is based upon a "deemed valid marriage" as described in § 404.346.

§ 404.345 Your relationship as wife, husband, widow, or widower under State law.

To decide your relationship as the insured's wife or husband, we look to the laws of the State where the insured

had a permanent home when you applied for wife's or husband's benefits. To decide your relationship as the insured's widow or widower, we look to the laws of the State where the insured had a permanent home when he or she died. If the insured's permanent home is not or was not in one of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, or American Samoa, we look to the laws of the District of Columbia. For a definition of permanent home, see § 404.303. If you and the insured were validly married under State law at the time you apply for wife's or husband's benefits or at the time the insured died if you apply for widow's, widower's, mother's, or father's benefits, the relationship requirement will be met. The relationship requirement will also be met if under State law you would be able to inherit a wife's, husband's, widow's, or widower's share of the insured's personal property if he or she were to die without leaving a will.

§ 404.346 Your relationship as wife, husband, widow or widower based upon a deemed valid marriage.

(a) *General.* If your relationship as the insured's wife, husband, widow, or widower cannot be established under State law as explained in § 404.345, you may be eligible for benefits based upon a deemed valid marriage. You will be deemed to be the wife, husband, widow, or widower of the insured if, in good faith, you went through a marriage ceremony with the insured that would have resulted in a valid marriage except for a legal impediment. A legal impediment means only that there was a defect in the procedure followed in connection with the ceremony, or that a previous marriage of the insured had not ended at the time of the ceremony. For example, a defect in the procedure may be found where a marriage was performed through a religious ceremony in a country that requires a civil ceremony for a valid marriage. Good faith means that at the time of the ceremony you did not know that a legal impediment existed, or if you did know, you thought that it would not prevent a valid marriage.

(b) *Entitlement based upon a deemed valid marriage.* To be entitled to benefits as the result of a deemed valid marriage, you and the insured must have been living in the same houshold (see § 404.347) at the time the insured died, or if the insured is living, at the time you apply for benefits. If at the time you apply another person is or has been entitled to benefits as the wife, husband, widow, or widower of the insured, and such person's relationship to the insured was determined under State law as explained in § 404.345, you will not be entitled to benefits. Also, if after your entitlement, we find that another person is the wife, husband, widow, or widower of the insured under State law as explained in § 404.345, you entitlement will end with the month before the month in which this determination is made.

§ 404.347 "Living in the same household" defined.

You may be eligible for benefits as a wife, husband, widow, or widower because your relationship to the insured is based upon a deemed valid marriage, as described in § 404.346, only if you and the insured were living in the same household at the time you apply for wife's or husband's benefits or at the time the insured died if you apply for widow's, widower's, mother's, or father's benefits. Living in the same household means that you and the insured customarily lived together as husband and wife in the same residence. You may be considered to be living in the same household although one of you is temporarily absent from the residence. An absence will be considered temporary if it was due to service in the U.S. Armed Forces. An absence of less than 6 months is also considered temporary if neither you nor the insured were outside of the United States during this time and the absence was due to business or employment; or to confinement in a hospital, nursing home, other medical institution, or a penal institution. Other absences may be considered temporary if it is shown that you and the insured could have reasonably expected to live together in the near future.

§ 404.348 When a child living with you is "in your care".

To become entitled to wife's benefits before you become 62 years old or to mother's or father's benefits, you must have the insured's child "in your care." A child who has been living with you for at least 30 days is in your care unless—

(a) The child is in active military service;

(b) The child is 18 years old or older and not disabled;

(c) The child is 18 years old or older with a mental disability, but you do not actively supervise his or her activities and you do not make important decision about his or her needs, either alone or with help from your spouse; or

(d) The child is 18 years old or older with a physical disability, but it is not necessary for you to perform personal services for him or her. Personal services are service such as dressing, feeding and managing money that the child cannot do alone because of a disability.

§ 404.349 When a child living apart from you is "in your care".

(a) *In your care.* A child living apart from you is in your care if—

(1) The child lived apart from you for not more than 6 months, or the child's current absence from you is not expected to last over 6 months;

(2) The child is under 18 years old, you supervise his or her activities and make important decisions about his or her needs, and one of the following circumstances exist:

(i) The child is living apart because of school but spends at least 30 days vacation with you each year unless some event makes having the vacation unreasonable; and if you and the child's other parent are separated, the school looks to you for decisions about the child's welfare;

(ii) The child is living apart because of your employment but you make regular and substantial contributions to his or her support; see § 404.366(a) for a definition of "contributions for support";

(iii) The child is living apart because of a physical disability that the child has or that you have; or

(3) The child is 18 years old or older, and is mentally disabled but you supervise his or her activities, make important decisions about his or her needs, and help in his or her upbringing and development.

(b) *Not in your care.* A child living apart from you is not in your care if—

(1) The child is in active military service;

(2) The child is living with his or her other parent;

(3) The child is removed from your custody and control by a court order;

(4) The child is 18 years old or older, is mentally competent, and either has been living apart from you for 6 months or more, or begins living apart from you and is expected to be away for more than 6 months;

(5) You gave your right to have custody and control of the child to someone else; or

(6) You are mentally disabled.

Child's Benefits

§ 404.350 Who is entitled to child's benefits.

You are entitled to child's benefits on the earnings record of an insured person who is entitled to old-age or disability benefits or who has died if—

(a) You are the insured person's child, based upon a relationship described in §§ 404.355–404.359;

(b) You are dependent on the insured, as defined in §§ 404.360–404.365;

(c) You apply;

(d) You are unmarried; and

(e) You are under age 18; or you are 18 years old or older and have a disability that began before you became 22 years old; or you are under age 22 and a full-time student, as defined in § 404.367; or you become 22 years old in a month in which you are a full-time student and you have not completed the requirements for, or received, a degree from a 4-year college or university.

§ 404.351 Who may be reentitled to child's benefits

If your entitlement to child's benefits has ended, you may be reentitled on the same earnings record if you have not married and if you apply for reentitlement. Your reentitlement may begin with—

(a) The first month in which you are a full-time student and either you have not become 22 years old, or you become 22 years old in a month in which you are a full-time student and you have not completed the requirements for, or received, a degree from a 4-year college or university;

(b) The first month in which you are disabled, if your disability began before you became 22 years old; or

(c) The first month you are under a disability that began before the end of the 84th month following the month in which your benefits had ended because an earlier disability had ended.

§ 404.352 When child's benefits begin and end.

(a) You are entitled to child's benefits beginning with the first month covered by your application in which you meet all the other requirements for entitlement. (b) Your entitlement to benefits ends with the month before the month in which one of the following events first occurs:

(1) You become 18 years old, unless you are disabled or a full-time student. If you become 18 years old and you are disabled, your entitlement ends with the second month following the month in which your disability ends. If you become 18 years old and you are a full-time student who is not disabled, your entitlement ends with the last month you are a full-time student or, if earlier, the month before the month you become age 22. If the become age 22 in a month in which you are a full-time student and you have have not completed the requirements for, or received, a degree from a 4-year college or university, your entitlements will end with the month in which the quarter or semester in which you are enrolled ends. If the school you are attending does not have a quarter or semester system, your benefits will end with the month you complete the course, of if earlier, the first day of the third month following the month in which you become 22 years old.

(2) You marry. Your benefits will not end if you are 18 years old or older, disabled, and you marry a person entitled to child's benefits based on disability or a person entitled to old-age, divorced wife's, divorced husband's, widow's, widower's, mother's, father's, parent's, or disability benefits. If you are a woman entitled to child's benefits based on disability and you marry a man entitled to either child's benefits based on disability or disability benefits and he recovers from the disability, your benefits will end with the same month as his benefits end.

(3) The insured's entitlement to old-age or disability benefits ends for a reason other than death or the attainment of age 65.

(4) You die.

§ 404.353 Child's benefit amounts.

(a) *General.* Your child's monthly benefit is equal to one-half of the insured person's primary insurance amount if he or she is alive and three-fourths of the primary insurance amount if he or she has died. The amount of your monthly benefit may change as explained in § 404.304.

(b) *Entitlement to more than one benefit.* If you are entitled to a child's benefit on more than one person's earnings record, you will ordinarily receive only the benefit payable on the record with the highest primary insurance amount. If your benefit before any reduction would be larger on an earnings record with a lower primary insurance amount and no other person entitled to benefits on that record would receive a smaller benefit as a result of your entitlement, you will receive benefits on that record. If you are entitled to a child's benefit and to other dependent's or survivor's benefits, you can receive on the highest of the benefits.

§ 404.354 Your relationship to the insured.

(a) *General.* You may be related to the insured person in one of several ways and be entitled to benefits as his or her child—as a natural child, legally adopted child, stepchild, grandchild, stepgrandchild, or equitably adopted child. (b) *Use of State laws.* To decide your relationship to the insured, we look to the laws of the State where the insured had a permanent home when you applied, or where the insured had a permanent home when he or she died if you apply after his or her death. If the insured's permanent home is not or was not in one of the 50 States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, or American Samoa, we will look to the laws of the District of Columbia. For a definition of permanent home see § 404.303. The State laws we use are the ones the courts would use to decide whether you could inherit a child's share of the insured's personal property if he or she were to die without leaving a will. If these laws would not permit you to inherit the insured's personal property as his or her child, you may still be eligible for child's benefits if you are related to the insured in one of the other ways described in §§ 404.355–404.359.

§ 404.355 Who is the insured's natural child.

You may be eligible for benefits as the insured's natural child if one of the following conditions is met:

(a) You could inherit the insured's personal property as his or her natural child under State inheritance laws as described in § 404.354.

(b) Before your birth, your mother or father entered into a deemed valid marriage with the insured as described in § 404.346.

(c) Your mother has not married the insured but the insured is your father and he has either acknowledged in writing that you are his child, been decreed by a court to be your father, or been ordered by a court to contribute to your support because you are his child.

(d) Your mother has not married the insured, but you have evidence other than the evidence described in paragraph (c) of this section to show that the insured in your natural father. Additionally, you must have evidence to show that the insured was either living with you or contributing to your support at the time you applied for benefits. See § 404.366 for an explanation of the terms "living with" and "contributing to your support". If the insured is not alive at the time of your application, you must have evidence to show that the insured was either living with you or contributing to your support when he died.

§ 404.356 Who is the insured's legally adopted child.

You may be eligible for benefits as the insured's child if you were legally adopted by the insured. If you were legally adopted after the insured's death

by his or her surviving spouse you may also be considered the insured's legally adopted child.

§ 404.357 Who is the insured's stepchild.

You may be eligible for benefits as the insured's stepchild if, after your birth, your natural or adopting parent married the insured. The marriage between the insured and your parent must be a valid marriage under State law or a deemed valid marriage as described in §§ 404.345–404.346. If the insured is alive when you apply, you must have been his or her stepchild for at least 1 year immediately preceding the day you apply. If the insured is not alive when you apply, you must have been his or her stepchild for at least 9 months immediately preceding the day the insured died. This 9-month requirement will not have to be met if the marriage between the insured and your parent lasted less than 9 months under the conditions described in § 404.335(a)(2).

§ 404.358 Who is the insured's grandchild or stepgrandchild.

(a) *Grandchild and stepgrandchild defined.* You may be eligible for benefits as the insured's grandchild or stepgrandchild if you are the natural child, adopted child, or stepchild of a person who is the insured's child as defined in §§ 404.355–404.357, or § 404.359. Additionally, for you to be eligible as a grandchild or stepgrandchild, your natural or adoptive parents must have been either deceased or under a disability, as defined in § 404.1501(a), at the time your grandparent or step-grandparent became entitled to old-age or disability benefits or died; or if your grandparent or stepgrandparent had a period of disability that continued until he or she became entitled to benefits or died, at the time the period of disability began.

(b) *Legally adopted grandchild or stepgrandchild.* If you are the insured's grandchild or stepgrandchild and you are legally adopted by the insured or by the insured's surviving spouse after his or her death, you are considered an adopted child and the dependency requirements of § 404.362 must be met.

§ 404.359 Who is the insured's equitably adopted child.

You may be eligible for benefits as an equitably adopted child if the insured had agreed to adopt you as his or her child but the adoption did not occur. The agreement to adopt you must be one that would be recognized under State law so that you would be able to inherit a child's share of the insured's personal property if he or she were to die without leaving a will. The agreement must be in whatever form, and you must meet whatever requirements for performance under the agreement, that State law directs. If you apply for child's benefits after the insured's death, the law of the State where the insured had his or her permanent home at the time of his or her death will be followed. If you apply for child's benefits during the insured's life, the law of the State where the insured has his or her permanent home at the time or your application will be followed.

§ 404.360 When a child is dependent upon the insured person.

One of the requirements for entitlement to child's benefits is that you be dependent upon the insured. The evidence you need to prove your dependency is determined by how you are related to the insured. To prove your dependency you may be asked to show that at a specific time you lived with the insured, that you received contributions for your support from the insured, or that the insured provided at least one-half of your support. These dependency requirements, and the time at which they must be met, are explained in §§ 404.361–404.365. The terms "living with", "contributions for support," and "one-half support" are defined in § 404.366.

§ 404.361 When a natural child is dependent.

If you are the insured's natural child, as defined in § 404.355, you are considered dependent upon him or her. However, if you are legally adopted by someone else during the insured's lifetime and after the adoption you apply for child's benefits on the insured's earnings record, you will be considered dependent upon the insured (your natural parent) only if he or she was either living with you or contributing to your support at one of these times—

(a) When you applied;

(b) When the insured died; or

(c) If the insured had a period of disability that lasted until he or she died or became entitled to disability or old-age benefits, at the beginning of the period of disability or at the time he or she became entitled to benefits.

§ 404.362 When a legally adopted child is dependent.

(a) *General.* If you were legally adopted by the insured before he or she became entitled to old-age or disability benefits, you are considered dependent upon him or her. If you were legally adopted by the insured after he or she became entitled to old-age or disability benefits and you apply for child's benefits during the life of the insured, you must meet the dependency requirements stated in paragraph (b) of this section. If you were legally adopted by the insured after he or she became entitled to old-age or disability benefits and you apply for child's benefits after the death of the insured, you are considered dependent upon him or her. If you were adopted after the insured's death by his or her surviving spouse, you may be considered dependent upon the insured only under the conditions described in paragraph (c) of this section.

(b) *Adoption by the insured after he or she became entitled to benefits.*

(1) *General.* If you are legally adopted by the insured after he or she became entitled to benefits and you are not the insured's natural child, stepchild, grandchild, or stepgrandchild, you are considered dependent upon the insured during his or her lifetime only if—

(i) Your adoption took place in the United States;

(ii) You began living with the insured before you became 18 years old; and

(iii) You were living with the insured in the United States and receiving at least one-half of your support from him or her for the year before he or she became entitled to benefits or became entitled to a period of disability that continued until entitlement to benefits began. If you were born within this 1-year period, the insured must have lived with you and provided at least one-half of your support for "substantially all" of the period that begins on the date of your birth. The "substantially all" requirement will be met if, at the time of the insured's entitlement, he or she was living with you and providing at least one-half of your support, and any period during which he or she was not living with you or providing one-half of your support did not exceed the lesser of 3 months or one-half of the period beginning with the month of your birth.

(2) *Grandchild of the insured or the insured's spouse.* If you legally adopted by the insured after he or she became entitled to benefits and you are the insured's grandchild or the grandchild of the insured's spouse, you are considered dependent upon the insured during his or her lifetime only if—

(i) Your adoption took place in the United States;

(ii) You began living with the insured before you became 18 years old; and

(iii) You were living with the insured in the United States and receiving at least one-half of your support from him or her for either the 1-year period before the month you applied or for one of the

periods described in paragraph (b)(1)(iii) of this section. If you were born within this 1-year period, the insured must have lived with you and provided one-half of your support for "substantially all" of the period that begins on the date of your birth. The term "substantially all" is defined in paragraph (b)(1)(iii) of this section.

(3) *Natural child and stepchild.* If you were legally adopted by the insured after he or she became entitled to benefits and you are the insured's natural child or stepchild, you are considered dependent upon the insured.

(c) *Adoption by the insured's surviving spouse.*

(1) *General.* If you are legally adopted by the insured's surviving spouse after the insured's death, you are considered dependent upon the insured as of the date of his or her death if—

(i) You were living in the insured's household at the time of his or her death;

(ii) You were not receiving regular contributions for your support from someone other than the insured or his or her spouse, or from any public or private welfare organization at the time of the insured's death; and

(iii) The insured had started adoption proceedings before he or she died; or if the insured had not started the adoption proceedings before he or she died, his or her surviving spouse began and completed the adoption within 2 years of the insured's death.

(2) *Grandchild or stepgrandchild adopted by the insured's surviving spouse.* If you are the grandchild or stepgrandchild of the insured and any time after the death of the insured you are legally adopted by the insured's surviving spouse, you are considered the dependent child of the insured as of the date of his or her death if—

(i) Your adoption took place in the United States;

(ii) At the time of the insured's death, your natural, adopting or stepparent was not living in the insured's household and making regular contributions toward your support; and

(iii) You meet the dependency requirements stated in § 404.364.

§ 404.363 When a stepchild is dependent.

If you are the insured's stepchild, as defined in § 404.357, you are considered dependent upon him or her if you were either living with or receiving at least one-half of your support from him or her at one of these times—

(a) When you applied;

(b) When the insured died; or

(c) If the insured had a period of disability that lasted until his or her death or entitlement to disability or old-age benefits, at the beginning of the period of disability or at the time the insured became entitled to benefits.

§ 404.364 When a grandchild or stepgrandchild is dependent.

If you are the insured's grandchild or stepgrandchild, as defined in § 404.356(a), you are considered dependent upon the insured if—

(a) You began living with the insured before you became 18 years old; and

(b) You were living with the insured in the United States and receiving at least one-half of your support from him for the year before he or she became entitled to old-age or disability benefits or died; or if the insured had a period of disability that lasted until he or she became entitled to benefits or died, for the year immediately before the month in which the period of disability began. If you were born during the 1-year period, the insured must have lived with you and provided at least one-half of your support for "substantially all" of the period that begins on the date of your birth. The term "substantially all" is defined in § 404.362(b)(1)(iii).

§ 404.365 When an equitably adopted child is dependent.

If you are the insured's equitably adopted child, as defined in § 404.350, you are considered dependent upon him or her if you were either living with or receiving contributions for your support from the insured at the time of his or her death. If your equitable adoption is found to have occurred after the insured became entitled to old-age or disability benefits, your dependency cannot be established during the insured's life. If your equitable adoption is found to have occurred before the insured became entitled to old-age or disability benefits, you are considered dependent upon him or her if you were either living with or receiving contributions for your support from the insured at one of these times—

(a) When you applied; or

(b) If the insured had a period of disability that lasted until he or she became entitled to old-age or disability benefits, at the beginning of the period of disability or at the time the insured became entitled to benefits.

§ 404.366 "Contributions for support," "one-half support," and "living with" the insured defined.

To be eligible for child's or parent's benefits, you must be dependent upon the insured at a particular time or be assumed dependent upon him or her. What it means to be a dependent child is explained in §§ 404.360–404.365 and what it means to be a dependent parent is explained in § 404.370(f). Your dependency upon the insured may be based upon whether at a specified time you were receiving "contributions for your support" or "one-half of your support" from the insured, or whether you were "living with" him or her. These terms are defined in paragraphs (a)–(c) of this section.

(a) *"Contributions for support".* The insured makes a contribution for your support if the following conditions are met:

(1) The insured gives some of his or her own cash or goods to help support you. Support includes food, shelter, routine medical care, and other ordinary and customary items needed for your maintenance. The value of any goods the insured contributes is the same as the cost of the goods when he or she gave them for your support. If the insured provides services for you that would otherwise have to be paid for, the cash value of his or her services may be considered a contribution for your support. An example of this would be work the insured does to repair your home. The insured person is making a contribution for your support if you receive an allotment, allowance, or benefit based upon his or her military pay, veterans' pension or compensation, or social security earnings.

(2) Contributions must be made regularly and must be large enough to meet an important part of your ordinary living costs. Ordinary living costs are the costs for your food, shelter, routine medical care, and similar necessities. If the insured person only provides gifts or donations once in a while for special purposes, they will not be considered contributions for your support. Although the insured's contributions must be made on a regular basis, temporary interruptions caused by circumstances beyond the insured person's control, such as illness or unemployment, will be disregarded unless during this interruption someone else takes over responsibility for supporting you on a permanent basis.

(b) *"One-Half Support".* The insured person provides one-half of your support if he or she makes regular contributions for your support and the amount of these contributions exceeds one-half of your ordinary living costs. Ordinary living costs are the costs for your food, shelter, routine medical care, and similar necessities. A contribution may be in cash, goods, or services. The insured is not providing at least one-half of your support unless he or she has done so for a reasonable period of time. Ordinarily, we consider a reasonable period to be the 12-month period immediately

preceding the time when the one-half support requirement must be met under the rules in §§ 404.362–404.364 (for child's benefits) or in § 404.370(f) (for parent's benefits). A shorter period will be considered reasonable under the following circumstances:

(1) At some point within the 12-month period, the insured person started providing at least one-half of your support on a permanent basis and this was a change in the way you had been supported up to then. In these circumstances, the time from the change, when the insured started providing one-half or more of your support, up to the end of the 12-month period may be considered a reasonable period. The change in your source of support must be permanent and not temporary. Changes caused by seasonal employment or customary visits to the insured's home are considered temporary.

(2) The insured provided one-half or more of your support for at least 3 months of the 12-month period, but was forced to stop or reduce contributions because of circumstances beyond his or her control, such as illness or unemployment, and no one else took over the responsibility for providing at least one-half of your support on a permanent basis. Any support you received from a public assistance program is not considered as a taking over of responsibility for your support by someone else. Under these circumstances, a reasonable period is that part of the 12-month period before the insured was forced to reduce or stop providing at least one-half of your support.

(c) *"Living with" the insured.* You are living with the insured if you ordinarily live in the same home with the insured and he or she is exercising, or has the right to exercise, parental control and authority over your activities. You are living with the insured during temporary separations if you and the insured expect to live together in the same place after the separation. Temporary separations may include the insured's absence because of active military service or imprisonment if he or she still exercises parental control and authority. However you are not considered to be living with the insured if you are in active military service or in prison.

§ 404.367 When are you a "full-time student".

You may be eligible for child's benefits if you are a full-time student. A full-time student means a person who is in full-time attendance at an educational institution. You will be considered a full-time student if all the following conditions are met:

(a) You attend an educational institution that is a school (including a technical, trade, or vocational school), junior college, college, or university that meets any one of the following conditions:

(1) It is operated or directly supported by the United States, or by any State, local government or by a political subdivision of any State or local government.

(2) It is approved by a State agency or subdivision of the State or accredited by a State or nationally-recognized accrediting body. A national recognized accrediting body is one determined to be such by the U.S. Commissioner of Education. A State-recognized accrediting body is one designated or recognized by a State as the proper authority for accrediting schools, colleges, or universities. Approval by a State agency or subdivision includes approval of a school, college, or university as an educational institution, or approval of one or more of the courses offered by a school, college or university.

(3) It is a nonaccredited school, college, or university, but its credits are accepted by at least three educational institutions that have been accredited by a State or nationally recognized accrediting body.

(b) You are enrolled in a noncorrespondence course and carrying a subject load that is considered full-time for day students under the practices and standards of the educational institution. If you are enrolled in a junior college, college, or university, your course of study must last at least 13 weeks. If you are enrolled in any other educational institution, your course of study must last at least 13 weeks and your scheduled attendance must be at least 20 hours a week. If your full-time attendance either begins or ends in a month, you will be considered a full-time student for that month. You will not be considered a full-time student in the month you graduate if you completed your course of study and stopped carrying a full-time subject load in a month before the month preceding the month you graduate.

(c) You are not being paid while attending the educational institution by an employer who has requested or required that you attend the educational institution.

§ 404.368 When may you be considered a full-time student during a period of nonattendance.

If you are a full-time student at an educational institution, your eligibility may continue during a period of nonattendance (including part-time attendance) if all the following conditions are met:

(a) The period of nonattendance is 4 consecutive months or less.

(b) You show us that you intend to resume your studies as a full-time student at the end of the period; or at the end of the period you are a full-time student.

(c) The period of nonattendance is not due to your expulsion or suspension from the educational institution.

Parent's Benefits

§ 404.370 Who is entitled to parent's benefits.

You may be entitled to parent's benefits on the earnings record of someone who has died and was fully insured. You are entitled to these benefits if all the following conditions are met:

(a) You are related to the insured person as his or her parent in one of the ways described in § 404.374.

(b) You are at least 62 years old.

(c) You have not married since the insured person died.

(d) You apply.

(e) You are not entitled to an old-age benefit equal to or larger than the parent's benefit amount.

(f) You were receiving at least one-half of your support from the insured at the time he or she died, or at the beginning of any period of disability he or she had that continued up to death. See § 404.366(b) for a definition of "one-half support." If you were receiving one-half of your support from the insured at the time of the insured's death, you must give us proof of this support within 2 years of the insured's death. If you were receiving one-half of your support from the insured at the time his or her period of disability began, you must give us proof of this support within 2 years of the month in which the insured filed his or her application for the period of disability. You must file the evidence of support even though you may not be eligible for parent's benefits until a later time. There are two exceptions to the 2-year filing requirement:

(1) If there is a good cause for failure to provide proof of support within the 2-year period, we will consider the proof you give us as though it were provided within the 2-year period. Good cause does not exist if you were informed of the need to provide the proof within the

2-year period and you neglected to do so or did not intend to do so. Good cause will be found to exist if you did not provide the proof within the time limit due to—

(i) Circumstances beyond your control, such as extended illness, mental or physical incapacity, or a language barrier;

(ii) Incorrect or incomplete information we furnished you;

(iii) Your efforts to get proof of the support without realizing that you could submit the proof after you gave us some other evidence of that support; or

(iv) Unusual or unavoidable circumstances that show you could not reasonably be expected to know of the 2-year time limit.

(2) The Soldiers' and Sailors' Civil Relief Act of 1940 provides for extending the filing time.

§ 404.371 When parent's benefits begin and end.

(a) You are entitled to parent's benefits beginning with the first month covered by your application in which you meet all the other requirements for entitlement.

(b) Your entitlement to benefits ends with the month before the month in which one of the following events first occurs:

(1) You become entitled to an old-age benefit equal to or larger than the parent's benefit.

(2) You marry, unless your marriage is to someone entitled to wife's, widow's, widower's, mother's, father's, parent's, or disabled child's benefits. If you marry a person entitled to these benefits, the marriage is disregarded unless you are a woman and marry someone entitled to disabled child's benefits, in which instance your benfits will end with the same month your spouse's benefits end should he recover from his disabilily.

(3) You die.

§ 404.373 Parent's benefit amounts.

Your parent's monthly benefit before any reduction that may be made as explained in § 404.304, is figured in one of the following ways:

(a) *One parent entitled.* Your parent's monthly benefit is equal to 82½ percent of the insured person's primary insurance amount if you are the only parent entitled to benefits on his or her earnings record.

(b) *More than one parent entitled.* Your parent's monthly benefit is equal to 75 percent of the insured person's primary insurance amount if there is another parent entitled to benefits on his or her earnings record.

§ 404.374 Parent's relationship to the insured.

You may be eligible for benefits as the insured person's parent if—

(a) You are the mother or father of the insured and would be considered his or her parent under the laws of the State where the insured had a permanent home when he or she died;

(b) You are the adoptive parent of the insured and legally adopted him or her before the insured person became 16 years old; or

(c) You are the stepparent of the insured and you married the insured's parent or adoptive parent before the insured became 16 years old. The marriage must be valid under the laws of the State where the insured had his or her permanent home when he or she died. See § 404.303 for a definition of "permanent home".

Special Payment at Age 72

§ 404.380 General.

Some older persons had little or no chance to become fully insured for regular social security benefits during their working years. For those who became 72 years old several years ago but are not fully insured, a "special payment" may be payable as described in the following sections.

§ 404.381 Who is entitled to special age 72 payments.

You are entitled to a special age 72 payment if—

(a) You became 72 years old before 1968 or you have credit for at least 3 quarters of social security work for each calendar year between 1966 and the year you became 72 years old (see Subpart B for a description of these work credits);

(b) You reside in one of the 50 states, the District of Columbia, or the Northern Mariana Islands;

(c) You apply; and

(d) You are a U.S. citizen or a citizen of the Northern Mariana Islands; or you are an alien who was legally admitted for permanent residence in the United States and who has resided here continuously for 5 years. Residence in the United States includes residence in the Northern Mariana Islands, Guam, American Samoa, Puerto Rico, and the Virgin Islands.

§ 404.382 When special age 72 payments begin and end.

(a) Your entitlement to the special age 72 payment begins with the first month covered by your application in which you meet all the other requirements for entitlement.

(b) Your entitlement to this payment ends with the month before the month of your death.

§ 404.383 Special age 72 payment amounts.

If both you and your spouse are entitled to the payment, the husband's payment amount is $83.70 and the wife's payment amount is $41.90. If you are entitled to the special payment but your spouse is not, your payment amount is $83.70. The special payment amounts of $83.70 and $41.90 are payable for months after May 1978; these amounts will increase because of cost-of-living increases that occur after 1978. The special payment may be reduced, suspended, or not paid at all as explained in § 404.384.

§ 404.384 Reductions, suspensions, and nonpayments of special age 72 payments.

(a) *General.* Special age 72 payments may not be paid for any month you receive public assistance payments. The payment may be reduced if you or your spouse are eligible for a government pension. In some instances, the special payment may not be paid while you are outside the United States. The rules on when special payments may be suspended, reduced, or not paid are provided in paragraphs (b)–(e) of this section.

(b) *Suspension of special age 72 payments when you receive certain assistance payments.* You cannot receive the special payment if supplemental security income or aid to families with dependent children (AFDC) payments are payable to you, or if your needs are considered in setting the amounts of these assistance payments made to someone else. However, if these assistance payments are stopped, you may receive the special payment beginning with the last month for which the assistance payments were paid.

(c) *Reduction of special age 72 payments when you or your spouse are eligible for a government pension.* Special payments are reduced for any regular government pension (or lump-sum payment given instead of a pension) that you or your spouse are eligible for at retirement. A government pension is any annuity, pension, or retirement pay from the Federal Government, a State government or political subdivision, or any organization wholly owned by the Federal or State government. Also included as a government pension is any social security benefit. The term govenment pension does not include workmen's compensation payments or

Veterans Administration payments for a service-connected disability or death.

(d) *Amount of reduction because of a government pension.* If your spouse is eligible for a government pension but is not entitled to the special payment, your special payment is reduced by the difference between the pension amount and the special payment amount due a wife. This is in addition to any reduction to be made in your payment if you are also entitled to, or eligible for, a government pension. If both you and your spouse are entitled to the special payment, each one's payment is first reduced by the amount of his or her own government pension (if any). Then, the wife's special payment is reduced by the amount that the husband's government pension exceeds the husband's special payment. The husband's special payment is also reduced by the amount that the wife's government pension exceeds the wife's special payment.

(e) *Nonpayment of special age 72 payments when you are not residing in the United States.* No special payment is due you for any month you are not a resident of one of the 50 States, the District of Columbia, or the Northern Mariana Islands. Also, payment to you may not be permitted under the rules in § 404.463 if you are an alien living outside the United States.

Lump-Sum Death Payment

§ 404.390 General.

If a person is fully or currently insured when he or she dies, a lump-sum death payment of $255 may be paid to the widow or widower of the deceased if he or she was living in the same household with the deceased at the time of his or her death. If the insured is not survived by a widow or widower who meets this requirement, all or part of the $255 payment may be made to someone else as described in § 404.392.

§ 404.391 Who is entitled to the lump-sum death payment as a widow or widower.

You are entitled to the lump-sum death payment as a widow or widower if—

(a) You are the widow or widower of the deceased insured individual based upon a relationship described in §§ 404.345 or 404.346;

(b) You apply for this payment within two years after the date of the insured's death. You need not apply again if, in the month prior to the death of the insured, you were entitled to wife's or husband's benefits on his or her earnings record; and

(c) You were living in the same household with the insured at the time of his or her death. The term "living in the same household" is defined in § 404.347.

§ 404.392 Who is entitled to the lump-sum death payment when there is no eligible widow or widower.

If the deceased individual is not survived by a widow or widower who meets the requirements of § 404.391, the lump-sum death payment shall be paid as follows:

(a) If all or part of the burial expenses of the deceased incurred by a funeral home remain unpaid, the funeral home may receive the lump-sum death payment to the extent of the unpaid expenses if—

(1) A person who has assumed the responsibility for paying these expenses applies for the lump-sum death payment within 2 years of the insured's death, asking that the payment be made to the funeral home; or

(2) At least 90 days have gone by since the death of the insured, no person has assumed responsibility for paying the burial expenses, and the funeral home director or other official of the funeral home applies for the payment.

(b) If all the burial expenses of the insured that were incurred by a funeral home have been paid, and any part of the lump-sum death payment remains, it may be paid to a person who paid these burial expenses and who applies for the payment within 2 years of the insured's death.

(c) If the body of the deceased is not available for burial, but expenses were incurred in connection with a memorial service or any other item for which expenses are customarily incurred in connection with disposing of a deceased's remains, the lump-sum death payment may be paid to a person who paid the expenses and applies for the payment within 2 years of the insured's death.

(d) If any part of the lum-sum death payment remains after payments have been made under paragraphs (a), (b), and (c) of this section, that part of the payment may be made to a person who applies within 2 years of the insured's death and who has paid other expenses of a burial in the following order of priority—

(1) Expenses of opening and closing the grave;

(2) Expenses of providing the burial plot; and

(3) Any remaining expenses in connection with the burial.

§ 404.393 Who is entitled to the lump-sum death payment when burial expenses are paid from the deceased's funds.

If funds of a deceased person were used to pay any of the burial expenses for which payment of the lump-sum can be made under the rules in § 404.392, the deceased person's estate may be entitled to the lump-sum death payment. If you apply for the payment on behalf of a person's estate, you must show you are the legal representative (administrator or executor) of the estate. If there is no legal representative and none will be appointed, you must agree to divide the payment among those who have a right to it under State law, or under foreign law, that applies where the deceased had his or her permanent home at death. We may also require that you get written approval to receive the payment from any of the deceased's closest relatives who are available. A person's closest relatives follow this order: widower or widow; children and the children of any deceased children; parents; brothers and sisters and the children of any deceased brothers and sisters; and other relatives by blood or adoption.

§ 404.394 Who is not entitled to the lump-sum death payment.

The following persons and organizations are not entitled to the lump-sum payment—

(a) The U.S. Government or a foreign government;

(b) Any person who has received or will receive repayment from any other source for the burial expenses he or she paid;

(c) Persons and organizations who are required by a contract to pay the burial expenses except for a tax-exempt, nonprofit home for the sick or aged that paid for burial of a deceased resident or guest or a tax-exempt, nonprofit fraternal organization that paid a member's burial expenses not covered by an express contract;

(d) An employer or organization that paid burial expenses of an employee or member under a plan, system, or general practice other than a home for the sick or aged or a fraternal organization mentioned in paragraph (c) of this section; and

(e) A person or organization that furnished goods or services for the burial unless the goods or services were furnished by—

(1) A State or a political subdivision of a State;

(2) An organization exempt from income tax under § 501(c)(3) or (13) of the Internal Revenue Code; or

(3) A funeral director in connection with burial of a close relative.

Subpart H [Amended]

3. Subpart H is amended by adding the phrase "or divorced husband" to the first sentences of §§ 404.723 and 404.728(a) so as to read as follows:

§ 404.723 When evidence of marriage is required.

If you apply for benefits as the insured person's husband or wife, widow or widower, divorced wife or divorced husband, we will ask for evidence of the marriage and where and when it took place.* * *

§ 404.728 Evidence a marriage has ended.

(a) *When evidence is needed that a marriage has ended.* If you apply for benefits as the insured person's divorced wife or divorced husband, you will be asked for evidence of your divorce.* * *

4. Subpart H is further amended by revising the first sentence of section 404.780(a) so as to read as follows:

§ 404.780 Evidence of "good cause" for exceeding time limits on accepting proof of support or application for a lump-sum death payment.

(a) *When evidence of "good cause" is needed.* We may ask for evidence that you had "good cause" (as defined in § 404.370(f)) for not giving us sooner proof of the support you received from the insured as his or her parent. We may also ask for evidence that you had "good cause" (as defined in § 404.621(b)) for not applying sooner for the lump-sum death payment. You may be asked for evidence of "good cause" for these delays if—* * *

BILLING CODE 4110-07-M

Food and Drug Administration

[Docket No. 77F-0441]

21 CFR Part 177

Indirect Food Additives: Polymers Polyethersulfone Resins

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the food additive regulations to provide for the safe use of polyethersulfone resins as articles or components of articles intended for repeated use in contact with food. ICI Americas, Inc., filed a petition for such use.

DATES: Effective June 15, 1979; objections by July 16, 1979.

ADDRESS: Written objections to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St., SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: A notice published in the Federal Register of February 7, 1978 (43 FR 5071) announced that a food additive petition (FAP 7B3342) had been filed by ICI Americas, Inc., Wilmington, DE 19897, proposing that Part 177 (21 CFR Part 177), Subpart C, of the food additive regulations be amended to provide for the use of polyethersulfone resins as articles or as components of articles intended for repeated use in contact with food.

The Food and Drug Administration has evaluated data in the petition and other relevant material and concludes that the food additive regulations should be amended as set forth below to provide for the use of the petitioned additive.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409, 72 Stat. 1785-1788 as amended (21 U.S.C. 348)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 177 is amended by adding new § 177.2440 to read as follows:

§ 177.2440 Polyethersulfone resins.

Polyethersulfone resins identified in paragraph (a) of this section may be safely used as articles or components of articles intended for repeated use in contact with food, at use temperatures not exceeding 212° F, in accordance with the following prescribed conditions:

(a) For the purpose of this section, polyethersulfone resins (poly(oxy-*p*-phenylenesulfonyl-*p*-phenylene) resins) (CAS Reg. No. 25667-42-9) consist of basic resins produced by the polymerization of the monopotassium phenate salt prepared from 4,4'-dichlorodiphenylsulfone such that the finished resins have a minimum number average molecular weight of 16,000, as determined by reduced viscosity in dimethyl formamide in accordance with ASTM Method D2857-70 (Reapproved 1977),[1] which is incorporated by reference.

(b) The basic resins identified in paragraph (a) of this section may contain optional adjuvant substances used in their production. These adjuvants may include substances described in § 174.5(d) of this chapter and the following:

List of substances	*Limitations*
Diphenylsulfone	Not to exceed 0.2 percent as residual solvent in the finished basic resin.
Dimethyl sulfoxide	Not to exceed 0.01 percent as residual solvent in the finished basic resin.

(c) The finished food-contact article, when extracted at reflux temperatures for 2 hours with the following four solvents, yields net chloroform-soluble extractives in each extracting solvent not to exceed 0.02 milligram per square inch of food-contact surface: distilled water, 50 percent (by volume) ethyl alcohol in distilled water, 3 percent acetic acid in distilled water, and *n*-heptane. (Note: In testing the finished food-contact article, use a separate test sample for each required extracting solvent.)

(d) In accordance with good manufacturing practice, finished food-contact articles containing the polyethersulfone resins shall be thoroughly cleansed before their first use in contact with food.

Any person who will be adversely affected by the foregoing regulation may at any time on or before July 16, 1979, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective June 15, 1979.

---

BILLING CODE 4110-03-M

DEPARTMENT OF JUSTICE

Parole Commission

28 CFR Part 2

Paroling, Recommitting and Supervision Federal Prisoners; Correction

AGENCY: U.S. Parole Commission.

ACTION: Final rule; correction.

SUMMARY: This document further corrects and clarifies the final rule relating to Parole, Recommitting and Supervising Federal Prisoners appearing at 43 FR 38822, Thursday, August 31, 1978 as amended at 44 FR 3409, Tuesday, January 16, 1979 and corrected at 44 FR 31637, Friday, June 1, 1979.

EFFECTIVE DATE: Friday, June 1, 1979.

FOR FURTHER INFORMATION CONTACT: Michael A. Stover, phone (202) 724–7567.

SUPPLEMENTARY INFORMATION: In FR 78–24603 issue of Thursday, August 31, 1978 page 38822 in § 2.32(a)(1) the quotation marks should be removed around: Parole to the actual physical custody of the detaining authorities only.

In 2.32(a)(2) the quotation marks should be removed around: Parole to the actual physical custody of the detaining authorities or an approved plan.

In 2.32(b) the quotation marks should be removed around: Parole to the actual physical custody of the immigration authorities or an approved plan.

In 2.32(c) the quotation marks should be reinserted in the first sentence of that subsection as follows: As used in this section "parole to a detainer" means release to the "physical custody" of the authorities who have lodged the detainer.

Dated: June 11, 1979.

Cecil C. McCall,

Chairman, United States Parole Commission.

[FR Doc. 79-18937 Filed 6-14-79; 8:45 am]

BILLING CODE 4410-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1613

Equal Employment Opportunity in the Federal Government

AGENCY: Equal Employment Opportunity Commission.

ACTION: Interpretation of Commission regulation.

SUMMARY: This document sets forth the Commission's interpretation of the phrase "receipt of his [or her] agency's notice of final decision on his [or her] complaint" as used in the Commission's regulations governing the processing of a Federal EEO appeal from a final agency decision (29 CFR 1613.233(a), formerly 5 CFR 713.233(a)).

DATES: Notice of this interpretation is effective June 15, 1979.

SUPPLEMENTARY INFORMATION: Pursuant to Reorganization Plan No. 1 of 1978 (43 FR 19807 (May 9, 1978)), the administration and enforcement of equal opportunity in Federal employment vested in the Civil Service Commission pursuant to section 717 (b) and (c) of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e–16 (b) and (c), were transferred to the Equal Employment Opportunity Commission as of January 1, 1979. 43 FR 60964 (December 29, 1978). The Commission adopted certain of the regulations of the Civil Service Commission which were codified at 5 CFR Part 713, and moved the regulations to Title 29, Part 1613, of the Code of Federal Regulations. 43 FR 60900 (December 29, 1978). In addition, certain technical changes were made in the regulations in order to reflect the transfer of authority with respect to Federal EEO from the Civil Service Commission to the Equal Employment Opportunity Commission.

The regulations adopted from the Civil Service Commission (43 FR 60900, December 29, 1978) provide that a complainant may appeal the final agency decision on a claim of discrimination to the EEOC, but the appeal must be filed within 15 days from receipt of the final agency decision. 29 CFR § 1613.233(a) (formerly 5 CFR § 713.233(a)). The date of receipt is crucial because it triggers the running of the time period within which the complainant must file his or her appeal. In many cases, however, evidence of receipt of the final agency decision is lacking. Accordingly, the Commission hereby adopts the presumption that in all cases in which evidence of the actual date of receipt is lacking, the final agency decision will be deemed to have been received 5 days following the date of the decision. This is a rebuttable presumption. 29 CFR § 1633.233(b).

Signed at Washington, D.C. this 12th day of June, 1979.

For the Commission.

Eleanor Holmes Norton,

Chair, Equal Employment Opportunity Commission.

[FR Doc. 79-18742 Filed 6-14-79; 8:45 am]

BILLING CODE 6750-06-M

29 CFR Part 1613

Equal Employment Opportunity in the Federal Government

AGENCY: Equal Employment Opportunity Commission.

ACTION: Interim revised regulations with comments invited for consideration in final rulemaking.

SUMMARY: The Equal Employment Opportunity Commission adopted certain of the regulations of the Civil Service Commission, which were codified at 5 CFR Part 713, with respect to equal employment opportunity in the federal government and moved the regulations to Title 29, Part 1613, of the Code of Federal Regulations. 43 FR 60900 (December 29, 1979). The Commission is now revising § 1613.221 and § 1613.233 of these regulations.

DATE: The interim regulations will become effective on June 22, 1979 and will remain effective until final regulations are issued. Written comments on the interim regulations must be received on or before August 15, 1979.

ADDRESSES: Interested persons are invited to submit written comments on the proposed revised regulations to Marie Wilson, Executive Secretariat, Equal Employment Opportunity Commission, 2401 E Street, Northwest, Washington, D.C. 20506. Copies of the comments submitted by the public will be available for review at the Social Sciences Library, Room 2003, EEOC, 2401 E Street, Northwest, Washington, D.C. 20506, between the hours of 9:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Constance L. Dupre, Associate General Counsel, EEOC, 2401 E Street, Northwest, Washington, D.C. 20506, 202–634–6595.

SUPPLEMENTARY INFORMATION: 29 CFR 1613.221(b)(1) currently provides that the decision of the agency shall be transmitted by letter to the complainant and his representative, but this section

does not contain any provision relating to proof of receipt. Therefore, the Commission is revising its regulations to require a method of delivery by the agencies which will allow proof of receipt to be established. The Commission is also revising § 1613.221(d) to require agencies to cite § 1613.233 (a) and (b) (concerning time limitations) in final agency decisions so as to ensure that complainants are fully aware of their appeal rights.

It should be noted that the form letters prescribed in FPM letter 713.21 are necessarily also modified by the adoption of the revision to § 1613.221(d).

Section 1613.233(a) currently requires that a complainant file his appeal not later than 15 calendar days after receipt of the agency decision. There has been some confusion on the part of the complainants as to whether they were required to file a brief or statement of reasons for their appeal within the fifteen days, or whether the filing of a notice of appeal was sufficient to preserve their appeal rights. Section 1613.233(a), as proposed, makes two changes. It provides that a complainant will have 20 days within which to file a "notice of appeal". This provision will be applied retroactivity to pending appeals. The revised regulation also provides for an additional 30 calendar days after the filing of a "notice of appeal" within which to submit a brief or statement in support of the appeal. The Commission has also reworded § 1613.233(b) to change its emphasis.

Prior to publication in the Federal Register, the proposed regulations were circulated to all affected federal agencies for comment. They were revised to incorporate certain agency suggestions received.

These regulations have been reviewed in accordance with Executive Order 12044. These regulations are not "substantial regulations" under section 2(e) of that Order nor do they require regulatory analysis under section 3 of that Order.

Pursuant to 5 U.S.C. 553(d)(3), the Commission finds that good cause exists for making these revised regulations effective in less than 30 days, in order to provide continuity of operation in the processing of Federal EEO appeals. The interim revised regulations appear below.

Signed at Washington, D.C. this 12th day of June, 1979.

For the Commission.

Eleanor Holmes Norton,

Chair Equal Employment Opportunity Commission.

PART 1613—EQUAL EMPLOYMENT OPPORTUNITY IN THE FEDERAL GOVERNMENT

29 CFR Part 1613 is amended by revising § 1613.221(b)(1) and (d) to read as follows:

§ 1613.221 Decision by head of agency or designee.

(a) * * *

(b)(1) The decision of the agency shall be in writing, shall reflect the date of its issuance, and shall be transmitted to the complainant and his or her representative either by certified mail, return receipt requested, or by any other method which enables the agency to show the date of receipt.

(c) * * *

(d) The decision letter shall inform the complainant of his or her right to appeal the decision of the agency to the Commission and shall include the text of 29 CFR § 1613.233 (a) and (b). The decision letter shall also inform the complainant of his or her right to file a civil action.

29 CFR Part 1613 is amended by revising § 1613.233 (a) and (b) to read as follows:

§ 1613.233 Time limit.

(a) Except as provided in paragraph (b) of this section, a complainant may file a notice of appeal at any time up to 20 calendar days after receipt of the agency's notice of final decision on his or her complaint. An appeal shall be deemed filed on the date it is postmarked, or, in the absence of a postmark, on the date it is received by the Commission. Any statement or brief in support of the appeal must be submitted to the Commission and to the defendant agency within 30 calendar days of filing the notice of appeal.

(b) The 20-day time limit within which a notice of appeal must be filed will not be extended by the Commission unless, based upon a written statement by the complainant showing that he or she was not notified of the prescribed time limit and was not otherwise aware of it or that circumstances beyond his or her control prevented the filing of a Notice of Appeal within the prescribed time limit, the Commission exercises its discretion to extend the time limit and accept the Appeal.

BILLING CODE 6570-06-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Parts 67 and 68

[DoD Directive 1200.1] [1]

Allocation of Reserve Forces Units to and Determination of Manpower in Local Communities

AGENCY: Office of the Secretary of Defense.

ACTION: Final rule.

SUMMARY: This rule consolidates this Part 67 and 32 CFR Part 68 to update and clarify DoD policy and procedures regarding the allocation of Reserve forces units to local communities. These procedures outline certain factors for the Secretaries of the Military Departments to consider when formulating plans for the allocation of a Reserve unit to a local community. These procedures are to ensure that Reserve component units in local communities do not exceed the number that may reasonably be expected to be maintained at authorized strength.

EFFECTIVE DATE: April 21, 1979.

FOR FURTHER INFORMATION CONTACT: Colonel Giles A. Bax, Office of the Deputy Assistant Secretary of Defense (Reserve Affairs), The Pentagon, Washington, D.C. 20301, Telephone: 202-697-9328.

SUPPLEMENTARY INFORMATION: In FR Doc. 71-18188, appearing in the Federal Register (36 FR 23328) on December 11, 1971, the Office of the Secretary of Defense published Part 67 effective on July 14, 1978, which established a uniform procedure in the allocation of reserve forces units of the military departments to local communities in accordance with the reserve manpower potential. This rule updates the July 14, 1970 directive and incorporates Part 68 (DoD Directive 1200.10) which is being canceled as a separate action (44 FR 33309). Part 68 was entitled, "Determination of Manpower Available for Reserve Units in Specific Areas." This Part now includes the provisions of manpower determinations in accordance with 10 U.S.C. 2236(1).

Accordingly, we are revising Part 67, 32 CFR, Chapter I, reading as follows:

---

[1] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120. Attention: Code 301.

PART 67—ALLOCATION OF RESERVE FORCES UNITS TO AND DETERMINATION OF MANPOWER IN LOCAL COMMUNITIES

Sec.
67.1 Purpose.
67.2 Applicability and Scope.
67.3 Policy.
67.4 Responsibilities.
67.5 Limitation.
67.6 Procedures.

Authority.—The provisions of this Part 67 issued under 5 U.S.C. 301.

§ 67.1 Purpose.

This Part consolidates into a single document § 67 and § 68 and provides standard procedures (a) in the allocation of Reserve forces units of the Military Departments to local communities in accordance with the Reserve manpower potential, and (b) for making manpower determinations in accordance with Title 10, U.S.C. Section 2234(1), Chapter 133.

§ 67.2 Applicability and Scope.

(a) The provisions of this Directive apply to the Office of the Secretary of Defense and the Military Departments. The term "Military Services," as used here, refers to the Army, the Navy, the Air Force, and the Marine Corps.

(b) Its provisions do not apply to actions involving Guard and Reserve units of the same Service being relocated within a 15-mile radius of the present location.

§ 67.3 Policy.

(a) Reserve component units located or to be located in a local community will not be larger than the number that may reasonably be expected to be maintained at authorized strength.

(b) The manpower potential of the area will be reviewed to determine if it is adequate to meet and maintain authorized strengths in accordance with 10 U.S.C. 2234(1) prior to granting approval for construction of a Reserve forces facility.

(c) Procedures in § 67.6 will be followed to comply with above policy.

§ 67.4 Responsibilities.

The *Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics)* (ASD (MRA&L)), or designee, shall:

(a) Provide tentative approval when a Military Department formulates a plan for the allocation of a Reserve unit to a local community where a unit of that department did not formerly exist.

(b) Resolve cases where complete coordination cannot be effected under the procedures of paragraphs (a) and (b) of § 67.6.

(c) Make final construction determination with respect to the requirements of paragraph (e) of § 67.6 and 10 U.S.C. 2234(1).

§ 67.5 Limitation.

Nothing in this Part shall be construed in any way to limit the rights of the Governors of the several States to fix the location of units of the National Guard within their respective borders, as authorized by 32 U.S.C. 104(a), Chapter 1.

§ 67.6 Procedures.

(a) When a Millitary Department formulates a plan for the allocation of a Reserve unit to a local community where a unit of that department did not formerly exist, the Secretary of the Military Department concerned will consider the factors in paragraph (d), below, and coordinate such tentative location with the ASD (MRA&L), the Secretaries of the other Military Departments and, when appropriate, with the Governor of the State concerned.

(b) The Military Department may also, through command channels, utilize the advice of all military and civilian agencies concerned with Reserve facilities, including the State Reserve Forces Facilities Boards (DoD Directive 5126.24,[1] "Duties and Responsibilities of State Guard/Reserve Forces Facilities Boards," August 1, 1973), and the Reserve Forces Policy Board, Office of the Secretary of Defense.

(c) If complete coordination cannot be effected, the plan will be forwarded to the ASD (MRA&L) for resolution. The plan will include how the factors in paragraph (d), below, were considered. Final coordination must be completed prior to the announcement establishing a unit.

(d) When approval is sought for the construction of a Reserve forces facility for a unit or units, the Military Service concerned shall review the Reserve component manpower potential of the area to determine whether it is adequate to meet and maintain the authorized strengths (approved manning levels) of its Reserve component units considering the factors outlined below. This review shall address, but not be limited to:

(1) The manpower marked potential of the area to include: (i) The age and educational/skill distribution of the population;

(ii) The number of prior service personnel in the area by skills (requests for this information may be submitted directly to: Director, Defense Manpower Data Center, 300 N. Washington Street, Alexandria, VA 22314); and,

(iii) Any other manpower factors which would affect Reserve component participation in the area.

(2) The history of authorized and actual strengths of National Guard and Reserve units in the area; and the authorized strengths of units allocated to the area but not yet activated of all Reserve Components (Army and Air National Guard, and Army, Navy, Air Force, Marine Corps, and Coast Guard Reserve).

(3) Community attitude toward National Guard and Reserve units.

(4) Industrial and professional composition of the community as related to the skill requirements of the units.

(5) Projected growth and composition of the population.

(6) Environmental impact of unit location on the community.

(e) If a positive determination is made following the procedures in (d), above, the Military Service concerned shall coordinate this determination with other Services having Reserve component units in the area. Based on this coordinated determination, the following statement shall be included in project justification documents:

"The Reserve manpower potential to meet and maintain authorized strengths of all Reserve units in the area in which this facility is to be located has been reviewed in accordance with the procedures described in § 67. It has been determined, in coordination with all other Services having Reserve units in the area, that the number of units of the Reserve components of the Armed Forces presently located in the area, and those which have been allocated to the area for future activation, is not and will not be larger than the number that reasonably can be expected to be maintained at authorized strength."

(1) The above statement will be retained in the project file by the Reserve component concerned.

(2) Individual manpower determination statements will be consolidated by the Reserve components and included as a program statement when the military construction program is submitted to the Secretary of Defense for congressional review in accordance with 32 CFR § 246.

(f) Programing of construction projects and authorizations for construction will be in accordance with 32 CFR § 246.

PART 68—[Removed]

2. Part 68 is removed.

BILLING CODE 7710-12-M

39 CFR Part 111

Preparation for Mailing; Second-Class Bulk Mailings, Key Rate Second-Class Publications

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This rule amends postal regulations to require publishers of second-class publications, for which the key rate method of computing postage is used, to submit a statement on Form 3541, Statement of Mailing—Second-Class Publications, showing the number of subscribers' copies of an issue to each zone, at six month intervals, instead of the current twelve month interval. This rule also requires publishers to submit such a statement when there is a postage rate change. The purpose of the rule is to enable the Postal Service to compute key rates which reflect more up-to-date circulation data, increasing the likelihood that the proper postage can be calculated and collected.

EFFECTIVE DATE: July 16, 1979.

FOR FURTHER INFORMATION CONTACT: Ernest J. Collins at (202) 245–4749.

SUPPLEMENTARY INFORMATION: On December 11, 1978, the Postal Service published for comment in the Federal Register proposed changes to Part 125 of the Postal Service Manual as described above (43 FR 57924). Interested persons were invited to submit written comments concerning the proposed changes by January 10, 1979.

Written comments were received from three publications and an oral comment was received from another publication.

Two commenters disagreed with the proposed changes regarding when a new zone statement must be submitted. One of those commenters objected to the proposed requirement that publishers submit a new zone statement every six months. The commenter would prefer the Postal Service require a new zone statement only when there is a rate change or when the postmaster requests it.

The other commenter took the opposite view and objected to the proposed requirement that publishers submit a new zone statement when there is a postage rate change. The objection was on the grounds that, if a new zone statement is prepared every six months, the proper postage rates should be assessed regardless of rate changes.

One of the major causes of inaccurate postage payments when the key rate is used is the failure of publishers to submit a new zone statement when a change in zone distribution occurs between the time the key rate is computed and a mailing is made. If the publisher performs a periodic analysis of zone distribution any changes in that distribution should be discovered. For this reason, the Postal Service considers routine zone distribution analysis by publishers essential. We believe that every six months is a reasonable period for requiring a zone analysis. Although sometimes post offices will notice that there is a change in zone distribution when a mailing is made and request a publisher to submit a new zone analysis, reliance cannot be placed on post offices to always detect those changes.

Because key rates are based on postage rates as well as distribution, it seems apparent that a new key rate should be computed every time second-class postage rates change. To compute an accurate key rate, it is necessary to use both current postage rates and the most up-to-date zone distribution data.

The Postal Service recognizes that a rate change may occur close to the time when a publisher's semi-annual statement is due. We do not wish to unduly burden publishers by requiring the submission of a statement when there is a rate change and then requiring a routine semi-annual statement to be submitted a month or two later. Accordingly, the Postal Service has revised the final rule, in section 125.722 (which corresponds to section 125.73 of the proposal), to provide that when a new statement is filed because of a rate change the next semi-annual statement need not be filed until six months after the rate change statement was filed.

One comment was a suggestion that all post offices allow second-class publishers to use the key rate method of computing postage. The commenter complained that because all post offices do not permit postage computations based on the key rate, publishers are sometimes required to use two different methods for preparation of the Form 3541, one for key rate computation and another for regular computation.

The key rate should only be used when the zone distribution and circulation of a publication remain stable, when the volume of mail is large, and when the publisher submits accurate and timely data. Postmasters have the option of allowing a publisher to use the key rate because the local postmaster, using the above criteria, is best able to determine whether a publisher's use of the key rate is justified.

Another commenter voiced his support for the proposal provided that his statement of distribution could be submitted during November and May. We have no objection to the publisher submitting his statement during those months. Section 125.721 of the final rule, which was section 125.72 of the proposal, only requires that a statement of distribution be submitted at six month intervals; it does not specify particular months the statement must be submitted.

The fourth commenter mistakenly appeared to believe that the proposed regulation was intended to apply to controlled circulation publications.

However, the regulation applies only to second-class publications.

This regulation amends Chapter I of the Postal Service Manual. The Postal Service plans to replace Chapter I of the Postal Service Manual with the Domestic Mail Manual (see 44 FR 24432). Existing regulations which will be included in the Domestic Mail Manual have been reviewed, restructured and rewritten in order to make the Domestic Mail Manual easier to read and understand than the present Postal Service Manual. Sentence structure, grammar and language have been changed in many regulations to accomplish this goal. In keeping with the format of the Domestic Mail Manual, the Postal Service has reorganized, rewritten, and renumbered this regulation. None of these changes are intended to alter the substance of the regulation as it was proposed.

In view of the considerations discussed above, the Postal Service hereby adopts, as amended, the following revision of the Postal Service Manual:

PART 125—SECOND-CLASS BULK MAILINGS

In 125.7 revise .72 and add new .721, .722, .723 to read as follows; delete existing .73; and renumber .74 as .73, .741 as .731, .742 as .732, .743 as .733; and revise .731 to read as follows:

.72 *Statements of Distribution*

.721 *Semi-Annual Statements.* The publisher must submit twice each calendar year, at 6-month intervals, a Form 3541, showing the number of subscribers' copies of an issue mailed to each zone.

.722 *Other Statements.* The publisher must submit a Form 3541, showing the mailings to each zone at any time during the 6-month intervals when the volume of mailings to the zones varies, when there is an increase in the total number of copies, or when there is a postage rate change. When the form 3541 is filed because of a rate change, the semi-annual statement need not be filed until six months after the filing of the rate change statement.

.723 *Between Statements.* During the 6-month period or other intervals, the publisher need not complete the lines for zones 1 to 8 on Form 3541. The publisher must enter only total zone mailings on the "Total Copies" lines.

125.73 *Computation*

.731 *When To Compute.* A new key rate must be computed by the postmaster and used whenever a Form 3541 is submitted in accordance with 125.72.

These changes will be renumbered and incorporated in the Domestic Mail Manual upon its adoption. The Domestic Mail Manual will replace chapter I of the Postal Service Manual (See 44 FR 24432). The Postal Service Manual is incorporated by reference in the Federal Register (See 39 CFR 111.3).

(39 U.S.C. 401(2), 403.)

W. Allen Sanders,

Acting Deputy General Counsel.

[FPR Amendment 200]

Miller Act Bonds and Bond Premiums

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment of the Federal Procurement Regulations (FPR) modifies the requirement for Miller Act bonds and the payment of premiums. The amendment codifies the telegram sent to Executive Agencies on November 13, 1978, concerning Pub. L. 95-585 which increased the level at which Miller Act bonds are required from $2,000 to $25,000. The amendment also implements the Comptroller General Decision B-189402, October 12, 1977, which reversed an earlier position and now permits payment of full bond premiums if the contract specifically so provides. The intended effect of this amendment is to provide uniform administration of the two items and to permit contractors to recover the amount of premiums early in the performance of the contract.

EFFECTIVE DATE: This amendment is effective July 16, 1979, but may be observed earlier.

FOR FURTHER INFORMATION CONTACT: Philip G. Read, Director of Federal Procurement Regulations Directorate (APR), 703-557-8947.

PART 1-7—CONTRACT CLAUSES

Subpart 1-7.6 Fixed-Price Construction Contracts

Section 1-7.602-7 is amended to redesignate paragraph (e) of the clause prescribed by the section as paragraph (f), and to add a new paragraph (e) as follows:

§ 1-7.602-7 Payments to contractor.

Payments to Contractor

* * * * *

(e) If Miller Act (40 U.S.C. 270a-270e) performance or payment bonds are required under this contract, the Government shall pay to the Contractor the total premiums paid by the contractor to obtain the bonds. This payment shall be paid at one time to the contractor together with the first progress payment otherwise due after the contractor has (1) furnished the bonds (including coinsurance and reinsurance agreements, when applicable), (2) furnished evidence of full payment to the surety company, and (3) submitted a request for such payment. The payment by the Government of the bond premiums to the contractor shall not be made as increments of the individual progress payments and shall not be in addition to the contract price.

(f) Upon completion and acceptance of all work, the amount due the Contractor under this contract shall be paid upon the presentation of a properly executed voucher and after the Contractor has furnished the Government with a release of all claims against the Government, arising by virtue of this contract, other than claims in stated amounts as may be specifically excepted by the Contractor from the operation of the release. If the Contractor's claim to amounts payable under the contract has been assigned under the Assignment of Claims Act of 1940, as amended (31 U.S.C. 203, 41 U.S.C. 15), a release may also be required of the assignee.

PART 1-10—BONDS AND INSURANCE

Subpart 1-10.1—Bonds

1. Section 1-10.103-1 is amended to revise paragraph (a), as follows:

§ 1-10.103-1 Policy on use.

(a) The use of bid guarantees is required when a performance bond or a performance and payment bond is required.

* * * * *

2. Section 1-10.103-3 is amended to revise paragraph (a)(1), as follows:

§ 1-10.103-3 Invitation for bids provisions.

(a) When a bid guarantee is required, the invitation for bids shall contain:

(1) A statement that a bid guarantee is required with the bid and that identifies details which will enable bidders to determine the amount of the bid guarantee.

* * * * *

3. Section 1-10.104-1 is amended to revise paragraph (a), as follows:

§ 1-10.104 Performance bonds.

§ 1-10.104-1 Construction contracts.

(a) Under the Miller Act, as amended (40 U.S.C. 270a-270e), a performance bond shall be required in connection

with any construction contract exceeding $25,000 in amount, except that this requirement may be waived (1) by the contracting officer for work to be performed in a foreign country, if he finds that it is impracticable for the contractor to furnish such bond, and (2) as otherwise authorized by law.

* * * * *

(4) Section 1–10.105–1 is amended to revise paragraph (a), as follows:

§ 1–10.105 Payment bonds.

§ 1–10.105–1 Construction contracts.

(a) Under the Miller Act, as amended (40 U.S.C. 270a–270e), a payment bond shall be required in connection with any construction contract exceeding $25,000 in amount, except that this requirement may be waived (1) by the contracting officer for work to be performed in a foreign country, if he finds that it is impracticable for the contractor to furnish such bond, and (2) as otherwise authorized by law.

* * * * *

PART 1–16—PROCUREMENT FORMS

Subpart 1–16.4—Forms for Advertised Construction Contracts

Section 1–16.401 is amended to revise paragraphs (a) and (e), as follows:

§ 1–16.401 Forms prescribed.

* * * * *

(a) Invitation, Bid and Award (Construction, Alteration, or Repair) (Standard Form 19, July 1973 edition). Pending the publication of a new edition of the form, the following modifications are authorized.

(1) *Face of form.* (i) Under the section designated "Bid", change the second sentence to read, as follows: "The undersigned further agrees, if any contract award resulting from this bid exceeds $2,000, to comply with the provisions of Standard Form 19–A, Labor Standards Provisions Applicable to Contracts in Excess of $2,000."

(ii) Under the section designated "Award", line through or otherwise delete the block and the words "Notice to proceed will be issued upon receipt of acceptable payment and performance bonds."

(2) *Back of form.* The Examination of Records by Comptroller General clause, the Utilization of Small Business Concerns clause and the Utilization of Minority Business Enterprises clause shall be deleted in their entirety; the Convict Labor clause prescribed by § 1–12.204 shall be substituted for the Convict Labor Clause in Article 10; the Employment of the Handicapped clause in § 1–12.1304–1 shall be added as an additional article of the General Provisions; and the following clause shall be substituted for the Payments to Contractor clause in Article 6:

6. *Payments to contractor.* (a) Progress payments equal to the value of the work performed shall be made monthly or at more frequent intervals as determined by the Contracting Officer on estimates approved by him. Upon payment, therefor, title to the property shall vest in the Government, but this provision shall not be construed as relieving the Contractor from the sole responsibility for all material and work upon which payments have been made. The Contractor will notify the Government when all work is complete. Final payment will be made after final acceptance.

* * * * *

(e) Bid Form (Construction Contract) (Standard Form 21, February 1979 edition). Pending the publication of a new edition of the form, the back of the form shall be modified as follows:

(1) Change the first sentence to read:

The undersigned agrees that, upon written acceptance of this bid, mailed or otherwise furnished within ———— calendar days (**calendar days unless a different period is inserted by the bidder) after the date of opening of bids, he will within 15 calendar days (unless a longer period is allowed) after receipt of the prescribed forms, execute Standard Form 23, Construction Contract, and give performance and payment bonds*, as required, on Government standard forms with good and sufficient surety.

(2) Add as a footnote:

*Performance and payment bonds shall be furnished when (1) the contract award resulting from this bid exceeds $25,000, or (2) bonds are specifically required by the Invitation for Bids (Standard Form 20).

* * * * *

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: May 30, 1979.

Clarence A. Lee, Jr.,

Acting Administrator of General Services.

BILLING CODE 6820-61-M

National Archives and Records Service

41 CFR Part 101–11

[FPMR Temp. Reg. B–4]

Records Management; Transfer of Permanent Records

AGENCY: National Archives and Records Service, General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This temporary regulation amends GSA regulations relating to the transfer of Federal agency records to the National Archives. Public Law 95–416, signed by the President on October 5, 1978, reduces the age to 30 years of records that the Administrator of General Services may direct and effect the transfer of to the National Archives and Records Service (NARS). In addition, the National Archives is authorized to accession records of any age offered by a Federal agency or the Congress and appraised by the National Archives as permanent and appropriate for deposit. The National Archives will determine which records over 30 years old are kept in agency space and how those records are being maintained.

DATES: Effective date: June 15, 1979. Expiration date: June 1, 1980. Comments due: August 14, 1979.

FOR FURTHER INFORMATION CONTACT: Adrienne C. Thomas, Director, Planning and Analysis Division, Office of the Executive Director, National Archives and Records Service, General Services Administration (NAA), Washington, DC 20408. 202–523–3214.

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this regulation will not impose unnecessary burdens on the economy or on individuals and, therefore, is not significant for the purposes of Executive Order 12044.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c)).

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter B to read as follows:

Federal Property Management Regulations; Temporary Regulation B–4

To: Heads of Federal agencies.

Subject: Transfer of permanent records.

1. *Purpose.* This temporary regulation contains revised information concerning the age at which the Administrator of General Services may direct and effect the transfer of Federal agency records to the National Archives of the United States (NARS).

2. *Effective date.* This regulation is effective upon publication in the Federal Register (June 15, 1979).

3. *Expiration date.* This regulation expires June 1, 1980, unless revised or superseded earlier. Prior to that date, this regulation will be codified in the permanent regulations of GSA appearing in Title 41, CFR, Public Contracts and Property Management.

4. *Applicability.* The provisions of this regulation apply to all executive agencies.

5. *Background.*

a. Federal law (44 U.S.C. 2103) provides legal authority to the Administrator of General Services to ". . . direct and effect the transfer of the National Archives of the United States . . . records of a Federal agency that have been in existence for more than fifty years and determined by the Archivist of the United States to have sufficient historical or other value to warrant their continued preservation by the United States Government, unless the head of the agency which has custody of them certifies in writing to the Administrator that they must be retained in his custody for use in the conduct of the regular current business of the agency. . . ."

b. On October 5, 1978, the President signed Public Law 95-416 amending chapter 21 of Title 44, U.S.C. This law reduces the age at which Federal agency records may be transferred to the National Archives of the United States. The Administrator of General Services may direct the transfer of Federal records over 30 years old to the National Archives which are determined by the Archivist of the United States to be sufficiently valuable for preservation by the United States Government and are not required by the agency for the conduct of current business. In addition, 44 U.S.C. 2103 also authorizes the National Archives to accession records of any age offered by a Federal agency or the Congress and appraised by NARS as permanent and appropriate for preservation. Based on information provided on Standard Form 136, Annual Summary of Records Holdings, NARS will review Federal records over 30 years old which are currently retained in agency space and examine how those records are being maintained.

6. *Agency action.* FPMR 101-11.102-7 requires Federal agencies to report on Standard Form 136, the Annual Summary of Records Holdings. For fiscal year 1979, agencies should include in the "remarks" section of Standard Form 136 a description of all records under their control that are over 30 years old. Agencies should also provide inclusive dates and volume, specific location, and the type of equipment used to house the records. The location should indicate whether the records are in office space, an agency records center or storage area, or a special storage area established to house the historical records of the agency. Reference and non-record materials, and records that have been approved for disposal on Standard Form 115, Request for Records Disposition Authority, should not be included.

7. Effect on other directives. This regulation modifies the provisions of §§ 101.11.102-7, 101-11.411-2, and 101-11.411-3.

Dated: May 30, 1979.

Paul E. Goulding,

Acting Administrator of General Services.

[FR Doc. 79-18782 Filed 6-14-79; 8:45 am]

BILLING CODE 6820-26-M

Proposed Rules

Federal Register
Vol. 44, No. 117
Friday, June 15, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[7 CFR Part 301]

Witchweed Quarantine; Miscellaneous Amendments to Regulated Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal would amend the supplemental regulations which designate generally infested regulated areas and suppressive regulated areas subject to the Witchweed Quarantine. It would remove, add, or extend parts of certain counties in North Carolina and South Carolina to the list of suppressive regulated areas. These changes appear to be necessary in order to prevent the spread of witchweed.

DATE: Comments must be received on or before August 10, 1979.

ADDRESS: Submit written data, views, or arguments to: H. V. Autry, Regulatory Support Staff, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: H. V. Autry, 301-436-8247.

SUPPLEMENTARY INFORMATION: All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 633, Hyattsville, MD 20782, during regular hours of business, 8 a.m. to 4:30 p.m., Monday to Friday, except holidays, unless the person makes the submission to the Regulatory Support Staff, Plant Protection and Quarantine Programs, and requests that it be held confidential. A determination will be made whether a proper showing in support of the request has been made on grounds that its disclosure could adversely affect any person by disclosing information in the nature of trade secrets or commercial or financial information obtained from any person and privileged or confidential. If it is determined that a proper showing has been made in the support of the request, the material will be held confidential; otherwise, notice will be given of the denial of such request and an opportunity afforded for withdrawal of the submission. Requests for confidential treatment will be held confidential (7 CFR 1.27(c)).

Witchweed, is a parasitic plant which causes the degeneration of corn, sorghum, and other grassy crops. It has been found in the United States only in parts of North Carolina and South Carolina. Areas within these States have been designated as suppressive areas where a witchweed eradication program is currently being undertaken.

Surveys conducted by the United States Department of Agriculture and State agencies of North Carolina and South Carolina establish that witchweed has spread or is likely to spread to certain areas beyond the outer perimeter of the current designated suppressive areas. Therefore, in order to prevent the spread of witchweed and to facilitate its ultimate eradication, the current designated suppressive areas would be extended in the countries of: Brunswick, Columbus, Craven, Duplin, Lenoir, Onslow, Pender, Pitt, Richmond, Scotland, and Wayne in North Carolina; and Florence in South Carolina. Suppressive areas would be established in the formerly unregulated county of Beaufort in North Carolina. The surveys also establish that witchweed has been eradicated in parts of the following counties which would be deleted from the list of suppressive areas: Columbus, Duplin, Harnett Johnston, Lenoir, Onslow, Pender, Richmond, Scotland, and Wayne in North Carolina.

Other changes would also be made to reflect changes in property ownership. Certain property descriptions would also be revised in order to more accurately describe the regulated areas.

Accordingly, the list of regulated areas in the States of North Carolina and South Carolina specifically designated as generally infested areas and suppressive areas by § 301.80-2a of the Witchweed Quarantine and regulations (7 CFR 301.80-2a) would be amended to read as set forth below:

1. In § 301.80-2a relating to the State of North Carolina under suppressive area, the entire State would be redescribed to read as follows:

§ 301.80-2a Regulated areas; suppressive and generally infested areas.

* * * * *

North Carolina

(1) *Generally infested area.*

Robeson County. The entire county.

(2) *Suppressive area.*

Beaufort County. The Jefferson, Russell M., farm located on the southwest side of State Secondary Road 1809 and 0.8 mile southeast of the junction of said road and State Highway 32.

The Osborne, H. R., farm located on both sides of State Secondary Road 1809 and 0.5 mile southeast of the junction of said road and State Highway 32.

Bladen County. The entire county.

Brunswick County. The Babson, N. L., farm located on the west side of State Secondary Road 1321 and 0.4 mile south of its junction with State Highway 130.

The Bryant, Ottice, farm No. 1 located at the end of a farm road 1.0 mile west of State Secondary Road 1342, 2.5 miles northwest of said State Secondary Road and its junction with State Highway 211.

The Bryant, Ottice, farm No. 2 located on both sides of State Secondary Road 1342, 2.3 miles northwest of said road and its junction with State Highway 211.

The Hewett, Jr., R. B., farm located at the end of a farm road on the northeast side of State Secondary Road 1132, 0.4 mile northeast of said road and its intersection with N.C. Highway 130.

The Meares, Hobson, farm located on both sides of State Secondary Road 1125 and 2.0 miles south of the junction of said road with U.S. Highway 17.

The Register, W. C., farm located on the south side of State Secondary Road 1147 and 0.3 mile east of the junction of said road and State Secondary Road 1143.

The Register, W. T., farm located on the west side of State Secondary Road 1181 and 0.4 mile south of its junction of State Secondary Road 1147.

The Sanders, Albert C., farm located on the east side of State Secondary Road 1143 at the end of a dirt road located 0.5 mile south of the junction of State Secondary Roads 1143 and 1147.

The Smith, B. Coda, farm located on the west side of a dirt road and 0.8 mile north of its junction with State Secondary Road 1322, said junction being 0.1 mile west of the junction of State Secondary Road 1322 and State Secondary Road 1321.

The Todd, Lester, farm located on the east side of State Secondary Road 1143 at the end of a dirt road located 0.5 mile south of the junction of State Secondary Roads 1143 and 1147.

Columbus County. That part of the county lying north and west of a line beginning at a

point where State Highway 211 intersects the Bladen-Columbus County line, thence south along said Highway 211 to its intersection with State Secondary Road 1740, thence southwest and south along said State Secondary Road 1740 to its junction with U.S. Highways 74 and 76, thence west along said highways to its intersection with White Marsh Swamp, thence south along said swamp to its junction with Cypress Creek, thence southwest along said creek to its intersection with State Highway 130, thence northwest along said highway to its junction with State Secondary Road 1166, thence southwest along said road to its junction with State Secondary Road 1157, thence southwest along said road to its junction with U.S. Highway 701, thence south and west along said highway to its intersection with State Secondary Road 1314, thence west along said road to its junction with State Secondary Road 1346, thence southwest along said road to its junction with the North Carolina-South Carolina State line.

The Jacobs, Thomas, farm located 0.2 mile north of State Secondary Road 1847 and 1 mile northeast of the junction of said road 1847 with State Secondary Road 1740.

The Long, J. M., farm located on the southwest side of State Secondary Road 1113 and 0.4 mile northwest of its junction with State Secondary Road 1108.

The McLamb, H. M., farm located on the southwest side of State Secondary Road 1113 and 0.5 mile northwest of its junction with State Secondary Road 1108.

The Owen, J. A., farm located on the southwest side of State Highway 87 and 0.3 mile southeast of the intersection of said Highway 87 with the Bladen-Columbus County line.

The Shaw, Archie, farm located 0.2 mile southeast of State Secondary Road 1804 and 0.5 mile southeast of the junction of said Road 1804 with State Secondary Road 1808.

The Shaw, Charles H., farm located 0.1 mile north of State Secondary Road 1847 and 0.9 mile northeast of the junction of said Road 1847 with State Secondary Road 1908.

The Shipman, C. S., farm located on the east side of State Secondary Road 1909 and 0.6 mile southeast of the junction of said Road 1909 with State Secondary Road 1908.

The Spivey, D. M., farm located in the northeast corner of the intersection of U.S. Highway 701 and Gum Swamp.

The Suggs, Lacy, farm located at the end of a dirt road 0.5 mile southeast of the junction of said road with State Secondary Road 1108, said junction being 0.7 mile northeast of the junction of State Secondary Road 1108 and State Secondary Road 1118.

The Young, Grace, farm located on the west side of N.C. State Secondary Road 1914, and 0.2 mile south of the junction of said road with N.C. State Secondary Road 1904.

Craven County. The Chapman, Idel M., farm located on the west side of State Secondary Road 1459 and 0.1 mile north of junction of State Secondary Road 1463 with said road 1459 and 0.3 mile off west side of State Secondary Road 1459.

The Goodman, W. D., farm located on both sides of State Secondary Road 1263 and 2.6 miles east of its southern junction with State Secondary Road 1262.

The Hawkins, Annie A., farm located on both sides of State Secondary Road 1263 and 1 mile east of the junction of said Road 1263 with State Secondary Road 1262.

The Hawkins, Mattie, farm located on the west side of State Secondary Road 1263 and 1.2 miles east and north of its southern junction with State Secondary Road 1262.

The Hodges, Mary K., farm located on both sides of State Secondary Road 1263 and 2.2 miles east of its southern junction with State Secondary Road 1262.

The West, Gladys W., farm located on both sides of State Secondary Road 1263 and 1.4 miles east of its southern junction with State Secondary Road 1262.

The White, Raymond E., farm located on both sides of State Secondary Road 1263 and 0.2 mile east of its northern junction with State Secondary Road 1262.

Cumberland County. All of Cumberland County excluding the Fort Bragg Military Reservation, the area within the corporate limits of the city of Fayetteville, and the unincorporated communities of East Fayetteville and Bonnie Doone.

Duplin County. That area bounded by a line beginning at a point where State Secondary Road 1337 intersects the Duplin-Sampson County line, thence northeast along said road to its junction with State Highway 50, thence northwest along said highway to its junction with State Secondary Road 1355, thence northeast along said road to its junction with State Secondary Road 1332, thence northeast along said road to its junction with State Secondary Road 1304, thence southeast along said road to its intersection with Bear Swamp, thence east along said swamp to its junction with Goshen Swamp, thence southeast along said swamp to its intersection with State Secondary Road 1004, thence southeast along said road to its intersection with Nahunga Creek, thence southwest along said creek to its intersection with State Secondary Road 1301, thence northwest along said road to its junction with State Secondary Road 1346, thence southwest along said road to its junction with State Secondary Road 1385, thence west along said road to its junction with State Highway, 50, thence southeast along said highway to its junction with State Secondary Road 1900, thence southeast along said road to its junction with State Secondary Road 1003, thence east along said road to its junction with State Highway 11, thence south along said highway to its junction with State Secondary Road 1922, thence southwest along said road to its junction with State Secondary Road 1909, thence south along said road to its junction with State Secondary Road 1912, thence west along said road to its intersection with the Magnolia city limits, thence south, west, and north along said city limits to its intersection with State Secondary Road 1003, thence southwest along said road to its junction with State Secondary Road 1101, thence southeast along said road to its intersection with State Secondary Road 1102, thence southwest along said road to its junction with State Secondary Road 1126, thence west along said road to its intersection with State Secondary Road 1100, thence southeast along said road to its intersection with State Secondary Road 1102, thence south along said road to its junction with State Secondary Road 1129, thence southwest along said road to its intersection with State Secondary Road 1128, thence northwest along said road to its intersection with Duplin-Sampson County, thence north along said county line to the point of beginning.

The Alphin, Clara, farm located in the north junction of State Secondary Road 1004 and State Secondary Road 1505.

The Beard, Mary Lou, farm located on both sides of State Secondary Road 1981 and 0.6 mile west of the intersection of said road and the Northeast Cape Fear River.

The Bostic, Jake, farm located on both sides of State Secondary Road 1981 and 0.5 mile west of the intersection of said road and the Northeast Cape Fear River.

The Bradshaw, Gene A., farm located on the south side of State Secondary Road 1321 and 0.8 mile west of the junction of said road with State Secondary Road 1302.

The Bradshaw, Milton J., farm located at the northwest end of State Secondary Road 1980.

The Branch, Hall, farm located on the southeast side of State Highway 11 and 0.6 mile southwest of the junction of said higway and State Secondary Road 1004.

The Britt, Ben, farm located on the north side of State Secondary Road 1306 and 0.1 mile east of its junction with State Secondary Road 1361.

The Britt, Cornia, farm located on both sides of State Secondary Road 1545 and 0.5 mile east of the junction of said road and State Secondary Road 1564.

The Brock, Jack, farm located on both sides of State Secondary Road 1700 and 0.8 mile west of the intersection of said road and the Northeast Cape Fear River.

The Brown, George, farm located on the west side of State Secondary Road 1004 and 0.8 mile north of its junction with State Secondary Road 1504.

The Dail, Albert D., farm located on both sides of State Secondary Road 1524 and 0.1 mile north of the junction of said road and State Secondary Road 1525.

The Davis, Jimmie, farm located on the eas side of State Highway 111 and the south side of State Secondary Road 1546.

The Davis, Wenzell, farm located on the south side of State Secondary Road 1560 and 0.3 mile south of the junction of said road and State Secondary Road 1537.

The English, James Earl, farm located on the north side of State Secondary Road 1980 and 0.3 mile southwest of the junction of said road and State Secondary Road 1979.

The Garner, S. C., farm located on the south side of State Secondary Road 1306 and 0.5 mile west of the junction of said road and State Secondary Road 1511.

The Goodson, Emma, farm located on the south side of State Secondary Road 1501 and 0.3 mile west of the junction of said road and State Secondary Road 1505.

The Grady, E. C., farm located on both sides of State Secondary Road 1700 and 0.7

mile west of the intersection of said road and the Northeast Cape Fear River.

The Grady, Robert, farm located on the east side of State Secondary Road 1560 and the south side of State Secondary Road 1537.

The Grady, S. Leland, farm located on both sides of State Secondary Road 1700 and 0.6 mile west of the intersection of said road and the Northeast Cape Fear River.

The Green, Willie, farm located on both sides of State Secondary Road 1971, and 0.6 mile southwest of the junction of said road and State Highway 50.

The Harper, Milo, farm located on the northwest side of State Secondary Road 1539 and 0.6 mile northeast of the junction of said road and State Secondary Road 1540.

The Herring Estate, Jeff, farm located on the north side of State Secondary Road 1545 and 0.6 mile east of the junction of said road and State Secondary Road 1504.

The Horne, Harry, farm located on the south side of State Secondary Road 1961 and 0.8 mile west of the intersection of said road and State Secondary Road 1962.

The Howard, Henry, farm located on the north side of State Secondary Road 1700 and 0.8 mile west of the intersection of said road and the Northeast Cape Fear River.

The Hussey Estate, M. W., farm located on the east side of State Secondary Road 1560 and 0.2 mile south of the junction of said road and State Secondary Road 1537.

The Ivey, Jr., C. C., farm located on the east side of State Secondary Road 1361 and 0.3 mile south of its junction with State Secondary Road 1362.

The Ivey, Foy, No. 1, farm located on the north side of State Secondary Road 1306 and 0.3 miles east of its junction with State Secondary Road 1361.

The Ivey, Foy, No. 2, farm located on both sides of State Secondary Road 1004 and 0.1 miles south of its junction with State Secondary Road 1561.

The Jernigan, Cornelia, farm located on the west side of State Secondary Road 1360 and 0.4 mile south of its junction with State Secondary Road 1004.

The Johnson, Eldora, farm located on both sides of State Secondary Road 1123 and 1.2 miles west of the junction of said road and State Secondary Road 1103.

The Jones, Billy, farm located on both sides of State Secondary Road 1700 and 0.7 mile west of the intersection of said road and the Northeast Cape Fear River.

The Jones, H. A., farm located on south side of State Secondary Road 1700 and 0.7 mile west of the intersection of said road and the Northeast Cape Fear River.

The Jones, Nora, farm located on west side of State Secondary Road 1004 and 0.3 mile south of its junction with State Secondary Road 1305.

The Kalmar, J. N., farm located on the south side of State Highway 403 and 0.5 mile west of its junction with State Secondary Road 1304.

The Kennedy, Owen, farm located on the east side of State Secondary Road 1726 and the southeast side of State Secondary Road 1702.

The Kennedy, Sidney J., farm located on the east side of State Secondary Road 1718 and 0.2 mile south of the junction of said road and State Highway 41.

The King, W. E., farm located on the east side of State Secondary Road 1302 and 0.1 mile south of the junction of said road and State Secondary Road 1308.

The Kornegay, Byrus, farm located on the east side of State Highway 403 and 0.1 mile north of its junction with State Secondary Road 1360.

The Kornegay, Ethyl, farm located 0.2 mile east of State Secondary Road 1501 and 0.6 mile south of the intersection of said road and State Secondary Road 1519.

The Kornegay Estate, Isaac, located on the southwest side of State Secondary Road 1306 and 0.7 mile northwest of the junction of said road and State Secondary Road 1305.

The Lane, David, farm located 0.1 mile east of State Secondary Road 1369 and 0.1 mile south of its junction with State Highway 403.

The Lewis, Merle S., farm located on the east side of State Secondary Road 1004 and both sides of State Secondary Road 1506.

The Marshburn, Freeman J., farm located on both sides of State Secondary Road 1128 and 0.7 mile southeast of the intersection of said road and State Secondary Road 1129.

The Maxwell, Myra, farm located on the southeast side of State Secondary Road 1306 and the west side of State Secondary Road 1562.

The McCullen, Larry, farm located on the northeast side of State Highway 24 and 0.2 mile northwest of the junction of said highway and State Secondary Road 1904.

The McGowan, Woodell, farm located on the south side of State Secondary Road 1961 and 1.1 mile west of the intersection of said road and State Secondary Road 1962.

The Mercer, Cathleen, farm located on the south of State Secondary Road 1703 and 1.1 mile east of the intersection of said road and State Secondary Road 1704.

The Mercer, Herbert C., farm located on the south side of State Secondary Road 1703 and 0.7 mile west of the junction of said road and State Secondary Road 1732.

The Norris, Maggie T., farm located on the south side of State Secondary Road 1700 and 1.4 mile east of the intersection of said road and State Secondary Road 1701.

The Outlaw, Bennie F., farm located on both sides of State Secondary Road 1524 and north side of State Secondary Road 1525.

The Outlaw, Emma, farm located on the south of State Secondary Road 1509 and 0.5 mile southwest of the junction of said road and State Secondary Road 1510.

The Parrott, Jr., Mrs. Frank, farm located on the south side of State Secondary Road 1708 and 0.3 mile east of the intersection of said road and State Secondary Road 1704.

The Pate, Robert Lee, farm located on both sides of State Secondary Road 1357 and 0.9 mile southwest of the junction of said road and State Secondary Road 1308.

The Powell, William F., farm located on both sides of State Secondary Road 1128 and 0.2 mile southeast of the intersection of said road and State Secondary Road 1129.

The Precythe, Harold, farm located on the east side of U.S. Highway 117 and 0.1 mile south of the junction of said highway and State Secondary Road 1354.

The Rivenbark, George W., farm located on the northwest side of State Secondary Road 1131 and 0.4 mile southwest of the junction of said road and State Secondary Road 1128.

The Rouse, Beatrice S., farm located on both sides of State Secondary Road 1980 and at the west end of said road.

The Rouse, Jim, farm located on both sides of State Secondary Road 1537 and 0.3 mile north of the junction of said road and State Secondary Road 1308.

The Rouse, Rouka, farm located on the north side of State Secondary Road 1537 and the west side of State Secondary Road 1538.

The Shepard, J. T., farm located on both sides of State Secondary Road 1732 and 0.2 mile north of the junction of said road and State Secondary Road 1708.

The Smith, R. J., farm located on the north side of State Highway 11 and 1.2 miles east of the junction of said highway and State Highway 111.

The Smith, Sallie P., farm located on the northeast side of State Highway 111 and 0.8 mile southeast of the Duplin-Wayne County line.

The Stokes, Fred, farm located on the south side of State Secondary Road 1980 and 2.4 miles west of the junction of said road and State Secondary Road 1979.

The Stokes, William C., farm located at the southwest end of State Secondary Road 1980.

The Summerlin, D. C., farm located on the north side of State Secondary Road 1513 and 0.4 mile east of the junction of said road and State Secondary Road 1505.

The Summerlin, Lannie, farm located on the both sides of State Secondary Road 1359 and 0.3 mile southwest of its junction with State Secondary Road 1308.

The Summerlin, Oliver, farm located on the south side of State Highway 403 and 0.1 mile east of the corporate limits of the town of Faison.

The Sumner, India, farm located on the southwest side of State Highway 111 and 1.2 miles south of the intersection of said highway and State Secondary Road 1700.

The Sutton, Effie O., farm located on the northeast side of State Secondary Road 1004 and 0.7 mile northwest of its junction with State Secondary Road 1504.

The Turner, Lumas, farm located on the south side of State Secondary Road 1703 and 0.6 mile west of the junction of said road and State Secondary Road 1732.

The Walker, C. P., Estate, farm located on the west side of State Secondary Road 1308 and 1.2 miles north of its junction with State Secondary Road 1364.

The Whaley, Bennie, farm located on the southeast side of State Secondary Road 1931 and 0.2 mile northeast of the junction of said road and State Secondary Road 1800.

The Whitman, Herman E., farm located on the south side of State Secondary Road 1360 and 0.1 mile west of the junction of said road and State Road 1361.

The Whitman, Herman E., farm located on the north side of State Secondary Road 1360 and 0.8 mile of the intersection of said road and State Secondary Road 1361.

The Williams, McArthur, farm located on the south side of State Secondary Road 1931

and 1 mile west of the intersection of said road and State Secondary Road 1962.

The Wilson, Mammie, farm located on the east side of State Highway 111 and 1.0 mile south of the intersection of said highway and State Secondary Road 1700.

Green County. That area bounded by a line beginning at a point where State Highway 102 intersects State Highway 123 and extending south along State Highway 123 to its intersection with Contentnea Creek, thence northwest along said creek to its junction with Panther Swamp. Thence northerly along said Panther Swamp to its intersection with U.S. Highway 13–258, thence easterly along said highway to the point of beginning.

The Carmon, James E., farm located on the east side of State Secondary Road 1004 and 0.4 mile south of its junction with North Carolina Highway 102.

The Dixon, John, farm located on the east side of State Secondary Road 1004 at the junction on State Secondary Road 1405.

The Dixon, Sudie, farm located on the west side of State Secondary Road 1004 and 0.2 mile south of its junction of State Secondary Road 1405.

The Murphrey, Edward, farm located on the east side of State Secondary Road 1004 and 0.3 mile south of its junction with State Highway 102.

The Whitaker, J. H., farm located on the east side of State Secondary Road 1004 and 0.6 mile south of its junction with State Highway 102.

Harnett County. That area bounded by a line beginning at a point on the Harnett-Lee County line due west of the head of Barbecue Swamp and extending east to the head of said swamp, thence south and east along Barbecue Swamp to its intersection on State Secondary Road 1201, thence south and southeast along said road to its junction with State Highway 27, thence southeast along said highway to its junction with State Highway 24, thence southeast along said highway to its junction with State Secondary Road 1111, thence southwest along said road to its intersection with Harnett-Moore County line, thence northwest along the Harnett-Moore County line to its junction with the Moore-Harnett-Lee County line, thence northeast along the Harnett-Lee County line to the point of beginning.

That area bounded by a line beginning at a point where the Harnett-Cumberland County line and McLeod Creek intersect and extending northwest along said creek to its intersection with State Secondary Road 1117, then northeast, northwest and north along said road to its intersection with Anderson Creek, thence southeast along said creek to its intersection with the State Highway 210, thence northeast along said highway to its junction with State Secondary Road 2030, thence southeast along said road to its junction with State Secondary Road 2031, thence southwest along said road to its intersection with the Harnett-Cumberland County line, thence southwest and west along said county line to the point of beginning.

The Cook, A. L., farm located on the east side of State Secondary Road 1201 and 1.5 miles southeast of the junction of said road with State Secondary Road 1203.

The Gilchrist, Leonard W., farm located on the southeast side of State Secondary Road 1111, 0.4 mile north of the junction of said road with State Secondary Road 1110.

The Johnson, Sr., Jonah C., farm located at the junction of State Secondary Roads 1553 and 1555: The farm lies in the northeast portion of this junction.

The Keath, Vick, farm located on the east side of State Secondary Road 1293 and 0.7 mile southwest of the junction of said road with State Secondary Road 1114.

The McAden, J. L., farm located on southeast side of State Highway 27 and 0.6 mile southwest of the intersection of said highway with State Highway 87.

The Proctor, T. G., farm located on the northeast side of State Highway 27 at that point where said highway forms on overpass over State Highway 87.

The Thomas, Floyd, E., farm located on the northeast side of State Secondary Road 1146 and 0.2 mile north of the junction of said road with State Secondary Road 1117.

The Womack, E. H., farm located on east side of State Highway 27, and 1.0 mile north of the junction of said highway with State Highway 24.

Hoke County. The entire county excluding Fort Bragg Military Reservation.

Johnston County. The Baker, Mrs. Lula, farm located on the east side of State Highway 242 and 0.2 mile south of the intersection of said highway and State Secondary Road 1116.

The Blackman, Dewey, farm located on the south side of State Secondary Road 1146, and 0.4 mile east of the junction of said road with State Secondary Road 1145.

The Braswell, J. C., farm located on the east side of State Secondary Road 2519 and 0.4 mile north of the junction of State Secondary Roads 2519 and 2520.

The Davis, I. H., farm located on the southwest side of State Secondary Road 1197 and 0.1 mile southeast of the junction of said road with State Secondary Road 1198.

The Edwards, Archie, farm located on the south side of State Secondary Road 2542 and 0.6 mile south of the junction of said road with State Secondary Road 1007.

The Everett, Betty, farm located on the west side of State Secondary Road 2541 and 0.5 mile south of the junction of said road with State Secondary Road 1007.

The Everett, Betty, farm located on a farm road and 0.6 mile west of its junction with State Secondary Road 2541, said junction being 1.9 miles south of the junction of State Secondary Roads 2541 and 1007.

The Everett, Jaspar, farm located on a farm road and 0.5 mile west of its junction with State Secondary Road 2541, said junction being 1.9 miles south of the junction of State Secondary Roads 2541 and 1007.

The Hudson, Price, Estate farm located on a farm road and 0.4 mile north of its junction with State Secondary Road 1006, said junction being 0.8 mile northeast of the intersection of State Secondary Road 1006 with U.S. Highway 701.

The Johnson, Annie, farm located on the west side of State Secondary Road 1138 and 0.5 mile south of its junction with State Secondary Road 1144.

The Johnson, Corby, farm located on the southwest side of State Highway 50 and 0.4 mile southeast of the intersection of said highway and State Secondary Road 1124.

The Johnson, Floyd, farm located on the west side of State Secondary Road 1124 and 0.2 mile south of the intersection of said road and State Secondary Road 1122.

The Johnson, Wade, farm located on both sides of State Secondary Road 1144 and 0.2 mile west of the junction of said road with State Secondary Road 1138.

The Jones, U. E., farm located on the south side of State Secondary Road 1128 and 0.7 mile east of the junction of said road with State Secondary Road 1124.

The Martin, Emitt, farm located on the east of State Secondary Road 2519 and 0.3 mile north of the junction of State Secondary Roads 2519 and 2520.

The Martin, John L., farm located on the west side of State Secondary Road 1201 and 0.3 mile north of the juction of said road with State Secondary Road 1200.

The McArthur, Margaret, farm located on a farm road and 1.4 miles north of its junction with State Secondary Road 1109 and 0.9 mile west of the junction of said road with State Secondary Road 1006.

The Naylor, Mrs. Luby, farm located on the southwest side of State Highway 50 and 0.3 mile northwest of the intersection of said highway and State Secondary Road 1124.

The Smith, Clifton, farm located on the east side of State Highway 96 at the junction of said highway and State Secondary Road 1120.

The Summerlin, Everett L., farm located on the north side of State Secondary Road 1006, and 0.6 mile west of the junction of said road with State Secondary Road 1109.

The Tart, Allen, farm located on the southwest corner of the junction of State Highway 96 and State Secondary Road 1120.

The Williams, D. C., farm located on the south side of State Secondary Road 1128 and 0.3 mile east of the junction of said road with State Secondary Road 1124.

Jones County. The Franck, Mrs. Wilber, farm located on the south side of State Secondary Road 1116 and 1.9 miles west of junction of said road with State Secondary Road, 1115.

The Simpson, Eugene T., farm located on the south side of State Secondary Road 1116 and 2.5 miles west of the junction of said road at State Secondary Road 1115.

Lee County. The McGilvary, Aquilla, farm located north of State Secondary Road 1186 and 0.6 mile east of the junction of said road with State Secondary Road 1001.

Lenoir County. The Barber, Clarence, farm located on the both sides of State Secondary Road 1301 with 0.2 mile northeast of its junction with State Secondary Road 1302.

The Braxton, Clyde, Estate located on the both sides of State Secondary Road 1802 and 0.9 mile northeast of the junction of State Secondary Road. 1802 and State Highway 11.

The Brown, Nannie H., farm located in the southwest junction of State Secondary Roads 1152 and 1309.

The Carey, Jack, farm located on the both sides of State Secondary Road 1906 and 1.0 mile east of its junction with U.S. Highway 285.

The Carr, Lillian, farm located on the southwest side of State Secondary Road 1524 and 0.1 mile south of its junction with State Secondary Road 1528.

The Carter, Ephrom, farm located on the south side of State Secondary Road 1116 and 1.5 miles east of its junction with State Highway 11.

The Elmore, Lucy H., No. 1, farm located on the south side of State Secondary Road 1324 and 0.2 mile west of its junction with State Secondary Road 1333.

The Foss, Reginal D., farm located on the north side of State Secondary Road 1316 and 0.6 mile northwest of its junction with State Secondary Road 1318.

The Hamilton, C. W., farm located on the southeast side of State Secondary Road 1802 and 1.2 miles northeast of its junction with State Highway 11.

The Herring, Ben D., No. 1, farm located on the both sides of State Secondary Road 1330 and 0.2 mile west of the junction of State Secondary Roads 1330 and 1331.

The Herring, Ben D., No. 2, farm located on the west side of State Secondary Road 1310 and 0.3 mile south of its junction with State Secondary Road 1311.

The Herring, Lewis R., No. 1, farm located on the south side of State Secondary Road 1324 and 0.3 mile west of its junction with State Secondary Road 1333.

The Howard, Clarence, farm located on the south side of State Secondary Road 1105 and 0.1 mile east of its intersection with State Secondary Road 1118.

The Jarman, F. R., farm located on the southeast side of State Secondary Road 1311 and 0.7 mile southwest of its junction with State Secondary Road 1318.

The Jones, Edward S., farm located on the west side of U.S. Highway 258 and 0.3 mile north of its junction with State Secondary Road 1116.

The Joyner Farms, Inc., farm located on the both sides of State Secondary Road 1324 and 0.5 mile east of its junction with State Secondary Road 1335.

The Moody, Alton, farm located on the south side of State Highway 55 and 0.6 mile northeast of its junction with State Secondary Road 1161.

The Moye, Lenton G., farm located on the west side of State Secondary Road 1335 and 0.3 mile north of its junction with State Secondary Road 1324.

The Parrott Farms, Inc., farm located on the northwest side of State Secondary Road 1157 and 0.7 mile northwest of its intersection with State Highway 55.

The Rouse, Forrest, farm located on the northwest side of State Secondary Road 1143 and 2.9 miles northwest of its intersection with State Secondary Road 1154.

The Rouse, Jim W., farm located on the northeast side of State Secondary Road 1143 and 2.8 miles northwest of its intersection with State Secondary Road 1154.

The Rouse, Leon, farm located on the both sides of State Secondary Road 1307 and 0.4 mile southwest of its junction with State Secondary Road 1324.

The Singleton, Ruby S., farm located on the east side of State Secondary Road 1802 and 0.6 mile south of its junction with State Secondary Road 1801.

The Sutton, George Hodges, No. 1, farm located on the southwest junction of State Secondary Roads 1324 and 1307.

The Sutton, Iris, farm located on the east side of State Secondary Road 1152 and 0.6 mile south of its junction with State Secondary Road 1324.

The Sutton, John W., farm located on the southeast junction of State Secondary Roads 1330 and 1333.

The Sutton, M. L., farm located on the southeast side of State Secondary Road 1311 and 0.8 mile southwest of its junction with State Secondary Road 1318.

The Sutton, Nathan, farm located on the southeast side of State Secondary Road 1311 and 0.6 mile southwest of its junction with State Secondary Road 1318.

The Sutton, Norman, farm located on the northwest side of State Secondary Road 1308 at the end of Farm road located 0.3 mile southwest of junction of State Secondary Roads 1308 and 1324.

The Sutton, Prentice, farm located on the south side of State Secondary Road 1503 and 0.3 mile southeast of its intersection with State Secondary Road 1327.

The Sutton, Robert H., farm located on the south side of State Secondary Road 1324 and 0.2 mile east of its junction with State Secondary Road 1327.

The Sutton, Woodrow W., farm located on the north side of State Secondary Road 1331 and 0.5 mile west of its junction with State Secondary Road 1333.

The Taylor, Heber, farm located on the north side of State Secondary Road 1161 and 0.3 mile east of its juction with State Highway 55.

The Walters, H. F., farm located on both sides of State Secondary Road 1335 and 0.4 mile north of its junction with State Secondary Road 1324.

The Waters, Thomas, Estate located on both sides of State Secondary Road 1316 and 0.3 mile north of its junction with State Secondary Road 1317.

The Wood, C. W., farm located on the northwest side of State Secondary Road 1311 and 0.7 mile southwest of its junction with State Secondary Road 1318.

Moore County. The Bryant, R. E., farm located on both sides of State Secondary Road 1815 and 0.5 mile southwest of the junction of said road with U.S. Highway 15 501.

The Hardy, N. W., farm located on both sides of State Secondary Road 2007 and 0.2 mile southeast of the junction of said road with State Secondary Road 2005.

The Laton, William A., farm located on the east side of State Secondary Road 1004 and 0.3 mile north of the intersection of said road with State Secondary Road 1113.

The Marks, E. M., farm located on the south side of State Secondary Road 2019 and 2.5 miles east of the junction of said road and State Secondary Road 2018.

The McLaurin, Hattie J., farm located on the north side of N.C. Highway 211 and 0.5 mile west of the junction of said highway with State Secondary Road 2075.

The McNeill, Lena Bell, farm located on the northwest side of State Secondary Road 2077 and 0.5 mile southwest of the junction of said road with State Highway 211.

The Thomas, Claude and Ted, farm located on the west side of State Secondary Road 1128 and 0.5 mile northwest of the junction of said road with State Secondary Road 1122.

Onslow County. The Cox, Robert B., farm located on the southeast side of State Secondary Road 1224, and 0.7 mile from the junction of said road and State Secondary Road 1222.

The Lewis, L. Bryan, farm located on the southeast side of State Secondary Road 1224, and 0.9 mile from the junction of said road and State Secondary Road 1222.

The Marshburn, James B., farm located on the southeast side of State Secondary Road 1224, and 0.6 mile from the junction of said road and State Secondary Road 1222.

The McAllister, Henry, farm located on both sides of State Secondary Road 1316 and 1 mile southwest of said road and its junction with State Secondary Road 1306.

Pender County. That area bounded by a line beginning at a point where State Secondary Road 1104 intersects the Pender-Bladen County line, and extending northeast along said county line to its junction with Black River, thence southeast along said river to its intersection with State Highway 210, thence southwest along said highway to its junction with State Secondary Road 1103, thence southeast along said road to its junction with State Secondary Road 1104, thence southwest and northwest along said road to the point of beginning.

That area bounded by a line beginning at a point where Moore's Creek intersects State Highway 53, and extending east along said highway to its intersection with State Secondary Road 1121, thence south along said road to its intersection with State Secondary Road 1125, thence west along said road to its intersection with Moores Creek, thence northeast along said creek to the point of beginning.

That area bounded by a line beginning at a point where State Secondary Road 1517, junctions with U.S. Highway 117, and extending northwest along said highway to its intersection with Walker Swamp, thence northeast along said swamp to its junction with Pike Creek, thence southeast along said creek to its junction with the Northeast Cape Fear River, thence south along said river to its intersection with State Highway 210, thence southwest along said highway to its junction with State Secondary Road 1518, thence southeast along said road to its junction with State Secondary Road 1517, thence westerly along said road to the point of beginning.

The Alderman, Bessie, farm located on the north side of State Highway 53 and 0.1 mile west of its intersection with State Secondary Road 1121.

The Anderson, Julian W., farm located on both sides of State Secondary Road 1108 and

0.9 mile northwest of the junction of said road and State Secondary Road 1107.

The Armstrong, Willie, farm located 0.5 mile west of State Secondary Road 1408 and 0.3 mile south of the junction of said road with State Highway 210.

The Colvin, Alex, farm located on the northwest side of State Secondary Road 1120 and 1.4 miles southwest of the intersection of said road and U.S. Highway 421.

The Corbett, P. P. Estate, farm located 0.1 mile west of State Secondary Road 1202 and 0.2 mile north of its junction with State Secondary Road 1100.

The Kea, Leo, farm located 0.5 mile east of State Secondary Road 1105 and 1 mile southwest of the junction of said road and State Secondary Road 1104.

The Kea, Nora, farm located 0.1 mile west of the end of State Secondary Road 1106.

The Marshall, Milvin, farm located on the north side of State Secondary Road 1103 and 0.6 mile east of the southern junction of said road and State Secondary Road 1104.

The McCallister, Mary K., farm located 0.2 mile east of State Secondary Road 1105 and 1 mile southwest of the junction of said road and State Secondary Road 1104.

The McLendon, Evander, farm located 0.4 mile north of State Secondary Road 1411 and 0.3 mile east of its intersection with Pike Creek.

The Murphy, Henry, farm located 0.1 mile west of State Secondary Road 1121 and 0.4 mile north of its intersection with State Highway 58.

The Stringfield Estate, John, located on the southwest side of State Secondary Road 1517 and 1.4 miles east of the junction of said road and U.S. Highway 117.

The Thomas, Kenneth, farm located on the west side of State Secondary Road 1125 and 0.2 mile north of its junction with State Secondary Road 1121.

The Walker, Janie N., farm located on both sides of State Secondary Road 1125 and on the west side of State Secondary Road 1121.

The Williams, John H., and Heirs, farm located on the east side of State Secondary Road 1520 and 2.7 miles north of the junction of said road and State Highway 210.

Pitt County. That area bounded by a line beginning at a point where State Secondary Road 1919 intersects the Pitt-Craven County Line, thence southwest along said county line to its intersection with State Highway 118, thence westward along said highway to it's intersection with State Secondary Road 1753, thence northward along said road to its junction with State Secondary Road 1919, thence eastward to the point of beginning.

The Garris, Bruce E., farm located in the south junction of State Highway 118 and State Secondary Road 1916.

The Hodges, M. B., farm located on the east side of State Secondary Road 1907 and 1.1 miles north of State Highway 118.

Richmond County. The Autry, J. H., farm located on the north side of State Secondary Road 1803 and 0.7 miles east of Osborne.

The Beck, Lacy A., farm located on both sides of State Secondary Road 1607 and 0.4 mile southeast of the intersection of said road and State Secondary Road 1608.

The Bethea, Queen, farm located on the northeast side of State Secondary Road 1803 and 0.4 mile southeast of the intersection of said road and State Secondary Road 1825.

The Chappell, Fred, Jr., located on the northwest side of N.C. Highway 177 and 0.5 mile northeast of the junction of said road and State Secondary Road 1607.

The David, Ethel, farm located on both sides of State Secondary Road 1803, on the west side of the intersection of said road with State Secondary Road 1825.

The Davis, Cimon, farm located on the northwest side of N.C. Highway 38 and 0.5 mile northeast of the intersection of said road and State Secondary Road 1803.

The Davis, Katherine, farm located on the northeast side of State Secondary Road 1803 and 0.4 mile northwest of the intersection of said road and N.C. Highway 68.

The Dial, Dennic, farm located on the north side of State Secondary Road 1607 and 0.8 mile west of the intersection of said road and State Secondary Road 1608.

The Dumas, Elnora, farm located on the northeast side of State Secondary Road 1803 and 0.3 mile southeast of the intersection of said road and State Secondary Road 1825.

The Dumas, Reba, farm located on the northeast side of State Secondary Road 1803 and 0.3 mile northwest of said intersection of N.C. Highway 38.

The Elizhbugar, Charity, farm located on the northeast side of State Secondary Road 1008 and 2 miles northwest of its junction with State Secondary Road 1475.

The Godfrey, J. R., farm located on the northwest side of State Secondary Road 1318 and 0.2 mile north of its junction with State Secondary Road 1310.

The Hailey, Annie, farm located on the north side of State Secondary Road 1475 and 1.7 miles west of its junction with U.S. Highway 1.

The Hailey, Maria, farm located on the southwest side of State Secondary Road 1440 and 0.3 mile southeast of its junction with State Secondary Road 1433.

The Hamlet Gin & Supply Co., farm located on both sides of State Secondary Road 1803 and on the east side of the intersection of said road and State Secondary Road 1825.

The Ingram, Rome, farm located on the southwest side of State Secondary Road 1003 and 1.8 miles northwest of its junction with State Secondary Road 1475.

The Little, John, farm located on the southeast side of State Secondary Road 1442 and at the junction of said road with State Secondary Road 1476.

The McLaurin, Meta, farm located on the southwest side of State Secondary Road 1803 and 0.3 mile southeast of the intersection of said road and State Secondary Road 1825.

The McNeill, Dalton, farm located on the southwest side of State Secondary Road 1003 and 1.9 miles northwest of its junction with State Secondary Road 1475.

The Quick, Julius, farm located on the northeast side of State Secondary Road 1992 and 0.6 mile northeast of its junction with State Secondary Road 1994.

The Rush, Eli, farm located on the northwest side of State Secondary Road 1442 and 0.7 mile northeast of its junction with State Secondary Road 1439.

The Rush, James, farm located on the southeast side of State Secondary Road 1442 and 0.7 mile northeast of its junction with State Secondary Road 1439.

The Sorennen, Gladys, farm located on the southwest side of State Secondary Road 1803 and 0.4 mile northwest of the intersection of said road and N.C. Highway 38.

The Steen, Willard, farm located on the southwest side of State Secondary Road 1803 and 0.2 mile southeast of the intersection of said road and State Secondary Road 1825.

The Terry, Ruth, farm located on both sides of State Secondary Road 1442 and 0.2 mile northeast of its junction with State Secondary Road 1477.

The Terry, Tom, farm located on both sides of State Secondary Road 1442 and 0.3 mile northeast of its junction with State Secondary Road 1477.

The Terry, W. C., farm located on the west side of State Secondary Road 1424 at its junction with State Secondary Road 1507 at Roberdel, N.C.

The Thomas, Walter, farm located on both sides of U.S. Highway 220 and 0.4 mile northeast of its junction with State Secondary Road 1433.

The Wall, Ben, farm located on the northeast side of State Secondary Road 1440 and 0.4 mile southeast of its junction with State Secondary Road 1433.

The Waters, Will, farm located on both sides of State Secondary Road 1822 and 0.4 mile southwest of its junction with State Secondary Road 1607.

The Watkins, John Q., farm located on the southeast side of State Secondary Road 1476 and 0.3 mile northeast of its junction with State Secondary Road 1442.

The Watkins, Mosby, farm located on both sides of State Secondary Road 1476 and 0.2 mile northeast of its junction with State Secondary Road 1442.

The York, Will, farm located on the northeast side of State Secondary Road 1803 and 0.4 mile northwest of the intersection of said road and N.C. Highway 38.

Sampson County. The entire county.

Scotland County. That area bounded by a line beginning at a point where U.S. Highway 15–401 intersects the North Carolina-South Carolina State line and extending northeast along said highway to its junction with U.S. Highway 15A–401A, thence north along said highway to its junction with U.S. Highway 501, thence north along said highway to its intersection with U.S. Highway 15–401, thence southwest along said highway to its intersection with State Secondary Road 1300, thence northwest along said road to its junction with State Secondary Road 1110, thence northwest along said road to its junction with State Secondary Road 1324, thence north along said road to its junction with State Secondary Road 1345, thence northwest along said road to its intersection with State Secondary Road 1341, thence northeast along said road to its junction with State Secondary Road 1338, thence north along said road to its intersection with the southern boundary of the Sandhills Game Management Area, thence east along said

boundary to its intersection with U.S. Highway 15–1501, thence north along said highway to its intersection with the Scotland-Hoke County line, thence southeast along said county line to the Scotland-Robeson County line, thence south and southwest along said county line to the North Carolina-South Carolina State line, thence northwest along said State line to the point of beginning, excluding the area within the corporate limits of the city of Laurinburg and the town of East Laurinburg.

The Butler, Luther, farm located on the south side of State Secondary Road 1154 and 0.2 mile east of the junction of said road with State Secondary Road 1155.

The Calhoun, L. E., farm located on the south side of State Highway 79 and and 0.3 mile west of its junction with State Secondary Road 1118.

The Gibson, H. P., Estate, farm located on the north side of State Highway 79 and 0.4 mile west of its junction with State Secondary Road 1118.

McCoy, R. F., farm located on the east side of State Secondary Road 1346 and 0.4 mile north of its junction with State Secondary Road 1343.

The Morgan, J. D., farm located on the east side of State Secondary Road 1346 and 0.5 mile north of the junction of said road with State Secondary Road 1343.

The Morgan, J. D., farm located on both sides of State Secondary Road 1345 and 0.1 mile northwest of its junction with State Secondary Road 1342.

The Newton, Peter F., farm located at the intersection of State Secondary Roads 1334, 1336, and 1345.

The Sharpe, Preston, farm located on the south side of U.S. Highway 74 and 0.2 mile west of the junction of said highway with State Secondary Road 1153.

The Steele, J. D., farm located on both sides of State Secondary Road 1351 and 0.9 mile northwest of the junction of said road with State Secondary Road 1346.

Wayne County. That area bounded by a line beginning at a point where the State Highway 111 and State Highway 55 intersect, thence southwest and west along State Highway 55 to its intersection with State Secondary Road 1937, thence northerly on said road to its junction with State Secondary Road 1932, thence north on said road to the intersection with State Secondary Road 1120, thence easterly along said road to its junction with State Secondary Road 1915, thence east along a line projected from a point at the junction of State Secondary Roads 1120 and 1915 to the junction of said line with a point located at the junction of Sleepy Creek and Neuse River, thence east along said river to its intersection with State Highway 111, thence south along said highway to the point of beginning.

The Barwick, George, farm located on the east side of State Secondary Road 1931 and 0.1 mile south of its junction with State Secondary Road 1930.

The Baucom, Howard, farm located on the east side of State Secondary Road 1932 and 0.2 mile north of its junction with State Secondary Road 1927.

The Benton, Bernice L., farm located on the south side of State Secondary Road 1730 and 0.3 mile east of its junction with State Highway 111.

The Brock, Odell, farm located on the north side of State Secondary Road 1210 and 0.3 mile east of its junction with State Secondary Road 1209.

The Carraway, Ethel, farm located on the east side of State Secondary Road 1915 and 0.1 mile north of the junction of said road and State Secondary Road 1130.

The Casey, Emma, E., farm located 7 miles east of Goldsboro on the north side of U.S. Highway 70 and 0.4 mile east of the junction of State Secondary Road 1721 and said highway.

The Coor, O. S., farm located on both sides of State Secondary Road 1730 and 0.6 mile east of its junction with State Highway 111.

The Crawford, William P., farm located on the south side of State Secondary Road 1330 and 0.9 mile west of State Highway 581.

The Daly, N. B., farm located on the north side of State Secondary Road 1730 and 0.8 mile east of the junction of said road with State Highway 111.

The Dawson, L. A., farm located on the west side of State Highway 111 and 0.5 mile south of the junction of said highway and State Secondary Road 1730.

The Edwards, Julia, farm located in the northeast intersection of State Highway 111 and State Secondary Road 1745.

The Flowers, Willie, farm located on the north side of U.S. Highway 13 and 0.4 mile east of its junction with State Secondary Road 1207.

The Grady, Gertrude W., farm located on the south side of State Secondary Road 1741 and 0.7 miles east of its junction with State Secondary Road 1740.

The Grady, Mrs. Sim, farm located in the north junction of State Highway 111 and State Secondary Road 1730.

The Grady, Vernie C., farm located on the west side of State Secondary Road 1931 and 0.2 mile north of its intersection with State Secondary Road 1120.

The Grant, Maggie, Estate located on the west side of N.C. Highway 111 and 1.9 miles south of the junction of State Secondary Road 1730 with said highway.

The Grant, Nannie, farm located on both sides of State Secondary Road 1741 and 0.6 miles east of its junction with State Secondary Road 1740.

The Grantham, Barfield, farm located on the west side of State Secondary Road 1931 and 0.4 mile north of its intersection with State Secondary Road 1120.

The Gray, Albert, farm located on the east side of State Secondary Road 1719 and 0.9 mile south of its intersection with U.S. Highway 70.

The Green, Bessey, farm located at the southern end of the State Secondary Road 1741 and 1.3 miles east of its junction with State Secondary Road 1740.

The Griffin, McKinley, farm located on the north side of State Secondary Road 1737 and 0.2 mile east of its junction with State Secondary Road 1731.

The Griffin, Oliver H., farm located 0.6 mile north of Dudley and 0.2 mile west of U.S. Highway 117

The Griffin, W. A., farm located on the northeast side of State Secondary Road 1731 and 0.6 mile north of its junction with State Secondary Road 1737.

The Gurley, Clara Lee, farm located on the south side of State Secondary Road 1330 and 0.1 mile west of the junction of said road and State Secondary Road 1332.

The Haggin, Joe, No. 1, farm located on the east side of State Secondary Road 1931 and 0.7 mile north of its intersection with State Secondary Road 1120.

The Haggin, Joe, No. 2, farm located on the east side of State Secondary Road 1931 and 1.1 miles northeast of its intersection with State Secondary Road 1120.

The Ham, George E., farm located southeast of Seymour Johnson Air Base on the south side of State Secondary Road 1909 and 0.7 mile west of the junction of said road with State Secondary Road 1910.

The Herring, Charles F., farm located on the south side of State Secondary Road 1741 and 0.3 mile east of its junction with State Secondary Road 1740.

The Herring, Harmon, farm located on the south side of State Secondary Road 1734 and 0.4 mile east of its junction with State Secondary Road 1731.

The Herring, Thel, farm located on the west side of State Secondary Road 1711 and 0.4 mile north of its junction with U.S. Highway 70A.

The Hines, J. D., farm located on both sides of State Secondary Road 1230 and 0.8 mile east of the intersection of said road with State Highway 581.

The Hollaman, R. J., farm located on the northwest corner of State Secondary Road 1125 and 0.7 mile north of the junction of said road and State Secondary Road 1122.

The Humphrey, Josephine, farm located on east side of State Secondary Road 1932 and 0.2 mile north of its intersection with State Secondary Road 1120.

The Ivey, W. H., farm located on the south side of State Secondary Road 1734 and 0.3 mile east of its junction with State Secondary Road 1731.

The Johnson, J. R., farm located on the south side of State Secondary Road 1330 and 0.1 mile west of the junction of said road and State Secondary Road 1332.

The Jones, Mary, farm located on both sides of State Secondary Road 1730 and its junction with State Secondary Road 1731.

The Lane, Alfred, farm located on the south side of State Secondary Road 1730 and 0.4 mile east of its junction with State Highway 111.

The Lofton, Burt & Davis, King, farm located on the east side of State Secondary Road 1730 and 0.3 miles south of its junction with State Highway 55.

The McClenny, G. A. farm located on the south side of State Secondary Road 1907 and 0.1 mile west of the junction of said road with State Highway 581.

The McClenny, G. A., No. 2, farm located on both sides of State Secondary Road 1332 and 0.1 mile north of junction of said road and State Secondary Road 1330.

The Newsome, Paul, farm located on the east side of State Secondary Road 1719 and 1 mile south of its intersection with U.S. Highway 70.

The Oliver, Estella J., farm located on the west side of U.S. Highway 117 and 0.8 mile north of Brogden School.

The Oliver, H. H., farm located on the south side of State Secondary Road 1219 and 0.4 mile east of its junction with State Secondary Road 1218.

The Parks, Robert, farm located on the southeast side of State Secondary Road 1932 and 0.5 mile northeast of its intersection with State Secondary Road 1120.

The Perkins, Joe D., farm located on the northwest side of State Secondary Road 1711 and 0.2 mile southwest of the intersection of said road with U.S. Highway 70 Bypass.

The Price, James, farm located in the southeastern intersection of State Highway 111 and State Secondary Road 1745.

The Ray, Cora Pate, farm located on both sides of State Secondary Road 1730 and 0.8 mile west of its junction of State Secondary Road 1731.

The Raynor, A. B., farm located on the south side of U.S. Highway 13 and 0.1 mile east of its junction with State Secondary Road 1207.

The Raynor, Early, No. 1, farm located on the south side of U.S. Highway 13 and 0.3 mile east of its junction with State Secondary Road 1207.

The Raynor, Early, No. 2, farm located on the north side of State Secondary Road 1101 and 0.7 mile east of its intersection with State Secondary Road 1105.

The Raynor, Elester, farm located on the east side of State Secondary Road 1105 and 0.8 mile south of its intersection with U.S. Highway 13.

The Sasser, Rosa, farm located on both sides of State Highway 111 and 0.1 mile south of its junction with State Secondary Road 1912.

The Smith, Alfred, farm located on the north side of State Secondary Road 1330 and 0.9 mile west of the junction of said road and North Carolina Highway 581.

The Smith, Arnold, farm located on the southeast side of State Secondary Road 1932 and 0.5 mile northeast of its intersection with State Secondary Road 1120.

The Smith, Olivia, farm located on the southeast side of State Secondary Road 1122 and both sides of State Secondary Road 1124.

The Sutton, D. M., farm located on the east side of State Secondary Road 1731 and 0.9 mile north of the Neuse River.

The Sutton, Gordon, farm located on the south side of State Secondary Road 1730 and 1.6 miles east of its junction with State Highway 111.

The Talton, Lillian D., farm located on the south side of State Secondary Road 1730 and 0.6 mile east of its junction with State Highway 111.

The Tart, John, No. 1, farm located on the south side of U.S. Highway 13 and 0.7 mile east of its intersection with State Secondary Road 1105.

The Thornton, S. E., farm located on the southeast junction of State Secondary Roads 1210 and 1209.

The Turnage, W. H., farm located on the northwest side of State Secondary Road 1932 and 0.3 mile northeast of its junction with State Secondary Road 1927.

The Weaver, Luby W., farm located on both sides of State Secondary Road 1106 and 0.2 mile east of its junction with State Secondary Road 1101.

The Williams, Eddie, farm located on the north side of State Highway 581 and the east side of State Secondary Road 1236 at the junction of said roads.

The Wise, Ella, farm located on the south side of State Secondary Road 1208 and 1 mile west of its junction with State Secondary Road 1209.

Wilson County. The Eatmon, Ralph, farm located on both sides of State Secondary Road 1302 and 0.5 mile east of its intersection with State Secondary Road 1301.

2. In § 301.80–2a relating to the State of South Carolina under suppressive area, the description for Florence County is changed to add three properties in alphabetical order to read as follows:

South Carolina

(1) *Generally infeasted area.* None.

(2) *Suppressive area.*

* * * * *

Florence County.

* * * * *

The Canal Timber Company, farm located at the junction of State Secondary Highway 57 and State Secondary Highway 791. Said farm being on all sides of said junction.

* * * * *

Done at Washington, D.C. this 8th day of June, 1979.

Note.—This proposal has been reviewed under the USDA criteria established to implement E. O. 12044, "Improving Government Regulations." A determination has been made that this action should not be classified "significant under these criteria." A draft Impact Analysis is available from Plant Protection and Quarantine Programs, APHIS, Room 633, Federal Building, Hyattsville, MD 20782.

James O. Lee, Jr.,

Deputy Administrator, Plant Protection and Quarantine Programs, Animal and Health Inspection Service.

BILLING CODE 3410-34-M

Agricultural Marketing Service

[7 CFR Part 945]

Irish Potatoes Grown in Certain Designated Counties in Idaho and Malheur County, Oreg.; Proposed Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed regulation would require fresh market shipments of potatoes grown in certain counties in Idaho and Malheur County, Oregon, to be inspected and meet minimum grade, size, cleanliness, maturity and pack requirements during the period August 1, 1979 through August 15, 1980. The regulation would promote orderly marketing of such potatoes and keep less desirable sizes and qualities from being shipped to consumers.

DATE: Comments due July 16, 1979.

ADDRESSES: Comments should be sent to: Hearing Clerk, Room 1077 South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written comments shall be submmitted, and they will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Donald S. Kuryloski, Acting Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: (202) 447-6393.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 98 and Order No. 945, both as amended (7 CFR Part 945), regulate the handling of potatoes grown in designated counties in Idaho and Malheur County, Oregon. It is effective under the Agricultural Marketing Act of 1937, as amended (7 U.S.C. 601–674). The Idaho-Eastern Oregon Potato Committee, established under the order, is responsible for its local administration.

This regulation is based upon recommendations made by the committee at its public meeting in Pocatello, Idaho, on May 31, 1979.

The proposed regulation is similar to those issued during past seasons. The grade, size, cleanliness, maturity, pack and inspection requirements recommended herein are necessary to prevent potatoes of low quality or undesirable sizes from being distributed to fresh market outlets. The specific proposed requirements would benefit consumers and producers by standardizing and improving the quality of the potatoes shipped from the production area, thereby promoting orderly marketing, and would tend to effectuate the declared policy of the act.

Exceptions would be provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable.

A specified quantity of potatoes would be exempt from maturity requirements in order to (1) permit

growers to make test diggings without loss of the potatoes so harvested or (2) to allow a lot to be shipped which after regrading, meets the grade and size requirements but then fails to meet the maturity requirements, possibly due to further "skinning" as a result of running the potatoes over the grader again.

Shipments would be permitted to certain special purpose outlets without regard to minimum grade, size, cleanliness, maturity and pack requirements, provided that safeguards were met to prevent such potatoes from reaching unauthorized outlets. Since no purpose would be served by regulating potatoes used for charity purposes, such shipments would also be exempt. Certified seed and seed pieces cut from stock eligible for certification would be exempt, because requirements for this outlet differ greatly from those for fresh market.

Potatoes used for experimentation have special requirements and do not normally enter commercial channels of trade. Potatoes for most processing uses are exempt under the legislative authority for this part.

Requirements for export shipments differ from those for domestic markets. While the standard quality requirements are desired in foreign markets, smaller sizes are more acceptable. In commercial prepeeling, operators can use potatoes with surface defects which would be undesirable for the tablestock market, and smaller sizes are acceptable. Therefore, different requirements are proposed for export and prepeeling shipments.

In order to maximize the benefits of orderly marketing the proposed regulation should become effective on August 1, when the marketing season is expected to begin. Interested persons were given an opportunity to comment on the proposal at an open public meeting on May 31, where it was unanimously recommended by the committee. This proposal is similar to regulations in effect for past seasons. It is hereby determined that the period allowed for comments should be sufficient under these circumstances and will effectuate the declared policy of the act.

The proposal is as follows:

§ 945.337 [Removed]

Section 945.337 is removed and § 945.338 is added to Part 945 of Title 7 CFR to read as set forth below.

§ 945.338 Handling regulation.

During the period August 1, 1979, through August 15, 1980, no person shall handle any lot of potatoes unless such potatoes meet the requirements of paragraphs (a), (b), (c) and (d) of this section, or unless such potatoes are handled in accordance with paragraphs (e) and (f), or (g) of this section.

(a) *Minimum quality requirements.*—(1) *Grade. All varieties.* U.S. No. 2 or better grade.

(2) *Size.* (i) *Round red varieties.* 1⅞ inches minimum diameter.

(ii) *All other varieties.* 2 inches minimum diameter, or 4 ounces minimum weight.

(iii) *All varieties.* Size B if U.S. No. 1 grade.

(3) *Cleanliness. All varieties.* "Fairly clean."

(b) *Minimum maturity requirements.*—(1) *White Rose and red skin varieties.* Each season from August 1 through December 31, "moderately skinned"; thereafter no maturity requirements.

(2) *Norgold varieties.* Each season from August 1 through August 15, "moderately skinned"; thereafter "slightly skinned."

(3) *All other varieties.* "Slightly skinned."

(4) *Exceptions.* (i) Subject to compliance with subdivision (iii) of this subparagraph, any lot of potatoes not exceeding a total of 80 hundredweight of each variety may be handled for any producer without regard to the foregoing maturity requirements.

(ii) If an officially inspected lot of potatoes meets the foregoing maturity requirements, but fails to meet the grade and size requirements, the lot may be regraded. If, after regrading, such lot then meets the grade and size requirements but fails to meet the maturity requirements, as indicated by the applicable Federal-State inspection certificate, such lot if not exceeding 100 hundredweight shall be exempt from the foregoing maturity requirements if the handler complies with subdivision (iii) of this subparagraph.

(iii) Prior to each shipment of potatoes exempt from the foregoing maturity requirements, the handler thereof shall report to the committee the name and address of the producer of such potatoes, and each such shipment shall be handled as an identifiable entity.

(c) *Pack.* (1) When 50-pound containers (except master containers) of long varieties of potatoes are marked with a count, size or similar designation they must meet the count, average count and weight ranges for the count designation listed below.

Count	Range: Average count*	Range: Weight
Larger than 50 size	10 percent over or under	5 percent over or under	15 ounces or larger
Larger than:			
50 size	46 to 55	49 to 58	12 to 16.
60 size	54 to 66	57 to 63	10 to 14.
70 size	63 to 77	67 to 74	9 to 13.
80 size	72 to 88	76 to 84	8 to 13.
90 size	81 to 99	86 to 95	7 to 12.
100 size	90 to 110	96 to 106	6 to 10.
110 size	99 to 121	105 to 116	5 to 9.
120 size	108 to 132	114 to 126	4 to 8.
130 size	117 to 143	124 to 137	4 to 8.
140 size	126 to 154	133 to 147	4 to 8.
Smaller than 140 size	10 percent over or under	5 percent over or under	4 to 8.

*Applicable to lots.

The following tolerances by weight, are provided for potatoes in any lot which fail to meet weight range for the designated count:

(i) Not to exceed 5 percent for undersize; and

(ii) Not to exceed 10 percent for oversize.

(2) Potatoes packed in 50-pound cartons shall be U.S. No. 1 or better grade. However, potatoes of U.S. Extra No. 1 grade shall be no smaller than 110 size nor larger than 60 size.

(d) *Inspection.* (1) No handler shall handle potatoes unless such potatoes are inspected by either the Idaho Federal-State Inspection Service or Oregon Federal-State Inspection Service and are covered by a valid inspection certificate except when relieved of such requirement pursuant to paragraphs (e) and (f), or (g) of this section.

(2) Each lot moving by truck shall be accompanied by a copy of a valid inspection certificate.

(e) *Special purpose shipments.* (1) The minimum grade, size, cleanliness, maturity and pack requirements set

forth in paragraphs (a), (b) and (c) of this section shall not be applicable to shipments of potatoes for any of the following purposes:

(i) Charity;

(ii) Certified seed;

(iii) Seed pieces cut from stock eligible for certification as certified seed;

(iv) Experimentation; and

(v) Canning, freezing and "other processing" as hereinafter defined: Except shipments of potatoes for the purpose specified in this subdivision (v) shall be exempt from inspection requirements specified in § 945.65 and paragraph (d) of this section and from assessment requirements specified in § 945.42.

(2) The minimum grade, size, cleanliness, maturity and pack requirements set forth in paragraphs (a), (b) and (c) of this section shall be applicable to shipments of potatoes for each of the following purposes:

(i) *Export.* Except potatoes of a size not smaller than 1½ inches in diameter may be shipped if the potatoes grade not less than U.S. No. 2; and

(ii) *Prepeeling.* Except potatoes of a size not smaller than 1½ inches in diameter may be shipped if the potatoes grade not less than Idaho Utility or Oregon Utility grade.

(f) *Safeguards.* (1) Each handler making shipments of potatoes for charity, seed pieces cut from stock eligible for certification, experimentation, export, or for prepeeling pursuant to paragraph (e) of this section shall:

(i) First, apply to the committee for and obtain a Certificate of Privilege to make shipments for each purpose;

(ii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iii) At the time of applying to the committee for a Certificate of Privilege, or promptly thereafter furnish the committee with a receiver's or buyer's certification that the potatoes so handled are to be used only for the purpose stated in the application and that such receiver will complete and return to the committee such periodic receiver's reports that the committee may require.

(iv) Mail to the office of the committee a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(v) Bill each shipment directly to the applicable receiver.

(2) Each handler making shipments of potatoes for canning, freezing, or "other processing" pursuant to paragraph (e) of this section shall:

(i) First apply to the committee for and obtain a Certificate of Privilege to make shipments for processing;

(ii) Make shipments only to those firms whose names appear on the committee's current list of manufacturers of potato products;

(iii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iv) Mail to the committee's office a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(v) Bill each shipment directly to the applicable processor.

(3) Each receiver of potatoes for processing pursuant to paragraph (e) of this section shall:

(i) Complete and return an application form for listing as a manufacturer of potato products;

(ii) Certify to the committee and to the Secretary that potatoes received from the production area for processing will be used for such purposes and will not be placed in fresh market channels;

(iii) Report on shipments received as the committee may require and the Secretary approve.

(g) *Minimum quantity exception.* Each handler may ship up to, but not to exceed, five hundredweight of potatoes any day without regard to the inspection and assessment requirements of this part, but this exception shall not apply to any shipment that exceeds five hundredweight of potatoes.

(h) *Definitions.* The terms "U.S. Extra No. 1," "U.S. No. 1," "U.S. No. 2," "Size B," "fairly clean," "moderately skinned," and "slightly skinned," shall have the same meaning as when used in the United States Standards for Potatoes (7 CFR 2851.1540–2851.1566), including the tolerances set forth therein. The term "prepeeling" means the commercial preparation in a prepeeling plant of clean, sound, fresh potatoes by washing, peeling or otherwise removing the outer skin, trimming, sorting, and properly treating to prevent discoloration preparatory to sale in one or more of the styles of peeled potatoes described in § 2852.2422 of the United States Standards for Peeled Potatoes (7 CFR 2852.2421–2852.2433). The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, dicing, or applying material to prevent oxidation does not constitute "other processing." The terms "Idaho Utility" grade and "Oregon Utility" grade shall have the same meaning as when used in the standards for potatoes for the respective State. Other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 98 and Order No. 945, both as amended.

(i) *Applicability to imports.* Pursuant to § 8e of the act and § 980.1 "Import regulations" (7 CFR 980.1), Irish potatoes of the long varieties imported during the effective period of this section shall meet the grade, size, quality and maturity requirements specified in paragraphs (a) and (b) of this section.

Dated: June 12, 1979.

Note.—This proposed regulation has not been determined significant under the USDA criteria for implementing Executive Order 12044.

D. S. Kuryloski,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

FEDERAL DEPOSIT INSURANCE CORPORATION

[12 CFR Part 309]

Routine Public Disclosure of Trust Department Annual Reports of Assets Filed by State Nonmember Insured Banks

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Proposed Amendment to existing Regulations.

SUMMARY: The Board of Directors of FDIC has voted to amend Part 309 of its regulations so as to allow for routine public disclosure of the Trust Department Annual Reports of Assets filed with the FDIC by State nonmember insured banks. All interested persons are invited to submit written comments on the proposed amendment.

DATES: Comments must be received by July 16, 1979.

ADDRESS: Comments should be addressed to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429.

FOR FURTHER INFORMATION CONTACT: Pamela E. F. LeCren, Attorney, legal Division (202–389–44553), or John Harvey, Review Section Chief (202–389–4620).

SUPPLEMENTARY INFORMATION: The FDIC currently obtains Trust Department Annual Reports of Assets from nonmember insured banks. The information compiled from these reports is used in a publication of statistical data on trust activities. The publication contains in some instances the data supplied by individual banks. The reports are themselves exempt from public disclosure under the Freedom of Information Act (5 U.S.C. § 552(b)(8)), but may be disclosed at the FDIC's discretion. As it is the opinion of the Board of Directors of the FDIC that the public will be benefited by the release of this information and that State nonmember insured banks will not be harmed thereby, the Board of Directors proposes to make these reports available to the public on a routine basis. In order to do so, § 309.4(b) of FDIC's regulations must be amended to allow for such disclosure.

* * * * *

In consideration of the foregoing, the Board of Directors of the FDIC proposes to amend 12 CFR § 309.4(b)(1) by adding at the end thereof:

§ 309.4 Information made available for public inspection.

(b) * * *

(1) * * *

(v) Annual Trust Department Report of Assets for commercial banks and mutual savings banks.[*]

By order of the Board of Directors of the Federal Deposit Insurance Corporation 11th day of June, 1979.

Hoyle L. Robinson,

Executive Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[18 CFR Part 271]

[Docket No. RM79-44]

Ceiling Prices; High-Cost Natural Gas

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of Inquiry.

SUMMARY: The Federal Energy Regulatory Commission (Commission) requests comments on what regulations should be promulgated for the implementation of section 107(b) of the Natural Gas Policy Act of 1978. Section 107(b) deals with the authority of the Commission to set incentive prices for high-cost natural gas.

DATES: Comments should be filed by July 16, 1979.

ADDRESSES: All filings should reference Docket No. RM79-44 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Philip Yates, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 (202) 275-4212.

The Federal Energy Regulatory Commission (Commission) gives notice that it is considering proposing regulations implementing all or portions of sections 107 (b) and (c) of the Natural Gas Policy Act (NGPA). It hereby invites comments, data, and suggestions from interested persons on the matters more fully set forth below.

Section 107(b) of the NGPA gives the Commission authority to "prescribe a maximum lawful price applicable to any first sale of any high-cost natural gas which exceeds the otherwise applicable maximum lawful price to the extent that such price is necessary to provide reasonable incentives for the production of such high-cost natural gas." Section 107(a) establishes a maximum lawful price for deep, high-cost natural gas, i.e., natural gas produced from wells the surface drilling of which began on or after February 19, 1977, if the production is from a completion location of more than 15,000 feet. Because of the limited time the Commission had to adopt interim regulations under the NGPA, only the rules necessary for determining whether or not natural gas qualified as deep, high-cost natural gas have been promulgated. However, section 107 authorizes the Commission to set prices for other categories of high-cost gas. Whether or not and how this authority should be implemented is the subject of this notice of inquiry.

In section 107(c) (2), (3), and (4) the term "high-cost natural gas" is defined to include natural gas determined to be "produced from geopressured brine," "occluded natural gas produced from coal seams," and natural gas "produced from Devonian shale." The Commission has addressed the appropriate definitions for these categories of gas in a Notice of Proposed Rulemaking issued today in this docket.

Section 121 of the NGPA provides that deep, high-cost gas, as well as the gas covered by the proposed definitions, will no longer be subject to price controls under the NGPA when the incremental pricing rule becomes effective. Section 201 of the NGPA requires that the Commission make that rule effective no later than November 8, 1979. Comments on the need or desirability of establishing incentive prices for categories listed in sections 107(c) (2) through (4) should discuss the limited period of applicability of such prices, and its effect on the position taken in the comments.

In addition to the specific categories of natural gas described above, section 107(c)(5) authorizes the Commission to establish incentive prices for any category of high-cost natural gas "produced under such other conditions as the Commission determines to present extraordinary risks or costs." It should be noted that any categories the Commission establishes under section 107(c)(5) are not included in section 121, and thus will remain subject to NGPA pricing regulation.

Comments concerning the implementation of section 107(c)(5) are solicited. Specifically, the Commission is interested in identifying those general categories of natural gas which interested persons believe should be considered under this provision and the price believed to be necessary to "provide reasonable incentives for the production" of that gas.

In this regard, the Commission received on March 9, 1979, a Petition of Rulemaking, in Docket No. RM79-27, filed by Exxon Corporation, for thirty-six producers and entitled "In the Matter of Determinations Whether Wells Drilled in More Than 500-foot Water Depth Should Be Determined to be 'High-Cost Gas' Under Section 107(c)(5) of the Natural Gas Policy Act." The petition requests that the Commission institute a rulemaking

proceeding to determine whether natural gas produced from new wells drilled on submerged land located beneath more than 500 feet of water should be classified as high-cost natural gas in order to "encourage the timely exploration in an area inherently risky and costly and involving long-term commitments of vast amounts of capital." The Commission also requests comments concerning this petition, copies of which are available at the Commission's Office of Public Information.

All submissions in response to this Notice of Inquiry should be accompanied by supporting data. Comments should include a description of the conditions which are believed to present extraordinary risks or costs. All comments suggesting an incentive price for any category of high-cost gas, including those categories specifically set forth in the statute, should include whatever economic analysis exists to support any suggested price, including the data supporting such analysis, and the methodology used to determine the suggested price. The Commission is particularly interested in receiving specific information for each category; comments should avoid general statements. Further, comments should not recommend a single incentive price for a group of categories, unless there are data supporting the need for that price with respect to each category.

Comment Procedures

Comments should be filed no later than July 16, 1979. Any interested person may submit to the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, data, comments, or suggestions in writing, concerning all or part of the matters raised in this notice. An original and 14 conformed copies should be filed with the Secretary of the Commission. Comments should indicate the name, title, mailing address, and telephone number of the person to whom communications concerning the proposal may be addressed. Comments should reference Docket No. RM79-44 on the outside of the envelope and on all documents submitted to the Commission. Written comments will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426 during regular business hours.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

[20 CFR Part 615]

Extended Benefits; Revision of Regulations

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule.

SUMMARY: This is a proposal to amend the Department of Labor's regulation on the computation of the National and State "on" and "off" indicators for an Extended Benefit period. The regulation is amended so as to eliminate weeks claimed for Federal-State Extended Benefits and State additional benefits from the computation of the indicators.

DATES: Comments: All comments on the changes in this proposal must be received on or before August 14, 1979. Proposed effective date: October 1, 1979.

ADDRESSES: Send comments on this proposal to Employment and Training Administration, U.S. Department of Labor, Room 7000, Patrick Henry Building, 601 D Street, NW, Washington, D.C. 20213.

All comments received will be available for public inspection during normal business hours, in Room 7000, at the above address.

FOR FURTHER INFORMATION CONTACT: James H. Manning, Chief, Division of Actuarial Services, Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, Room 7410, Patrick Henry Building, 601 D Street, NW., Washington, D.C. 20213, telephone 202-376-7231.

SUPPLEMENTARY INFORMATION: The Federal-State Extended Unemployment Compensation Act of 1970 (Title II of Pub. L. 91-373; 84 Stat. 695, 708; 26 U.S.C. 3304 note) created a program of extended unemployment benefits (referred to as Extended Benefits) as a permanent part of the Federal-State Unemployment Compensation Program, for unemloyed individuals who have exhausted their rights to regular unemployment benefits under State and Federal unemployment conpensation laws. Extended Benefits are payable in a State during an Extended Benefit Period, which is triggered "on" when unemployment in the State or in all States collectively reaches the high levels set in the Act. The Act and the State unemployment compensation laws also provide that an Extended Benefit Period in a State will trigger "off" when unemployment in the State is no longer at the high levels set in the Act.

National and State "on" and "off" indicators are triggered by the national or state "rate of insured unemployment", a term which is defined in section 203(f)(1) of the Act as meaning—

* * * the percentage arrived at by dividing—

(A) the average weekly number of individuals filing claims for weeks of unemployment with respect to the specified period, as determined on the basis of the reports made by all State agencies (or, in the case of subsection (e), by the State agency) to the Secretary, by

(B) the average monthly covered employment for the specified period.

Accordingly, the Department of Labor prescribed and published in Part 615 the method for determining the "average weekly number of individuals filing claims for weeks of unemployment" in 20 CFR 615.12(d)(2) and (e)(2) as follows:

(d)(2) *Method of computing the National indicator rate.* The seasonally adjusted weekly average number of weeks claimed in all States is computed in the following manner:

(i) The number of weeks claimed for regular compensation reported by all State agencies is compiled for the current week and for each of the preceding 12 weeks.

(ii) The National total of unadjusted weeks claimed for each week in the 13-week period obtained in subdivision (i) of this subparagraph is seasonally adjustment factor of factors developed and published by the Bureau of Labor Statistics of the U.S. Department of Labor.

(iii) To these seasonally adjusted weekly volumes of insured unemployment (weeks claimed) are added weeks claimed for additional compensation and for Extended Benefits for which there are no seasonal factors.

(iv) The resulting weekly totals are added for the 13 weeks and divided by 13 to obtain the average weekly volume for the 13-week period.

* * * * *

(e)(2) *Method of computing the State indicator rates.* The unadjusted weekly average number of weeks claimed in the State is computed in the following manner:

(i) The number of weeks claimed for regular compensaton, additional compensation, and Extended Benefits are added for the current week and for each of the preceding 12 weeks.

(ii) The weekly totals obtained in subdivision (i) of this subparagraph are added for the 13 weeks and divided by 13 to

obtain the average weekly volume for the 13-week period.

Claims for Extended Benefits and additional compensation were included in the calculations because of the broad wording of section 203(f)(1). At that time there was no precedent to look to for guidance and no data which would indicate how much impact the inclusion of Extended Benefit claims would have in prolonging an extended benefit period once it had started. Over the ensuing years enough data have been gathered to warrant a reconsideration of the matter.

Proposed Amendments

The proposed amendment revises the regulation so that only those weeks claimed for regular compensation are used in the calculation of National and State "on" and "off" indicators. Under the present regulation the inclusion of Extended Benefit and State additional benefit weeks claimed in the calculation of the indicator rate (1) renders inadequate use of the rate as an economic indicator, and (2) tends to define the level of unemployment differently for "on" and "off" triggers.

National Indicator

With respect to the National indicator, under the present regulation, Extended Benefit weeks claimed will be zero during a period in which no State is triggered "on," but in turn can add up to 20 percent more claims to the calculation during times when the National trigger is "on." As an economic indicator, this can change the rate quite abruptly at the time of triggering nationally or by large States. Further, a 4.5 percent "on" trigger includes Extended Benefit weeks claimed only for States that were previously "on," while the "off" trigger includes Extended Benefit weeks claimed for all States such that the "real" rate of unemployment is higher to trigger "on" than to trigger "off." This has the further effect of causing a national Extended Benefit period to begin sooner and end later than it would without the addition of Extended Benefit and additional compensation weeks claimed. The proposed change, therefore, deletes subsection (d)(2)(iii) from § 615.12.

State Indicator

Under the present regulation, State indicators can be affected both "on" and "off." They may be delayed triggering "on" because of the requirement that the current rate be 20 percent higher than the average of the 2 previous years' rates which may include Extended Benefit weeks claimed. State "off" triggers may be postponed since the indicator rate is increased by the inclusion of Extended Benefit and additional compensation weeks claimed. The proposed change deletes weeks claimed for additional compensation and Extended Benefits from subsection (e)(2)(i) of § 615.12.

In addition, subsection (e)(3) is changed to correct an error in a reference.

Note.—The Department of Labor has determined that this document does not contain a major proposal requiring preparation of a regulatory analysis under Executive Order 12044 and applicable guidelines.

This document was prepared under the direction and control of Robert B. Edwards, Administrator, Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW, Washington, D.C. 20213.

Accordingly, 20 CFR 615.12 (d)(2) and (e)(2) and (e)(3) are proposed to be revised to read as follows:

§ 615.12 Determination of "on" and "off" indicators.

* * * * *

(d) * * *

* * * * *

(2) *Method of computing the National indicator rate.* The seasonally adjusted weekly average number of weeks claimed in all States is computed in following manner:

(i) the number of weeks claimed for regular compensation reported by all State agencies is compiled for the current week and for each of the preceding 12 weeks.

(ii) The national total of unadjusted weeks claimed for each week in the 13-week period obtained in subdivision (i) of this paragraph is seasonally adjusted, using the applicable seasonal adjustment factor or factors developed and published by the Bureau of Labor Statistics of the U.S. Department of Labor.

(iii) The resulting weekly totals are added for the 13 weeks and divided by 13 to obtain the average weekly volume for the 13-week period.

* * * * *

(e)(2) *Method of computing the State indicator rates.* The unadjusted weekly average number of weeks claimed in the State is computed in the following manner:

The number of weeks claimed for regular compensation for the current week and for each of the preceding 12 weeks are added and divided by 13 to obtain the average weekly volume for the 13-week period.

(e)(3) *Rates for preceding 2 years.* Determinations of State rates for the corresponding 13-week periods in the preceding 2 years shall be made in the same manner as provided in subsections (e) (1) and (2) of this section.

* * * * *

Signed at Washington, D.C., on June 12, 1979.

Ernest G. Green,

Assistant Secretary for Employment and Training.

[21 CFR Part 178]

[Docket No. 78N-0293]

Indirect Food Additives; Proposed Revocation of Uses of Hydrogenated 4,4'-Isopropylidenediphenolphosphite Ester Resins

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the regulations for indirect food additives by terminating the listing of hydrogenated 4,4'-

isopropylidenediphenolphosphite ester resins. This proposal is based on a previous proposal issued on the initiative of the Food and Drug Administration (FDA) together with additional data not considered in that proposal.

DATE: Comments by August 14, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John J. McAuliffe, Bureau of Foods (HFF–334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: An order published in the Federal Register of January 17, 1968 (33 FR 569) amended § 178.2010 (21 CFR 178.2010) (formerly 21 CFR 121.2566, before recodification published in the Federal Register of March 15, 1977 (42 FR 14302)) to provide for the use of hydrogenated 4,4'-isopropylidenediphenolphosphite ester resins in vinyl chloride polymer resins when such resins are used in the manufacture of rigid polyvinyl chloride bottles intended for contact with edible oils and all types of dressing for salads. The regulation was amended in the Federal Register of August 8, 1969 (34 FR 12885) to provide for the additional use of the additive in the manufacture of rigid polyvinyl chloride bottles intended for contact with dry foods of types VIII and IX, as described in table 1 of § 176.170(c) (21 CFR 176.170(c)). The regulation was further amended in the Federal Register of November 18, 1969 (34 FR 18382) to provide for the additional use of the additive in vinyl chloride-propylene copolymers complying with § 177.1980 (21 CFR 177.1980).

When the additive was first authorized for use under § 178.2010, and when the regulations were amended to provide for additional uses, available data indicated that the compound would be safe for those uses. Data subsequently became available to showing that a very closely related compound, one that shares a common reactant (hydrogenated bisphenol-A) in its synthesis with the compound in question, caused neurological hind-quarter paralysis when fed to dogs. In the absence of detailed knowledge as to the exact cause of the toxic effect (i.e., whether due to the actual compound, a reactant impurity, or a breakdown product), a notice of proposed rulemaking to revoke the listing of hydrogenated 4,4'-isopropylidenediphenolphosphite ester resins was issued in the Federal Register of April 16, 1974 (39 FR 13067). The agency has since received, in addition to the comments on that proposal, new toxicological data submitted by a manufacturer that have a direct bearing upon the safety of the compound in question and that were not available to those who commented on the first proposal. It is the purpose of the present proposal to review the comments to the original proposal, to address the implications of the new toxicological data, and to solicit further comments.

The two comments submitted in response to the request for comments to the original proposal and the Commissioner's replies to those comments are as follows:

1. The first comment argued two main points. First, the comment claimed that there was no public mention of any change in FDA's standards of toxicology or migration since the original order regulating the phosphite was issued, nor was there any indication in the proposal for revocation that the compound in question failed to meet any old or new requirements of toxicology or migration. The comment argued that any claims by FDA that the revocation of this compound's approval being carried out in order to exercise "all due caution" in favor of the consumer were redundant because FDA had already exercised "all due caution" by virtue of the fact that it saw fit to regulate this compound in the first place.

Second, the comment argued that no known properties of the organic phosphite in question justify revocation of its approval, and that the unfavorable properties of a "related compound" do not justify the revocation. Moreover, the comment claimed that the concepts of "related compound" and "chemical similarity" are open-ended and indefinite and thus should not have been used as a basis for the proposal to revoke.

As to the first point, the agency may reassess the status of a regulation on its own initiative under the general administrative provisions of § 10.25 (21 CFR 10.25). It has done so in the past and will continue to do so when a food additive regulation becomes suspect because of new or modified analytical techniques or data indicating a greater degree of toxicity than first suspected. This has been the case with the present compound.

There has been no change in the toxicology or migration standards used to evaluate the safety of the compound in question. The decision to issue a food additive regulation for the use of hydrogenated 4,4'-isopropylidenediphenolphosphite ester resins was based upon migration and toxicity data originally thought sufficient to ensure its safe use. However, after the regulation was issued, it was learned that the substance could migrate to a degree much greater than had been originally thought (possibly by as much as a factor of thirteen). This is due partly to the fact that the original migration levels, which were based on a measurement of the concentration of a chemical derivative (i.e., organophosphates) of the stabilizer, were improperly converted to the concentration of the stabilizer itself. A correction factor of 5 must be applied to obtain the actual concentration of the stabilizer. In addition, data became available after the substance was initially regulated that indicated that the migration level in water under certain conditions can be as high as 0.13 part per million (ppm) after the application of the correction factor. This level of possible migration is not considered safe in view of new toxicological findings about the stabilizer, as discussed below.

The new toxicological data resolve the question of whether the observed adverse effects and caused by the specific compound in question or by a related compound and thus render the comment's second objection moot. Screening studies were submitted by a manufacturer of the compound to establish the existence of any toxic component(s). Several substances were fed to dogs over a 90-day period. Among these were hydrogenated bisphenol-A and triphenylphosphite (component moieties of the stabilizer in question) and the compound itself, hydrogenated 4,4μ-isopropylidenediphenolphosphite ester resin. In these particular studies, 4 groups of dogs were exposed to hydrogenated 4,4Δ-isopropylidenediphenolphosphite ester resin at a level of 1,000 ppm in the diet. Results showed that in each of the 4 groups neurological hind-quarter paralysis occurred within 9 to 32 days. The dose level at which the neurotoxic effects would not occur was not established by these studies. (Copies of the report and data from these studies, as well as the data indicating higher than previously expected migration, are on file at the office of the Hearing Clerk (address above).) Therefore, to support a food additive regulation for this compound it would be necessary to conduct toxicological studies to determine a "no-effect" level to which appropriate safety factors could be applied to establish a safe level of use

for the stabilizer. Then it would be necessary to determine whether this safe level of use would be less than or greater than the level expected to migrate to food.

2. The second comment agreed that the toxicological data originally submitted to justify the "no extraction" level of 0.0001 milligram (mg) of organophosphates per square inch of food-contact surface may be inadequate and that the additive in question should be revoked on the basis of an inadequate showing of toxicological safety. The comment did not object specifically to the original proposed revocation, but to the justification given, namely, the earlier use (as mentioned in the April 1974 proposal to revoke) of data on one compound to incriminate another compound.

This objection is no longer pertinent due to the above-cited toxicological test results on the subject compound.

The agency has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

In view of the newer estimates of increased migration and studies demonstrating toxic effects of the regulated phosphite stabilizer, the agency finds that there are insufficient data to prescribe safe conditions of use for the compound. Thus, having evaluated the relevant data, the agency concludes that § 178.2010 should be amended by revoking the authorization for the use of hydrogenated 4,4μ-isopropylidenediphenolphosphite ester resins.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), it is proposed that Part 178 be amended in § 178.2010 *Antioxidants and/or stabilizers for polymers* by deleting from the list of substances in paragraph (b) the item "Hydrogenated 4,4μ-isopropylidenediphenolphosphite ester resins * * *."

Interested persons may, on or before August 14, 1979, submit to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments are to be submitted, except that individuals may submit single copies of comments. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Note.—In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: June 6, 1979.

Corrections

In FR Doc. 79-9170 appearing at page 18246 in the issue for Tuesday, March 27, 1979; make the following changes:

(1) On page 18246, third column, sixth line of the first full paragraph, insert "with other linkages" after "linkages".

(2) On page 18246, third column, the second line from the bottom of the second full paragraph should read "(see § 136.110(c)(11) (21 CFR".

(3) On page 18247, second column, last line of the first full paragraph, "wright" should read "weight".

(4) On page 18248, third column, eighth line of § 184.1277(b)(1), insert "D" in front of "25""

(5) On page 18249, first column, insert footnote 1 (as it was omitted) directly above footnote 2.

"[1] Copies may be obtained from: National Academy of Sciences, 2101 Constitution Ave. NW., Washington, DC 20037."

BILLING CODE 1505-01

[21 CFR Part 606]

[Docket No. 78N-0439]

Calibration of Hematocrit Centrifuges and Vacuum Blood Agitators; Proposal on Calibration

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The FDA is proposing to amend the biologics regulations to require less frequent performance checks and calibrations of hematocrit centrifuges and vacuum blood agitators. This action is being taken because the equipment is rarely subject to significant malfunctions, and because if a malfunction does occur that could affect compliance with the requirements for donor protection and the product, it is usually audibly and/or visually obvious.

DATE: Comments by August 14, 1979.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert J. Meyer, Bureau of Biologics (HFB–620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, MD 20205, 301–443–1306.

SUPPLEMENTARY INFORMATION: Section 606.60(b) of the biologics regulations (21 CFR 606.60(b)) requires the observation, standardization, and calibration of equipment used in the collection, processing, compatibility testing, storage, and distribution of blood and blood components by specifying the frequency of performance checks and calibration. The use of accurate and reliable equipment is essential for compliance with the requirements for determining donor suitability and for the manufacture of products that are safe, pure, potent, and effective. To ensure that the hematocrit centrifuge and the vacuum blood agitator are operating correctly, § 606.60(b) requires that for each day of use a performance check be conducted by standardizing the equipment with a control cell preparation and a container of known mass or volume, respectively. However, both items of equipment are not subject to significant malfunctions during their operation, and any aberrations in their expected performance that could affect compliance with the requirements for donor protection and the product are usually audibly and/or visibly obvious. Therefore, the agency concludes that the required performance checks are excessive and subject blood facilities to an unnecessary quality control burden.

Accordingly, the FDA is proposing to amend § 606.60(b) to change the presently required performance checks and frequency of calibrations and to require instead that (1) the hematocrit centrifuge be standardized and calibrated with a control preparation

before initial use, after repairs or adjustments and annually and that the timer be calibrated every 3 months, and (2) the performance of the vacuum blood agitator be checked by observing the weight of the first container of blood filled for correct results each day of use and be standardized with a container of known mass or volume before initial use and after repairs or adjustments.

The agency concludes that the proposed performance checks and the frequency of calibration for the hematocrit centrifuge and the vacuum blood agitator would be adequate to determine that the equipment is performing in the manner for which it was designed to ensure compliance with the requirements concerning donor suitability and the manufacture of products that are safe, pure, potent, and effective.

§ 606.60 Equipment.

* * * * * * * * *

(b) * * *

Equipment	Performance check	Frequency	Frequency of calibration
*	*	*	*
Hematocrit centrifuge	Standardize with control preparation.		Before initial use, after repairs or adjustments, and annually. Timer every 3 mo
*	*	*	*
Vacuum blood agitator	Observe weight of the first container of blood filled for correct results.	Each day of use	Standardize with container of known mass or volume before initial use, and after repairs or adjustments.
*	*	*	*

Interested persons may, on or before August 14, 1979 submit to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

The agency has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), it is proposed that Part 606 be amended in § 606.60 by revising the entries for the hematocrit centrifuge and the vacuum blood agitator in the table in paragraph (b) to read as follows:

Dated: June 8, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[23 CFR Parts 750 and 751]

[FHWA Docket No. 79–10, Notice 3]

Highway Beautification Program Reassessment; Amendment to Public Hearing Schedule and Procedures

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Hearing site change in Washington, D.C., and procedure modification.

SUMMARY: This amendment changes the location for a public hearing in Washington, D.C., from the Nassif Building to the Departmental Auditorium and changes procedures to permit a speaker to relinquish time to another under certain conditions.

FOR FURTHER INFORMATION CONTACT: Mr. Richard W. Moeller, Chief, Junkyard and Outdoor Advertising Branch, (202) 245–0021, or Mr. Edward Kussy, Deputy Assistant Chief Counsel for Right-of-Way and Environmental Law, (202) 426–0791. Office hours are 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: The Federal Highway Administration (FHWA) announced in the Federal Register at 44 FR 28948, May 17, 1979, the schedule and procedures for a series of public hearings to be held for the purpose of soliciting comments from all interested parties who may wish to express their ideas about the future direction of the Highway Beautification Program, and in particular, the outdoor advertising and junkyard control programs as set forth in 23 U.S.C. §§ 131 and 136. The purpose of this Notice is to amend certain information included in the May 17 Notice of hearing schedules and procedures.

The Washington, D.C. hearing site has been changed. The hearing will not be held at the address listed in the May 17 Notice (Department of Transportation, Nassif Building, Room 2230, 400 Seventh Street, SW.). Instead, the hearing will be held in the Departmental Auditorium which is located on Constitution Avenue between 12th and 14th Streets, NW., Washington, D.C.

The hearing procedure noted in paragraph 2b of the Supplementary Information Section of the May 17 Notice has been modified in part. The procedure stated in part that " . . . Speakers may not relinquish their speaking time to others . . . ." That procedure is hereby revised to read as follows. "A speaker may relinquish his/her speaking time to another provided that any one speaker may speak only for himself/herself and no more than two other persons who have relinquished their time."

All other schedules and procedures remain as published on May 17.

Issued on: June 12, 1979.

John S. Hassell, Jr.,

Deputy Administrator.

BILLING CODE 4910-22-M

DEPARTMENT OF LABOR

Office of Pension and Welfare Benefit Programs

[29 CFR Ch. XXV]

Rules and Regulations for Fiduciary Responsibility; Eligible Individual Account Plans

AGENCY: Department of Labor.

ACTION: Notice of intent to propose a regulation.

SUMMARY: This document is a notice to interested persons that the Department of Labor has under consideration the publication of a proposed regulation which would clarify the definition of the term "eligible individual account plan." Under the Employee Retirement Income Security Act of 1974 such plans are not subject to certain restrictions with respect to the acquisition and holding of employer securities and employer real property. Any regulation which is adopted would affect participants and beneficiaries of certain pension benefit plans as well as the sponsors and fiduciaries of such plans. This notice is given in order to facilitate early public participation in the development of the regulation.

DATES: Written comments should be received by the Department of Labor on or before August 14, 1979.

ADDRESSES: Written comments (preferably, at least six copies) should be addressed to the Office of the Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, Washington, D.C. 20216. Attention: Section 407(d)(3) Notice. All comments received will be available for public inspection at the Public Documents Room, Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: William A. Schmidt, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, (202) 523-7931. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department of Labor (the Department) has under consideration the publication of a proposed regulation under Title I of the Employee Retirement Income Security Act of 1974 (ERISA) which would clarify the definition of the term "eligible individual account plan" under section 403(d)(3) of ERISA. By this notice, the Department is inviting public comment on certain issues which have arisen in the development of the regulation.

Statutory Provisions

Section 407(a) of ERISA prohibits an employee benefit plan from acquiring or holding any securities issued by, or real property leased to, an employer of employees covered by the plan, or an affiliate of such employer, unless the securities are qualifying employer securities or the real property is qualifying employer real property, as those terms are defined in sections 407(d) (4) and (5). Section 407(a) also provides that a plan may not acquire any qualifying employer securities or qualifying employer real property if immediately after the acquisition the fair market value of such investments exceeds 10 percent of plan assets. Further, section 407(a) provides that, subject to certain transitional rules, a plan may not hold such securities or real property if the fair market value of such investments exceeds 10 percent of plan assets. Under section 407(b) of ERISA, however, eligible individual account plans, as defined in section 407(d)(3), are exempt from the 10 percent limitation. Further, section 404(a)(2) of ERISA provides that in the case of an eligible individual account plan a fiduciary does not violate his obligation of prudence in the management of plan assets under section 404(a)(1)(B) (insofar as it requires diversification), or his obligation to diversify investments under section 404(a)(1)(C), by acquiring or holding qualifying employer real property or qualifying employer securities. In addition, section 408(e) of ERISA exempts eligible individual account plans from the prohibited transaction rules of section 406 with respect to the acquisition or disposition of qualifying employer securities and qualifying employer real property, provided such acquisition or disposition is for adequate consideration and no commission is charged with respect to the transaction.[1]

Section 407(d)(3)(A) of ERISA defines the term "eligible individual account plan" as:

> * * * an individual account plan which is (i) a profit-sharing, stock bonus, thrift, or savings plan; (ii) an employee stock ownership plan; or (iii) a money purchase plan which was in existence on the date of enactment of * * * [ERISA] and which on such date invested primarily in qualifying employer securities. Such term excludes an individual retirement account or annuity described in section 408 of the Internal Revenue Code of 1954.

[1] Section 4975(d)(22) of the Internal Revenue Code (the Code) exempts from the taxes imposed by sections 4975(a) and 4975(b) of the Code any transaction which is exempt from section 406 of ERISA by reason of section 408(e) thereof.

Section 407(d)(3)(B) provides that only those plans which explicitly provide for the acquisition and holding of qualifying employer securities or qualifying employer real property may be treated as eligible individual account plans.

An individual account plan is defined in section 3(34) of ERISA as "a pension plan which provides for an individual account for each participant and for benefits based solely upon the amount contributed to the participant's account, and any income, expenses, gains and losses, and any forfeitures of accounts of other participants which may be allocated to such participant's account."

A pension plan other than an individual account plan is a "defined benefit plan" under section 3(35) of ERISA. Section 3(35) also contains rules for the treatment of plans which have some characteristics of defined benefit plans and some characteristics of individual account plans.

Discussion

In developing a regulation under section 407(d)(3), it has come to the attention of the Department that certain plans provide an individual account for each participant, but also are part of an arrangement under which each participant is guaranteed, among other things, a minimum rate of return on the amount contributed to his account or a minimum benefit (collectively referred to as "guarantee arrangements"). For example, a sponsoring employer may promise a participant a minimum rate of return on amounts contributed to his individual account. An employer may be maintaining such guarantees on an unfunded basis, in contemplation that the amount, if any, necessary to provide such a minimum rate of return would be paid from the general assets of the employer when the participant ceases to participate in the plan.

Other guarantee arrangements may provide a minimum benefit. For example, an employer may sponsor a plan which provides an individual account for each participant with benefits based on the participant's account balance. The employer also may sponsor a defined benefit plan which provides benefits to the extent necessary to ensure that benefits from both the individual account plan and the defined benefit plan are not less than a guaranteed minimum. Under such an arrangement ("floor plan arrangement"), each participant is, in effect, promised a minimum benefit which may be supplemented by a potential additional

benefit, the amount of which varies with the participant's account balance.[2]

A plan with individual accounts which is part of a guarantee arrangement may, therefore, provide a benefit derived from sources other than the balance of a participant's separate account. It appears that not only is such a plan not an eligible individual account plan, as defined in section 407(d)(3) of ERISA, because it is not, strictly speaking, any of the plans described therein, but it also is, in some respects, quite similar to a conventional defined benefit plan because of the promise of a specified benefit. If such a plan makes substantial investments in employer securities or real property, a participant may be more dependent on the continued financial well-being of his employer for receipt of a specified benefit than he would be under a conventional defined benefit plan that is subject to the 10 percent limitation on the acquisition and holding of qualifying employer securities and real property. For these reasons, it may be inappropriate to treat such a plan as an eligible individual account plan, which would be exempt from this percentage limitation. In this regard, the legislative history of the limitation indicates that Congress intended that a participant not be overly dependent on his employer for the receipt of a promised pension.[3]

Issues Under Consideration

This notice is being published in order to provide interested persons with an opportunity to submit written comments which will be considered by the Department in developing a proposed regulation clarifying the definition of the term "eligible individual account plan" for purposes of section 407(d)(3). In this regard, it should be noted that the Internal Revenue Service (Service) announced in Revenue Ruling 76–259,[4] that, in the case of a floor plan arrangement, a profit-sharing plan may be established and funded separately from a companion defined benefit plan. While the Department is considering, among other things, the treatment of this type of arrangement under section 407(d)(3), the resolution of that issue would relate only to Part 4, Title I of ERISA and section 4975 of the Code.[5] It is contemplated that any regulation which the Department may issue pursuant to this rulemaking proceeding would describe certain plans which are not eligible individual account plans because they are not profit-sharing, stock bonus, thrift or savings plans, employees stock ownership plans, or money purchase plans as those terms are used in section 407(d)(3) of ERISA. Therefore, such a regulation would not affect the issue of whether a plan which is part of a guarantee arrangement should be considered an individual account plan under section 3(34) of ERISA or section 414(i) of the Code, and would not affect the application of Rev. Rul. 76–259 to matters under the jurisdiction of the Service.

As a general framework for comments, the following is a list of issues under consideration by the Department. The list does not describe all issues relevant to the development of a regulation concerning eligible individual account plans, and comments on other matters raised by section 407(d)(3) also are invited.

A. *Kinds of Guarantee Arrangements*

1. What kinds of guarantees are made to participants in plans which provide a separate account for each participant, and how are those guarantees determined?

2. Under what circumstances does a plan which provides for individual accounts but also is part of a guarantee arrangement still provide a benefit derived solely from a participant's account balance?

B. *Treatment of Guarantee Arrangements Under ERISA*

1. Under what circumstances, if any, should a plan which provides a separate account for each participant, but which is part of a guarantee arrangement, be treated as an eligible individual account plan as defined in section 407(d)(3) of ERISA?

2. In the case of a floor plan arrangement:

(a) If the plan which provides for separate accounts is not treated as an eligible individual account plan because of the availability of a guaranteed benefit through the "floor plan," should the two plans be treated as separate plans, neither of which would qualify as an eligible individual account plan under section 407(d)(3)(A), or should the entire arrangement be treated as one plan for purposes of section 407(d)(3)(A)? Specifically, should each plan be subject to a 10 percent limitation on the acquisition or holding of qualifying employer securities and qualifying employer real property or should the 10 percent limitation be imposed only in the aggregate?

(b) To what extent is it necessary or appropriate to make assumptions concerning the level of investment performance of the plan which provides for separate accounts in determining the level of contributions necessary to fund the "guaranteed" benefit portion of the arrangement?

3. Are there instances in which the nature and extent of a guarantee should affect the treatment of a guarantee arrangement under section 407(d)(3)? For example, are there circumstances under which it is appropriate to consider the likelihood that benefits derived from the individual accounts will be "insufficient," so as to require the application of the guarantee, in determining whether the limitation of section 407(d)(3) should apply?

Written Comments

All interested persons are invited to submit written comments on the subject matter of this notice to the address and within the time period set forth above. Copies of plan documents, or relevant portions thereof, might be helpful to the Department in its consideration of various guarantee arrangements. In addition, data regarding the number of participants in guarantee arrangements, the value of the assets of plans which are part of such arrangements, and the amount invested by such plans in qualifying employer securities and qualifying employer real property would be of assistance to the Department in developing a proposed regulation. All comments will be made a part of the record of this proceeding and will be available for public inspection.

Signed at Washington, D.C., this 11th day of June, 1979.

Ian D. Lanoff,

Administrator of Pension and Welfare Benefit Programs, Labor Management Services Administration, Department of Labor.

[4] Note 2, above.

[5] Effective, December 31, 1978 (44 FR 1065, January 3, 1979), section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred, with certain exceptions, the authority of the Secretary of the Treasury to issue regulations under section 4975 of the Code to the Secretary of Labor.

DEPARTMENT OF DEFENSE

Department of the Army

[33 CFR Part 209]

Administrative Procedures; Shipping Safety Fairways and Anchorages, Gulf of Mexico

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Corps of Engineers proposes to amend the regulations which establish the Galveston Entrance Fairway and Anchorage Areas in the Gulf of Mexico. The purpose of the proposed amendment is to facilitate the production and movement of oil and gas from wells located within the anchorage areas and surrounding area by permitting pipeline construction.

DATE: Comments must be received on or before July 16, 1979.

ADDRESS: HQDA, DAEN–CWO–N, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph T. Eppard (202) 693–6070.

SUPPLEMENTARY INFORMATION: Shipping safety fairways and anchorages have been established by the Department of the Army to control the erection of structures in shipping approaches to major coastal ports. Department of the Army permits are required for the construction of any structure in or over any navigable water of the United States pursuant to Section 10 of the River and Harbor Act of 1899 and for artificial islands and fixed structures located on the outer continental shelf in accordance with Section 4(e) of the Outer Continental Shelf Lands Act Amendments of 1953. The Corps in effect established the fairways and anchorages by denying permits for the erection of structures within certain designated areas. The Galveston Fairway and Anchorage Areas were established in 33 CFR 209.135 on 18 December 1968.

The Galveston District Engineer has received an application for a permit to construct a pipeline extending from the Galveston Anchorage Area across the Galveston Fairway and East Anchorage Area. The Corps proposes to delete a small portion of the anchorages at the southerly boundaries to facilitate the pipelines. The existing anchorage areas encompass approximately 140.7 square nautical miles. The proposed change would reduce this area by approximately 0.6 square nautical miles or six percent. The seaward boundary of the triangular easterly anchorage area would be relocated landward about 5 nautical miles, truncating the anchorage area to a more practical quadrangular shape. The eastward boundary of the westerly anchorage would be relocated landward approximately 0.5 nautical miles. The pipelines are required to accommodate the production and transmission of vitally needed oil and natural gas. The corps will continue to restrict the erection of platforms and other structures within the areas affected by this proposal.

The Corps of Engineers proposes to amend the regulations in 33 CFR 209.135 (d)(11) as set forth below:

§ 209.135 Shipping safety fairways and anchorage areas, Gulf of Mexico.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 1249–1]

Availability of Implementation Plan Revision for the State of New Hampshire

AGENCY: Environmental Protection Agency.

ACTION: Notice of Receipt of Plan for Proposed Rulemaking.

SUMMARY: This notice is to announce the receipt of a State Implementation Plan (SIP) revision for New Hampshire which is available for public review and comment.

Under the requirements of Part D of the Clean Air Act, the State of New Hampshire submitted to EPA on May 29, 1979 a revision to its SIP for certain areas designated as not attaining the National Ambient Air Quality Standards (NAAQS) for specific air pollutants. As required by the Act, the purpose of this revision is to implement new measures for controlling air pollution and to demonstrate that these measures will provide for attainment of the primary NAAQS as expeditiously as practicable, but no later than December 31, 1982 (in certain instances December 31, 1987). A Notice of Proposed Rulemaking describing the revision and EPA's intended approval or disapproval action will be published in the Federal Register at a later date.

DATES: See Supplementary Information.

ADDRESSES: Copies of the SIP revision are available for inspection at the following addresses: Environmental Protection Agency, Region I, Air Branch, Room 1903, J.F.K. Federal Building, Boston, Massachusetts 02203; Environmental Protection Agency, Public Information Reference Unit, 401 M Street, S.W., Washington, DC 20460; and the Air Pollution Control Agency, Department of Health and Welfare, State Laboratory Building, Hazen Drive, Concord, NH 03301.

WRITTEN COMMENTS SHOULD BE SENT TO: Frank J. Ciavattieri, Chief, Air Branch, Environmental Protection Agency, Region I, J.F.K. Federal Building, Room 1903, Boston, Massachusetts 02203.

FOR FURTHER INFORMATION CONTACT: Frank J. Ciavattieri, Chief, Air Branch, Environmental Protection Agency, Region I, J.F.K. Federal Building, Room 1903, Boston, Massachusetts 02203.

SUPPLEMENTARY INFORMATION: On March 3, 1978 (43 FR 8962), and on September 11, 1978 (43 FR 40412), pursuant to the requirements of Section 107 of the Clean Air Act, EPA designated areas in each state as non-attainment with respect to the criteria air pollutants. The non-attainment areas in New Hampshire are:

New Hampshire	CO	O_x	TSP Primary	TSP Secondary	SO_x
N.H. portion of Merrimack Valley S. N.H. Interstate AQCR 121		X			
Metropolitan Berlin			X		X
Metropolitan Keene				X	
Metropolitan Manchester	X			X	

Part D of the Clean Air Act requires each state to revise is SIP to meet specific requirements in the non-attainment areas. These SIP revisions were due on January 1, 1979 and must demonstrate attainment of the NAAQS, as expeditiously as practicable, but no later than December 31, 1982, or in limited instances for carbon monoxide and oxidants, no later than December 31, 1987. An 18-month extension may be granted for plans to demonstrate attainment of secondary standards for total suspended particulates.

On May 29, 1979 EPA received the revised SIP for New Hampshire and is currently reviewing the revision. The revision includes a CO attainment plan for Manchester; redesignation of Keene for TSP attainment; a request for an 18-month extension for Manchester TSP attainment plan; redesignation of AQCR 149 for O_x; Statewide strategies for control of O_x; New Source Review and Permit Requirements; Program for Prevention of Significant Deterioration (PSD); and public participation requirements. At the completion of this review, a notice will be published in the Federal Register proposing approval or disapproval of the revision.

All interested persons are advised that the proposed revision is available for review at the locations listed, and are invited to comment on its approvability. A file of documents explaining EPA's criteria for approval is also available at EPA offices. The proposed notice referred to above will announce the last day for public comment. This public comment period will end not less than 60 days from this date and not less than 30 days from the published date of EPA's proposal for approval or disapproval.

Dated: June 10, 1979.

William R. Adams, Jr.,

Regional Administrator, Region I.

[FR Doc. 79-18744 Filed 6-14-79; 8:45 am]

BILLING CODE 6560-01-M

[40 CFR Part 65]

[Docket No. VII-79-DCO-15; FRL 1247-6]

Proposed Approval of an Administrative Order Issued by the Iowa Department of Environmental Quality to Norris Construction Co., Ottumwa, Iowa

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an administrative order issued by the Iowa Department of Environmental Quality to Norris Construction Company. The order requires the company to bring air emissions from its asphalt plant in Ottumwa, Iowa into compliance with certain regulations contained in the federally-apporve Iowa State Implementation Plan (SIP) by June 15, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before July 16, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region VII, 324 E. 11th, Kansas City, Missouri 64106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Peter J. Culver or Henry F. Rompange, Environmental Protection Agency, Region VII, Enforcement Division, 324 East 11th Street, Kanasa City, Missouri 64106, telephone 816/374-2576.

SUPPLEMENTARY INFORMATION: Norris Construction Company operates an asphalt plant at Ottumwa, Iowa. The order under consideration addresses emissions from the asphalt plant at the facility, which are subject to subrule 400—4.4(2) Iowa Administrative Code, Asphalt batching plants. The regulation limits the emissions of particulates, and is part of the federally approved Iowa State Implementation Plan. The order requires final compliance with the regulation by June 15, 1979. The source has consented to the terms of the order. The source has satisfied increments 1 and 2 contained in the order.

Because this order has been issued to a major source of particulates emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Iowa SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the Federal Register the Agency's final action on the order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601)

Dated: May 17, 1979.

David R. Alexander,

Acting Regional Administrator—Region VII.

In consideration of the foregoing, it is proposed to amend Part 65 of Chapter 1, Title 40, Code of Federal Regulations as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By amending the table in § 65.201 to reflect approval of the following order: Docket No. VII-79-DCO-15.

2. The text of the order reads as follows:

Before the Iowa Department of Environmental Quality, Air Quality Commission, Des Moines, Iowa

In the matter of: Norris Construction Co., Plant No. 51, Ottumwa, Iowa; *Order*, Docket No. 78-A-015 Revised.

Whereas employees of the Department of Environmental Quality conducted an inspection of the Norris Construction Co., a major source facility in Ottumwa, Iowa, on August 4, 1978, and determined that the emissions from the asphalt plant no. 51

exceeded the emission standards of subrule 400—4.4(2) I.A.C.;

Whereas the said subrule is a part of the federally-approved implementation plan applicable to Air Quality Control Region 091 in which the asphalt plant no. 51 in Ottumwa, Iowa, is located:

Whereas Norris Construction Co. has acknowledged that it is in violation of subrule 400—4.4(2) I.A.C. and has agreed to waive its rights to a contested case hearing under the Iowa Administrative Procedure Act and to waive its rights under section 455B.17 of the Iowa Code;

Whereas Norris Construction Co. is hereby given notice that in the event it fails to meet any requirement of this order, it will be subject to civil penalties for such noncompliance, and that if it fails to achieve final compliance as specified in Subparagraph A–5 by July 1, 1979, it shall be required to pay a noncompliance penalty under Section 120 of the Clean Air Act as amended (42 U.S.C. 7420) or under Iowa Law subsequently enacted to obtain delegation under that section;

Whereas after full consideration of relevant facts, including the seriousness of the violation and any good faith efforts to comply the source cannot immediately comply and compliance with the order below is reasonable and expeditious;

Therefore, it is ordered by the Air Quality Commission:

A. That Norris Construction Co. complete the following acts with respect to the asphalt plant no. 51 on or before the dates specified.

1. January 1, 1979—Submit final control plan. *Completed.*

2. February 1, 1979—Award bids and execute contracts for emission control equipment. *Completed.*

3. May 1, 1979—Initiate on-site construction or installation of emission control equipment.

4. June 15, 1979—Complete on-site construction or installation of emission control equipment.

5. June 15, 1979—Complete shakedown operations and preformance tests on system and achieve final compliance with subrule 400—4.4(2) I.A.C.

B. That specific interim requirements, prior to final compliance as specificed in Subparagraph A–5, are not feasible.

C. That Norris Construction Co. shall monitor such emissions and report such information as required by the Executive Director of the Department of Environmental Quality pursuant to subrule 400–2.1(6) (455B) I.A.C.

D. That Norris Construction Co., prior to the initiation of on-site construction or installation of emission control equipment required by paragraph A–3, obtain a permit for the proposed equipment or related control equipment from the Permits Section of the Air and Land Quality Division of the Department of Environmental Quality, as defined in subrule 400—3.1 I.A.C.

E. That Norris Construction Co. certify to the Chief of the Surveillance Section of the Air and Land Quality Division of the Department of Environmmental Quality no later than seven (7) days after the deadline for completing such increment of progress, whether such increment has been achieved; if an increment has not been achieved by the deadline date, a full report of the reasons why the increment was not achieved and of whether the failure is expected to put the subsequent deadline dates in jeopardy should be submitted.

F. That Norris Construction Co., 15 days prior to conducting the performance tests required by this order give notice of such scheduled test to the Chief of Surveillance Section to afford him an opportunity to have an observer present.

Dated: April 12, 1979.

Air Quality Commission.

Hal B. Richerson,

Chairman.

Dated: February 8, 1979.

Norris Construction Co.

M. G. Norris

President.

A public notice was published on March 2, 1979 in the Ottumwa Courier regarding this order, (and the schedule for compliance contained herein), and a public hearing was held before the Iowa Air Quality Commission on April 12, 1979 at the Department of Environmental Quality, Henry A. Wallace Building, 900 East Grand Avenue, Des Moines, Iowa.

Department of Environmental Quality, Des Moines, Iowa

In the matter of: Norris Construction Co., Plant No. 51, Ottumwa, Iowa; Waiver.

Norris Construction Co. acknowledges that it is in violation of subrule 400—4.4(2) I.A.C. and agrees to waive its rights to a contested case hearing under the Iowa Administrative Procedure Act and its rights under 455B.17 of the Iowa Code. Furthermore, Norris Construction Co. has reviewed Order 78–A–015, believes it to be a reasonable means to attain compliance with the applicable regulations in that it accords with the intentions of Norris Construction Co. regarding asphalt plant no. 51 in Ottumwa, Iowa, and it consents to the terms of the order. Finally, Norris Construction Co. acknowledges that compliance with Order 78–A–015 does not relieve it of the responsibility to comply with the provisions of the Rules of the Air Quality Commission.

Dated: February 8, 1979.

Norris Construction Co.

M. G. Norris.

[FR Doc. 79-18798 Filed 6-14-79; 8:45 am]

BILLING CODE 6560-01-M

[40 CFR Part 65]

Docket No. VII–79–DCO–11; FRL 1239–5]

Proposed Approval of an Administrative Order Issued by the Iowa Department of Environmental Quality to Northwestern State Portland Cement Co. Mason City, Iowa

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an administrative order issued by the Iowa Department of Environmental Quality (IDEQ) to Northwestern States Portland Cement Company (Northwestern). The order requires the company to bring air emissions from its waste dust silo vents in Mason City, Iowa into compliance with certain regulations contained in the federally approved Iowa State Implementation Plan (SIP) by July 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order.

The purpose of this notice is to invite public comment on the order as a delayed compliance order.

DATE: Written comments must be received on or before July 16, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region VII, 324 East Eleventh Street, Kansas City, Missouri 64106. The State order, supporting material, and public comments received in response for this notice may be inspected and copies (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Peter J. Culver or Henry F. Rompage, EPA, Enforcement Division, 324 East Eleventh Street, Kansas City, Missouri 64106, telephone (816) 374–2576.

SUPPLEMENTARY INFORMATION: Northwestern operates a portland cement plant at Mason City, Iowa. The order under consideration addresses emissions from the waste dust silo vents at the facility, which are subject to subrule 400—43(2)a Process Weight Rate, Iowa Administrative Code. The regulation limits the emissions of particulates, and is part of the federally approved Iowa State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979, through installation of a baghouse. The source has consented to the terms of the order. The source has satisfied increments A 1 and 2 contained in the Order.

Because this order has been issued to a major source of particulates emissions

and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Iowa SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the Federal Register the Agency's final action on the order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601)

Dated: May 17, 1979.

David R. Alexander,

Acting Regional Administrator, Region VII

In consideration of the foregoing, it is proposed to amend Part 65 of Chapter 1, Title 40, Code of Federal Regulations as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By amending the table in § 65.201 to reflect approval of the following order: Docket No. VII-79-DCO-11.

2. The text of the order reads as follows:

Before the Iowa Department of Environmental Quality, Air Quality Commission, Des Moines, Iowa

In the matter of: Northwestern States Portland Cement Co., Mason City, Iowa; *Order;* Docket No. 78-A-027.

Whereas employees of the Department of Environmental Quality conducted an inspection of the Northwestern States Portland Cement Company, a major source facility in Mason City, Iowa, on September 28, 1978, and determined that the emissions from the waste dust silo vents exceeded the emission standard(s) of paragraph 400—4.3(2)a I.A.C.

Whereas the said paragraph is a part of the federally-approved implementation plan applicable to Air Quality Control Region 090 in which the Northwestern States Portland Cement Company in Mason City, Iowa, is located;

Whereas Northwestern States Portland Cement Company has acknowledged that it is in violation of paragraph 400—4.3(2)a I.A.C. and has agreed to waive its rights to a contested case hearing under the Iowa Administrative Procedure Act and to waive its rights under section 455B.17 of the Iowa Code;

Whereas Northwestern States Portland Cement Company is hereby given notice that in the event it fails to meet any requirement of this order, it will be subject to civil penalties for such noncompliance, and that if it fails to achieve final compliance as specified in Subparagraph A–5 by July 1, 1979, it shall be required to pay a noncompliance penalty under Section 120 of the Clean Air Act as amended (42 U.S.C. 7420) or under Iowa Law subsequently enacted to obtain delegation under that section;

Whereas after full consideration of relevant facts, including the seriousness of the violation and any good faith efforts to comply the source cannot immediately comply and compliance with the order below is reasonable and expeditious;

Therefore, it is ordered by the Air Quality Commission:

A. That Northwestern States Portland Cement Company complete the following acts with respect to the waste dust silo vents at its plant in Mason City, Iowa, on or before the dates specified.

1. December 18, 1978—Submit final control plan. *Completed.*

2. March 2, 1979—Award bids and execute contracts for emission control equipment.

3. April 23, 1979—Initiate on-site construction or installation of emission control equipment.

4. June 22, 1979—Complete on-site construction or installation of emission control equipment.

5. July 1, 1979—Complete shakedown operations and performance tests on system and achieve final compliance with paragraph 400–4.3(2)a I.A.C.

B. That specific interim requirements for emission reduction, prior to final compliance as specified in paragraph A–5, are not feasible.

C. That no specific monitoring prior to final compliance will be required.

D. That Northwestern States Portland Cement Company, prior to the initiation of on-site construction or installation of emission control equipment required by paragraph A–3, obtain a permit for the proposed equipment or related control equipment from the Permits Section of the Air and Land Quality Division of the Department of Environmental Quality, as defined in subrule 400—3.1 I.A.C.

E. That Northwestern States Portland Cement Company certify to the Chief of the Surveillance Section of the Air and Land Quality Division of the Department of Environmental Quality no later than seven (7) days after the deadline for completing each increment of progress, whether such increment has been achieved; if an increment has not been achieved by the deadline date, a full report of the reasons why the increment was not achieved and of whether the failure is expected to put the subsequent deadline dates in jeopardy should be submitted.

F. That Northwestern States Portland Cement Company, 15 days prior to conducting the performance tests required by this order give notice of such scheduled test to the Chief of Surveillance Section to afford him an opportunity to have an observer present.

Dated: March 15, 1979.

Air Quality Commission.

Hal B. Richerson,

Chairman.

Dated: January 5, 1979.

Northwestern States Portland Cement Co.

Jack MacNider.

A public notice was published on January 23, 1979 in the Mason City Globe-Gazette regarding this order, (and the schedule for compliance contained herein), and a public hearing was held before the Iowa Air Quality Commission on March 15, 1979 at the Department of Environmental Quality, Henry A. Wallace Building, 900 East Grand Avenue, Des Moines, Iowa.

Department of Environmental Quality; Des Moines, Iowa

In the matter of: Northwestern States Portland Cement Company, Mason City, Iowa; Waiver.

Northwestern States Portland Cement Company acknowledges that it is in violation of paragraph 400—4.3(2)a I.A.C. and agrees to waive its rights to a contested case hearing under the Iowa Administrative Procedure Act and its rights under 455B.17 of the Iowa Code. Furthermore, Northwestern States Portland Cement Company has reviewed Order 78–A–027, believes it to be a reasonable means to attain compliance with the applicable regulations in that it accords with the intentions of Northwestern States Portland Cement Company regarding the waste dust silo vents at its plant in Mason City, Iowa, and it consents to the terms of the order. Finally, Northwestern States Portland Cement Company acknowledges that compliance with Order 78–A–027 does not relieve it of the responsibility to comply with the provisions of the Rules of the Air Quality Commission.

Dated: January 5, 1979.

Northwestern States Portland Cement Co.

Jack MacNider.

BILLING CODE 6560-01-M

[40 CFR Part 65]

[FRL 1247-7]

Proposed Delayed Compliance Order for Amoco Oil Co.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: U.S. EPA proposes to issue an Administrative Order to Amoco Oil

Company. The Order requires the Company to bring its volatile organic material loading rack (the source) into compliance with Ohio Regulation AP–5–07(E), part of the federally approved Ohio State Implementation Plan (SIP). Because the Company is unable to comply with this regulation at this time, the proposed Order would establish an expeditious schedule requiring final compliance by July 1, 1979. Source compliance with the Order would preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (Act) for violation of the SIP regulation covered by the Order.

The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on U.S. EPA's proposed issuance of the Order.

DATES: Written comments must be received on or before the thirtieth day from the date of this notice and requests for a public hearing must be received on or before the fifteenth day from the date of this notice. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after twenty-one days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. Material supporting the Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Mr. Roger M. Grimes, Attorney, Enforcement Division, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, at (312) 353–2082.

SUPPLEMENTARY INFORMATION: Amoco Oil Company owns a volatile organic material loading rack at Aurora, Ohio. The proposed Order addresses emissions from this facility, which is subject to AP–5–07(E) of the Ohio Implementation Plan. The regulation limits the emissions of volatile organic material and is part of the federally approved Ohio State Implementation Plan. The Order requires final compliance with the regulation by July 1, 1979, and the source has consented to its terms.

The proposed Order satisfies the applicable requirements of Section 113(d) of the Act. If the Order is issued, source compliance with its terms would preclude further U.S. EPA enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether U.S. EPA should issue the Order. Testimony given at any public hearing concerning the Order will also be considered. After the public comment period and any public hearing, the Administrator of U.S. EPA will publish in the **Federal Register** the Agency's final action of the order in 40 CFR Part 65.

Dated: June 4, 1979.

John McGuire,

Regional Administrator, Region V.

In consideration of the foregoing, it is proposed to amend 40 CFR Chapter I, as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By amending the table in Section 65.400 to reflect approval of the following order:

§ 65.400 Federal Delayed Compliance Orders issued under Section 113(d)(1), (3), and (4) of the Act.

2. [insert entire contents of the Order]

U.S. Environmental Protection Agency, Region V

In the Matter of: AMOCO Oil Company, Aurora, Ohio; Proceeding Pursuant to Section 113(d) of the Clean Air Act, as Amended (42 U.S.C. Section 7413(d)).

Introduction

This Order is issued this date pursuant to Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. Section 7401 *et seq.* (hereafter the "Act") and contains a schedule for compliance, interim control requirements, and reporting requirements. Public notice, opportunity for a public hearing, and thirty (30) days notice to the State of Ohio have been provided pursuant to Section 113(d)(1) of the Act.

Findings

1. On December 29, 1978, the United States Environmental Protection Agency (hereafter "U.S. EPA" or "Agency") issued a Notice of Violation (hereafter "NOV") to the Amoco Oil Company (hereafter "Amoco" or the "Company") pursuant to Section 113(a)(1) of the Act, 42 U.S.C. 7413(a)(1), for alleged violation of Ohio Air Pollution Control Regulation AP–5–07(E).

2. AP–5–07(E), creates certain requirements applicable to facilities which load volatile organic materials in specified quantities into certain tanks or tank trucks. (Regulation AP–5–07(E) has been recodified by the State of Ohio as Regulation 3745–21–07(E); however, this designation has not yet been made part of the Ohio plan. Consequently, this document will use the prior designation.)

3. AP–5–07(E), is part of the State of Ohio Implementation Plan, which was created under Section 110 of the Act, 42 U.S.C. 7410.

4. In satisfaction of Section 113(a)(4) of the Act, 42 U.S.C. 7413(a)(4), an opportunity to confer with the Administrator's delegate was extended to Amoco in the NOV. The conference was waived by Amoco.

5. After receipt of the NOV, Amoco stated that it intended to install an Edwards low temperature refrigeration vapor recovery unit by July 1, 1979, at its Aurora, Ohio, volatile organic materials loading facility.

6. It has been determined by the U.S. EPA that the Amoco Oil Company is unable to immediately comply with AP–5–07(E) of the State of Ohio Implementation Plan.

Order

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule for compliance set forth in this Order is as expeditious as practicable, and that the terms of this Order comply with Section 113(d) of the Act. Therefore, it is hereby Agreed and ordered that:

1. The Amoco Oil Company will comply with the State of Ohio Implementation Plan, AP–5–07(E), which requires the installation of a vapor collection and disposal system at the volatile organic material loading rack associated with Amoco Oil Company's Aurora, Ohio, facility in accordance with the following schedule:

a. February 23, 1979—Bids received.

b. March 5, 1979—Place equipment orders for process equipment.

c. April 30, 1979—Start construction on foundation.

d. June 15, 1979—Process equipment received; start construction and installation.

e. July 1, 1979—Complete installation and achieve compliance.

2. The Amoco Oil Company shall adopt and implement operation and maintenance procedures to maximize the control efficiency of the vapor collection and recovery system and submit a copy of such procedures to the U.S. EPA.

3. The Amoco Oil Company shall use the best practicable interim system of emission reduction at its Aurora, Ohio loading facility so as to minimize hydrocarbon emissions, avoid any imminent and substantial endangerment to the health of persons, and minimize product spillage.

4. The Amoco Oil Company shall comply with the following emission monitoring and reporting requirements on or before the dates specified below:

a. *Emission Monitoring*

(1) Amoco Oil Company shall, beginning as soon as reasonably practical, maintain a record of the quantity of gasoline which passes through the loading facility.

(2) Amoco Oil Company shall, by August 1, 1979 complete manufacturers performance tests on the vapor control equipment.

(3) Amoco shall, beginning as soon as reasonably practical, maintain a record of any malfunctions of the vapor collection and disposal system (including the reasons for such malfunctions) and the down-time of the system, whether caused by malfunctions or other causes.

b. *Reporting Requirements*

(1) No later than fifteen (15) days after any date for achievement of an incremental step of the compliance schedule specified in this Order, Amoco Oil Company shall notify U.S. EPA in writing of its compliance or noncompliance with the requirement.

Amoco Oil Company shall, by August 15, 1979, submit performance test results associated with start up of the vapor collection and disposal system.

If Amoco fails to complete any of the actions required by the dates specified in the Order, it shall include a detailed explanation of such failure in the notification required in this paragraph 4.b.(1).

(2) Amoco shall, beginning with the calendar quarter April–June, 1979, report on quarterly basis the information required to be maintained under paragraph 4.a. of this Order. Such reporting requirement shall terminate following Amoco's submission covering the calendar quarter April–June, 1980.

(3) All submittals, notifications and reports to U.S. EPA pursuant to this Order shall be made to Mr. Eric Cohen, Chief, Compliance Section, Enforcement Division, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604.

5. Amoco is hereby notified that it is the position of the U.S. EPA that failure to achieve final compliance by July 1, 1979, at the Aurora, Ohio loading facility may result in a requirement to pay a noncompliance penalty in accordance with Section 120 of the Act, 42 U.S.C. 7420. In the event of such failure, Amoco will be formally notified by the U.S. EPA, pursuant to Section 120(b)(3), 42 U.S.C. 7420(b)(3), and any regulations promulgated thereunder, of its noncompliance.

6. This Order shall be terminated in accordance with Section 113(d)(8) of the Act if the Administrator or his delegate determines on the record, after notice and hearing, that an inability to comply with regulation AP–5–07(E), Ohio Implementation Plan no longer exists.

7. Violation of any substantive requirement of this Order may result in one or more of the following actions:

a. Enforcement of such requirement pursuant to Section 113 (a), (b), or (c) of the Act, 42 U.S.C. 7413 (a), (b) or (c).

b. Revocation of this Order, after notice and opportunity for a public hearing, and subsequent enforcement of Ohio Implementation Plan regulation AP–5–07(E), in accordance with the preceding paragraph.

c. If such violation occurs on or after July 1, 1979, notice of noncompliance and subsequent action pursuant to Section 120 of the Act.

8. This Order is effective upon final promulgation in the Federal Register.

Date ———————

Administrator, U.S. Environmental Protection Agency

Consent To Order

The Amoco Oil Company, by the duly authorized undersigned, hereby consents to the requirements of this Order.

Date ———————

Amoco Oil Company

Assessment and Collection of Noncompliance Penalties

AGENCY: Environmental Protection Agency.

ACTION: Amendments to proposed rulemaking.

SUMMARY: In the Federal Register of March 21, 1979 (44 FR 17309), several portions of Appendix B to the Agency's proposed rules for the assessment and collection of a noncompliance penalty were not printed legibly. In order to avoid any confusion, EPA is reprinting this Appendix in its entirety.

In addition, EPA wishes to clarify some discrepancies that exist between the proposed Computer Program (Appendix C) and the Instruction Manual. Lastly, the Agency is proposing a minor change to the lump sum settlement calculation and offering for public comment an alternative data source for the appropriate rate of return on equity for certain sources. Each of these matters is discussed below.

DATES: In the March 21, Federal Register Notice, EPA provided for a 90 day public comment period, 30 days more than the Clean Air Act would require. EPA noted that the Act requires that the noncompliance penalty program take effect on August 7, 1979. For this reason, EPA stated that it would not be able to provide any further extension of time for the public to comment on the March 21 proposal.

For the two proposed amendments discussed below EPA is announcing a 30 day comment period. The amendments noted today are minor in nature and do not alter any of the fundamental aspects of the noncompliance penalty program as originally published. For this reason, EPA believes that 30 days affords the public ample time in which to comment on these two amendments. This 30 day comment period applies only to the two amendments that are being proposed today. It does not provide the public with additional time in which to comment on the March 21 proposal.

Thus, comments on the two amendments proposed today will be accepted until July 16, 1979. Comments on any other portion of the proposed rulemaking must be submitted to EPA on or before June 19, 1979, in order to be considered in the Agency's final rulemaking.

ADDRESS: Questions or comments on this proposal should be directed to the Director, Division of Stationary Source Enforcement, EN–341, Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Robert Homiak, Attorney-Advisor, Division of Stationary Source Enforcement, Environmental Protection Agency at (202) 755–2581.

SUPPLEMENTARY INFORMATION: In the March 21, 1979, Federal Register, EPA published its proposed rules for the assessment and collection of noncompliance penalties under Section 120 of the Clean Air Act. Included as Appendix B to this rulemaking proposal was an Instruction Manual designed to inform sources how to calculate a penalty amount. The Manual contained several computer print-outs of the penalty calculations of a hypothetical company. Some of these computer print-outs did not reproduce legibly. This caused some confusion among people who have attempted to verify their own calculations with those produced by EPA's computer. Rather than reprinting only the illegible print-outs, EPA is reprinting the entire Instruction Manual.

EPA would also like to clarify a minor discrepancy between the proposed Instruction Manual and the Computer Program, which appeared as Appendix C to the proposed rule. The Instruction Manual indicates that a person using the computer program must enter only the equity share and the preferred stock share for a new investment. In actuality, the Computer Program also requires the entry of the debt share of the source's investment. Requiring explicit entry of the debt share of the investment reduces the chance of error in data entry. It in no way affects the magnitude of the penalty.

Another point that has caused some confusion is the inability of different computers to arrive at penalty figures

identical to those calculated by EPA's computer. Persons who anticipate using the computer program on their own computers should be cautioned that it will usually not be possible to reproduce exactly the calculations illustrated in the Instruction Manual. The large number of arithmetic operations needed to calculate the penalty payments will inevitably result in round-off errors within the computer itself. The magnitude and direction of these round-off errors will vary from computer to computer. However, in no case should there be a discrepancy of more than one-tenth of one percent. Differences larger than this are only likely to result from a faulty reproduction of the computer program.

Finally, EPA is proposing for comment two possible amendments to its March 21, 1979 proposal. A discussion of these changes follows.

A. Amount of Initial Penalty Payment

A fundamental precept of the noncompliance penalty calculation as it has been developed to date is that the total penalties paid by a source should equal the savings realized by that source. Since proposing its noncompliance penalty regulations on March 21, EPA has discovered that this attempt to recover the full economic value of noncompliance is compromised by EPA's current interpretation of Section 120(d)(3)(B) of the Act, which provides that the first penalty payment will not be due until 180 days after issuance of a notice of noncompliance. As presently formulated, EPA's economic model does not calculate earnings on the penalty payments delayed for the first six months of noncompliance. This means that the source pays total penalties less than economic savings realized from delayed compliance if it chooses to delay payment.

In order to enable capture of the total economic savings realized over the period of noncompliance, EPA is proposing to assess penalties based on the earnings a source realizes by delayig its initial payment for 180 days. Should the source make its first payment prior to the expiration of this 180 day period, the earnings calculation would be adjusted accordingly.

Adoption of this proposed change would require changes to the following pages of the Instruction Manual and Computer Program: III–17, III–19–22, IV–5, and IV–15.

These changes have been incorporated into both the Instruction Manual and Computer Program that are published today.

B. Use of All Manufacturing Average as Appropriate Discount Rate

In calculating the economic savings from noncompliance, EPA recognizes that the appropriate inflation rate and shareholders' return on equity (discount rate) are the long term future rates that apply to new investments. As presently formulated, the proposed noncompliance penalty regulations specify the use of the industry average return on equity as the discount rate in penalty calculations. These rates are reported in the Federal Trade Commission's (FTC's) *Quarterly Financial Report for Manufacturing, Mining and Trade Corporations.*

Because of the administrative difficulty involved in estimating the appropriate long term rates, EPA has found it necessary to rely on historical data. However, the use of historical data can result in relationships between the inflation rate and the equity rate that make little economic sense. It is possible for some industries to have historical rates of return that are less than or equal to the historical inflation rate. However, as profit-maximizing investors, source owners will seek out their most profitable investment opportunity. A source owner with an expected inflation rate that exceeds the anticipated rate of return from investing in his own business would be expected to make new investments in another alternative, one that would yield a rate of return in excess of the inflation rate.

Therefore, as an alternative to using the FTC industry average as the appropriate discount rate, EPA is proposing use of the higher of the industry average and the average rate of return for *all* manufacturing companies. This "all manufacturing" rate is published by the FTC in its *Quarterly Financial Report for Manufacturing, Mining and Trade Corporations.*

EPA believes that use of the industry "all manufacturing" rate of return is a reasonable representation of the equity-investor's opportunity cost if the actual return on equity for the industry is less than the inflation rate. If the investor's own industry is yielding a rate of return equal to or less than the inflation rate, the investor would find it more attractive to invest in a range of other industries. By investing funds which should have been used for pollution control over a broad spectrum of U.S. industry, the investor can realize a rate of return that approximates the "all manufacturing" rate. If investing in his own particular industry yields a higher rate of return than the "all manufacturing" rate, however, the proposal assumes the investor would continue to put his funds into that industry.

EPA's proposal today would not apply to regulated utilities or Federal, State and municipal facilities. These facilities would continue to use the data sources specified in EPA's March 21 proposal.

Adoption of this proposal will result in larger noncompliance penalty assessments against certain source categories, including the iron and steel industry. EPA is presently assessing the effects of this proposed alternative on the iron and steel industry. The results should be completed in about 3 weeks, and will be placed in the public docket for inspection as part of the Economic Impact Analysis. EPA solicits comment on the appropriateness of this approach.

Dated: June 5, 1979.

Douglas M. Costle,
Administrator.

Section I

Introduction

SECTION I

INTRODUCTION

This appendix describes the procedures used to calculate the noncompliance penalty imposed by the 1977 amendments to the Clean Air Act (the Act). The penalty, stipulated under Section 120 of the Act, removes the economic benefits which accrue to a firm from delaying investment in pollution control.

The method used to calculate the noncompliance penalty is based on the concept of costs avoided. The costs avoided by delaying the installation of pollution control equipment have two components. First, the firm benefits by delaying the capital expenditure needed for pollution control equipment. For this component, the cost avoided equals the return the firm expects on the money that should have been invested in pollution control equipment. That is, funds which should have been invested in pollution control equipment, but were not, can be invested in other assets, thus yielding a return. The second cost avoided through noncompliance results from the absence of operating and maintenance expenses for the equipment. In this case, the costs avoided equal the value of all operating and maintenance expense avoided plus the earnings on such costs avoided.

IMPLEMENTING THE NONCOMPLIANCE PENALTY

A detailed discussion of the economic rationale for the noncompliance penalty and the computational method used is contained in Appendix A, the Technical Support Document. This appendix is designed to aid the user in determining the appropriate data for calculating the penalty and to describe the computer program which performs the actual computation.

To the extent practicable, the computer program has been written to accept data as it appears in the source. However, it is necessary in some instances to adjust the data for entry. When this adjustment requires several computations, a worksheet has been provided.

Level Of Knowledge Required

The appendix has been written on the assumption that the user has had little formal training in business finance. Use of this manual and the computer program do not require a knowledge of the mathematical formulae in the Technical Support Document. It is assumed, however, that the reader is familiar with the discussion sections in the Technical Support Document.

Plan Of The Document

Section II describes the sources of data needed to calculate the penalty and how the various data items are converted to a form suitable for entry into the computer program. As an aid in exposition, a hypothetical noncomplying firm is described and relevant penalty calculations are illustrated.

Section III describes the procedures necessary to operate the computer. An example of an actual use of the program to calculate a penalty is included. This example will utilize data calculated in Section II.

Section IV describes the calculation of the post compliance settlement based on data used in Sections II and III.

Section V discusses the calculation of the penalty under special conditions. These conditions include investments financed with industrial development bonds and penalties for limited life facilities.

SECTION II

DATA REQUIREMENTS AND DATA SOURCES

Calculation of the noncompliance penalty requires a substantial amount of financial data. It is expected that most of this data, as well as the calculation itself, will be provided by the firm. This is in accordance with Section 120 of the Clean Air Act which will:

> "...require each person to whom is given under paragraph (3) to--
>
> (A) calculate the amount of the penalty owed (determined in accordance with subsection (d)(2)) and the schedule of payments (determined in accordance with subsection (d)(3) for each such source and, within forty-five days after the issuance of such notice or after the denial of a petition under subparagraph (B), to submit that calculation and proposed schedule, together with the information necessary for an independent verification thereof, to the State and to the Administrator".

However, some firms may not comply with the requirement. Section 120 further stipulates that if the firm fails to submit a calculation of the penalty, the State or the Administrator may contract with a third party to determine the penalty payments. This will require collection of data from several public sources. This section discusses the method used to collect data and prepare it for the calculation of the penalty.

CASE STUDY

As an aid to understanding the issues discussed in this and the next section, an example has been formulated involving a hypothetical fertilizer company. While this case will utilize data from an actual corporation, the firm is not in the fertilizer industry. The example was created to illustrate many of the features of the computer program and thus may be more complex than many "real life" situations. Data prepared in the case discussion below will be entered in the computer program to determine a penalty in Section III.

THE FERTILIZER COMPANY

On September 1, 1979 the Fertilizer Company was issued a notice of noncompliance with Section 120 of the Clean Air Act. The source of emissions was an incinerator used for the disposal of a waste by-product from the manufacture of the firm's most profitable product.

A preliminary engineering study had been performed in which it had been determined that compliance could be reached with an investment of $500,000. The investment would involve the purchase of a baghouse and modifications to the firm's incinerator in order to reduce particulate emissions.

In addition to the capital investment, it was estimated that $18,000 in operating and maintenance expense would be needed each year the pollution control equipment was operated. It was also estimated that $1,890 in pre-compliance maintenance expense was necessary to make the equipment operational.

Engineers for the Fertilizer Company believed that it would be at least eleven months before the equipment was installed and shake-down was completed. Because the waste could be safely stored for short periods, production of fertilizer would not be interrupted while the incinerator was being modified.

The Fertilizer Company is a publicly-owned corporation with assets of $770 million. The company is mainly financed with investment by the common stockholders but some preferred stock and long term debt also exists.

The firm, in accordance with the Act, had computed the penalty owed and a schedule of payments. It had also submitted the data used in calculating the penalty. The enforcement official now had to arrange the data in the order it would be requested by the computer and verify that it was from an appropriate source. The computer program would check the accuracy of the firm's penalty calculation.

Preparing Data For Entry Into The Program

The computer program will request data in a specific sequence. Although the data submitted by the firm can be verified in any order, it is useful to verify the data in the same way so that omissions are avoided. The following paragraphs follow the same sequence as is used to enter data into the computer program.

1. The number of months the source will be out of compliance. The period of noncompliance is measured from the day on which the notice of noncompliance is issued until the time standards are actually met.[1] This will include installation time and shakedown period for the equipment. If the firm indicates that compliance will be achieved in the first fifteen days of a month, it is assumed to be in compliance for the entire month. In the Fertilizer Company example, the firm stated that it will come into compliance in eleven months.

2. Limited Life Facility. The program calculates a penalty based on eventual compliance at the source. However, some firms will attain compliance by shutting down the source or by replacing it with a new source. This option is discussed in detail in Section V. For the Fertilizer Company, the source is not a limited life facility.

[1] This date cannot be before August 7, 1979.

3. Industrial Development Bonds. The calculation of the percentage of a pollution control investment financed by tax-exempt industrial development bonds is discussed in Section V. For the Fertilizer Company, none of the investment is financed by issuing tax-exempt bonds.

4. Schedule of capital investments. This is an estimate, provided by the firm, of monthly capital expenditures for the purchase and installation of the pollution control equipment. It is assumed that all capital expenditures are completed when compliance is achieved.

The sources which firms will use to estimate monthly expenditures include engineering estimates, quotations from manufacturers, or estimates by management. They will consist of not only the direct purchase cost, including sales taxes, but also site preparation, engineering design work, shipping costs and installation expense. All costs must be stated in terms of dollars as of the beginning of the noncompliance period. Thus, a firm which will comply eleven months late should not inflate the cost estimates to reflect price changes during the period of noncompliance. The computer program automatically takes this into account.

Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules 34551

The Fertilizer Company estimated that the total expenditure needed was $500,000. It submitted the data in Exhibit II-1 to justify the estimate. Expenditures to the manufacturer for the equipment will be made in three equal installments, during the second, fourth, and eleventh months of noncompliance. Each payment will thus be $166,666.67 ($500,000 ÷ 3).

5. Schedule of pre-compliance operating and maintenance expenditures and post-compliance annual operating and maintenance expense. These are costs the firm will incur for operation of the equipment. They may include operating and supervisory labor, power for equipment operation, supplies necessary for operation and a portion of the firm's overhead. If a by-product is created during equipment operation, disposal costs are included as an operating expense. If the by-product can be sold or used in another process, the value of the by-product should be subtracted from operating and maintenance expense.

In addition, operating and maintenance should include the incremental cost of changing plant operations to conform to the Act. For example, a firm forced to shift from high sulfur coal to low sulfur coal would include the increase in fuel costs as an operating expense. Operating expenses would also include the additional cost incurred if compliance requires shifting production to a less efficient or more expensive method.

EXHIBIT II-1

CALCULATION OF THE CAPITAL EXPENDITURE INPUT
FERTILIZER COMPANY[1]

1.	List price or estimated price of the equipment:	$485,908.65
2.	Less: Discount from manufacturer:	9,718.17
3.	Equals net price of equipment:	476,190.48
4.	Plus: Sales tax on equipment[2]:	23,809.52
5.	Plus: Freight and delivery charge:	0
6.	Equals estimated cost of equipment delivered:	$500,000.00
7.	Plus: Installation charge:	0
8.	Plus: Value of lost production:	0
9.	Plus: Cost of building modifications:	0
10.	EQUALS TOTAL CAPITAL EXPENDITURE:	$500,000.00

[1]This calculation uses Worksheet A in Attachment V.

[2]Some corporations subtract sales tax from revenue in the year of purchase. If this is the case, the sales tax is multiplied by (1 - Tax Rate) and subtracted from the cost of the equipment rather than added as in step four.

34558 Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules

EXHIBIT II-1
(CONTINUED)

Note: Line 6 divided by line 10 is the percentage of qualified investment for calculation of the investment tax credit.

QUALIFIED PERCENTAGE INVESTMENT TAX CREDIT:

$$\frac{\text{Line 6}}{\text{Line 10}} = \frac{\$500,000}{\$500,000} \times 10^{*} = 10\%$$

*If the depreciable life of the equipment is less than seven years, this figure must be adjusted as described on page II-16.

Sources for operating and maintenance expense are engineering reports, manufacturer specifications, estimates by owners or actual data from similar operations. Two different estimates of operating and maintenance expense are necessary--those incurred before compliance and those estimated for the period after compliance. These amounts should be stated in dollar terms as of the beginning of the noncompliance period. Dollar estimates should not be increased by an estimate of inflation.

The Fertilizer Company supplied the data in Exhibit II-2 as estimated pre-compliance operating and maintenance expense.

EXHIBIT II-2

ESTIMATE OF MONTHLY PRE-COMPLIANCE OPERATING AND MAINTENANCE EXPENSE FERTILIZER CORPORATION

PRE-COMPLIANCE OPERATING EXPENSE

Months 1-8		$ 0
Month 9		
Labor (10 hrs @ $10)	$100.00	$ 100.00
Month 10		
Labor (100 hrs @ $10)	1,000.00	
Power (1500 Kwh @ .0333 Kwh)	50.00	
Total		$1,050.00
Month 11		
Labor (50 hrs @ $10)	500.00	
Power (7200 Kwh @ .0333 Kwh)	240.00	
Total		$ 740.00

Pre-compliance monthly operating and maintenance expense cannot be larger than one-twelfth of the initial annual expense. For example, if the estimated initial annual expense is $15,000, no individual quarterly pre-compliance expenditure can be greater than $1,250 ($15,000 ÷ 12). If the pre-compliance operating and maintenance expense in a month is larger than the monthly equivalent of the initial annual expense, the computer program for calculating the penalty will not accept the data and will print an error message.[1]

For post-compliance operating and maintenance expense the Fertilizer Company supplied the data in Exhibit II-3.

[1] Monthly pre-compliance expenditures are used to adjust a penalty based on an estimate of the annual operating and maintenance expense throughout the life of the project. The requirement that pre-compliance expenditures be no more than one-twelfth of annual expense reflects the assumption that pre-compliance expenditures are similar to the annual expenditures avoided by noncompliance and do not include start-up costs and installation charges. These additional costs for installation and start-up should be included as a capital expenditure.

EXHIBIT II-3

POST-COMPLIANCE ANNUAL OPERATING AND MAINTENANCE EXPENSE

FERTILIZER COMPANY

1.	Annual Labor Expense 840 Hours x $10 per hour =	$8,400.00
2.	Power Cost 90000 Kwh x $.0333 per Kwh =	3,000.00
3.	Water Cost Gallons x $ per gallon =	0
4.	Raw Materials and Supplies 1000 lbs x $1 per Lb =	1,000.00
5.	Yearly Increase in Property Tax =	3,000.00
6.	Cost of Production Lost Due to Maintenance or Use of Equipment =	0
7.	Total Cost (1 + 2 + 3 + 4 + 5 + 6) =	$15,400.00
8.	Less: Value of By-Products 800 Lbs at $.50 per Lb =	400.00
9.	Annual Operating and Maintenance (7 - 8) =	$15,000.00

[1] This calculation uses Worksheet B in Attachment V.

EXHIBIT II-3

(CONTINUED)

Note: One-twelfth of line 9 is the maximum amount of any monthly pre-compliance expenditure.

$\frac{\text{Line 9}}{12}$ = $1,250 Maximum amount which may be entered as a pre-compliance monthly operating and maintenance expense.

6. Investment tax credit rate.[1] The investment tax credit is a percentage of the investment which can be used to directly reduce federal income tax. Although the federal tax credit for an investment is currently ten percent, this rate may have to be adjusted to reflect two restrictions in the revenue code:[2]

- Investments of less than seven years do not receive the entire ten percent.
- Certain investments do not qualify for the credit.

An investment with a depreciable life of less than seven years does not qualify for the maximum investment tax credit. Currently, percentages allowed for such investments are as follows:

[1] Information on the investment tax credit is contained in the Internal Revenue Service Code, Chapter 1, Subpart B--Rules for Computing Credit for Investment in Certain Depreciable Property.

[2] In addition to the two listed restrictions, investments financed with industrial development bonds qualify for only a portion of the credit when rapid amortization is used. This adjustment is made automatically by the computer program. Further, for the purposes of noncompliance penalties the entire investment tax credit as calculated is used regardless of taxable income amount.

Depreciable life (years)	Investment Tax Credit (percent)
Less than 3	0
At least 3 but less than 5	3.33
At least 5 but less than 7	6.67
7 or more	10.00

Items such as buildings and land are not usually allowable for purposes of computing the investment tax credit, so the percentage rate must be adjusted to yield a correct tax credit figure.[1] This adjustment is made by calculating the percentage of the investment qualifying for the tax credit and multiplying it by the percentage tax credit for equipment of similar depreciable life.

The state of Connecticut allows an investment tax credit to be applied against state taxes if the investment occurs in certain depressed areas. Because this credit reduces a tax deductible expense for federal income taxes, the credit must be adjusted to an after-tax basis. The adjustment is made by multiplying the state investment tax

[1] The Revenue Act of 1978 allows an investment tax credit for rehabilitation expenditures in connection with business and productive structures in use at least twenty years since first placed in service or since the last qualifying rehabilitation. Thus, the adjustment described above should be ignored for qualified rehabilitation investments.

34556 Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules

credit by one minus the marginal federal tax rate. The adjusted state credit is then added to the federal credit.[1]

For the Fertilizer Company, the entire investment qualifies for the investment tax credit. If $150,000 of the investment had not been qualified, only a seven percent credit would be allowed.[2]

If the Fertilizer Company had a depreciation tax life of five years and the entire investment qualified for the investment, only a 6.67 percent credit would be allowed.

7. Income tax rate. The income tax rate to be entered into the program must be the marginal rate--that is, the rate which the firm would pay on an additional dollar of income. The firm must estimate its marginal federal income tax rate and, where applicable, its marginal state and local income tax rates. The state and local tax rates should not include sales tax, inventory tax, charter tax

[1] The formula for determining the investment tax credit in a state having a tax credit is:

$$t_{ITC} = ITC_{FEDERAL} + \left[(1\text{-Tax Rate}_{FEDERAL}) * ITC_{STATE}\right]$$

This must be multiplied by one hundred for entry into the computer.

[2] Computed as $\frac{(\$500,000 - 150,000)}{500,000} \times 10\% = 7\%$.

or taxes on property. If any of these taxes are material to the analysis, they should be included in either the investment or operating and maintenance expenditures, as appropriate. Sales tax has already been shown to increase investment while property taxes would be included in operating and maintenance expense.

In most cases involving large firms, the marginal tax rate will be 46 percent.[1] Small corporations and some partnerships or privately owned firms could have lower rates. In many penalty calculations it will be necessary to adjust the state and local tax rates to reflect the fact that the state and local income taxes are also deductible from federal taxes. The steps for calculation are as follows.

[1] As of January 1979. This rate must be adjusted for future changes in the tax laws. The rate applicable to a firm is determined by the amount of taxable income expected in the next year. The ranges of taxable income and the corresponding marginal tax rate are shown below.

Taxable Income	Marginal Tax Rate
$0 - $25,000	17%
$25,000 - $50,000	20%
$50,000 - $75,000	30%
$75,000 - $100,000	40%
$100,000 and above	46%

- The marginal federal, state and local income tax rates are determined.
- The adjusted local tax rate given state taxes is computed[1].
- The local and state tax are adjusted for the federal tax.
- The effective tax rate is computed.

Exhibit II-4 contains a calculation of the tax rate for the Fertilizer Company.

[1] If the local tax is not deductible from the state tax, the numbers should be added.

EXHIBIT II-4

CALCULATION OF THE TAX RATE[1]
FERTILIZER CORPORATION

1. Marginal Federal tax rate.	46%
2. Marginal State tax rate.	5%
3. Marginal Local tax rate.	2%

CALCULATION OF ADJUSTED LOCAL TAX

(1 - State Tax Rate) x Local Tax Rate
= (1 - .03) x .02
= .95 x .02
= .019 = Adjusted Local Tax Rate.

CALCULATION OF ADJUSTED STATE AND LOCAL TAX

(1 - Federal Tax Rate) x (State Tax Rate + Adjusted Local Rate)
= (1 - .46) x (.05 + .019)
= .54 x .069
= .0373 = Adjusted Local and State Tax.

CALCULATION OF TAX RATE

100 x (Federal Tax Rate + Adjusted Local and State Tax)
= 100 x (.46 + .0373)
= 100 x .4973
= 49.73 = Tax Rate.

[1] This calculation uses Worksheet C in Attachment V.

8. Inflation rate. This is the estimated future increase in the capital and operating cost of pollution control equipment.[1] The inflation rate to be used in the Fertilizer Company penalty calculation is 8.3 percent. This was the compound rate of increase in the Chemical Engineering Plant Cost Inflation Index for the years 1972-1977.[2]

9. Discount rate. The discount rate is an estimate of the firm's cost of new equity capital. For a manufacturing firm, calculation of the discount rate requires averaging the twenty most recent quarters of the after-tax return on equity as reported for the firm's industry in Table 4 of the Federal Trade Commission's Quarterly Report for Manufacturing, Mining and Trade. Attachment I contains a copy of Table 4 for the year 1977.

[1] Chemical Engineering, McGraw Hill, Inc., April 28, 1975 and subsequent issues. The compound rate of increase is computed as:

$$\left(\left[\text{(Index in Final Year)} \div \text{(Index in Initial Year)}\right]^{1/N} - 1\right) \times 100$$

where N equals the number of years between the first and last years.

[2] The inflation rate of 8.3 percent is only applicable to the example described in the manual. Actual penalty determination will require calculation of the inflation rate using the above formula and the past Plant Cost Inflation Indices for the most recent twenty quarters.

The annual rates of return on equity after taxes are reported by the FTC in broad industrial categories. To categorize a firm, the Standard Industrial Classification Manual published by the Office of Management and Budget should be used.

The FTC does not report rates of return on equity for public utilities. For these organizations, the annual percent return on net worth published in the April Monthly Economic Letter by Citibank (New York) should be used instead. Attachment I includes a table listing this information for 1973 to 1977.

For the Fertilizer Company, the correct category to use is Chemicals and Allied Products. The calculation of the average return on equity for twenty quarters is shown in Exhibit II-5.

EXHIBIT II-5

FERTILIZER COMPANY
JULY 1978

	4	13.8
	Total:	316.7

Average: 15.84%

10. Interest rate. The interest rate is the estimated cost of new debt for the firm. Determination of the firm's interest rate requires two steps.

- The quality rating for the firm's bonds is found in Moody's Bond Record. If the firm does not have rated debt, an "A" rating is assumed. If it has more than one issue, that with the highest rating is used.

- The most recent monthly yield reported for bonds of the same rating is found in the Corporate Bond Yield Averages section of the Bond Record.

Bonds are rated by Moody's in a system ranging from a high of "Aaa" to a low of "C". The lowest average yield reported is "Baa"; a firm whose bonds have a rating of "Baa" or lower will use the yield reports for the "Baa" average. The bonds are listed in the Bond Record in alphabetical order by corporation. Convertible bonds are considered in the same manner as all other bonds.

Note that the interest rate is not taken from the so-called coupon rate on the bond. For example, in Table II-1, rates of 9.75 percent and 4.5 percent are listed. These are historical rates which were in effect at the time the bonds were issued. They do not reflect current market rates.

The Bond Record reports a number of different yields. If the firm is a utility, the Public Utility Average is used. If the firm is not a utility, the Industrial Bond average is used.

For the Fertilizer Company, the debt was not rated, so the industrial bond average for "A" bonds is used (8.76). Attachment II contains the average bond yields as reported in a recent issue of the Bond Record.

11. Preferred dividend rate. The method used for determining the preferred dividend rate is identical to that used to select the interest rate. The quality rating of the firm's preferred shares is found in Moody's Bond Record in the Preferred Stock section. If the stock is not rated, an "a" rating is assumed.

Average yields are reported for only "aa", "a", and "baa" preferred stocks issued by utilities. However, these figures should be used for non-utilities as well. If the stock has a rating of "baa" or lower, use the "baa" average yield. Preferred rated "aa" or higher should use the "aa" yield.

The latest monthly average is used and entered exactly as shown in the averages. Attachment III contains an example of the Bond Record preferred averages.

The Fertilizer Company's preferred stock is not rated so the yield entered for the penalty calculation is 8.88 percent, the rate found by using the return on "a" rated preferred stock.

12. Preferred stock share of investment. This is the percentage amount of preferred equity in the firm's capital structure. The capital structure of the firm is the dollar amount invested in the firm for periods over one year. Thus it does not include current liabilities or deferred federal income tax.

The preferred share of the investment is calculated using data contained in the firm's five most recent annual reports.[1] The procedure involves the following steps:

[1] This is available either directly from the firm or, for large corporations, in Moody's Industrial Manual. An advantage to using Moody's is that the percent equity is reported and can be used as a check on the calculation.

- The sum of all the firm's equity accounts on each year's balance sheet is added to the total of its long term debt. This total represents the firm's long term financing or its capital structure for that year. It will include paid-in capital, retained earnings, capital surplus, preferred stock and long term debt. If Treasury stock is shown as an asset on the balance sheet, it should be subtracted from the total capital.
- The dollar amount of all preferred stock shown in the equity section of the balance sheet for the year is divided by the total capital found in the previous step. This is the preferred share of the investment for the year.
- The preferred shares for each of the five most recent years are averaged to yield a preferred share for input to the penalty calculation.

13. Equity share of the investment. The sum of all equity accounts not used in the numerator of the preferred stock calculation is the amount of common equity in the capital structure each year. This sum is also divided by the yearly total capital found in step one yielding the equity share of the investment for the year. These figures are then averaged to yield an equity share for input to the penalty calculation.

The sum of the equity share of the investment and the preferred share of the investment cannot be greater than one hundred percent.

The hypothetical Fertilizer Company has the following balance sheet.

Table II-1

Fertilizer Company
Balance Sheet
December 31, 1978
(000's)

Assets	1976	Liabilities	
Cash	$18,881	Notes payable to bank	$122

Exhibit II-6 illustrates the calculation of the equity and preferred share of the investment for a single year.

34542 Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules

EXHIBIT II-6

CALCULATION OF THE EQUITY AND PREFERRED SHARE OF THE INVESTMENT[1]
FERTILIZER COMPANY
(000's)

The first step in obtaining the equity and preferred share of the investment is to sum the equity and long term debt.[2]

4.5% debentures	$ 21,331
9.75% notes	60,000
Long term lease	43,932
Pollution control rev bonds	46,000
Other long term debt	9,836
4.5% preferred stock	22,044
Common stock	100,000
Capital surplus	98,236
Retained earnings	262,799
	$623,772
Less: Treasury Stock	(477)
Total long term capital	$623,295

[1] For the purposes of this example, preferred and equity share are calculated for one year only.

[2] Deferred taxes are not included in the calculation of the equity and preferred share of the investment.

EXHIBIT II-6
(CONTINUED)

The second step is to divide the preferred stock by the total long term capital.

$$\frac{\text{Preferred stock}}{\text{Total Long Term Capital}} = \frac{22,044}{623,295} = .035 \text{ or } 3.5\%$$

The third step is to sum all common equity accounts. Do not include the preferred stock. Divide this number by the total long term capital.

Common Stock	$100,000
Capital Surplus	98,236
Retained Earnings	262,799
Total	421,035
Less Treasury Stock	(477)
Total Common Equity	$420,558

$$\frac{\text{Total Common Equity}}{\text{Total Long Term Capital}} = \frac{\$420,558}{623,295} = .675 \text{ or } 67.5\%$$

Thus, 67.5 percent is the equity share of the investment and 3.5 percent is the preferred share of the investment.

14. Depreciation life in years. This is the number of years over which the firm's pollution control equipment will be depreciated for tax purposes. It is found by taking the lower limit on the asset depreciation range for the appropriate class of assets given in the Internal Revenue Service publication Revenue Procedure 77-10. If the lower limit is greater than ten years, the regulations require that ten years be used. If the lower limit contains a fractional part of a year, the program should be run with the year lower than the fraction. If the rounding reduces the investment tax credit, the depreciation life should be rounded up and the program run again. The calculation giving the lower penalty should be used.

15. The useful life in years. The useful life is used to determine the length of each replacement cycle in the penalty calculation. It is also provided by Revenue Procedure 77-10. Instead of using the lower limit, the asset guideline period is used. If this contains a fractional part of a year the number should be rounded up to the next integer. The useful life must always be greater than or equal to the depreciation life in years.

For the Fertilizer Company example, the "Asset Guideline Period" for chemicals and allied products is used. This is eleven years. Had it been 11.5 years, it would have been rounded up to twelve.

II-32

Attachment IV

This attachment is IRS Revenue Procedure 77-10.

Revenue Procedure 77-10
Administrative, Procedural, and Miscellaneous

Reprinted from Internal Revenue Bulletin No. 12,
dated March 21, 1977

Department of the Treasury

26 CFR 601.105: Examination of returns and claims for refund, credit, or abatement; determination of correct tax liability.

Rev. Proc. 77-10

SECTION 1. PURPOSE.

.01 The purpose of this Revenue Procedure is to restate, pursuant to sections 167(m) and 263(f) of the Internal Revenue Code of 1954, with certain substantive modifications as noted below, the asset guideline classes, asset guideline depreciation periods and ranges, and annual asset guideline repair allowance percentages for the Class Life Asset Depreciation Range (CLADR) System.

.02 This Revenue Procedure supersedes Rev. Proc. 72-10, 1972-1 C.B. 721, and the supplements and revisions of the asset guideline classes, periods, and repair allowance percentages published since the publication of Rev. Proc. 72-10. These Revenue Procedures are as follows:

73-2, 1973-1 C.B. 747
73-3, 1973-1 C.B. 749
73-23, 1973-2 C.B. 474

.03 In addition, certain changes are made in the numbering system of asset guideline classes to facilitate the understanding and use of the CLADR system.

Broad title headings and asset guideline class number designations for several related guideline classes have been deleted wherever feasible to eliminate confusion over the appropriate asset guideline class number designations.

The asset guideline classes for "Office Furniture, Fixtures, and Equipment," "Information System," and "Data Handling Equipment, except Computers," were established in Rev. Proc. 73-2 as asset guideline classes 70.11, 70.12, and 70.13, respectively. These classes have been redesignated asset guideline classes 00.11, 00.12, and 00.13, respectively. In addition, the asset guideline class for Industrial Steam and Electric Generation and Distribution Systems, designated asset guideline class 49.5, has been redesignated asset guideline class 00.4. The redesignations group these asset guideline classes with certain other asset guideline classes by types of depreciable assets rather than by the activity or the product of an activity.

.04 Numerous changes and modifications have been made to the language of the asset guideline class descriptions. These changes are not intended to modify the composition of the existing classes of Rev. Proc. 72-10.

.05 The following substantive modifications of the classes of Rev. Proc. 72-10 have been made:

(i) Assets used in the ginning of cotton have been reclassified from class 39.0 to class 01.1.

(ii) Assets used by plumbing contractors have been reclassified from class 70.2 to class 15.1.

(iii) The description of assets included in class 15.2, "Marine Contract Construction," has been modified to be consistent with Rev. Proc. 66-18, 1966-1 C.B. 646.

(iv) Subclass 49.121, "Electric Utility Nuclear Fuel Assemblies," is part of class 49.12, "Electric Utility Nuclear Production Plant," to which it is related. Assets included in subclass 49.121 are not separately subject to possible exclusion from an election to apply section 1.167(a)-11(b)(5)(v) of the regulations. See Section 2.02(i) of this Revenue Procedure.

SEC. 2. RULE OF APPLICATION

.01 The asset guideline classes, asset guideline periods and ranges, and annual asset guideline repair allowances percentages set forth are for use under the rules set forth in section 1.167(a)-11 of the Income Tax Regulations.

.02 It should be noted that the following special rules apply as specified:

(i) It is expressly provided that asset guideline classes and subclasses 00.4, 20.5, 30.11, 30.21, 32.11, 33.11, 33.21, 34.01, 35.11, 35.21, 36.11, 37.12, 37.32, 37.33, and 49.121 are part of existing activity classes to which the assets included in them relate as stated in the Revenue Procedures establishing these subclasses; therefore, assets included in these classes and subclasses are not separately subject to possible exclusion from an election to apply section 1.167(a)-11(b)(5)(v) of the regulations.

(ii) "Service assets," as defined in classes 50.1 and 70.21, the cost of which is properly deductible under section 162 of the Code, are not eligible property under the CLADR system. Further, service assets may be treated as mass assets as defined in section 1.47-1(e)(4) of the regulations. Service assets may be depreciated under a method not described in section 167(b)(1), (2), or (3), if the requirements of section 1.167(a)-11(b)(5)(v) are met.

(iii) If the asset guideline class repair allowance for class 32.1 is elected in accordance with section 1.167(a)-11(d)(2)(ii) of the regulations, "cold tank repairs," including refractory relining expenditures to glass furnaces, shall be treated as deductible repairs within the provisions and limitations of section 1.167(a)-11(d)(2)(iv)(a) dealing with the application of the asset guideline class repair allowance.

(iv) General rebuilding or rehabilitation costs for the special tools defined in class 30.11 that have been traditionally capitalized as the cost of a new asset are included in class 30.11.

(v) Asset guideline class 00.3, "Land Improvements," includes "other tangible property" that qualifies under section 1.48-1(d) of the regulations. However, a structure that is essentially an item of machinery or equip-

ment or a structure that houses property used as an integral part of an activity specified in section 48(a)(1)(B)(i) of the Code, if the use of the structure is so closely related to the use of the property that the structure clearly can be expected to be replaced when the property it initially houses is replaced, is included in the asset guideline class appropriate to the equipment to which it is related.

.03 Property that is used predominantly outside the United States may be eligible property if the requirements of section 1.167(a)-11(b)(2) of the regulations are met. In the case of property first placed in service and used predominantly outside the United States during the taxable year of election, an asset guideline period, but no asset depreciation range is in effect. Accordingly, such property shall not be treated as included in the same asset guideline class as property used predominantly inside the United States, for purposes of determining the asset depreciation period under section 1.167(a)-11(b)(4). Thus, for this purpose each asset guideline class described in this Revenue Procedure has an exact counterpart that consists of property otherwise includable within the class, but used predominantly outside the United States during the taxable year of election. Generally, for this purpose property is used predominantly outside the United States if such property is physically located outside the United States during more than 50 percent of days of the taxable year of election, beginning with the date the property is first placed in service. However, there are ten exceptions to this general rule and these are contained in section 48(a)(2) of the Code. The asset depreciation period for property, which is determined in the taxable year of election, will not be changed because of a change in predominant use after the close of such taxable year. Although treated as in a separate class for purposes of determining the asset depreciation period, property predominantly used outside the United States shall be included in the same asset guideline class as property predominantly used inside the United States for purposes of applying the asset guideline class repair allowance under section 1.167(a)-11(d)(2).

SEC. 3. ASSET GUIDELINE CLASSES AND PERIODS, ASSET DEPRECIATION RANGES, AND ANNUAL ASSET GUIDELINE REPAIR ALLOWANCE PERCENTAGES.

The asset guideline classes, asset guideline periods, asset depreciation ranges, and annual asset guideline repair allowance percentages are prescribed as set forth below:

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
	SPECIFIC DEPRECIABLE ASSETS USED IN ALL BUSINESS ACTIVITIES, EXCEPT AS NOTED:				
00.11	**Office Furniture, Fixtures, and Equipment:** Includes furniture and fixtures which are not a structural component of a building. Includes such assets as desks, files, safes, and communications equipment. Does not include communications equipment that is included in other CLADR classes	8	10	12	2
00.12	**Information Systems:** Includes computers and their peripheral equipment used in administering normal business transactions and the maintenance of business records, their retrieval and analysis. Information systems are defined as: 1) Computers: A computer is an electronically activated device capable of accepting information, applying prescribed processes to the information, and supplying the results of these processes with or without human intervention. It usually consists of a central processing unit containing extensive storage, logic, arithmetic, and control capabilities. Excluded from this category are adding machines, electronic desk calculators, etc. 2) Peripheral equipment consists of the auxiliary machines which may be placed under control of the central processing unit. Non limiting examples are: Card readers, card punches, magnetic tape feeds, high speed printers, optical character readers, tape cassettes, mass storage units, paper tape equipment, keypunches, data entry devices, teleprinters, terminals, tape drives, disc drives, disc files, disc packs, visual image projector tubes, card sorters, plotters, and collators. Peripheral equipment may be used on-line or off-line.				

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
	Does not include equipment that is an integral part of other capital equipment and which is included in other CLADR classes of economic activity, i.e., computers used primarily for process or production control, switching and channeling	5	6	7	7.5
00.13	**Data Handling Equipment, except Computers:** Includes only typewriters, calculators, adding and accounting machines, copiers, and duplicating equipment	5	6	7	15
00.21	**Airplanes (airframes and engines), except those used in commercial or contract carrying of passengers or freight, and all helicopters (airframes and engines)**	5	6	7	14
00.22	**Automobiles, Taxis**	2.5	3	3.5	16.5
00.23	**Buses**	7	9	11	11.5
00.241	**Light General Purpose Trucks:** Includes trucks for use over the road (actual unloaded weight less than 13,000 pounds)	3	4	5	16.5
00.242	**Heavy General Purpose Trucks:** Includes heavy general purpose trucks, concrete ready-mix truckers, and ore trucks, for use over the road (actual unloaded weight 13,000 pounds or more)	5	6	7	10
00.25	**Railroad Cars and Locomotives, except those owned by railroad transportation companies**	12	15	18	8
00.26	**Tractor Units For Use Over-The-Road**	3	4	5	16.5
00.27	**Trailers and Trailer-Mounted Containers**	5	6	7	10
00.28	**Vessels, Barges, Tugs, and Similar Water Transportation Equipment,** except those used in marine contract construction	14.5	18	21.5	6
00.3	**Land Improvements:** Includes improvements directly to or added to land, whether such improvements are section 1245 property or section 1250 property, provided such improvements are depreciable. Examples of such assets might include sidewalks, roads, canals, waterways, drainage facilities, sewers, wharves and docks, bridges, fences, landscaping, shrubbery, or radio and television transmitting towers. Does not include land improvements that are explicitly included in any other class, and buildings and structural components as defined in section 1.48-1(e) of the regulations. Excludes public utility initial clearing and grading land improvements as specified in Rev. Rul. 72-403, 1972-2 C.B. 102.		20		
00.4	**Industrial Steam and Electric Generation and/or Distribution Systems:** Includes assets, whether such assets are section 1245 property or 1250 property, providing such assets are depreciable, used in the production and/or distribution of electricity with rated total capacity in excess of 500 Kilowatts and/or assets used in the production and/or distribution of steam with rated total capacity in excess of 12,500 pounds per hour, for use by the taxpayer in his industrial manufacturing process or plant activity and not ordinarily available for sale to others. Does not include buildings and structural components as defined in section 1.48-1(e) of the regulations. Assets used to generate and/or distribute electricity or steam of the type described above of lesser rated capacity are not included, but are included in the appropriate manufacturing equipment classes elsewhere specified.				

Asset guideline class	Description of assets included	Asset depreciation range (in years) Lower limit	Asset guideline period	Upper limit	Annual asset guideline repair allowance percentage
	Steam and chemical recovery boiler systems used for the recovery and regeneration of chemicals used in manufacturing, with rated capacity in excess of that described above, with specifically related distribution and return systems are not included but are included in appropriate manufacturing equipment classes elsewhere specified. An example of an excluded steam and recovery boiler system is that used in the pulp and paper manufacturing industry	22.5	28	33.5	2.5
	DEPRECIABLE ASSETS USED IN THE FOLLOWING ACTIVITIES:				
01.1	**Agriculture:** Includes machinery and equipment, grain bins, and fences but no other land improvements, that are used in the production of crops or plants, vines, and trees; livestock; the operation of farm dairies, nurseries, greenhouses, sod farms, mushroom cellars, cranberry bogs, apiaries, and fur farms; the performance of agricultural, animal husbandry, and horticultural services	8	10	12	11
01.11	**Cotton Ginning Assets**	9.5	12	14.5	5.5
01.21	**Cattle, Breeding or Dairy**	5.5	7	8.5	
01.22	**Horses, Breeding or Work**	8	10	12	
01.23	**Hogs, Breeding**	2.5	3	3.5	
01.24	**Sheep and Goats, Breeding**	4	5	6	
01.3	**Farm Buildings**	20	25	30	5
10.0	**Mining:** Includes assets used in the mining and quarrying of metallic and nonmetallic minerals (including sand, gravel, stone, and clay) and the milling, beneficiation and other primary preparation of such materials	8	10	12	6.5
13.1	**Drilling of Oil and Gas Wells:** Includes assets used in the drilling of onshore oil and gas wells and the provisions of geophysical and other exploration services; and the provision of such oil and gas field services as chemical treatment, plugging and abandoning of wells and cementing or perforating well casings. Does not include assets used in the performance of any of these activities and services by integrated petroleum and natural gas producers for their own account	5	6	7	10
13.2	**Exploration for and Production of Petroleum and Natural Gas Deposits:** Includes assets used by petroleum and natural gas producers for drilling of wells and production of petroleum and natural gas, including gathering pipelines and related storage facilities	11	14	17	4.5
13.3	**Petroleum Refining:** Includes assets used for the distillation, fractionation, and catalytic cracking of crude petroleum into gasoline and its other components	13	16	19	7
13.4	**Marketing of Petroleum and Petroleum Products:** Includes assets used in marketing petroleum and petroleum products, such as related storage facilities and complete service stations, but not including any of these facilities related to petroleum and natural gas trunk pipelines	13	16	19	4

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
15.1	**Contract Construction Other than Marine:** Includes assets used by general building, special trade, and heavy construction contractors. Does not include assets used by companies in performing construction services for their own account	4	5	6	12.5
15.2	**Marine Contract Construction:** Includes assets used by general building, special trade, and heavy construction contractors predominantly in marine construction work. Does not include assets used by companies in performing marine construction services for their own account except for floating, self-propelled, and other drilling platforms and support vessels used in offshore drilling for oil and gas which are included whether used for their own account or others	9.5	12	14.5	5
20.1	**Manufacture of Grain and Grain Mill Products:** Includes assets used in the production of flours, cereals, livestock feeds, and other grain and grain mill products	13.5	17	20.5	6
20.2	**Manufacture of Sugar and Sugar Products:** Includes assets used in the production of raw sugar, syrup, or finished sugar from sugar cane or sugar beets	14.5	18	21.5	4.5
20.3	**Manufacture of Vegetable Oils and Vegetable Oil Products:** Includes assets used in the production of oil from vegetable materials and the manufacture of related vegetable oil products	14.5	18	21.5	3.5
20.4	**Manufacture of Other Food and Kindred Products:** Includes assets used in the production of foods and beverages not included in classes 20.1, 20.2 and 20.3	9.5	12	14.5	5.5
20.5	**Manufacture of Food and Beverages-Special Handling Devices:** Includes assets defined as specialized materials handling devices such as returnable pallets, palletized containers, and fish processing equipment including boxes, baskets, carts, and flaking trays used in activities as defined in classes 20.1, 20.2, 20.3, 20.4. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices	3	4	5	20
21.0	**Manufacture of Tobacco and Tobacco Products:** Includes assets used in the production of cigarettes, cigars, smoking and chewing tobacco, snuff, and other tobacco products	12	15	18	5
22.1	**Manufacture of Knitted Goods:** Includes assets used in the production of knitted and netted fabrics and lace. Assets used in yarn preparation, bleaching, dyeing, printing, and other similar finishing processes, texturing, and packaging, are elsewhere classified	6	7.5	9	7
22.2	**Manufacture of Yarn, Thread, and Woven Fabric:** Includes assets used in the production of spun yarns including the preparing, blending, spinning, and twisting of fibers into yarns and threads, the preparation of yarns such as twisting, warping, and winding, the production of covered elastic yarn and thread, cordage, woven fabric, tire fabric, braided fabric, twisted jute for packing, mattresses, pads, sheets, and industrial belts, and the processing of textile mill waste to recover fibers, flocks, and shoddies. Assets used to manufacture carpets, man-made fibers, and nonwovens, and assets used in texturing, bleach-				

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
	ing, dyeing, printing, and other similar finishing processes, are elsewhere classified	9	11	13	16
22.3	**Manufacture of Carpets, and Dyeing, Finishing, and Packaging of Textile Products:** Includes assets used in the production of carpets, rugs, mats, woven carpet backing, chenille, and other tufted products, and assets used in the joining together of backing with carpet yarn or fabric. Includes assets used in washing, scouring, bleaching, dyeing, printing, drying, and similar finishing processes applied to textile fabrics, yarns, threads, and other textile goods. Includes assets used in the production and packaging of textile products, other than apparel, by creasing, forming, trimming, cutting, and sewing, such as the preparation of carpet and fabric samples, or similar joining together processes (other than the production of scrim reinforced paper products and laminated paper products) such as the sewing and folding of hosiery and panty hose, the creasing, folding, trimming, and cutting of fabrics to produce nonwoven products, such as disposable diapers and sanitary products. Assets used in the manufacture of nonwoven carpet backing, and hard surface floor covering such as tile, rubber, and cork, are elsewhere classified	7	9	11	15
22.4	**Manufacture of Textured Yarns:** Includes assets used in the processing of yarns to impart bulk and/or stretch properties to the yarn. The principal machines involved are falsetwist, draw, beam-to-beam, and stuffer box texturing equipment and related high-speed twisters and winders. Assets, as described above, which are used to further process man-made fibers are elsewhere classified when located in the same plant in an integrated operation with man-made fiber producing assets. Assets used to manufacture man-made fibers and assets used in bleaching, dyeing, printing, and other similar finishing processes, are elsewhere classified	6.5	8	9.5	7
22.5	**Manufacture of Nonwoven Fabrics:** Includes assets used in the production of nonwoven fabrics, felt goods including felt hats, padding, batting, wadding, oakum, and fillings, from new materials and from textile mill waste. Nonwoven fabrics are defined as fabrics (other than reinforced and laminated composites consisting of nonwovens and other products) manufactured by bonding natural and/or synthetic fibers and/or filaments by means of induced mechanical interlocking, fluid entanglement, chemical adhesion, thermal or solvent reaction, or by combination thereof other than natural hydration bonding as occurs with natural cellulose fibers. Such means include resin bonding, web bonding, and melt bonding. Specifically includes assets used to make flocked and needle punched products other than carpets and rugs. Assets, as described above, which are used to manufacture nonwovens are elsewhere classified when located in the same plant in an integrated operation with man-made fiber producing assets. Assets used to manufacture man-made fibers and assets used in bleaching, dyeing, printing, and other similar finishing processes, are elsewhere classified	8	10	12	15
23.0	**Manufacture of Apparel and Other Finished Products:** Includes assets used in the production of clothing and fabricated textile products by the cutting and sewing of woven fabrics, other				

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
	textile products, and furs; but does not include assets used in the manufacture of apparel from rubber and leather	7	9	11	7
24.1	**Cutting of Timber:** Includes logging machinery and equipment and roadbuilding equipment used by logging and sawmill operators and pulp manufacturers for their own account	5	6	7	10
24.2	**Sawing of Dimensional Stock from Logs:** Includes machinery and equipment installed in permanent or well-established sawmills	8	10	12	6.5
24.3	**Sawing of Dimensional Stock from Logs:** Includes machinery and equipment installed in sawmills characterized by temporary foundations and a lack, or minimum amount, of lumber-handling, drying, and residue disposal equipment and facilities	5	6	7	10
24.4	**Manufacture of Wood Products, and Furniture:** Includes assets used in the production of plywood, hardboard, flooring, veneers, furniture, and other wood products, including the treatment of poles and timber	8	10	12	6.5
26.1	**Manufacture of Pulp and Paper:** Includes assets for pulp materials handling and storage, pulp mill processing, bleach processing, paper and paperboard manufacturing, and on-line finishing. Includes pollution control assets and all land improvements associated with the factory site or production process such as effluent ponds and canals, provided such improvements are depreciable but does not include buildings and structural components as defined in section 1 48-1(e)(1) of the regulations. Includes steam and chemical recovery boiler systems, with any rated capacity, used for the recovery and regeneration of chemicals used in manufacturing. Does not include assets used either in pulpwood logging, or in the manufacture of hardboard	10.5	13	15.5	10
26.2	**Manufacture of Converted Paper, Paperboard, and Pulp Products:** Includes assets used for modification, or remanufacture of paper and pulp into converted products, such as paper coated off the paper machine, paper bags, paper boxes, cartons and envelopes. Does not include assets used for manufacture of non-wovens that are elsewhere classified	8	10	12	15
27.0	**Printing, Publishing, and Allied Industries:** Includes assets used in printing by one or more processes, such as letterpress, lithography, gravure, or screen; the performance of services for the printing trade, such as book-binding, typesetting, engraving, photoengraving, and electrotyping; and the publication of newspapers, books, and periodicals	9	11	13	5.5
28.0	**Manufacture of Chemicals and Allied Products:** Includes assets used in the manufacture of basic chemicals such as acids, alkalies, salts, and organic and inorganic chemicals; chemical products to be used in further manufacture, such as synthetic fibers and plastics materials, including petrochemical processing beyond that which is ordinarily a part of petroleum refining; and finished chemical products, such as pharmaceuticals, cosmetics, soaps, fertilizers, paints and varnishes, explosives, and compressed and liquified gases. Does				

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
	not include assets used in the manufacture of finished rubber and plastic products or in the production of natural gas products, butane, propane, and byproducts of natural gas production plants	9	11	13	5.5
30.1	**Manufacture of Rubber Products:** Includes assets used for the production of products from natural, synthetic, or reclaimed rubber, gutta percha, balata, or gutta siak, such as tires, tubes, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries; and in the recapping, retreading, and rebuilding of tires	11	14	17	5
30.11	**Manufacture of Rubber Products—Special Tools and Devices:** Includes assets defined as special tools, such as jigs, dies, mandrels, molds, lasts, patterns, specialty containers, pallets, shells, and tire molds, and accessory parts such as rings and insert plates used in activities as defined in class 30.1. Does not include tire building drums and accessory parts and general purpose small tools such as wrenches and drills, both power and hand-driven, and other general purpose equipment such as conveyors and transfer equipment	3	4	5	
30.2	**Manufacture of Finished Plastic Products:** Includes assets used in the manufacture of plastics products and the molding of primary plastics for the trade. Does not include assets used in the manufacture of basic plastics materials nor the manufacture of phonograph records	9	11	13	5.5
30.21	**Manufacture of Finished Plastic Products—Special Tools:** Includes assets defined as special tools, such as jigs, dies, fixtures, molds, patterns, gauges, and specialty transfer and shipping devices, used in activities as defined in class 30.2. Special tools are specifically designed for the production or processing of particular parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools, such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devic	3	3.5	4	5.5
31.0	**Manufacture of Leather and Leather Products:** Includes assets used in the tanning, currying, and finishing of hides and skins; the processing of fur pelts; and the manufacture of finished leather products, such as footwear, belting, apparel, and luggage	9	11	13	5.5
32.1	**Manufacture of Glass Products:** Includes assets used in the production of flat, blown, or pressed products of glass, such as float and window glass, glass containers, glassware and fiberglass. Does not include assets used in the manufacture of lenses	11	14	17	12
32.11	**Manufacture of Glass Products—Special Tools:** Includes assets defined as special tools such as molds, patterns, pallets, and specialty transfer and shipping devices such as steel racks to transport automotive glass, used in activities as defined in class 32.1. Special tools are specifically designed for the production or processing of particular parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are				

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
	made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices	2	2.5	3	10
32.2	**Manufacture of Cement:** Includes assets used in the production of cement, but does not include any assets used in the manufacture of concrete and concrete products nor in any mining or extraction process	16	20	24	3
32.3	**Manufacture of Other Stone and Clay Products:** Includes assets used in the manufacture of products from materials in the form of clay and stone, such as brick, tile, and pipe; pottery and related products, such as vitreous-china, plumbing fixtures, earthenware and ceramic insulating materials; and also includes assets used in manufacture of concrete and concrete products. Does not include assets used in any mining or extraction processes	12	15	18	4.5
33.1	**Manufacture of Primary Ferrous Metals:** Includes assets used in the smelting and refining of ferrous metals from ore, pig, or scrap; the rolling, drawing, and alloying of ferrous metals; the manufacture of castings, forgings, and other basic products of ferrous metals; and the manufacture of nails, spikes, structural shapes, tubing, wire, and cable	14.5	18	21.5	8
33.11	**Manufacture of Primary Ferrous Metals—Special Tools:** Includes assets defined as special tools such as dies, jigs, molds, patterns, fixtures, gauges, and drawings concerning such special tools used in the activities as defined in class 33.1, manufacture of Primary Ferrous Metals. Special tools are specifically designed for the production or processing of particular products or parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices. Rolls, mandrels, and refractories are not included in class 33.11 but are included in class 33.1	5	6.5	8	4
33.2	**Manufacture of Primary Nonferrous Metals:** Includes assets used in the smelting, refining, and electrolysis of nonferrous metals from ore, pig, or scrap, the rolling, drawing, and alloying of nonferrous metals; the manufacture of castings, forgings, and other basic products of nonferrous metals; and the manufacture of nails, spikes, structural shapes, tubing, wire, and cable	11	14	17	4.5
33.21	**Manufacture of Primary Nonferrous Metals—Special Tools:** Includes assets defined as special tools such as dies, jigs, molds, patterns, fixtures, gauges, and drawings concerning such special tools used in the activities as defined in class 33.2, Manufacture of Primary Nonferrous Metals. Special tools are specifically designed for the production or processing of particular products or parts and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particu-				

Asset guideline class	Description of assets included	Asset depreciation range (in years) Lower limit	Asset guideline period	Upper limit	Annual asset guideline repair allowance percentage
	lar part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices. Rolls, mandrels, and refractories are not included in class 33.21 but are included in class 33.2	5	6.5	8	4
34.0	**Manufacture of Fabricated Metal Products:** Includes assets used in the production of metal cans, tinware, nonelectric heating apparatus, fabricated structural metal products, metal stampings, and other ferrous and nonferrous metal and wire products not elsewhere classified	9.5	12	14.5	6
34.01	**Manufacture of Fabricated Metal Products—Special Tools:** Includes assets defined as special tools such as dies, jigs, molds, patterns, fixtures, gauges, and returnable containers and drawings concerning such special tools used in the activities as defined in class 34.0. Special tools are specifically designed for the production or processing of particular machine components, products, or parts, and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices	2.5	3	3.5	3.5
35.1	**Manufacture of Metalworking Machinery:** Includes assets used in the production of metal cutting and forming machines, special dies, tools, jigs, and fixtures, and machine tool accessories	9.5	12	14.5	5.5
35.11	**Manufacture of Metalworking Machinery—Special Tools:** Includes assets defined as special tools, such as jigs, dies, fixtures, molds, patterns, gauges, and specialty transfer and shipping devices, used in activities as defined in class 35.1. Special tools are specifically designed for the production or processing of particular machine components and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices	5	6	7	12.5
35.2	**Manufacture of Other Machines:** Includes assets used in the production of such machinery as engines and turbines; farm machinery, construction, and mining machinery; general and special industrial machines including office machines and nonelectronic computing equipment; miscellaneous machines except electrical equipment and transportation equipment	9.5	12	14.5	5.5
35.21	**Manufacture of Other Machines—Special Tools:** Includes assets defined as special tools, such as jigs, dies, fixtures, molds, patterns, gauges, and specialty transfer and shipping devices, used in activities as defined in class 35.2. Special tools are specifically designed for the production or processing of particular machine components and have no significant utilitarian value and cannot be adapted to further				

Asset guideline class	Description of assets included	Asset depreciation range (in years) Lower limit	Asset guideline period	Upper limit	Annual asset guideline repair allowance percentage
	or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices	5	6.5	8	12.5
36.1	**Manufacture of Electrical Equipment:** Includes assets used in the production of machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy such as; electric test and distributing equipment, electrical industrial apparatus, household appliances, electric lighting and wiring equipment; electronic components and accessories, phonograph records, storage batteries and ignition systems	9.5	12	14.5	5.5
36.11	**Manufacture of Electrical Equipment—Special Tools:** Includes assets defined as special tools such as jigs, dies, molds, patterns, fixtures, gauges, returnable containers, and specialty transfer devices used in activities as defined in class 36.1. Special tools are specifically designed for the production or processing of particular machine components, products or parts, and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices	4	5	6	
36.2	**Manufacture of Electronic Products:** Includes assets used in the production of electronic detection, guidance, control, radiation, computation, test, and navigation equipment or the components thereof including airborne application. Also includes assets used in the manufacture of electronic airborne communication equipment or the components thereof. Does not include the assets of manufacturers engaged only in the purchase and assembly of components	6.5	8.0	9.5	7.5
37.11	**Manufacture of Motor Vehicles:** Includes assets used in the manufacture and assembly of finished automobiles, trucks, trailers, motor homes, and buses. Does not include assets used in mining, printing and publishing, production of primary metals, electricity, or steam, or the manufacture of glass, industrial chemicals, batteries, or rubber products, which are classified elsewhere. Includes assets used in manufacturing activities elsewhere classified other than those excluded above, where such activities are incidental to and an integral part of the manufacture and assembly of finished motor vehicles such as the manufacture of parts and subassemblies of fabricated metal products, electrical equipment, textiles, plastics, leather, and foundry and forging operations. Does not include any assets not classified in manufacturing activity classes, e.g., does not include assets classified in asset guideline classes 00.11 through 00.4. Activities will be considered incidental to the manufacture and assembly of finished motor vehicles only if 75 percent or more of the value of the products produced under one roof are used for the manufacture and assembly of finished motor vehicles. Parts that are produced as a normal replacement stock complement in connection with the manufacture and as-

		Lower limit	Asset guideline period	Upper limit	
	sembly of finished motor vehicles are considered used for the manufacture and assembly of finished motor vehicles. Does not include assets used in the manufacture of component parts if these assets are used by taxpayer not engaged in the assembly of finished motor vehicles ----	9.5	12	14.5	9.5
37.12	**Manufacture of Motor Vehicles—Special Tools:** Includes assets defined as special tools, such as jigs, dies, fixtures, molds, patterns, gauges, and specialty transfer and shipping devices, owned by manufacturers of finished motor vehicles and used in qualified activities as defined in class 37.11. Special tools are specifically designed for the production or processing of particular motor vehicle components and have no significant utilitarian value, and cannot be adapted to further or different use, after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices ----------	2.5	3	3.5	12.5
37.2	**Manufacture of Aerospace Products:** Includes assets used in the manufacture and assembly of airborne vehicles and their component parts including hydraulic, pneumatic, electrical, and mechanical systems. Does not include assets used in the production of electronic airborne detection, guidance, control, radiation, computation, test, navigation, and communication equipment or the components thereof ----------	8	10	12	7.5
37.31	**Ship and Boat Building Machinery and Equipment:** Includes assets used in the manufacture and repair of ships, boats, caissons, marine drilling rigs, and special fabrications not included in asset guideline classes 37.32 and 37.33. Specifically includes all manufacturing and repairing machinery and equipment, including machinery and equipment used in the operation of assets included in asset guideline class 37.32. Excludes buildings and their structural components --------	9.5	12	14.5	8.5
37.32	**Ship and Boat Building Dry Docks and Land Improvements:** Includes assets used in the manufacture and repair of ships, boats, caissons, marine drilling rigs, and special fabrications not included in asset guideline classes 37.31 and 37.33. Specifically includes floating and fixed dry docks, ship basins, graving docks, shipways, piers, and all other land improvements such as water, sewer, and electric systems. Excludes buildings and their structural components ----------	13	16	19	2.5
37.33	**Ship and Boat Building—Special Tools:** Includes assets defined as special tools such as dies, jigs, molds, patterns, fixtures, gauges, and drawings concerning such special tools used in the activities defined in classes 37.31 and 37.32. Special tools are specifically designed for the production or processing of particular machine components, products, or parts, and have no significant utilitarian value and cannot be adapted to further or different use after changes or improvements are made in the model design of the particular part produced by the special tools. Does not include general purpose small tools such as wrenches and drills, both hand and power-driven, and other general purpose equipment such as conveyors, transfer equipment, and materials handling devices ----------	5	6.5	8	0.5

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
37.41	**Manufacture of Locomotives:** Includes assets used in building or rebuilding railroad locomotives (including mining and industrial locomotives). Does not include assets of railroad transportation companies or assets of companies which manufacture components of locomotives but do not manufacture finished locomotives	9	11.5	14	7.5
37.42	**Manufacture of Railroad Cars:** Includes assets used in building or rebuilding railroad freight or passenger cars (including rail transit cars). Does not include assets of railroad transportation companies or assets of companies which manufacture components of railroad cars but do not manufacture finished railroad cars	9.5	12	14.5	5.5
38.0	**Manufacture of Professional, Scientific, and Controlling Instruments:** Includes assets used in the manufacture of mechanical measuring, engineering, laboratory and scientific research instruments, optical instruments and lenses; surgical, medical, and dental instruments, equipment and supplies; ophthalmic goods, photographic equipment and supplies; and watches and clocks	9.5	12	14.5	5.5
39.0	**Manufacture of Athletic, Jewelry and Other Goods:** Includes assets used in the production of jewelry; musical instruments; toys and sporting goods; motion picture and television films and tapes; and pens, pencils, office and art supplies, brooms, brushes, caskets, etc.	9.5	12	14.5	5.5
	Railroad Transportation: Classes with the prefix 40 include the assets identified below that are used in the commercial and contract carrying of passengers and freight by rail. Assets of electrified railroads will be classified in a manner corresponding to that set forth below for railroads not independently operated as electric lines. Excludes the assets included in classes with the prefix beginning 00.1 and 00.2 above, and also excludes any non-depreciable assets included in Interstate Commerce Commission accounts enumerated for this class.				
40.1	**Railroad Machinery and Equipment:** Includes assets classified in the following Interstate Commerce Commission accounts: Roadway Accounts: (16) Station and office buildings (freight handling machinery and equipment only) (25) TOFC/COFC terminals (freight handling machinery and equipment only) (26) Communication systems (27) Signals and interlockers (37) Roadway machines (44) Shop machinery Equipment Accounts: (52) Locomotives (53) Freight train cars (54) Passenger train cars (57) Work equipment	11	14	17	10.5

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
40.2	**Railroad Structures and Similar Improvements:** Includes assets classified in the following Interstate Commerce Commission road accounts: (6) Bridges, trestles, and culverts (7) Elevated structures (13) Fences, snowsheds, and signs (16) Station and office buildings (stations and other operating structures only) (17) Roadway buildings (18) Water stations (19) Fuel stations (20) Shops and enginehouses (25) TOFC/COFC terminals (operating structures only) (31) Power transmission systems (35) Miscellaneous structures (39) Public improvements construction	24	30	36	5
40.3	**Railroad Wharves and Docks** Includes assets classified in the following Interstate Commerce accounts: (23) Wharves and docks (24) Coal and ore wharves	16	20	24	5.5
40.51	**Railroad Hydraulic Electric Generating Equipment**	40	50	60	1.5
40.52	**Railroad Nuclear Electric Generating Equipment**	16	20	24	3
40.53	**Railroad Steam Electric Generating Equipment**	22.5	28	33.5	2.5
40.54	**Railroad Steam, Compressed Air, and Other Power Plant Equipment**	22.5	28	33.5	7.5
41.0	**Motor Transport-Passengers:** Includes assets used in the urban and interurban commercial and contract carrying of passengers by road, except the transportation assets included in classes with the prefix 00.2	6.5	8	9.5	11.5
42.0	**Motor Transport-Freight:** Includes assets used in the commercial and contract carrying of freight by road, except the transportation assets included in classes with the prefix 00.2	6.5	8	9.5	11
44.0	**Water Transportation:** Includes assets used in the commercial and contract carrying of freight and passengers by water except the transportation assets included in classes with the prefix 00.2. Includes all related land improvements	16	20	24	8
45.0	**Air Transport:** Includes assets (except helicopters) used in commercial and contract carrying of passengers and freight by air. For purposes of section 1.167 (a)-11(d)(2)(iv)(*a*) of the regulations, expenditures for "repair, maintenance, rehabilitation, or improvement" shall consist of direct maintenance expenses (irrespective of airworthiness provisions or charges) as defined by Civil Aeronautics Board uniform accounts 5200, maintenance burden (exclusive of expenses pertaining to maintenance buildings and improvements) as defined by Civil Aeronautics Board uniform accounts 5300, and expenditures which are not "excluded additions" as defined by section 1.167(a)-11(d)(2)(vi) of the regulations and which would be charged to property and equipment accounts in the Civil Aeronautics Board uniform system of accounts	9.5	12	14.5	15

Asset guideline class	Description of assets included	Asset depreciation range (in years) Lower limit	Asset guideline period	Upper limit	Annual asset guideline repair allowance percentage
45.1	**Air Transport (restricted)** Includes each asset described in the description of class 45.0 which was held by the taxpayer on April 15, 1976, or is acquired by the taxpayer pursuant to a contract which was, on April 15, 1976, and at all times thereafter, binding on the taxpayer. This criterion of classification based on binding contract concept is to be applied in the same manner as under the general rules expressed in section 49(b)(1), (4), (5), and (8) of the Code	5	6	7	15
46.0	**Pipeline Transportation:** Includes assets used in the private, commercial, and contract carrying of petroleum, gas, and other products by means of pipes and conveyors. The trunk lines and related storage facilities of integrated petroleum and natural gas producers are included in this class. Excludes initial clearing and grading land improvements as specified in Rev. Rul. 72-403, 1972-2 C.B. 102, but includes all other related land improvements	17.5	22	26.5	3
	Telephone Communications: Includes the assets identified below and that are used in the provision of commercial and contract telephonic services such as:				
48.11	**Telephone Central Office Buildings:** Includes assets intended to house central office equipment, as defined in Federal Communications Commission Part 31 Account No. 212 whether section 1245 or section 1250 property	36	45	54	1.5
48.12	**Telephone Central Office Equipment:** Includes central office switching and related equipment as defined in Federal Communications Commission Part 31 Account No. 221	16	20	24	6
48.13	**Telephone Station Equipment:** Includes such station apparatus and connections as teletypewriters, telephones, booths, private exchanges, and comparable equipment as defined in Federal Communications Commission Part 31 Account Nos. 231, 232, and 234	8	10	12	10
48.14	**Telephone Distribution Plant:** Includes such assets as pole lines, cable, aerial wire, underground conduits, and comparable equipment, and related land improvements as defined in Federal Communications Commission Part 31 Account Nos. 241, 242.1, 242.2. 242.3, 242.4, 243, and 244	28	35	42	2
48.2	**Radio and Television Broadcastings:** Includes assets used in radio and television broadcasting, except transmitting towers	5	6	7	10
	Telegraph, Ocean Cable, and Satellite Communications (TOCSC) Includes communications-related assets used to provide domestic and international radio-telegraph, wire-telegraph, ocean-cable, and satellite communications services; also includes related land improvements.				
48.31	**TOCSC-Electric Power Generating and Distribution Systems:** Includes assets used in the provision of electric power by generation, modulation, rectification, channelization, control, and distribution. Does not include these assets when they are installed on customer's premises	15	19	23	

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
48.32	**TOCSC-High Frequency Radio and Microwave Systems:** Includes assets such as transmitters and receivers, antenna supporting structures, antennas, transmission lines from equipment to antenna, transmitter cooling systems, and control and amplification equipment. Does not include cable and long-line systems	10.5	13	15.5	
48.33	**TOCSC-Cable and Long-line Systems:** Includes assets such as transmission lines, pole lines, ocean cables, buried cable and conduit, repeaters, repeater stations, and other related assets. Does not include high frequency radio or microwave systems	21	26.5	32	
48.34	**TOCSC-Central Office Control Equipment:** Includes assets for general control, switching, and monitoring of communications signals including electromechanical switching and channeling apparatus, multiplexing equipment, patching and monitoring facilities, in-house cabling, teleprinter equipment, and associated site improvements	13	16.5	20	
48.35	**TOCSC-Computerized Switching, Channeling, and Associated Control Equipment:** Includes central office switching computers, interfacing computers, other associated specialized control equipment, and site improvements	8.5	10.5	12.5	
48.36	**TOCSC-Satellite Ground Segment Property:** Includes assets such as fixed earth station equipment, antennas, satellite communications equipment, and interface equipment used in satellite communications. Does not include general purpose equipment or equipment used in satellite space segment property	8	10	12	
48.37	**TOCSC-Satellite Space Segment Property:** Includes satellites and equipment used for telemetry, tracking, control, and monitoring when used in satellite communications	6.5	8	9.5	
48.38	**TOCSC-Equipment Installed on Customer's Premises:** Includes assets installed on customer's premises, such as computers, terminal equipment, power generation and distribution systems, private switching center, teleprinters, facsimile equipment, and other associated and related equipment	8	10	12	
48.39	**TOCSC-Support and Service Equipment:** Includes assets used to support but not engage in communications. Includes store, warehouse, and shop tools, and test and laboratory assets	11	13.5	16	
	Cable Television (CATV): Includes communications-related assets used to provide cable television (community antenna television services). Does not include assets used to provide subscribers with two-way communications services.				
48.41	**CATV-Headend:** Includes assets such as towers, antennas, preamplifiers, converters, modulation equipment, and program non-duplication systems. Does not include headend buildings and program origination assets	9	11	13	5
48.42	**CATV-Subscriber Connection and Distribution Systems:** Includes assets such as trunk and feeder cable, connecting hardware, amplifiers, power equipment, passive devices, directional taps, pedestals,				

Asset guideline class	Description of assets included	Asset depreciation range (in years)			Annual asset guideline repair allowance percentage
		Lower limit	Asset guideline period	Upper limit	
	pressure taps, drop cables, matching transformers, multiple set connector equipment, and converters	8	10	12	5
48.43	**CATV-Program Origination:** Includes assets such as cameras, film chains, video tape recorders, lighting, and remote location equipment excluding vehicles. Does not include buildings and their structural components	7	9	11	9
48.44	**CATV-Service and Test:** Includes assets such as oscilloscopes, field strength meters, spectrum analyzers, and cable testing equipment, but does not include vehicles	7	8.5	10	2.5
48.45	**CATV-Microwave Systems:** Includes assets such as towers, antennas, transmitting and receiving equipment, and broad band microwave assets if used in the provision of cable television services. Does not include assets used in the provision of common carrier services	7.5	9.5	11.5	2
	Electric, Gas, Water and Steam, Utility Services: Includes assets used in the production, transmission and distribution of electricity, gas, steam, or water for sale, including related land improvements.				
49.11	**Electric Utility Hydraulic Production Plant:** Includes assets used in the hydraulic power production of electricity for sale, including related land improvements, such as dams, flumes, canals, and waterways	40	50	60	1.5
49.12	**Electric Utility Nuclear Production Plant:** Includes assets used in the nuclear power production of electricity for sale and related land improvements. Does not include nuclear fuel assemblies	16	20	24	5
49.121	**Electric Utility Nuclear Fuel Assemblies:** Includes initial core and replacement core nuclear fuel assemblies (i.e. the composite of fabricated nuclear fuel and container) when used in a boiling water, pressurized water, or high temperature gas reactor used in the production of electricity. Does not include nuclear fuel assemblies used in breeder reactors	4	5	6	
49.13	**Electric Utility Steam Production Plant:** Includes assets used in the steam power production of electricity for sale, combustion turbines operated in a combined cycle with a conventional steam unit and related land improvements	22.5	28	33.5	5
49.14	**Electric Utility Transmission and Distribution Plant:** Includes assets used in the transmission and distribution of electricity for sale and related land improvements. Excludes initial clearing and grading land improvements as specified in Rev. Rul. 72-403, 1972-2 C.B. 102	24	30	36	4.5
49.15	**Electric Utility Combustion Turbine Production Plant:** Includes assets used in the production of electricity for sale by the use of such prime movers as jet engines, combustion turbines, diesel engines, gasoline engines, and other internal combustion engines, their associated power turbines and/or generators, and related land improvements. Does not include combustion turbines operated in a combined cycle with a conventional steam unit	16	20	24	4

Asset guideline class	Description of assets included	Asset depreciation range (in years) Lower limit	Asset guideline period	Upper limit	Annual asset guideline repair allowance percentage
49.21	**Gas Utility Distribution Facilities:** Including gas water heaters and gas conversion equipment installed by utility on customers' premises on a rental basis	28	35	42	2
49.221	**Gas Utility Manufactured Gas Production Plants:** Includes assets used in the manufacture of gas having chemical and/or physical properties which do not permit complete interchangeability with domestic natural gas	24	30	36	2
49.222	**Gas Utility Substitute Natural Gas (SNG) Production Plant (naptha or lighter hydrocarbon feedstocks):** Includes assets used in the catalytic conversion of feedstocks of naphtha or lighter hydrocarbons to a gaseous fuel which is completely interchangeable with domestic natural gas	11	14	17	4.5
49.23	**Natural Gas Production Plant**	11	14	17	4.5
49.24	**Gas Utility Trunk Pipelines and Related Storage Facilities:** Excludes initial clearing and grading land improvements as specified in Rev. Rul. 72-403	17.5	22	26.5	3
49.25	**Liquefied Natural Gas Plant:** Includes assets used in the liquefaction, storage, and regasification of natural gas including loading and unloading connections, instrumentation equipment and controls, pumps, vaporizers and odorizers, tanks, and related land improvements. Also includes pipeline interconnections with gas transmission lines and distribution systems and marine terminal facilities	17.5	22	26.5	4.5
49.3	**Water Utilities:** Includes assets used in the gathering, treatment, and commercial distribution of water	40	50	60	1.5
49.4	**Central Steam Utility Production and Distribution:** Includes assets used in the production and distribution of steam for sale	22.5	28	33.5	2.5
50.0	**Wholesale and Retail Trade:** Includes assets used in carrying out the activities of purchasing, assembling, storing, sorting, grading, and selling of goods at both the wholesale and retail level. Also includes assets used in such activities as the operation of restaurants, cafes, coin-operated dispensing machines, and in brokerage of scrap metal	8	10	12	6.5
50.1	**Wholesale and Retail Trade Service Assets:** Includes assets such as glassware, silverware (including kitchen utensils), crockery (usually china) and linens (generally napkins, tablecloths and towels) used in qualified activities as defined in class 50.0	2	2.5	3	
70.2	**Personal and Professional Services:** Includes assets used in the provision of personal services such as those offered by hotels and motels, laundry and dry cleaning establishments, beauty and barber shops, photographic studios and mortuaries. Includes assets used in the provision of professional services such as those offered by doctors, dentists, lawyers, accountants, architects, engineers, and veterinarians. Includes assets used in the provision of repair and maintenance services and those assets used in providing fire and burglary protection services. Includes equipment or facilities used by cemetery organizations, news agencies, teletype wire services, frozen food lockers, and research laboratories	8	10	12	6.5

Asset guideline class	Description of assets included	Asset depreciation range (in years) Lower limit	Asset guideline period	Upper limit	Annual asset guideline repair allowance percentage
70.21	**Personal and Professional Services Service Assets:** Includes assets such as glassware, silverware, crockery, and linens (generally sheets, pilowcases and bath towels) used in qualified activities as defined in class 70.2	2	2.5	3	
79.0	**Recreation:** Includes assets used in the provision of entertainment services on payment of a fee or admission charge, as in the operation of bowling alleys, billiard and pool establishments, theaters, concert halls, and miniature golf courses. Does not include amusement and theme parks and assets which consist primarily of specialized land improvements or structures, such as golf courses, sports stadia, race tracks, ski slopes, and buildings which house the assets used in entertainment services	8	10	12	6.5
80.0	**Theme and Amusement Parks:** Includes assets used in the provision of rides, attractions, and amusements in activities defined as theme and amusement parks, and includes appurtenances associated with a ride, attraction, amusement or theme setting within the park such as ticket booths, facades, shop interiors, and props, special purpose structures, and buildings other than warehouses, administration buildings, hotels, and motels. Includes all land improvements for or in support of park activities, (e.g. parking lots, sidewalks, waterways, bridges, fences, landscaping, etc.) and support functions (e.g. food and beverage retailing, souvenir vending and other nonlodging accommodations) if owned by the park and provided exclusively for the benefit of park patrons. Theme and amusement parks are defined as combinations of amusements, rides, and attractions which are permanently situated on park land and open to the public for the price of admission. This guideline class is a composite of all assets used in this industry except transportation equipment (general purpose trucks, cars, airplanes, etc., which are included in asset guideline classes with the prefix 00.2), assets used in the provision of administrative services (asset guideline classes with the prefix 00.1), and warehouses, administration buildings, hotels and motels	10	12.5	15	12.5

SEC. 4. EFFECT ON OTHER DOCUMENTS.

Rev. Procs. 72-10, 73-2, 73-3, 73-23, 73-24, 73-25, 73-26, 73-27, 73-28, 73-30, 74-27, 74-28, 74-29, 74-30, 74-31, 74-32, 74-37, 74-50, 76-16 76-17, 76-18, 76-27, 76-37, 77-2, 77-3 and 77-8 are superseded for property placed in service in taxable years ending on or after March 21, 1977, the date of publication of this Revenue Procedure in the Internal Revenue Bulletin, in accordance with section 1.167(a)-11(b)(4) of the regulations. However, the taxpayer may at his option apply Rev. Proc. 72-10, as previously modified by the aforementioned documents, without regard to this Revenue Procedure for such property placed in service in a taxable year beginning before March 21, 1977, and ending on or after that date. Such option shall be exercised in making the election to apply section 1.167(a)-11 for such year and may not be revoked after the latest time for making such election.

The asset guideline classes, asset guideline depreciation periods and ranges, and asset guideline repair allowance percentages set forth in this Revenue Procedure will from time to time be supplemented and revised as provided by section 1.167(a)-11(b)(4) of the regulations. Taxpayers using this Revenue Procedure should apply it as supplemented and revised.

News Release

Department of the Treasury
Internal Revenue Service
Washington, DC 20224
Tel. (202) 964-4021

For Release: 12/30/77

IR-1924

Washington, D.C.--The Internal Revenue Service today announced a new procedure that reclassifies assets used in the offshore pipeline transportation of petroleum and natural gas for taxpayers who elect the Class Life Asset Depreciation Range system.

Revenue Procedure 78-5 , which is attached, makes a reclassification of offshore pipeline transportation assets of producers and others that affects the depreciation period and repair allowance percentage of such assets. The class for assets used by producers in the exploration for and production of petroleum and natural gas deposits now includes the offshore pipeline transportation assets of producers and others.

The new procedure, which will appear in Internal Revenue Bulletin No. 1978-5 , dated January 30, 1978 supplements and modifies related material previously published in Revenue Procedure 77-10.

x x x

PART III. ADMINISTRATIVE, PROCEDURAL, AND MISCELLANEOUS

26 CFR 601.105: Examination of returns and claims for refund, credit, or abatement; determination of correct tax liability. (Also Part I, Section 167; 1.167(a)-11.)

REV. PROC. 78-5

SECTION 1. PURPOSE.

The purpose of this Revenue Procedure is to prescribe under section 1.167(a)-11 of the Income Tax Regulations a revised asset guideline class for assets used in the exploration for and production of petroleum and natural gas deposits to include assets used by petroleum and natural gas producers and others in the offshore pipeline transportation of oil and natural gas. These assets were formerly included in Class 46.0.

The revised asset guideline class, the associated asset guideline depreciation period and range, and annual asset guideline repair allowance percentage are set forth in Section 2 of this Revenue Procedure.

SEC. 2. ASSET GUIDELINE CLASS, ASSET GUIDELINE DEPRECIATION PERIOD AND RANGE, AND ANNUAL ASSET GUIDELINE REPAIR ALLOWANCE PERCENTAGE FOR ASSETS USED IN THE EXPLORATION FOR AND PRODUCTION OF PETROLEUM AND NATURAL GAS DEPOSITS.

The asset guideline class, asset guideline depreciation period and range, and the annual asset guideline repair allowance percentage are prescribed as set forth below.

(MORE)

Asset Guideline Class	Description of Assets Included	Asset Depreciation Range (in years) Lower Limit	Asset Guideline Period	Asset Depreciation Range (in years) Upper Limit	Annual Asset Guideline Repair Allowance Percentage
13.2	Exploration for and Production of Petroleum and Natural Gas Deposits: Includes assets used by petroleum and natural gas producers for drilling of wells and production of petroleum and natural gas, including gathering pipelines and related storage facilities. Also includes petroleum and natural gas offshore transportation facilities used by producers and others consisting of platforms (other than drilling platforms classified in Class 15.2), compression and pumping equipment, and gathering and transmission lines to the first onshore transshipment facility. The assets used in the first onshore transshipment facility are also included and consist of separation equipment (used for separation of natural gas, liquids, and solids), compression or pumping equipment (other than equipment classified in Class 49.23), and liquid holding or storage facilities (other than those classified in Class 49.25). Does not include support vessels	11	14	17	4.5

SEC. 3. EFFECT ON OTHER DOCUMENTS.

Rev. Proc. 77-10, 1977-1 C.B. 548 , is modified by the prescription of revised asset guideline class 13.2, Exploration for and Production of Petroleum and Natural Gas Deposits, with the associated asset guideline depreciation period and range and annual asset guideline repair allowance percentage as set forth in Section 2 of this Revenue Procedure. Class 13.2, as modified, now includes offshore transportation assets formerly included in Class 46.0.

SEC. 4 EFFECTIVE DATE.

The asset guideline class, asset guideline depreciation period and range, and the annual asset guideline repair allowance percentage for the activity class set forth in this Revenue Procedure are effective for property first placed in service in taxable years beginning after December 31, 1976.

Calculation Of Income Tax Rate

1. Marginal Federal tax rate. _____
2. Marginal State tax rate. _____
3. Marginal Local tax rate. _____

Calculation of Adjusted Local Tax.

(1 - State Tax Rate) x Local Tax Rate
= (1 - _____) x _____
= _____ x _____
= _____ = Adjusted Local Tax Rate.

Calculation of Adjusted State and Local Tax.

(1 - Federal Tax Rate) x (State Tax Rate + Adjusted Local Rate)
= (1 - _____) x (_____ + _____)
= _____ x _____
= _____ = Adjusted Local and State Tax.

Calculation of Tax Rate.

100 x (Federal Tax Rate + Adjusted Local and State Tax)
= 100 x (_____ + _____)
= 100 x _____
= _____ = Tax Rate.

Section III

USING THE COMPUTER PROGRAM

Gaining Access To The System

The computer program used to calculate the non-compliance penalty is written in the language FORTRAN. It is designed to operate on a time sharing computer. The method used to access, or load, the program on a particular computer system will vary slightly from that on any other system. The following description of the accessing procedure applies to EPA's Washington Computer Center. The procedure at other installations will be somewhat different.

1. Switch on the terminal. The on/off switch is usually located on the keyboard, but some models have switches on the top or back of the terminal.

2. Contact the computer system. This usually involves dialing the computer's number on a telephone and then connecting the telephone to a coupler. When a connect signal is obtained, push the Return key once more. The computer will then respond with an indication that contact is established.

3. Account and code number. At this time, the computer will ask for a user number, a password and an account number. This number is specific to the computer system and must be known beforehand. These are entered by typing on the keyboard and pressing the "return" key.

4. Running the program. The command
EXEC PENALTY:EPABOH,GREGION=200K
will start the program.

Additional questions will follow each data input (and "return"). Caution: When user demand is high, response time can be very slow. Be certain the computer has given you your complete prompt before answering input questions. A prompt is generally a two digit alpha-nureric job identifier and a question mark (e.g., 2B?)

Exhibit III - 1 illustrates the procedure used to access the computer.

ENTERING THE DATA

It is important in using a computer to understand that the computer requires a specific form of data entry. For example, if the item in question has the value of ten percent and the computer program is designed to accept a figure expressed in percentage terms, only the entry 10 is acceptable. Entries such as 10%, TEN, and .10 are all incorrect. The first two will result in an error message being typed at the terminal, followed by a command to re-enter the data. The third entry will be interpreted by the computer as 0.10 percent and used in the computation as that value. The result will be an incorrect figure for that penalty. If a wrong number is entered and the Return key has not been pushed, the mistake can be corrected by detecting the error and re-entering the number. To delete a number before the Return key is pushed, simply backspace the typing element (by pushing the Control and H keys simultaneously). If during data entry a wrong number is entered and the Return key is pushed, operation of the program can be halted by pushing the Break key. The computer will respond by printing OPTION?. To stop the program, type CANCEL. However, in most cases it will be more convenient to continue entering data, allow the computations to be made, and then change the erroneous value.

The following paragraphs discuss general rules to be followed in entering data into the computer program. Exhibit III - 2 contains an example of the completed entry for the Fertilizer Company. Figures which are underlined have been entered by the program user. After each line is entered the carriage return should be pressed. It should also be noted that each question asked by the computer must be answered. Thus, for example, if a firm has no debt and the interest rate is inapplicable, a zero must be entered for the interest rate. Certain questions asked by the computer refer to special types of analysis such as post-compliance settlements, limited life facilities and industrial development bonds. These special cases are discussed in a later chapter.

34574 Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules

- Post-Compliance Settlement. This number is entered only as a 0 or 1. For the Fertilizer Company this is an initial calculation and a 0 is entered.

- Limited Life Facility. This number is entered as 0 or 1. For the Fertilizer Company this is not a limited life facility and a 0 is entered.

- Percent Financed by Industrial Development Bonds. This is entered as a percent. For the Fertilizer Company, a 0 is entered.

- Number of Months out of Compliance. This number is entered only as an integer. Fractions or decimals are not allowed. For the Fertilizer Company, compliance will be achieved in eleven months. This is entered as 11.

- Schedule of Capital Investments and Pre-Compliance Operating and Maintenance Expense. The program will ask for an estimate of such expenditures for each month which the firm will be out of compliance. If the firm will not make a pre-compliance capital expenditure in a particular month, a zero is entered. If no pre-compliance expenditures are to be made, the entire capital expenditure is entered in the last month.

For the Fertilizer Company, capital expenditures of $166,666.67 will be made in the second, fourth, and eleventh months. All other months will be entered as 0.

After entering the capital expenditure in each month, the user types a comma and then enters the operating and maintenance expense in each month. These are expenses to be incurred during the period of noncompliance on a month-by-month basis. If in any month a pre-compliance operating and maintenance expense is not incurred, a zero must be entered.

For the Fertilizer Company, pre-compliance operating and maintenance expenses will not be incurred in the first eight months. In the ninth month, the estimated expense is $100. In the tenth month it is $1,050. In the eleventh month it is $740. These are entered without dollar signs.

- Initial Annual O&M Expense. The initial annual operating and maintenance expense is the expense which would be incurred if the equipment were installed and operating. The program is designed to reject monthly pre-compliance expenditures larger than one-twelfth of the annual operating and maintenance expense. For the Fertilizer Company, operating and maintenance expenses are $15,000.

- Investment Tax Rate. This is entered as a percent and not as a decimal. Thus, for example, 7.5 percent would be entered as 7.5. The program is designed to test for data entered as a decimal and print an error message. In the Fertilizer Company example, the investment tax rate was 10 percent.

- Income Tax Rate. This is also entered as a percent. For the Fertilizer Company the tax rate is 49.73 percent.

- Inflation Rate. The inflation rate is entered as 8.3 percent.

- Discount Rate. This is entered as a percent. The lower bound for any discount rate used is the rate of inflation. The program will not accept discount rates lower than the rate of inflation and will print an error message.

  For the Fertilizer Company, the discount rate is the twenty quarter average after tax return on equity for the chemicals and allied products industry. This is calculated to be 15.84 percent.

- Interest Rate. The interest rate is entered as a percent. For the Fertilizer Company this is the average return on "A" rated industrial bonds. The latest reported average is 8.76 percent.

- Preferred Dividend Rates. This is entered as a percent. If the firm does not have preferred stock, both the dividend rate and the preferred share of the investment are entered as zero. For the Fertilizer Company this was the latest monthly average yield on "a" rated utility preferred stocks. It is entered as 8.88 percent.

- Preferred Share of Investment. The preferred share of the investment is entered as a percent. For the Fertilizer Company this was computed at 3.5 percent.

- Equity Share of Investment. This is entered as a percent. It was computed to be 67.5 percent for the Fertilizer Company. If the sum of the preferred share of the investment and the equity share of the investment is greater than 100 percent, an error message is printed.

- Depreciation Life in Years. This number must be entered as an integer. Decimals or fractions cannot be used. For the Fertilizer Company the depreciation life was nine years.

- Useful Life in Years. The useful life in years must also be entered as an integer. For the Fertilizer Company, the useful life is eleven years.

Exhibit III-3

Error Messages For Data Entry

The program for computing the noncompliance penalty was designed to test for errors in the data as it is entered into the computer. If the program detects an error, a message is printed informing the user and requesting that the mistake be corrected. Examples of such error messages follow.

1. Pre-Compliance Expenditure. As discussed in Section II, it is not possible to enter a pre-compliance monthly operating and maintenance expenditure which is larger than one-twelfth of the annual operating and maintenance expense. Exhibit III-3 shows an annual operating and maintenance expense of $15,000. The error message is printed because the user entered $2,000 for a pre-compliance expenditure.

Exhibit III-3

ERROR IN ENTERING PRE-COMPLIANCE O&M EXPENDITURES

```
 2 INITIAL ANNUAL O+M EXPENSE?5000

INVESTMENT TAX RATE?10
```

34578 Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules

4. Inflation Rate Higher Than Discount Rate. The program will print an error message if the inflation rate is higher than the discount rate. For this type of error the program allows the user to continue to enter data. At the end of data entry an error message is printed and the user can change either the inflation rate or the discount rate. This is illustrated in Exhibit III-6 where the discount rate of 15.84 percent was erroneously entered as 5.84 percent.

Output From The Program

The output from the computer program will also require several responses from the user. In general, the output is structured in the following way.

- The amortization and depreciation method used in calculating the penalty is printed. For example, for the Fertilizer Company, rapid amortization and straight line depreciation are used.
- The program asks the user how many months will elapse between the first day of violation and the date of the first penalty payment.
- The program prints the quarterly penalty payments the firm must make during the period of noncompliance.
- The option to compute a lump sum settlement is offered. The user can specify the date for that payment.
- The program asks if changes to the input data are desired.

An example of the output for the Fertilizer Company appears in Exhibit III-7. Once again, the presence of underlining indicates data entered by the user.

Exhibit III-7

                                       ********
```

The output printed in Exhibit III-6 illustrates only a few of the possible variations in penalty calculation possible with the computer program. The remainder of this section discusses in detail the output from the Fertilizer Company example and the program options available to alter that output.

1. Amortization and Depreciation Method. The computer program calculates the capital investment portion of the penalty using standard and rapid amortization. Under both types of amortization the program calculates the depreciation tax savings using straight line, sum-of-the-years-digits and double-declining balance depreciation methods. The formulae for these calculations are contained in the Technical Support Document. The program automatically chooses the method which will result in the lowest penalty. This method is then used to calculate the penalty shown.

2. Delay in the Penalty. The program asks the user how many months the first penalty payment will be delayed. The months of delay are calculated from the day a notice of noncompliance is issued until the first payment is made. Exhibit III-7 illustrated the payment made if the firm paid the first quarterly penalty on

34530 Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules

the day that the notice of noncompliance was issued. The first

the day that the notice of noncompliance was issued. The first quarterly payment was 5214.65. The second payment would be made ninety days later and it would equal the penalty shown for the number four (5319.64).

A more realistic example might involve a six-month delay in the first payment. In this case, the output would appear as in Exhibit III-8. The first penalty payment includes the amounts that should have been paid at the first, fourth and seventh months, discounted forward to the time of actual payment. Such discounting is required to keep the present value of all penalties paid equal to the present value of savings from non-compliance. The next quarterly penalty payment is due three months later, putting the firm back on the original penalty schedule. The present value of the payments in Exhibit III-8 is equal to the present value of the penalty payments in Exhibit III-7.

Exhibit III-8

SIX-MONTH DELAY IN PAYMENT OF PENALTY

```
    HOW MANY MONTHS AFTER THE FIRST DAY OF
    NONCOMPLIANCE WILL THE INITIAL PENALTY
    PAYMENT BE MADE?
?A? 6

          MONTH          PAYMENT
            7           16558.85
           10            5536.91
```

3. Lump Sum Settlement. A lump sum settlement is sometimes made instead of quarterly payments. For example, if the firm was going to be out of compliance for four quarters, it could either pay the four quarterly payments shown in the output or pay the lump sum settlement. In terms of present value, the amount eventually paid is the same in each case.

If the firm wishes to pay a lump sum settlement but will delay payment, the number of months of delay must be entered. Exhibit III-9 illustrates a seven month delay for the Fertilizer Company.

Exhibit III-9

SEVEN MONTH DELAY IN PAYMENT OF LUMP SUM SETTLEMENT

```
    DO YOU WISH TO SEE A LUMP SUM
    SETTLEMENT? 1=YES,2=NO:
?A? 1
    HOW MANY MONTHS AFTER THE FIRST DAY OF
    NONCOMPLIANCE WILL THE LUMP SUM
    SETTLEMENT BE MADE?
?A? 7
    THE VALUE OF THE NONCOMPLIANCE PENALTY
    COMPUTED AS OF    7 MONTHS AFTER THE DATE
    OF NONCOMPLIANCE IS                22164.17
```

Thus, for the Fertilizer Company, delaying the lump sum settlement seven months increased the settlement to 22,164.17 from the 20,342.32 shown in Exhibit III-7. The 1,821.85 difference between the lump sum settlement delayed seven months and the settlement paid on the date of noncompliance is the result of discounting the initial lump sum settlement forward to the time of actual payment.

Only a single payment is required if the first penalty payment is delayed longer than the firm is out of compliance. In this event, the firm will not make quarterly payments but will make one lump sum settlement. Exhibit III-10 shows the output from the program if a twelve-month delay in penalty payment occurs. The Fertilizer Company was out of compliance eleven months.

5. New Computation. The user has several options here. By typing in 0 (zero) and pushing the carriage return, the program can be terminated. Typing 999 will result in all of the data that is currently in the program being printed; the program will then once again ask if any changes are to be made. An example of typing 999 is shown in Exhibit III-11.

PREFERRED SHARE OF INVESTMENT = 3.5
EQUITY SHARE OF INVESTMENT= 67.5
DEPRECIATION LIFE IN YEARS = 9
USEFUL LIFE IN YEARS = 11
```

If changes are desired in the input, the following steps must be taken.

- The number of changes desired must be entered.
- For each change, the computer will respond with a question mark. When the question mark is printed, type in the number of the item that you wish to change. (For example, 4 for the marginal income tax rate).
- The computer will print the name of the item. Enter the new data desired and push the carriage return.

The following is an example using the Fertilizer Company. Suppose that the interest rate, which has been entered as 8.76 percent, should be 9.76 percent and that the preferred share of the investment, which was entered as 3.5 percent, should be 10 percent.[1] Two changes are thus necessary.

[1] The equity share will remain at 67.5 percent. The program sums the equity and preferred shares and calculates automatically the debt share. Thus, the increase in preferred share from 3.5 to 10 percent while the equity share is held constant, will result in a decrease in debt share.

Exhibit III-11

When the return key is pressed after entering the 10, the computation will be made using these new values. It should be noted that these new values permanently replace the previous values in the program.

BILLING CODE 1505-01-C

SECTION IV

CALCULATION OF THE POST-COMPLIANCE SETTLEMENT

The post-compliance settlement adjusts the penalty payment to reflect the firm's actual capital and operating expenditures rather than the estimates used in the original penalty calculation. For this purpose, six types of data are needed:

- A schedule of actual capital expenditures made by the firm in reaching compliance.
- A schedule of actual operating and maintenance expenditures made by the firm prior to compliance.
- A new estimate of post-compliance annual operating and maintenance expense based on the firm's experience prior to the post-compliance settlement.
- The number of months between the day of compliance and date of post-compliance settlement.
- A post-compliance settlement interest rate chosen by the Department of the Treasury.
- A listing of the actual penalty payments made by the firm and the months in which they were made.

In addition to these new data, it will be necessary to have available the financial parameters originally used to calculate the noncompliance penalty for the firm. To continue the example of the hypothetical Fertilizer Company, Exhibit IV-1 contains the data originally used to calculate the noncompliance penalty.

Exhibit IV-1

EQUITY SHARE OF INVESTMENT= 67.5
DEPRECIATION LIFE IN YEARS = 9
USEFUL LIFE IN YEARS = 11

[1]Listed during original penalty calculation by typing 999 when changes in input data were requested.

Preparing New Data For Entry Into The Program

In order to calculate the post-compliance settlement, the computer program should be accessed in the manner described on pages III-1 to III-3. After the RUN command has been typed, the terminal will ask if the penalty calculation is for a post-compliance settlement. This is illustrated in Exhibit IV-2.

Exhibit IV-2

CALCULATING A POST-COMPLIANCE SETTLEMENT

03/28/79 EPA NON-COMPLIANCE PENALTY PROGRAM VERSION 1.0 16:19

IS THIS A POST-COMPLIANCE SETTLEMENT CALCULATION (1=YES,0=NO)?1

The computer program will then ask for data on the actual penalty payments made by the firm and the month in which each payment was made. The data are entered in the following order.

1. Number of penalty payments made by the firm. This is the actual number of payments made by the firm. If more than one payment is made in a month, they should be totalled and counted as one payment.

2. Month of the penalty payment. This is the number of the month in which the penalty payment is received by EPA, beginning with the month the firm is out of compliance. For example, a firm making a payment at the time notice of noncompliance is issued would enter a one. If a six-month delay in payment occurred, a seven would be entered.

3. Actual penalty payment. This is the dollar amount of the penalty actually received from the firm in each month. The payment entered should not include the 20 percent penalty for late payment. The data entered in the Fertilizer Company example is shown in Exhibit IV-3. As can be seen in the exhibit, these payments are identical to the penalties calculated in the last section and shown in Exhibit III-7.

```

The terminal now asks for data on the Treasury interest rate, months out of compliance, limited life facilities, and financing with industrial development bonds. These data are entered in the following order.

1. Treasury interest rate. This is an annual interest rate set by the Secretary of the Treasury for the post-compliance settlement. It is entered as a percent. For the Fertilizer Company, the rate was chosen as 15.84 percent, which is the firm's return on equity.

2. Months out of compliance. This is the actual number of months the firm was out of compliance beginning on the date notice of noncompliance was issued and continuing until the firm demonstrates compliance was achieved.

3. Limited life facility. The limited life facility requires a slightly different method of calculation for the post-compliance settlement. This method is discussed in detail in the next section. For the Fertilizer Company, a zero is entered.

4. Industrial Development Bonds. This is an option explained in detail in the next section. For the Fertilizer Company, industrial development bonds were not sold. A zero is entered at the terminal. All four of the above data entries are shown in Exhibit IV-4.

```

The computer program now requests data on the actual expenditures the firm made in order to reach compliance. These new data are entered in the following order.

1. Schedule of Actual Capital Expenditures. These are the payments the firm made, or capital costs the firm incurred, in each month during the period of noncompliance. They are entered in actual dollars as of the period the expenditure was made. No adjustment for inflation during the period of noncompliance should be made, since the program will automatically convert the actual dollars to real dollars as of the first day of noncompliance.

The sources for data on the actual monthly expenditures for noncompliance include cancelled checks to manufacturers and shippers, accounting entries in the firm's fixed asset accounts, or manufacturers invoices. The Fertilizer Company submitted the data in Exhibit IV-5 to show capital expenditures made during the period of noncompliance.

2. Schedule of Actual Operating and Maintenance Expense. This schedule indicates the actual pre-compliance expenditures made by the firm in each month. This data will be calculated by the firm from accounting information and will include labor, utilities, supplies, property taxes and the value of any by-

Exhibit IV 5

FERTILIZER COMPANY
CALCULATION OF ACTUAL CAPITAL EXPENDITURE

1.	List price or estimated price of the equipment =	$536,588.92
2.	Less: Discount from manufacturer	(10,731.78)
3.	Equals net price of equipment =	525,857.14
4.	Plus: Sales tax on equipment[1] =	26,292.86
5.	Plus: Freight and delivery charge =	0
6.	Equals estimated cost of equipment delivered	$552,150.00
7.	Plus: Installation charge =	0
8.	Plus: Value of lost production =	0
9.	Plus: Cost of building construction or modifications =	0
10.	Equals Total Capital Expenditure =	$552,150.00

The capital expenditures were made in three equal amounts of $184,050.00 starting in the month South of pre-compliance.

[1] Sales tax in this case was not deductible from income in the year of purchase

products. The Fertilizer Company submitted the data in Exhibit IV-6 for pre-compliance expenditures. These values are adjusted for inflation by the program.

The program is designed to print an error message if any monthly precompliance operating and maintenance expenditure is larger than one-twelfth of the new post-compliance operating and maintenance cost.[1] When this occurs, it is likely that equipment start up costs which should have been included in capital expenditures have been incorrectly charged to precompliance operating and maintenance expense. In such a case, precompliance capital expenditures and operating and maintenance expenses should be adjusted accordingly.

3. Estimate of Annual Operating and Maintenance Expenditures. Because the post-compliance settlement will occur before the new equipment has operated for a full year, it will be necessary to estimate post-compliance annual operating and maintenance expenses based on the firm's experience from compliance to the time of the post-compliance settlement. Those estimates should be in the actual dollars as of compliance. Thus, for the

[1] Precompliance operating and maintenance expenditures are used to adjust the operating and maintenance component of the penalty. Quarterly precompliance expenditures larger than one twelfth of the annual would result in negative penalties.

Exhibit IV-6

ACTUAL MONTHLY PRE COMPLIANCE OPERATING AND MAINTENANCE EXPENSE
FERTILIZER COMPANY
August 1, 1980

Pre-compliance Operating Expense

Months 1-9		$ 0
Month 10		
Labor (84 hrs @ $10)	$840.00	
Power (1200 Kwh @ .0333 Kwh)	39.96	
Total		$ 879.96
Month 11		
Labor (110 hrs @ $10)	$1100.00	
Power (6719 Kwh @ .0333 Kwh)	226.40	
Total		$1,326.40

Fertilizer Company, which will come into compliance in 1980, the estimate for post-compliance annual operating and maintenance expenses should be in 1980 dollars. The program will automatically deflate this number to real terms as of the date of noncompliance. The Fertilizer Company submitted the data in Exhibit IV-7 as an estimate of post-compliance annual operating and maintenance expenditures.

Entry of the actual expenditures by the Fertilizer Company is shown in Exhibit IV-8. In addition, the data used to calculate the original penalty, such as the investment tax rate, income tax rate, etc., are entered in exactly the same manner as entered for the original penalty calculation. This is also shown in Exhibit IV-8. Note that the entry for all data after the annual operating and maintenance expense is identical to Exhibit II, the initial penalty calculation.

Output From The Post-Compliance Settlement Calculation

The output from the post compliance settlement calculation incorporates the data on penalty payments made by the firm and compares these payments to a penalty schedule based on actual expenditures made to achieve compliance. The output consists of two parts

- Printing of the penalty paid in each month and the penalty determined from actual expenditures. The difference between the actual penalty and the payment made by the firm is calculated in each month.

- The program allows the option of delaying the post-compliance settlement

The output from the post compliance settlement for the Fertilizer Company is shown in Exhibit IV 10. The first column prints the month in which a penalty payment was made or a penalty payment was required based on the post compliance penalty calculation. The second column contains the actual payment made by the firm. The third column is the penalty based on actual expenditures made coming into compliance.

The program next calculates the difference between the penalty payment in each month and the new penalty calculation based on actual expenditures. The difference between the payment made and the actual penalty is than charged interest at the rate specified by the Treasury for the number of months after payment that the firm remained out of compliance.

Exhibit IV-10

THE POST-COMPLIANCE SETTLEMENT

STRAIGHT LINE, RAPID AMORTIZATION

MONTH	PAID	PENALTY	DUE EPA	DUE FIRM
1	5214.65	8252.33	3037.68	0.0
4	5319.64	8418.44	3098.84	0.0
7	5426.75	8587.97	3161.22	0.0
10	5536.01	8760.88	3224.87	0.0

MONTHS FROM COMPLIANCE UNTIL SETTLEMENT= ?2

SETTLEMENT DUE EPA= 13896.23

The post-compliance settlement was calculated and paid two months after the Fertilizer Company came into compliance. For this reason, a 2 was entered when the program asked for the number of months between compliance and payment of the post-compliance settlement. Thus, the total post-compliance settlement paid by the firm to EPA is 13,896.23.

SPECIAL CONDITIONS

The preceding four sections enable the user to calculate the noncompliance penalty and post-compliance settlement when the source is privately owned and when compliance is achieved by modification of existing plant and equipment. In addition, it is assumed that financing would not involve industrial development bonds. Section V will expand the number of cases in which the penalty program is applicable and enable the user to compute the noncompliance penalty in the following situations.

- Plant and equipment necessary for compliance are financed through the sale of tax-exempt industrial development bonds.
- The source is operated by a local, state or federal government.
- The source has a limited useful life.

The noncompliance penalty in all three cases is calculated using the program PENALTY. However, it is necessary to modify some of the data entered into the program to reflect the unique characteristics of each of these situations. The following section describes special data requirements and modifications in data entry. It should be stressed that all data and data entry procedures discussed in the four previous sections are applicable to these special conditions except where specific changes are required.

INDUSTRIAL DEVELOPMENT BONDS

Industrial development bonds for pollution control equipment are used by firms in order to secure debt financing at an interest cost lower than the current rate on industrial bonds. This lower interest rate is possible because the development bonds are issued by a local or state government for the corporation and the interest payments received by the bond holder are exempt from federal income tax. The corporation pays the principal and interest payments, but because of the tax-exempt status of the interest, the interest charges are often several percentage points below corporate debt of similar quality.

The Revenue Act of 1978 requires that firms financing with industrial development bonds receive only one-half of the investment tax credit when rapid amortization is used. For firms financing in part with development bonds, a pro-rata portion of this financing should be applied to the facility for determining the investment tax

credit. The computer program will automatically pro-rate the investment tax credit. The user must provide two types of data.

- The percentage of the investment financed by industrial development bonds.
- Interest rate on development bonds.

Data are gathered for the calculation of the penalty in the same manner as described in Section II. In addition, the user must perform the following calculations.

1. Percent financed with industrial development bonds. This percentage is obtained by dividing the total issue of tax-exempt pollution control industrial development bonds by the capital investment.[1] In the Fertilizer Company example, the estimated capital investment was $500,000. If the firm sold $200,000 in industrial development bonds, the percentage entered would be forty. This would be entered as 40.

2. Interest rate on industrial development bonds. The interest rate used for pollution control industrial development bonds is published by Smith, Barney, Harris Upham & Co. in the Bond Markets Review. The review is published weekly and the current yield on bonds is printed on the last page.

[1] The firm may issue bonds in a volume much higher than the capital investment. In this case financing is entered as 100 percent. The program will not accept data higher than 100 percent.

For the Fertilizer Company example, the latest reported yield on pollution control industrial development bonds is 6.85 percent. This yield is entered as the interest rate in the penalty program.

There are thus only two changes in the data entered for industrial development bonds as opposed to the example described in Section III. A percentage of the project financed with tax-exempt bonds is entered, and the interest rate used is for pollution control industrial development bonds. All other data entry remains the same.

GOVERNMENT-OWNED FACILITIES

The use of the noncompliance penalty program for government facilities requires that all cash flows related to taxes be eliminated. In addition, no debt financing is considered and the discount rate is entered at ten percent. Exhibit V-1 shows the data entry procedure for non-complying sources owned by governments. Data labelled "no change" are calculated using the methods described in Section II.

34502 Federal Register / Vol. 44, No. 117 / Friday, June 15, 1979 / Proposed Rules

Equity Share of Investment	100.0
Depreciation Life in Years	No Change
Useful Life in Years	No Change

Facilities with Limited Useful Lives

The noncompliance penalty computer program will calculate penalties for facilities with limited useful lives. In cases where a noncomplying facility is to be operated for a period of time and then retired, the current program may be used. Capital and operating and maintenance cost estimates are made based on what it would cost to bring the source into compliance and the calculation proceeds in the normal manner. In such cases there are no precompliance operating and maintenance expenditures and the total capital expenditure is entered in the last month. There is no post-compliance settlement.

In cases where the noncomplying source is to be replaced by a new, complying facility after some period of noncompliance, program inputs and operation will be slightly different than at present. In such cases, the program will

- ask if the calculation is for a limited life facility that is being replaced,
- request an estimate of the capital and annual operating expenses required to bring the old source into compliance,
- request a schedule of precompliance total capital expenditures (for productive capability plus pollution control equipment) required to build the new source,

- request a schedule of precompliance O&M expenditures (for productive capability and pollution control equipment) associated with the new source, and
- request an estimate of annual production costs including pollution control operating and maintenance expenses at the new source.

The program will then calculate the penalty based on the costs of compliance at the old source but will be adjusted for precompliance expenditures on the new source. Once the new source is in operation and the old source is retired (and, thus, full compliance is achieved), a postcompliance settlement can be made. Such a settlement will consider only changes in the precompliance expenditures associated with the new source relative to the estimates made when the initial penalty calculation was carried out.

BILLING CODE 6560-01-C

[40 CFR Part 52]

[FRL 1

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Pennsylvania has submitted a plan to attain the National Ambient Air Quality Standards for Total Suspended Particulates, Carbon Monoxide, Photochemical Oxidants, Sulfur Dioxide, and Nitrogen Dioxide in unclassified areas of the Commonwealth of Pennsylvania. This plan was submitted to the Administrator of EPA by the Pennsylvania Department of Environmental Protection (PADER) to satisfy the requirements of Part D of the Clean Air Act as amended in 1977. In addition, PADER has submitted a request for an extension under section 172(a) of the Act.

EPA is proposing to approve the plan's designation of areas, emission inventory, Pennsylvania's request for an extension, and is to approve in part and disapprove in part the proposed control strategy.

DATE: Comments on this proposed rule and on the proposed public hearing must be received on or before July 16, 1979.

ADDRESSES: Comments may be submitted to Thomas C. Voltaggio, Chief, Air Programs Branch, Region III, Environmental Protection Agency, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106.

Copies of the plan are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106.

Pennsylvania Department of Environmental Resources, Bureau of Air Quality Control, Fulton Building, 3rd and Locust Streets, Harrisburg, Pennsylvania 17120.

Public Information Reference Unit, EPA, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Thomas C. Voltaggio, Chief, Air Programs Branch, Environmental Protection Agency, Region III, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, 215/597-9370.

SUPPLEMENTARY INFORMATION:

Background

Section 110(a)(2)(I) of the Act requires that each State submit to the Administrator of EPA a plan which provides for implementation, maintenance, and enforcement of the primary and secondary national ambient air quality standards in each air quality control region (or portion thereof) within such State. Section 172(a) of the Act requires that each plan submitted to satisfy the requirements of Part D of the Act shall provide for the attainment of each national primary ambient air quality standard as expeditiously as practicable but no later than three years from the date of approval of the plan. The Administrator may extend the three-year period for no more than two years for any air quality control region if he finds that such region has complied with all requirements and commitments pertaining to it in the applicable implementation plan and that it is impossible to attain the standard within the three-year period.

[40 CFR Part 81]

Commonwealth of Pennsylvania; Section 107 Attainment Status Designations

[FRL 1248-2]

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Commonwealth of Pennsylvania has revised its air quality attainment designation for the Monongahela Air Basin, with respect to sulfur dioxide, from nonattainment to unclassifiable. On December 29, 1978, Pennsylvania submitted this revision to the Administrator of the Environmental Protection Agency, along with supporting information for promulgation under Section 107(d).

EPA proposes to promulgate this designation change submitted by Pennsylvania. The purpose of this notice is to solicit public comments on this proposed action.

DATE: Comments on this proposed designation change should be submitted on or before July 16, 1979.

ADDRESSES: Copies of the associated support material are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, PA 19106.

Pennsylvania Department of Environmental Resources, Bureau of Air Quality and Noise Control, 200 North Third Street, Fulton Building, 10th floor, Harrisburg, PA 17120.

Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

All comments should be addressed to:

Mr. Howard R. Heim, Jr., Chief (3AH10), Air Program Branch, U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Curtis Building, 10th floor, Philadelphia, PA 19106, Attn: 107PA-1.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold A. Frankford (3AH12), U.S. Environmental Protection Agency, Region III, Curtis Building, 10th floor, 6th & Walnut Streets, Philadelphia, PA 19106, (Phone) 215/597-8392.

SUPPLEMENTARY INFORMATION:

Background

Section 107(d) of the Clean Air Act requires the States to submit to the Administrator a list identifying all air quality control areas, or portions thereof, that have not attained the National Ambient Air Quality Standards. The Act further requires that the Administrator promulgate this list, with such modifications as he deems necessary, as required by Section 107(d)(2) of the Act. On March 3, 1978, the Administator promulgated nonattainment designations for Pennsylvania for total suspended particulates (TSP), sulfur dioxide (SO_2), carbon monoxide (CO), ozone (O_3) and oxides of nitrogen (NO_x) (43 FR 8962). These designations were effective immediately and public comment was solicited. On September 12, 1978, in response to the comments received, the Administrator revised and amended certain of the original designations (43 FR 40502). The Act also provides that a State, from time to time, may review and revise its designations list and submit these revisions to the Administrator for promulgation (Section 107(d)(5) of the Act). The criteria and policy guidelines governing these revisions and the Administrator's review of them are the same that were used in the original designations and which are summarized in the Federal Register on March 3, 1978 (43 FR 8962), September 11, 1978 (43 FR 40412) and September 12, 1978 (43 FR 40502). Pennsylvania has revised its original designations list and on December 29, 1978, submitted these revisions to EPA.

In support of this redesignation request for the Monogahela Valley Air Basin with respect to sulfur dioxide, the Commonwealth of Pennsylvania provided air quality data showing that no violations of either the primary or secondary SO_2 standards occurred during calendar year 1978. The State also indicated that attainment of standards is supported by emission reductions in the area over the past year. In addition, results of an ongoing modeling study indicate no violations of the primary annual SO_2 standard for the base year (1978) and for the situation assuming all sources in compliance with the existing SIP limitations. Until the modeling study is complete and additional air quality data are available, the State has chosen to designate the Monongahela Valley Air Basin as "cannot be classified." In view of the fact that SO_2 emission reductions have occurred, that current air quality meets primary and secondary SO_2 standards, and that modeling of all sources in compliance with the existing SIP does not show violations of the SO_2 standards, it is EPA's proposed determination that a revision to the existing SIP by July 1, 1979, is not necessary.

Request for Public Comment

In view of the rapidly approaching (July 1, 1979) date by which the Administrator must make final determinations on nonattainment SIP's and in view of the fact that the issues pertaining to this proposed redesignation are straightforward and well defined, the Regional Administrator feels justified to limit the public comment period to 30 days. All comments received on or before July 16, 1979 will be considered. The Regional Administrator will consider extending the comment period if a prospective commenter provides adequate justification for such extensions.

All comments should be addressed to:

Mr. Howard R. Heim, Jr., Chief (3AH10), Air Program Branch, U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Curtis Building, 10th Floor, Philadelphia, PA 19106, Attn: 107PA-1.

(Secs. 107(d), 171(2), 301(a), Clean Air Act, as amended (42 U.S.C. 7407(d), 7501(2), 7601(a)))

Dated: May 30, 1979.

Jack J. Schramm,
Regional Administrator.

BILLING CODE 6560-01-M

[40 CFR Part 86]

[FRL 1249-2]

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines; Gaseous Emission Regulations for 1983 and Later Model Year Heavy-Duty Engines

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Additional Information Relating to Proposed Rule, Notice of Public Hearing, and Notice of Extension to Comment Period.

SUMMARY: In proposed regulations for 1983 and later model year heavy-duty engines published on February 13, 1979 (44 FR 9464), approximate numerical values were given for the proposed standards for hydrocarbons and carbon monoxide because EPA had not completed its baseline testing. EPA has completed that testing, and exact numerical values derived from the testing are contained in this notice. EPA

has also completed sufficient testing of 1979 engines to provide a numerical value for the proposed 1983 oxides of nitrogen standard.

A public hearing has been scheduled for the submission of testimony relating to (1) the proposed standards contained in today's notice, and (2) the supporting material which has been placed in the public docket. Additionally, both the closing date for the record of the May 14–15, 1979 public hearing (44 FR 22131), and the closing date for the comment period which was specified as June 13, 1979 in the February 13, 1979 proposal, have been extended to June 29, 1979.

DATES: The hearing will be convened at 8:30 A.M., July 16, 1979 and reconvened at 8:30 A.M., July 17, 1979. Sessions will be adjourned at 5:00 P.M. each day, or at a later time if necessary to complete the business of the hearing.

LOCATION: All sessions of the hearing will be held at the West Bank Holiday Inn, 2900 Jackson Road, Ann Arbor, Michigan 48103.

PUBLIC COMMENT: The record of the July 16–17, 1979 hearing will be left open for 30 days following the close of the hearing to allow submission of rebuttal and supplementary information. Relevant comments received by close of day August 16, 1979 will be considered. The scope of materials which may be submitted at the hearing or during the ensuing 30 day comment period is limited to those aspects of the February 13, 1979 proposal directly affected by the supplementary information contained n today's notice and the supportive material which has been placed in the public docket.

FOR FURTHER INFORMATION CONTACT: Mr. Chester J. France, Emission Control Technology Division, Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105, Phone: (313) 668–4338.

SUPPLEMENTARY INFORMATION: Section 202(a)(3)(A)(ii) of the Clean Air Act, as amended (the Act), provides that "regulations applicable to emissions from [heavy-duty] vehicles or engines manufactured during and after model year 1983, in the case of hydrocarbons and carbon monoxide, shall contain standards which require a reduction of at least 90 per cent * * * from the average of the actually measured emissions from heavy-duty gasoline-fueled vehicles or engines, or any class or category thereof, manufactured during [1969]."

EPA implemented a 1969 model year baseline test program in order to generate the data needed to define standards representing the 90% reduction. At the time of the February 13, 1979 proposal, this test program had not been completed. However, based on the data then available, approximate standards representing the required 90% reductions in hydrocarbon (HC) and carbon monoxide (CO) emissions were included in the proposal as follows: 1.4 grams per brake horsepower-hour (g/BHP-hr) for HC, 14.7 g/BHP-hr for CO, 1400 parts per million of carbon (ppm C) for idle HC, and .55 percent for idle CO. EPA also included "lower limits" for the above standards, and stated that standards more stringent than the lower limits would not be promulgated without reproposing. The lower limits specified in the proposal were .76 g/BHP-hr for HC, 11.4 g/BHP-hr for CO, 530 ppm C for idle HC, and .30 percent for idle CO.

EPA has now completed its 1969 baseline test program, in which 23 engines were tested for transient emissions and 19 engines were tested for idle emissions. Each baseline engine was tested two or more times using the EPA transient and idle test procedures. The average of the tests for each engine was used to represent emissions from all engines of that type sold in 1969. In combining individual engine results into the final baseline, the emissions from each engine were given a weighting factor. The weighting factor corresponded to the fraction of total sales represented by each engine using the combined sales of all the test engines as a base. The test samples represent approximately 80 percent of the 1969 heavy-duty engine market.

Based on the data generated by this testing, the proposed standards representing 90% reductions from sales-weighted 1969 baseline emissions levels are 1.3 g/BHP–hr for HC, 15.5 g/BHP–hr for CO, 970 ppm C for idle HC and .47 percent for idle CO. Since these standards are above the lower limits identified in the February 13, 1979 proposal, they do not provide a reason for EPA to repropose.

The February 13, 1979 proposal indicated that EPA intended to set an oxides of nitrogen (NO_x) standard for 1983 which would not substantially increase the stringency of the current NO_x standard. The proposal also indicated that EPA intended to base such a standard on testing of 1979 gasoline engines. Manufacturers were invited to submit ideas on how to derive such a standard. At the time of the proposal, no specific numbers for the NO_x standard were proposed.

EPA has now completed the testing of 4 gasoline and 2 diesel engines (certified to the 1979 Federal standards) using the transient test procedure. Based upon that sample, EPA has calculated a numerical level representing the 1983 proposed NO_x standard. Though the February 13, 1979 proposal indicated that a sales-weighted average would form the basis for the standard, by its nature as an average, such a basis would create a standard more stringent than the current NO_x standard for approximately half of the engines. Therefore, the following procedure has been used to derive the level identified in this notice.

The transient test data for the 6 engines tested were first deteriorated by adding the certification deterioration factors (D.F.'s) for each engine to the NO_x transient test results. A level corresponding to the mean plus two standard deviations from the mean was then determined from this deteriorated data. Finally, that value was multiplied by a factor corresponding to the ratio of the current NO_x standard to the single highest NO_x emission rate exhibited by the six engines as tested on the current procedure. This factor compensates for the fact that current engines are certified somewhat below rather than at the current standard.

In order to compare emissions on the current test procedure to the current standard, the NO_x equivalent of the current 10 g/BHP–hr HC plus NO_x Federal standard was required. An equivalent NO_x level of 9 g/BHP–hr was developed in the EPA report, "An Examination of Interim Emission Control Strategies for Heavy-Duty Vehicles" (a regulatory support document for the 1979 heavy-duty engine regulations).

The following table lists the test data and the calculations using the above described procedure to establish the proposed standard. As indicated, the level of the proposed NOx emissions standard is 10.7 g/BHP-hr.

Heavy-Duty Engine NOx Emissions

Engine	Year	Fuel	HC+NOx Cert. D.F.	NOx Emissions g/BHP-hr: Proposed procedure	Current procedure
CAT-3208	1979	Diesel	0.0	5.65	[1]9.59
DDA 6V-92T	1979	Diesel	0.0	6.00	
GM 454	1979	Gas	0.0	8.62	9.73
GM 350	1979	Gas	0.0	6.58	7.76
GM 292	1979	Gas	0.0	8.74	8.82
IHC 446	1980	Gas	[2]0.55	5.25	5.17

Mean of determined data for proposed procedure=5.82
Standard deviation=1.52
Mean plus two standard deviation=8.86
Compositing factor=8/8.22=1.082
Proposed standard=8.86 X 1.082=10.7

[1] Caterpillar Data.
[2] HC D.F.=0.0.

Testing of 1979 engines is not yet completed. EPA plans to test 10 to 20 additional 1979 gasoline and diesel engines prior to finalizing the 1983 standard. If that testing indicates, by applying the above calculation method, that the NOx standard should be higher than 10.7 g/BHP-hr, the increase will be included in the final rule. However, under no circumstances will EPA promulgate a final NOx standard below this level without reproposing. Therefore, the level of 10.7 g/BHP-hr for NOx should be considered as the proposed standard, and comments regarding the technological feasibility of achieving the proposed standard should be directed at this level. EPA believes this level is consistent with the originally stated intent of setting a standard that would not substantially increase the stringency of the current NOx standard.

A tabulation of engine test data making up the final HC and CO baseline has been prepared and is available in the public docket for this rulemaking proposal (OMSAPC-78-4). This docket is located at the Environmental Protection Agency, Central Docket Section, Waterside Mall, Room 290B (EPA Library), 401 M Street, S.W., Washington, D.C. 20460. (As provided in 40 CFR Part 2, EPA may charge a reasonable fee for copying services.) In addition, by separate letter dated May 8, 1979, summaries of the engine test data have been made available to heavy-duty engine and vehicle manufacturers and associations, and to other parties which have expressed an interest in the February 13, 1979 proposal.

A detailed technical report on the HC and CO baseline has also been prepared, and is now available in the public docket. This report includes discussions of vehicle/engine selection and procurement, engine testing, and data compilation and standards computation. (It should be noted that the "cycle validation criteria" used for the baseline test program were revised from the criteria originally proposed on February 13, 1979. In particular, the stringency of the "regression line tolerances" was relaxed somewhat. The report contains a full description of these revisions.) Copies of the technical report are also available through the Director, Emission Control Technology Division, Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105.

Section 307(d)(5) of the Act requires the Administrator to "give interested persons an opportunity for the oral presentation of data, views, or arguments * * *" relating to the February 13, 1979 proposal. A public hearing was held on May 14–15, 1979 (44 FR 22131) to provide this opportunity. However, to provide an opportunity for specific comment on the additional information relating to proposed standards provided by this notice, and the material supportive to the development of those standards which has been placed in the public docket, a second public hearing has been scheduled for July 16–17, 1979, as discussed earlier. The scope of this hearing will be limited to those aspects of the February 13, 1979 proposal directly affected by this additional information and supportive material. Developmental data and other information relating to alternative test cycles to the proposed transient test procedure will be acceptable for submission at the July 16–17, 1979 hearing and during the ensuing comment period.

Opportunity for public comment on all other aspects of the proposed rule was provided during the May 14–15, 1979 hearing. The record for that hearing was scheduled to close on June 14, 1979. However, EPA has received requests from manufacturers for an extension of this closing date. EPA is therefore keeping the record of the May 14–15, 1979 hearing open through June 28, 1979. The date of closing for the public comment period which was specified as June 13, 1979 in the original proposal is also extended to June 28, 1979. This closing date applies to the submission of comments on all aspects of the February 13, 1979 proposal not directly affected by the additional information and supportive material discussed in today's notice.

Participation in the July 16–17 Public Hearing

Any person desiring to make a statement at the hearing or to submit material for inclusion in the record of the hearing should provide written notice of such intention, together with a copy of the proposed statement or material for inclusion in the record. All such documents should be submitted to EPA no later than Friday, July 6, 1979, at the following address: Administrator, Environmental Protection Agency, Attention: Director, Emission Control Technology Division, 2565 Plymouth Road, Ann Harbor, MI 48105. It is strongly requested, but not required, that at least 150 copies accompany any documents which cannot be submitted prior to the start of the hearing.

Participants are advised to adhere to these guidelines if possible. Documents submitted late may not receive full staff consideration prior to the hearing. Further, participants who submit documents on the scheduled day of appearance, without the requested 150 copies, may be rescheduled for a later time or session of the hearing if duplication of the documents cannot be completed by EPA prior to the scheduled time of appearance.

Mr. Charles L. Gray is hereby designated as the Presiding Officer for the hearing. He will be responsible for maintaining order, excluding irrelevant or repetitious material, scheduling presentations, and, to the extent possible, notifying participants of the time at which they may appear. The hearing will be conducted informally. Technical rules of evidence will not apply.

Dated: June 12, 1979.

Douglas M. Costle,
Administrator.

Health Care Financing Administration

[42 CFR Part 431]

Medicaid Quality Control

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: We are proposing to amend the Medicaid regulations on Medicaid Quality Control (MQC) to specify time periods for completion of reviews of the cases in the monthly MQC samples. We are also requiring a monthly report on eligibility and payment error findings. No time period requirements for review completion are imposed under current regulations. The purpose of these regulations is to ensure timely completions of MQC reviews and submittal of information on these reviews. The regulations will also improve program management of the quality control system at both State and Federal levels.

FOR FURTHER INFORMATION, CONTACT: Carlton Stockton, Medicaid Bureau, Health Care Financing Administrator, Department of Health, Education and Welfare, 330 C Street, SW., Washington, D.C. 20201, (202) 472–3790.

Dated: April 4, 1979.

Indochinese Refugee Assistance; Eligibility Requirements, Coverage and Scope of Services for Cash Assistance, Medical Assistance, Social Services, Employment Services and Training for Refugees—Including Federal Financial Participation

AGENCY: Social Security Administration, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: The Social Security Administration plans to publish regulations to carry out Section 2 of the Indochina Migration and Refugee Assistance Act of 1975, as amended, which authorizes cash assistance, medical assistance, social services, and special training programs for Indochinese refugees. When the Indochinese Refugee Assistance Program was established in 1975, we decided to issue program guidelines by administrative instructions because the program was to be temporary. Because of the continued growth of these programs and because we expect additional Indochinese refugees to be admitted, we are developing regulations to establish a more formal and uniform base for program operations and management.

The Department of Health, Education, and Welfare has classified the proposed regulation as policy significant.

FOR FURTHER INFORMATION CONTACT: Mr. Gene Hofeling, 330 C Street, S.W., Washington, D.C. 20201, telephone (202) 245–8817.

Dated: June 11, 1979.

Financial Assistance Programs; Quality Control System

AGENCY: Social Security Administration, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: We are proposing to amend the Aid to Families with Dependent Children (AFDC) and adult assistance (under titles I, X, XIV, or XVI of the Social Security Act) program regulations on Quality Control (QC) to specify time periods for completion of reviews of the cases in the monthly QC samples. We will also require States to submit, on a monthly basis, the individual sample case review data. No time requirements for the completion of reviews of individual sample cases are imposed under current regulations. The purpose of these regulations is to ensure timely completion of QC reviews and submittal of information on these reviews. The regulations will also improve program management of the quality control system at both State and Federal levels.

The Department of Health, Education, and Welfare has classified the proposed regulations as technical.

National Oceanic and Atmospheric Administration

[50 CFR Part 611]

Foreign Fishing for Billfish, Oceanic Sharks, Wahoo and Mahimahi in the Pacific Ocean

AGENCY: National Oceanic and Atmospheric Administration/ Commerce.

ACTION: Amendments to the Preliminary Management Plan for Billfish, Oceanic Sharks and Associated Species in the Pacific Ocean (PMP); and proposed implementing regulations.

SUMMARY: The plan and proposed regulations apply to vessels of foreign nations engaged in longline fishing which results in the catching of billfish, oceanic sharks, wahoo or mahimahi (dolphin fish) in the fishery conservation zone (FCZ) of the Pacific Ocean. Comments are requested on the proposed regulations and draft regulatory analysis.

DATE: Comments are invited until August 12, 1979.

ADDRESS: Comments may be submitted in writing to: Mr. Gerald V. Howard, Director, Southwest Region, National Marine Fisheries Service, 300 S. Ferry Street, Terminal Island, California 90731. Telephone: 213-548-2575.

FOR FURTHER INFORMATION AND COPIES OF THE DRAFT REGULATORY ANALYSIS CONTACT: Mr. Gerald V. Howard (see address stated above).

SUPPLEMENTARY INFORMATION:

a. Background.

The proposed regulations would implement the Preliminary Management Plan for Billfish, Oceanic Sharks and Associated Species in the Pacific Ocean (PMP), as amended. The PMP applies to foreign longline fishing, pursuant to a Governing International Fishery Agreement, which results, or can reasonably be expected to result, in the catching of billfish, oceanic sharks, wahoo and mahimahi (dolphin fish) in the FCZ of the Pacific Ocean (excluding the FCZ seaward of Alaska).

The Fishery Conservation and Management Act of 1976, as amended (the Act) states, in part, " * * * no foreign fishing is authorized within the fishery conservation zone * * * unless such foreign fishing * * * is conducted under . . . a valid and applicable permit * * *". (The Act, section 204(a)). The definition of "fishing" includes " * * * any other activity which can reasonably be expected to result in the catching, taking, or harvesting of fish * * *." (The Act, section 3(9)(c)).

A foreign longline fishery for tuna has been conducted in the Pacific Ocean for many years. Although the primary target species is tuna, incidental catches of billfish, sharks, wahoo and mahimahi are unavoiable in this fishery. The Act provides for the management of all "fish". "Highly migratory species", as defined in § 611.2(x) of this Part, are specifically excluded from the definition of "fish". Other pelagic species such as billfish, oceanic sharks, wahoo and mahimahi are not considered highly migratory under the Act. The purpose of this PMP, as amended, is to establish a conservation and management plan for these pelagic species.

The PMP was prepared pursuant to the authority of section 201(h) of the Act, and a final environmental impact statement (EIS) was filed with the Environmental Protection Agency on June 2, 1978. Proposed implementing regulations and the approved PMP were published on July 21, 1978 for public comment (43 FR 31374). Several of the comments received stated that further recognition should be given to the special social and economic impacts of the plan on various areas of the Pacific, particularly American Samoa. The Comments also reflected some misunderstanding about actions vessels must, or may, take in order to comply with the implementing regulations. In response to the comments, the proposed regulations were withdrawn on September 14, 1978 (43 FR 41062). Amendments to the PMP were developed and a draft supplemental EIS/PMP was filed with the Environmental Protection Agency on March 15, 1979.

b. The Amendments and Proposed Regulations

The amendments and proposed implementing regulations incorporate five major changes to the PMP as originally approved.

1. The area covered by the PMP has been divided into five fishing areas. The optimum yield (OY), expected domestic harvest, and total allowable level of foreign fishing (TALFF) for each species has been specified for each of the five fishing areas: mainland west coast; the State of Hawaii and Midway Island; American Samoa; Guam and the Northern Mariana Islands; and U.S. possessions. The major purposes of this change are (a) recognition of varying social, economic and recreational interests in these areas; and (b) closer adherence to a major objective of the PMP, which is maintenance of the status quo with respect to total catches for the species concerned.

Division of the FCZ into five fishing areas restricts retention of billfish, oceanic sharks and associated species to amounts based on historical harvest in each area. Under the original PMP, foreign vessels could have harvested the entire TALFF for a particular species in one area covered by the PMP, thus upsetting the historical balance of catch and, depending upon where the fish are harvested, adversely affecting the economic, recreational, or social interests recognized in the PMP.

2. The fishery has been expanded to include wahoo and mahimahi. These species are often taken in conjunction with billfish and oceanic sharks, by the same vessels and gear. They have been included in order that the PMP will address all of the species harvested by similar gear in the FCZ.

3. The managment unit includes the Northern Mariana Islands, to which the Act is now applicable.

4. An amount of fish has been set aside in a "reserve" to accommodate the possibility that domestic catches will exceed the estimated levels. The amount of fish which will be harvested by domestic fishermen is in part dependent upon wide fluctuations in availability. This factor, combined with uncertainty about the extent to which U.S. vessels having the capacity will actually harvest these species has led to establishment of reserve amounts to help assure that the OY will not be exceeded if the amount of U.S. harvest is underestimated. A reserve for sharks has been established in the Hawaii and Midway Island fishing area because of indications that a U.S. shark fishery may be developing in that area.

5. The reporting and inspection requirements have been modified and clarified to avoid misunderstandings reflected in the comments received. Reporting requirements have been minimized; the number of ports where the holds of fishing vessels may be sealed has been increased; and provisions has been made for the Administrator, Western Pacific Program Office, National Marine Fisheries Service (NMFS), to authorize alternatives to hold sealing in special circumstances. Use of logbooks combined with notices (see § 611.4 of

this Part) is one of the alternatives which may be considered in situations where hold sealing may be impracticable.

c. *The Proposed Implementing Regulations.* These regulations apply only to foreign longline vessels "fishing" (as defined in § 611.2(r) of this part) in the FCZ. Longline vessels in transit through the FCZ would not be subject to the requirements of this section or the other provisions of Part 611.

Any foreign vessel desiring to engage in longline fishing in the FCZ of the Pacific Ocean must possess a permit for that purpose, whether or not the billfish, oceanic sharks, wahoo, or mahimahi caught will be retained.

Permits are required even though the foreign longline vessel is rigged and fishes primarily for the purpose of taking highly migratory species over which the United States does not exercise exclusive fishery management authority. Any foreign nation whose vessels wish to retain billfish, oceanic sharks, wahoo, or mahimahi caught in the FCZ must also hold a national allocation from the total allowable level of foreign fishing (TALFF) for the applicable species and fishing area.

The PMP establishes the OY, U.S. harvesting capacity, and TALFF for billfish, oceanic sharks, wahoo, and mahimahi, as shown on Table 1 of the PMP amendments.

The TALFF's are established on an annual basis. The PMP establishes the TALFF's and reserves for 1979 and 1980. The regulations implement the 1979 TALFF's (to be prorated on the basis of the number of months remaining after the effective date of final regulations). TALFF's established for 1980 will be implemented by amendment to Part 611 prior to the 1980 fishing season. The FMP also provides for reassessment of the OY and U.S. harvesting capacity in May of 1980 on the basis of updated information related to status of stocks, estimated and actual performance of domestic and foreign fleets, and other relevant factors. This provision will also be implemented by 1980 amendments to Part 611. Foreign longline vessels holding applicable permits may fish as authorized under these regulations throughout the FCZ beyond 12 miles from the baseline used to measure the U.S. territorial sea. Until the applicable national allocation is reached, vessels of a nation holding an oceanic shark, wahoo, or mahimahi allocation may retain oceanic sharks, wahoo, or mahimahi caught in the applicable fishing area beyond 12 nautical miles from the baseline used to measure the U.S. territorial sea.

However, the proposed regulations establish retention and non-retention zones for billfish within each fishing area (see Table I of § 611.81(b)(2) of the proposed regulations). National allocations for species of billfish must be taken outside non-retention zones. Even if a foreign nation has a billfish allocation, all billfish caught by foreign vessels within the non-retention zones must be returned to the sea without removing the fish from the water. Billfish caught in non-retention zones are not counted against national allocations.

When a national allocation for a species of billfish or oceanic sharks is reached, any additional catch of that species must be returned to the sea without removing the fish from the water. When a national allocation for wahoo or mahimahi is reached, additional catch of these species are treated as a prohibited species (see 50 CFR 611.13).

d. *Boundaries of Fishing Areas.* A new Figure 5 has been added to Appendix II, Area Codes § 611.9 of this Part showing approximate boundaries of fishing areas of the Pacific. This Figure 5 is currently incomplete as to the outer limits of the FCZ in some areas. It is recognized that national allocations in these areas cannot be enforced until boundaries are specified.

e. *Regulatory Analysis.* A draft regulatory analysis of the proposed regulations has been prepared. Among the alternatives considered were taking no action, implementing the PMP as originally proposed, prohibiting all retention of billfish in the FCZ, and establish areas closed to any taking of billfish and associated species. The major reasons for the regulatory approach selected include: (1) considerations of foreign policy and consistency with U.S. international posture in relation to highly migratory species; (2) recognition of special economic, social and recreational interests in various fishing areas of the FCZ; and (3) minimizing reporting and recordkeeping requirements consistent with research and enforcement needs.

The Assistant Administrator has made an initial determination under section 201 of the Act that the PMP and proposed amendments conform to the national standards, the other requirements of the Act, and other applicable law.

The PMP is amended as follows:

1. In II.B1., insert "the Northern Mariana Islands," between "Guam," and "and other . . .".

2. IN II.B.2. substitute the following for the original first paragraph: "2. Biological systems—The foreign catch of bill-fish, sharks, and related species generally occurs as incidental catch in high seas tuna operations, for example, incidental to longlining. In some areas of the Pacific, foreign vessels target on bill fish. The by-catch of sharks probably is discarded at sea. The tuna, billfish, oceanic sharks, and related species taken by foreign fishing vessels are listed in the following table:"

3. Add to the end of the table in II.B.2. the following:

Related species: Wahoo dolphin *(Acanthocybium solandri Coryphaena hippurus; and C. equisetis).*

4. In II.B.3.:

(a) add after the second sentence in the first paragraph: "Wahoo and dolphin (hereafter called mahimahi) also are of recreational and commercial value to U.S. fishers."

(b) add after the second sentence of the fifth paragraph: "Wahoo and mahimahi also are caught by foreign vessels based in American Samoa and are delivered for consumption in local markets. The amount caught within 200 miles of American Samoa is small, but total deliveries may be as high as 300–400 Mt. per year."

(c) add to the end of the fifth paragraph: "The domestic fishery in the Northern Mariana Islands presently is quite small but is expected to grow rapidly."

5. In II.B.4.:

(a) revise second paragraph to read, "First, any actions taken under this preliminary management plan will not be effective in conserving oceanwide stocks of billfish, sharks and related species unless complementary actions are taken by other nations under an international management regime. These species are harvested primarily outside the FCZ. Foreign catches within the FCZ constitute a very small portion of total Pacific Ocean catches of billfish, oceanic sharks, and related species. Thus, regulations governing foreign harvest of these species within the FCZ is unlikely to have any impact on total catches of these species or on status of the stocks."

(b) in the first sentence of the fourth paragraph, substitute "stocks of billfish, oceanic sharks and related species" for "billfish and shark stocks"; and in the second sentence of the fourth paragraph, substitute "billfish, oceanic sharks, and related species" for "billfish and sharks"; and in the same sentence, substitute "availability of these species" for "availability of billfish and sharks".

(c) add a sixth paragraph as follows:

"Fifth, the private sector economy of American Samoa is dependent on

continued U.S. cannery operations, which in turn are dependent on continued deliveries of tuna by foreign longliners. Foreign longliners also catch and deliver to American Samoa billfish, wahoo, and mahimahi. This provides additional income for the vessels and provides foodfish for local consumption. Thus, it is in the interest of the U.S. to maintain such deliveries to the extent consistent with the FCMA."

6. In II.C.1.a.:

(a) substitute "stocks of billfish, oceanic sharks, and related species" for "billfish and shark stocks" in the first sentence of the first paragraph; and substitute "species" for "billfish and sharks" in the third sentence of the first paragraph.

(b) immediately after the listing of oceanic sharks, add:

"The other species covered by this plan are: Wahoo mahimahi *(Acanthocybium solandri Coryphaena hippurus; and C. equisetis)*

also add immediately after the paragraph ending "throughout the FCZ." the following: "Similarly, virtually no information is available on stock size, structure, or availability for wahoo and mahimahi."

7. In II.C.1.b., add the following:

(8) Wahoo is a circumtropical species. Generally they are found between 30°N and 31°S in the Pacific. They usually are found close to land; they are not abundant in the open ocean.

(9) Mahimahi are cosmopolitan in tropical and subtropical waters, but no information is available on stock structure or centers of abundance.

8. In II.C.1.c.(1), add to the first paragraph:

"Total Pacific Ocean shark catches have been as high as 132,000 MT, of which only a portion is of the oceanic shark species covered by this plan. Ocean-wide mahimahi catches averaged about 14,600 MT per year 1971–75, but no estimates of wahoo catch are available."

9. In II.C.1.c.(2).:

(a) substitute the following for the first sentence of the second paragraph:

"In California, a harpoon fishery harvested about 350 MT of swordfish in 1975, with an ex-vessal value of about $2.7 million, but the 1971–75 average harvest was about 223 MT (see Table 10).

(b) substitute the following for the fourth and fifth sentence in the fourth paragraph:

"It is estimated that only 9% of total average annual landings of sharks were of the oceanic shark species covered by this plan."

(c) add to the fifth paragraph, "Commercial vessels harvest substantial amounts of wahoo and mahimahi in Hawaii. The Northern Marianas commercial fishery is very limited and there are few data on harvests."

10. In II.C.1.c.(3), substitute the following for the fourth and fifth paragraphs:

"The Southwest Fisheries Center-Honolulu Laboratory completed recently an analysis of foreign longline data to estimate catch and effort by foreign longline in the FCZ in the period 1971–75. The analysis shows that foreign billfish and shark catches in most areas of the FCZ declined steadily in that period. Foreign catch estimates are summarized in Table 3."

11. In II.C.1.c.(4).:

(a) revise the second sentence of the first paragraph to read: "The recreational catch in Hawaii is not recorded officially."

(b) substitute the following for the first two sentences of the third paragraph:

"The recreational fishery in Hawaii has been growing rapidly, and a recent study by the Southwest Fisheries Center-Honolulu Laboratory indicates that previous estimates understated considerably the domestic catch especially of blue marlin. Recreational catch exceeds by far the commercial catch, although many billfish caught by anglers are subsequently sold. In addition, the social and economic values of the recreational fishery exceed those of the commercial fishery."

(c) add a new last paragraph:

"There is no documented recreational fishery in American Samoa. In the Northern Mariana Islands, there is some recreational fishing, but no estimates of catch and effort are available."

12. In II.C.1.d., add at end of section:

Northern Mariana Islands

Domestic commercial: 4 vessels 35–72 feet in length, type of gear unknown.

Foreign commercial: Unknown number of Japanese and possibly Korean longliners.

Domestic commercial: 97 outboards 12–25 feet in length (1975); and three charter vessels.

13. In II.C.2.b. (2), add the following:

(h) *Wahoo and mahimahi.* No estimates of MSY for these species can be derived using the production model; however, there is no indication that these species are overfished on an oceanwide or a localized basis. Therefore MSY is considered to equal or exceed historical levels of fishing.

14. In II.C.2.c.:

(a) revise the sentence in the third paragraph to read: "A summary of recent estimated catches of billfish, oceanic sharks, and related species is presented in Table 3."

(b) delete the last sentence of the section.

15. In II.C.3., substitute in the first sentence of the second paragraph the phrase "billfish, oceanic sharks, and related species" for "billfish and sharks".

16. In II.C.3., substitute the following for the portion of the section beginning with "Optimum yield (OY) for the FCZ . . ." and ending ". . . available for all portions of the FCZ.":

It also is necessary, however, to recognize the variety of social and economic conditions in different areas of the FCZ. Only striped marlin and swordfish are caught by domestic vessels off the West Coast; and no foreign longlining has been documented in that area of the FCZ. All billfish species as well as wahoo and mahimahi are quite important to domestic recreational and commercial interests in Hawaii, but sharks are not very important domestically. Foreign fishing in the Hawaii portion of the FCZ has been declining in recent years. Domestic fishing for billfish, wahoo and mahimahi appears to be increasing rapidly in Guam and the Northern Marianas; here too, however, sharks are of no domestic importance at this time. There is little domestic fishing in American Samoa. Rather, the economy of American Samoa is dependent on foreign longliners deliveries of tuna, and large amounts of wahoo and mahimahi are caught by foreign longliners (mainly outside the FCZ) and enter local food markets.

To accommodate these differences, it is necessary to derive OY on a subarea basis, viewing each portion of the FCZ as a separate management area. This can be done on a consistent basis by defining OY for each subarea as the average annual total catch, by species, in each subarea. These determinations would be based on 1971–75 data, where available; the survey of Hawaii recreational and commercial catches of 1976; and preliminary data for areas such as Guam and the Northern Marianas, which have not collected catch data in the past. The resulting OY's are summarized in Table 4.

17. In II.C.4.:

(a) substitute the following for the first sentence of the first paragraph: "Domestic commercial and recreational catch data were summarized in Table 1."

(b) revise the end of the first sentence of the second paragraph to read: ". . ., the extent to which U.S vessels will harvest the OY in each subarea is defined as the average annual domestic catch in the subarea (Table 1) plus 10% for increased participation in the fishery. The 10% increase factor is justified by the rapid increases in the number of vessels registered in California, Hawaii, Guam, and the Northern Marianas, and by the planned development of additional berthing facilities in Guam and the Northern Marianas. Expected domestic harvests are summarized in Table 5."

(c) delete the remainder of this section.

18. Add a new section II.C.5. as follows:

5. *Reserve and TALFF.* As indicated, domestic catches are highly variable and may exceed the average catch considerably in any single year. Domestic interests will not be affected by this plan, however, it is appropriate to establish unallocated "reserves" of billfish in the event domestic harvests exceed present estimates. this would provide some degree of control against fishing beyond OY in the FCZ. For blue marlin, which is such an important target species for domestic fishing and which is overfished, the "reserve" would be 8.8 MT and 23.9 MT for Hawaii and the Guam-Northern Marianas area. For other species of billfish in the FCZ around Hawaii and the Guam-Northern Marianas area, the "reserves" would be 10% of the difference between OY and expected domestic harvest. No "reserves" would be needed around American Samoa and U.S. Possessions throughout the Pacific because domestic fishing pressure is so light. Expected U.S. harvest on the West Coast is sufficient to take the OY, thus, no "reserves" would be set up there.

Total allowable levels of foreign fishing (TALFF's) for each subareas are then derived by the formula:

OY—expected U.S. harvest—"reserve"=TALFF.

The TALFF's are summarized by subarea in Table 6.

19. Renumber present II.C.5. to II.C.6.

20. In new II.C.6.a., revise first sentence to read "The previous section specifies the TALFF for each species in each of the five subareas of the FCZ covered by this plan."

21. In new II.C.6.b., add two new subsections as follows:

(6) Within 50 nautical miles of the major Northern Mariana Islands, i.e., Rota, Aquijan, Tinian and Saipan Islands.

(7) Within 12 nautical miles of the remaining Northern Mariana Islands.

22. Substitute the following for II.6.d.:

d. Other limitations, conditions and requirements:

(1) A foreign longline fishing vessel which will not fish in the FCZ will not be affected by the PMP. The operator is not required to obtain a permit and has full freedom to transit the FCZ with billfish, oceanic sharks, and other species on board.

(2) A foreign longline fishing vessel which intends to fish in the FCZ must obtain a permit, and when that vessel is fishing in the FCZ, it shall be a rebuttable presumption that all billfish, oceanic sharks, wahoo, and mahimahi on board that vessel, were caught in the FCZ. A vessel may (but is not required to) request U.S authorities to arrange an inspection of its hold *before fishing* in the FCZ to determine the amount of billfish, oceanic shark, wahoo, and mahimahi caught outside the FCZ, and thus rebut the presumption. A vessel also may report prior to fishing in the FCZ its catch of billfish, oceanic sharks, wahoo, and mahimahi outside the FCZ, and may arrange for an inspection of its catches when unloading to verify the accuracy of this report and of logs maintained during their fishing operations. Ports where it may be possible to arrange inspections include Honolulu and Kahului, Hawaii; Pago Pago, American Samoa; Agana, Guam; Saipan, Northern Mariana Islands; and San Diego, California.

(3) Foreign vessels which fish exclusively outside the FCZ are not required to maintain logs or provide data to the U.S. Foreign vessels which fish in the FCZ are required to maintain logs and provide data to the U.S., but only with respect to their operations in the FCZ. However, documentation (e.g., logbooks) concerning fishing and catches outside the FCZ may be requested by U.S. authorities as evidence to substantiate radio reports of catches prior to entering the FCZ to fish.

(4) The requirement to release fish by cutting the line or leader without removing the fish from the water would apply only to billfish which are caught in a non-retention zone or to billfish and oceanic sharks which are caught after that particular species allocation has been reached. The requirement does not apply to wahoo, mahimahi or other non-billfish species; when release of these species is required, it would be permissible to bring the fish aboard the vessel and remove the hook before returning the fish to the ocean.

(5) The National Marine Fisheries Service will prepare the logbook form to be used by foreign vessels.

23. Substitute new Tables 3, 4, 5, and 6 for original Tables 3–6 and renumber original Table 9 to Table 7.

Table 3.—*Estimated Average Annual Catch by Portion of the FCZ*

Signed in Washington, D.C. this 8th day of June, 1979.

Authority: 16 U.S.C. 1801 *et seq.*

Jack W. Gehringer,

Deputy Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration.

(A) It is proposed to add the following § 611.81 to CFR Part 611, Subpart F:

§ 611.81 Pacific billfish, oceanic sharks, wahoo and mahimahi.

(a) *Purpose.*—(1) *General.* This section regulates all foreign longline fishing conducted under a Governing International Fishery Agreement which involves the catching of any species of billfish, oceanic sharks, wahoo or mahimahi (dolphin fish) in the Fishery Conservation Zone (FCZ) of the United States in the Pacific Ocean, excluding the portion of the FCZ seaward of the State of Alaska.

(2) *Species Definitions.* For the purposes of this section, the following terms have the following meanings: (A) "mahimahi" means "dolphin fish" (*Coryphaena hippurus* and *C. equisetis*); and (B) "oceanic sharks" means sharks of the families *Carcharhinidae, Alopiidae, Sphyrnidae,* and *Lamnidae.*

(b) *Authorized Fishery.*— (1) *Fishing Areas.* For the purposes of this section, the FCZ of the Pacific Ocean (excluding the FCZ seaward of Alaska) is divided into five fishing areas: West Coast, Guam and Northern Mariana Islands, Hawaii and Midway Islands, American Samoa, and U.S. Possessions.

(2) *Zones.* The fishing areas are comprised of the following "Billfish retention" and "Billfish non-retention" zones (each zone is measured from the baseline used to measure the U.S. territorial sea.):

Table I

Fishing area	Billfish retention zones	Billfish non-retention zones
West Coast	Beyond 100 nautical miles	Between 12 and 100 nautical miles.
Guam and Northern Mariana Islands	(1) Beyond 50 nautical miles from Guam, Rota, Tinian, Aguijan and Saipan; and (2) beyond 12 nautical miles of the remaining Northern Mariana Islands.	Between 12 and 50 nautical miles from Guam, Rota, Tinian, Aguijan, and Saipan.
Hawaii and Midway Islands	(1) Beyond 100 nautical miles from the islands of Hawaii, Kahoolawe, Kauai, Lanai, Maui, Molokai, Niihau, and Oahu and (2) beyond 50 nautical miles from the remaining islands of the State of Hawaii and Midway Island.	(1) Between 12 and 100 nautical miles from the islands of Hawaii, Kahoolawe, Kauai, Lanai, Maui, Molokai, Niihau and Oahu; and (2) between 12 and 50 nautical miles from the remaining islands of the State of Hawaii and Midway Island.
American Samoa	Beyond 12 nautical miles from American Samoa	No non-retention zone.
U.S. Possessions	Beyond 12 nautical miles from any other possession of the United States	No non-retention zone.

(3) *General.* Foreign vessels subject to this section are authorized to fish in the FCZ of the Pacific Ocean beyond 12 miles from the baseline used to measure the U.S. territorial sea, subject to the requirements of this section.

(i) *Non-Retention Fishery.* Except as provided in paragraph (b)(3)(ii) of this section, and in section 611.80 of this Part, all billfish, oceanic sharks, wahoo, mahimahi and other fish caught by foreign vessels in the course of fishing under this section shall be returned to the sea in accordance with the requirements of paragraph (c) of this section.

(ii) *Retention Fishery.* Foreign vessels fishing subject to this section may retain billfish, oceanic sharks, wahoo and mahimahi to the extent that retention is authorized by pargraphs (b)(4) and (5) of this section.

(4) *Total Allowable Level of Foreign Fishing (TALFF); National Allocations; and Reserves.*

(i) *Total Allowable Level of Foreign Fishing (TALFF) and National Allocations.*

(A) The total amount of each species of billfish, oceanic sharks, wahoo and mahimahi which may be caught and retained in each fishing area by foreign vessels subject to this section is limited to the TALFF's set out in Table I of this paragraph for each applicable fishing area, and to the amount of the applicable national allocation.

Table I.—*Pacific Billfish and Oceanic Sharks TALFF and Reserve by Fishing Areas September Through December 1979 (Metric Tons)*

[Fishing areas]

Species		West Coast	Hawaii (including Midway)	Guam and N. Marianas	American Samoa	Possessions
Swordfish	TALFF	0	26.3	1.2	0.8	9.4
	Reserve	0	2.9	0.1	0	0
Blue Marlin	TALFF	0	0	0	11.6	25.4
	Reserve	0	2.9	5.9	0	0
Black Marlin	TALFF	0	0	0.2	1.8	2.1
	Reserve	0	0	0.03	0	0
Striped Marlin	TALFF	0	46.6	1.4	2.6	15.5
	Reserve	0	5.2	0.2	0	0
Sailfish/Spearfish	TALFF	0	5.8	1.4	0.7	4.8

	Reserve	0	0	0	0	0

(B) No foreign vessel subject to this section may retain billfish caught within the billfish non-retention zones set out in Table I of paragraph (b)(2) of this section.

(ii) *Reserves.* (A) *Amounts.* The amounts of fish held in reserve are shown in paragraph (b)(4)(i), Table I of this section.

(B) *Apportionment to TALFF.* (1) As soon as possible after September 1, the Regional Director, Southwest Region, shall determine the amount of fish of each species for which a reserve has been established which has been harvested to date by U.S. vessels in each applicable fishing area. (2) If the Regional Director determines that the amount of fish of a species harvested by vessels of the United States in an area is less than 80 percent of the estimated U.S. harvest for that species in that fishing area, the Regional Director, Southwest Region, shall apportion to TALFF the entire amount of the reserve for the applicable species in the applicable fishing area. (See Table 6 of the FMP, as amended, for estimated U.S. harvest by species and area.)

(C) *Notice.* The Assistant Administrator shall publish in the Federal Register a notice of determinations made under paragraph (b)(4)(ii)(B) of this section.

(5) *Cancellation of Authority to Retain.* (i) The authority of a foreign vessel to retain an applicable species is cancelled: (A) when the national

allocation for the applicable species is reached; or (B) at the date and time specified in the notification issued by the Assistant Administrator under paragraph (b)(5)(ii) of this section.

(ii) The Assistant Administrator shall determine, on the basis of the information specified in § 611.15(b) of this Part, when the TALFF or optimum yield (OY) for a billfish species, oceanic sharks, wahoo or mahimahi will be reached. At least forty-eight hours before the applicable TALFF or OY will be reached, the Assistant Administrator shall notify both the affected foreign nation(s) and the designated representative for any affected fishing vessel that authority to retain the applicable species is cancelled.

(iii) Any cancellation under this section hall remain in effect until a new or increased allocation becomes available.

(iv) The closure provisions of § 611.15 of this Part do not apply to foreign vessels fishing subject to this section.

(c) *Prohibited Species.* (1) *General.* The following are prohibited species undes this section:

(i) All species of fish over which the United States exercises exclusive fishery management authority and for which there is no national allocation;

(ii) All billfish, oceanic sharks, wahoo and mahimahi caught in excess of any OY, TALFF or national allocation; and

(iii) All billfish caught in a billfish non-retention zone. (See Table I of paragraph (b)(2) of this section).

(2) *Treatment.* (i) All prohibited species shall be treated in accordance with § 611.13 of this Part.

(ii) *Additional Requirements for Billfish and Oceanic Sharks.* Unless otherwise specifically instructed by a U.S. observer or authorized officer, all prohibited billfish and oceanic sharks must be released by cutting the line (or by other appropriate means) without removing the fish from the water.

(3) *Rebuttal of Presumption.* Foreign vessels fishing subject to this section may rebut the presumption of § 611.13(c) of this Part by: (A) storing all prohibited species caught outside the FCZ in a separate part of the vessel hold which can be sealed; and arranging inspection and sealing of the vessel's hold by U.S. authorities before commencing fishing in the FCZ or in billfish non-retention zones; or (B) other reasonable means which may be authorized by the Administrator of the Western Pacific Program Office if, in consultation with the U.S. Coast Guard, the Administrator determines that special circumstances warrant alternative arrangements.

(4) *Procedure for Hold Sealing.* (i) Inspection and sealing of a foreign vessel's hold may be arranged by contacting the Administrator, Western Pacific Program Office (Southwest Region, National Marine Fisheries Service, Post Office Box 3830, Honolulu, Hawaii 96812, telephone 808-946-2181) at least 48 hours in advance of the date for which inspection is requested.

(ii) Ports at which such inspections may be made are Honolulu and Kahului, Hawaii; Pago Pago, American Samoa; Agana, Guam; Saipan, Northern Mariana Islands; and San Diego, California.

(iii) Additional ports for hold inspections may be arranged with the Administrator of the Western Pacific Program Office.

(5) *Other Requirements.* The designation of ports for hold inspection and sealing does not modify any port entry arrangements or requirements (if any) of Governing International Fishery Agreements or the notification requirements of any other laws or regulations of the United States.

(d) *Statistical Reporting.* (1) *Retention fishery.* The operator of each vessel of a foreign nation with an allocation for billfish, oceanic sharks, wahoo or mahimahi shall comply with all of the requirements of § 611.9 of this Part, except that the daily cumulative catch log required by § 611.9(d) must be in the format illustrated in Appendix I of this § 611.81, and shall contain the following information:

(i) Name and call sign of the vessel;

(ii) Permit number;

(iii) Date;

(iv) Number and weight (in kilograms) of each species (by species code) of billfish, oceanic sharks, wahoo, and mahimahi caught and retained;

(v) Number of each species (by species code) of billfish, oceanic sharks, wahoo, mahimahi and other fish caught and released, and whether each fish released was alive or dead at the time of release;

(vi) Noon-day location of vessel, to the nearest tenth of a degree of longitude and latitude;

(vii) Number of hooks set by type of bait.

(2) *Non-Retention Fishery.* The operator of each vessel of a foreign nation without an allocation fishing subject to this section is exempt from the reporting requirements of § 611.9(d) and (e) of this Part, but shall provide a quarterly report containing the following information for the applicable quarter:

(i) Name and call sign of the vessel;

(ii) Permit number;

(iii) Time period covered by the report;

(iv) Total number of each species (by species code) of billfish, oceanic sharks, wahoo, mahimahi and other fish caught;

(v) Number of each species (by species code) of billfish, oceanic sharks, wahoo, mahimahi and other fish released, and whether each fish was alive or dead at time of release;

(vi) Average daily number of hooks set by type of bait;

(vii) Total number of days fished in the FCZ, by area code set forth in § 611.9, Appendix II.

(3) All reports by vessels fishing subject to this section in areas designated by code numbers 61–64, (see § 611.9, Appendix II of this Part) shall be submitted to: Administrator, Western Pacific Program Office, Southwest Region, National Marine Fisheries Service, Post Office Box 3830, Honolulu, Hawaii 96812, telephone 808-946-2181.

(4) All reports by vessels fishing subject to this section in areas designated by code numbers 71–74 (see § 611.9, Appendix II of this Part) shall be submitted to: Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731, telephone 213-548-2575.

(5)(i) The weekly catch report shall be submitted in accordance with the schedule in § 611.9 of this Part.

(ii) The quarterly catch report shall be submitted not later than 30 days from the end of the calendar year quarter for which the report is being made.

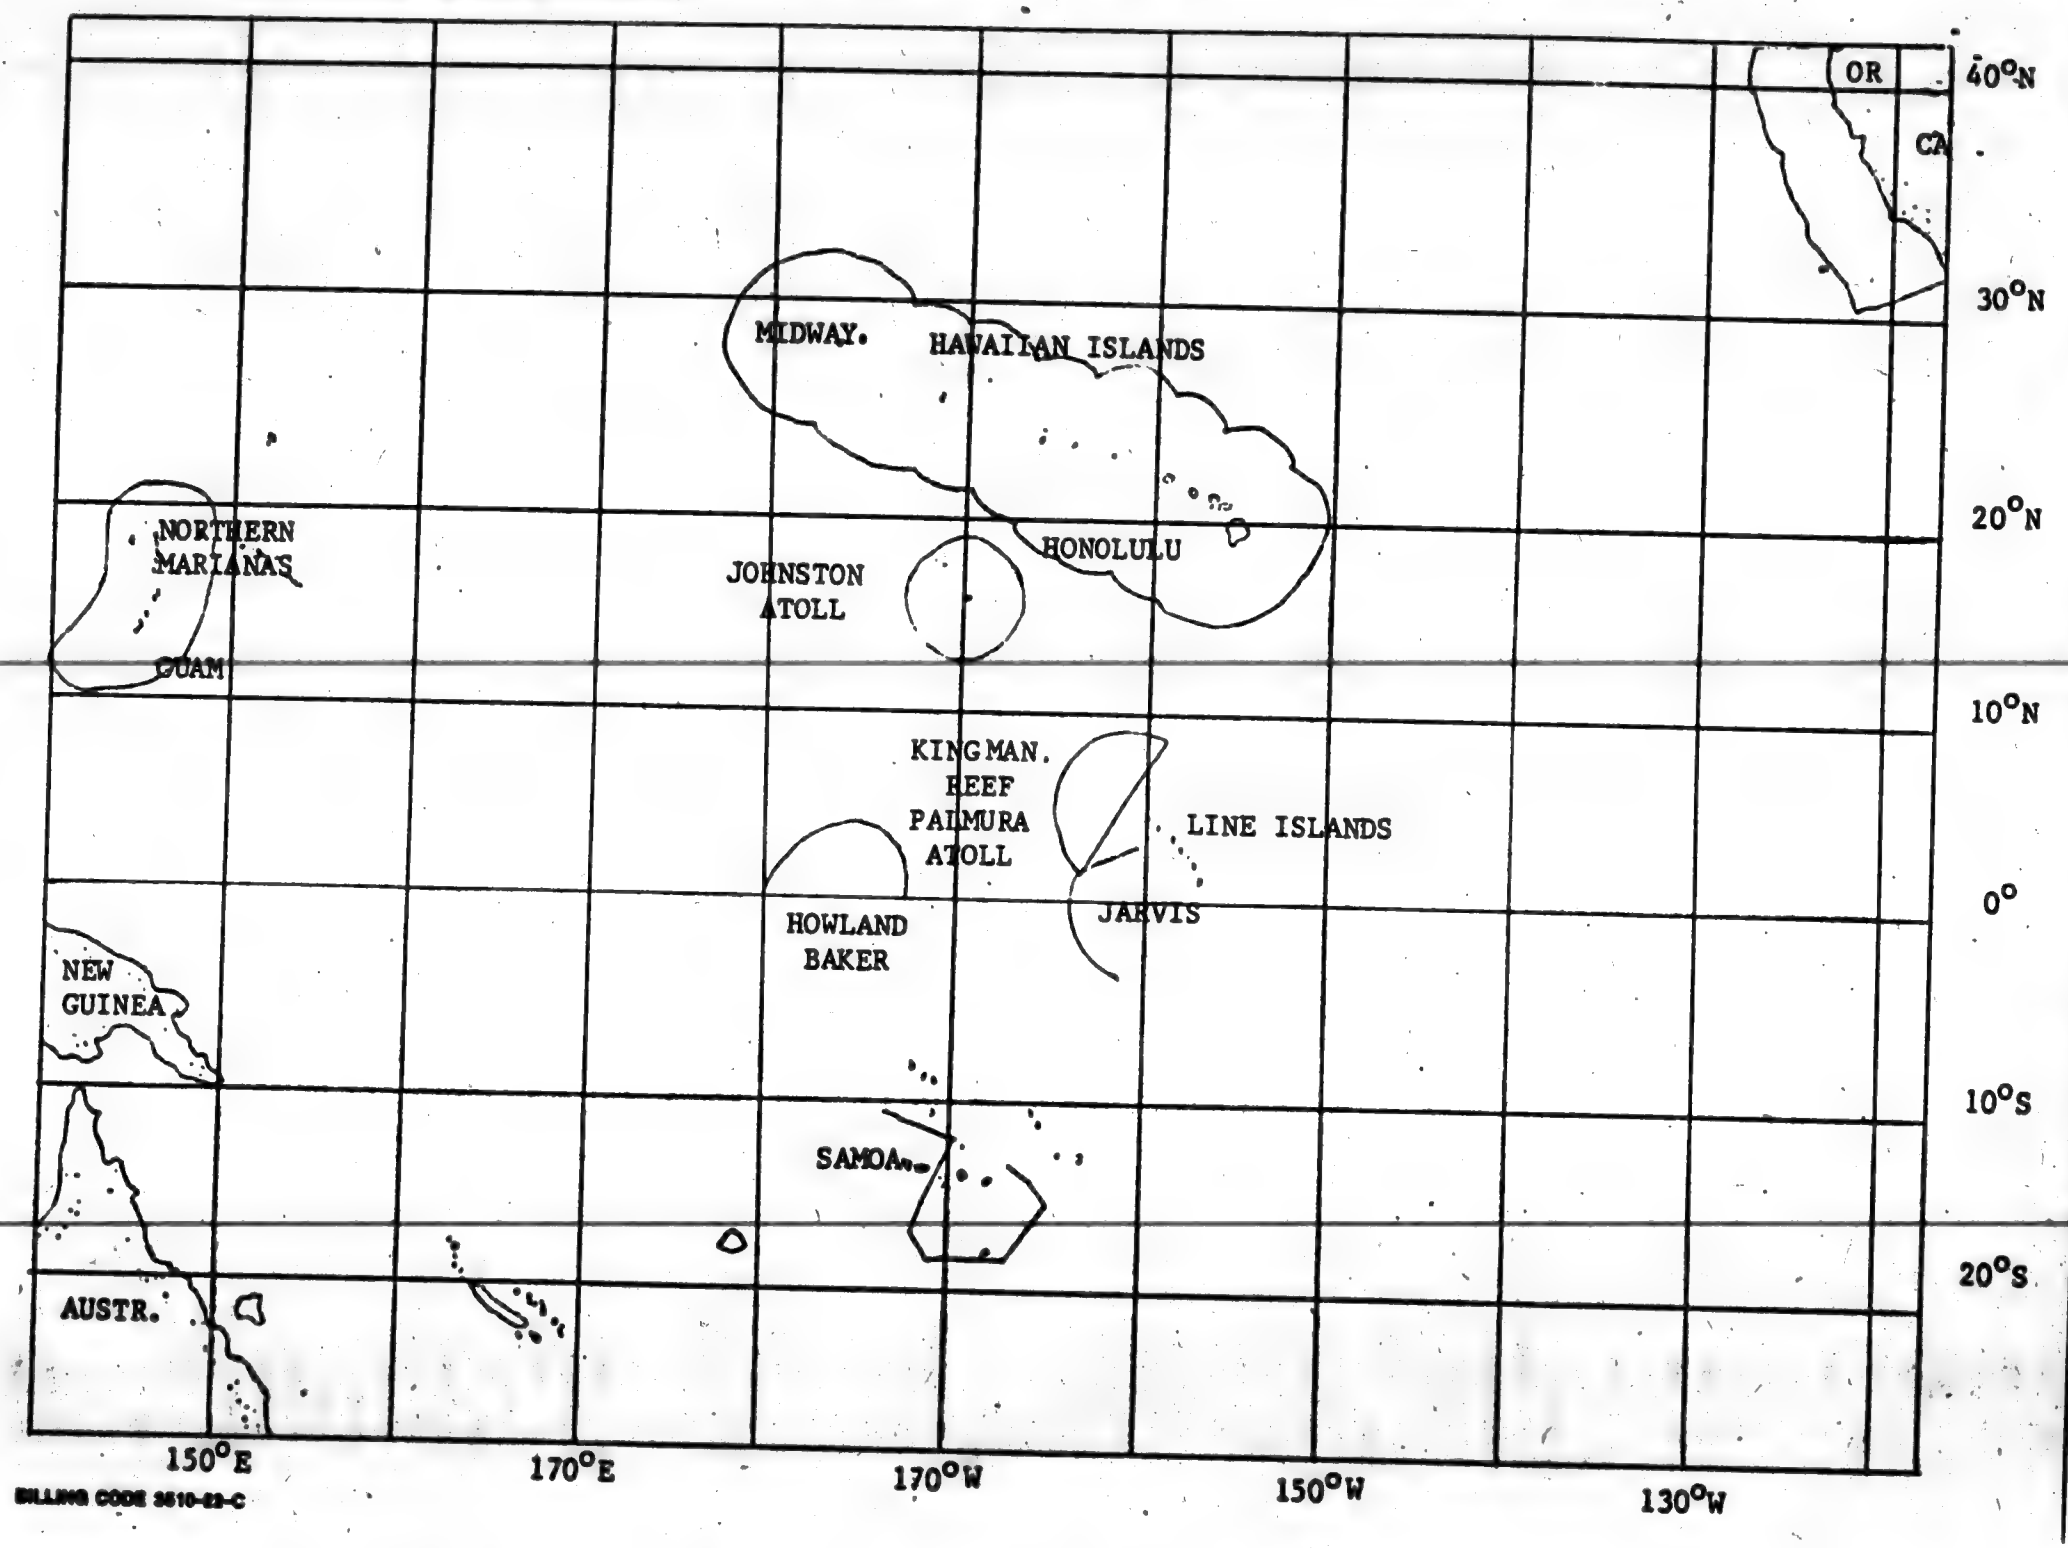
(Appendix I, Daily Cumulative Catch Log. Reserved.)

(3) It is further proposed to amend 50 CFR 611 as follows:

(1) Section 611.9, Appendix II, *add:* Figure 5. Fishing Areas of the Pacific Billfish, Oceanic Shark and Associated Species Fishery.

BILLING CODE 3510-22-M

Figure 5. Approximate Boundaries of Fishing Areas of the Pacific Billfish, Oceanic Shark, and Associated Species Fishery



BILLING CODE 3510-22-C

(2) Section 611.9, Appendix II, under "Area Codes-Pacific", *add* "86 Other U.S. Possessions and Territories FCZ"; and amend the line beginning "81" by *adding* "and Midway Island" between the words "Islands" and "FCZ".

(3) Section 611.9, Appendix I—Species Codes II. Pacific Ocean Fishes, Finfishes, add:

Code	
699	Shortfin [illegible] ..... Equaliformes

(4) Section 611.20, Table I, add the following:

Fishery	Species	Species code	TALFF (metric tons)
Pacific billfish and Sharks	Swordfish	254	[1]37.7
	Blue Marlin	250	[1]37.8
	Black Marlin	259	[1]4.1
	Striped Marlin	251	[1]66.1
	Sailfish/Spearfish	252	[1]12.7
	Sharks	293, 295, 296, 297.	[1]584.5
	Wahoo	255	0.7
	Mahimahi (dolphin fish)	237, 238	0.7

(5) Section 611.50(a) is amended by *adding* between the words "fishing" and "conducted", the phrase "for pelagic armorheads and alfonsins".

BILLING CODE 3510-22-M

OFFICE OF MANAGEMENT AND BUDGET

Improving Government Regulations; OMB Directives Covered by Executive Order 12044; Semiannual Agenda of Upcoming Action

June 8, 1979.

AGENCY: Office of Management and Budget.

ACTION: Publication of semiannual agenda of regulations.

SUMMARY: The Office of Management and Budget is publishing the semiannual agenda of upcoming action on OMB directives covered by Executive Order 12044, Improving Government Regulations. This action is in accordance with OMB's internal guidelines for implementing Executive Order 12044, as published in the Federal Register on February 28, 1978.

FOR FURTHER INFORMATION CONTACT: See agency contact person listed for each entry in the agenda, c/o Office of Management and Budget, 726 Jackson Place, N.W., Washington, D.C. 20503.

James T. McIntyre, Jr.,
Director.

Office of Management and Budget Agenda for Upcoming Actions on OMB Directives

Directive under development	Opportunity for public participation	Completion date	Reasons for review and major issues
Revision of Federal Management Circular 73-8, "Cost principles for educational institutions."	1. Draft of revised Circular published in FEDERAL REGISTER March 10, 1978. 2. Approximately 300 comment letters received from Members of Congress; Federal agencies; university administrators; faculty members, professional associations, and members of the public. 3. During December special briefings on a final draft of the Circular were held with university representatives, Federal agencies, and congressional staff members. These meetings were open to the public.	Revised Circular issued as Circular No. A-21 on Mar. 6, 1979 (rather than January 1979 as previously anticipated.	1. Circular is being revised at the urging of Congress to clarify existing cost principles in order to "bring spiraling indirect cost rates under control" and on recommendations for changes suggested by the Department of Health, Education, and Welfare. 2. Major issues— ● Adequate documentation of personnel costs. ● Paperwork burden imposed by accountability requirements. ● Methods of allocating indirect costs. *Contact Person:* John J. Lordan, Financial Management Branch(202), 395-[illegible]
Revision of Circular A-40, "Management of Federal Reporting Requirements." This Circular sets forth the requirements for seeking OMB approval for reporting and recordkeeping requirements.	1. Comments on issues may be received at any time. 2. Publication of proposed circular, June 1979, rather than March, as previously reported.	August, rather than June 1979, as previously reported.	Circular A-40 is being reviewed in order to reorganize, update, and clarify the existing circular. The circular is based on the Federal Reports Act of 1942. 1. Should guidelines of President's reporting burden reduction program or significant portions of them be incorporated into the circular? 2. Should circular be tested in subject matter to public reporting? 3. Are all terms defined? Are definitions clear? *Contact Person:* Stanley Morris, Regulatory Policy and Reports Management, 395-[illegible]

BILLING CODE 3510-22-C

Office of Management and Budget Agenda for Upcoming Actions on OMB Directives—Continued

Directive under development	Opportunity for public participation	Completion date	Reasons for review and major issues
Revision of Circular No. A-108, "Responsibilities for the maintenance of records about individuals by Federal agencies."	1. Comments on issues may be submitted at any time. 2. Proposed revisions will be published in the FEDERAL REGISTER and circulated to interested parties for comment.	September, rather than July 1979, as previously reported.	Circular No. A-108 was issued pursuant to the Privacy Act of 1974, for which OMB has oversight responsibility. This review is part of the Presidential Privacy Initiative, undertaken in response to the recommendations of the Privacy Protective Study Commission. Specific issues to be reviewed are: 1. Extension of the applicable provisions of the Act to certain recipients of discretionary Federal grants. 2. Strengthening the administration of the routine use provision of the Privacy Act. 3. Assignment of Privacy Act oversight and development of new information systems to one office in each department and agency. 4. Establishment of guidelines on the responsibility, training and appointment of the system managers required by the Act. 5. Adoption of mechanisms to improve oversight of the privacy implications of new Federal information systems at an early stage in the planning process; and 6. Promulgation of baseline standards for Federal regulations which require private sector recordkeepers to report personal information about their clients, customers, or employees to the government. It should be noted that OMB carries out its Privacy Act oversight through guidelines as well as Circular A-108. The issues listed above may be addressed in guidelines rather than Circular A-108. Public comment will be sought on any revision or additions to the guidelines. *Contact Person:* Leslie Greenspan, Information Systems Policy, 395-3785.
Revision of Circular A-106, Reporting Requirements in Connection with Federal Compliance with Pollution Control Standards. This circular sets forth the procedures to be followed by Federal agencies in carrying out the provision of Sections 1-4 and 1-5 of Executive Order No. 12088 pertaining to the control of pollution from Federal facilities.	1. Comments may be received at any time.	September rather than May 1979, as previously reported.	Circular 1-106 is being reviewed to clarify the procedures that must be followed by Federal agencies in controlling pollution at Federal facilities pursuant to Executive Order 12088. 1. Are the requirements for agency information on pollution control clear? 2. Does the schedule for agency reporting allow sufficient time for project review? 3. Does the schedule for reporting insure that all projects that are needed will be included? 4. Are the information requirements for EPA's evaluation of agency proposals clear and adequate? *Contact Person:* Kathleen O'Halloran, Natural Resources, 395-6227.
Revision of OMB Circular No. A-102, "Uniform administrative requirements for grants-in-aid to State and local governments".	Proposed revision was published for comment in the FEDERAL REGISTER on October 18, 1978.	July, rather than May 1979, as previously reported.	1. Proposed revision will bring the circular into line with Treasury requirements. 2. Major issue— ● Whether to reimburse recipients only for amounts which have been actually been paid to contractors. *Contact Person:* John J. Lordan, Financial Management Branch/GRD, 395-6823.
Revision of OMB Circular No. A-102, "Uniform Administrative Requirements for Grant-in-Aid to State and Local Governments" to call for coordinated audits, and to incorporate a standard audit guide.	1. Comment by Federal agencies requested on December 6, 1978. 2. Publication for comment in the FEDERAL REGISTER expected in July, rather than in April, 1979 as previously reported.	September rather than May, 1979, as previously reported.	1. Continuation of the long-term goal of grant standardization, and placing greater reliance on State and local governments. 2. Major issues— ● One guide would replace almost one hundred now in use. ● Emphasis on total audit of an organization, rather than grant by grant audits. *Contact Person:* John J. Lordan, Financial Management Branch/GRD, 395-6823.
Revision of Procurement Standards attachment to OMB Circular No. A-102, "Uniform Administrative Requirements for Grants-In-Aid to State and local Governments."	1. Public meeting held on January 16, 1979. 2. Published for comment in the FEDERAL REGISTER on December 6, 1978.	June rather than May 1979, as previously reported.	1. Attachment being revised to reduce administrative cost, paperwork, and other factors which contribute to inefficiency and delay in implementing programs. 2. Major issues— ● Rescinds nonconforming provisions of current agency subordinate regulations. ● Creates a grantee procurement review certification program to reduce Federal agency review of individual procurement. *Contact Person:* Jack Nadel, Office of Federal Procurement Policy, 395-6196.

Office of Management and Budget Agenda for Upcoming Actions on OMB Directives—Continued

Directive under development	Opportunity for public participation	Completion date	Reasons for review and major issues
Revision of Federal Management Circular No. 74-4, "Cost principles applicable to grants and contracts with State and local governments."	1. Proposed revision concerning expenses of officials has been circulated for comment to all the major public interest groups. 2. Extensive discussions on the interest issue have taken place with State and local officials and representatives of public interest groups. 3. Publication for comment in the FEDERAL REGISTER is expected in June 1979; however, publication of the interest issue is dependent upon comments received from Federal agencies.	October rather than April 1979, as previously reported.	The circular is being revised at the request of State, local and Federal officials. *Major issues*— 1. Whether to recognize travel cost of local legislators and chief executives as an expense when their work directly benefits grant programs. 2. Whether to recognize interest incurred in borrowing to construct building site as a reimbursable cost. *Contact Person:* John J. Lordan, Financial Management, 395-6823.
Revision of OMB Circulars No. A-102 and A-110 to include a set of standard legal assurances for grants to State and local governments, universities, hospitals, and other nonprofit organizations.	Publication for comment in the FEDERAL REGISTER expected in July, rather than February 1979, previously reported.	October, rather than May 1979, as previously reported.	1. Update of assurances in OMB Circular No. A-102 is needed because of the changes that have taken place in Executive Orders and Acts of Congress. Inclusion of standard assurances in OMB Circular No. A-110 will further the goal of standardization and simplification for grantees. 2. Major issue— ● Standardization of assurance language, assurance formats and forms. *Contact Person:* John J. Lordan, Financial Management Branch/SRD, 395-6823.
A new OMB circular covering "Principles for determining costs of grants and contracts with certain non-profit organizations."	1. Proposed circular was published for comment in the FEDERAL REGISTER on April 28, 1977. 2. Recirculated to Federal agencies and interested parties in October 1978.	July rather than February 1979, as previously reported.	1. Proposed Circular was developed to assist nonprofit agencies by providing single set of cost principles as part of Federal effort to standardize and simplify grant procedures. 2. Major issues— ● Methods of allocating indirect costs. ● Uniform set of allowable costs. *Contact Person:* John J. Lordan, Financial Management Branch/SRD, 395-6823.
Revision of Circulars A-102 and A-110	Publication for comment in the FEDERAL REGISTER expected in July 1979.	October 1979	1. Closeout attachment being revised as the result of reports that substantial amounts of funds advanced to grantees but not spent for program purposes are being held by grantees. 2. Major issues— ● Prompt refund of unspent cash advances. ● Greater specificity of closeout requirements. *Contact Person:* John J. Lordan, Financial Management Branch/SRD, 395-6823.
Revision of Circular A-110, "Uniform Administrative Requirements for grants and agreements with universities, hospitals, and other nonprofit organizations."	Publication for comment in the FEDERAL REGISTER expected in September 1979.	December 1979	Property management attachment is being revised to make it consistent with Circular A-21 and to further the goal of simplification of grant requirements and reduced paperwork. *Contact Person:* John J. Lordan, Financial Management Branch/SRD, 395-6823.
Revision of Circular A-73, "Audit of Federal Operations and Programs."	Proposed revision will be published in the FEDERAL REGISTER for comment in June 1979 and circulated to interested parties for comment.	August 1979	Circular A-73 will be revised to expand the section dealing with audit followup. Specific criteria will be provided Federal agencies to assure the timely and proper resolution of audit findings and any attendant collection actions. *Contact Person:* John J. Lordan, Financial Management Branch/SRD, 395-6823.
Revision of Circular 73-8,"Coordinating indirect cost rates and audits at educational institutions."	Proposed revisions will be published in the FEDERAL REGISTER for comment in June 1979.	October 1979	1. Circular will be released under its original designation of OMB Circular A-88. 2. Proposed revision is based in part on recommendations made by an interagency task force chaired by the Department of Health, Education, and Welfare. 3. The proposed revision would continue the existing policy of relying on a single agency to act for all agencies in auditing educational institutions and in negotiating their indirect cost rates. It would add to those duties the responsibility to followup on audits by: ● Assuring correction of systems deficiencies; and, ● Negotiating appropriate monetary recoveries. *Contact Person:* John J. Lordan, Financial Management Branch/SRD, 395-6823.

Notices

Federal Register
Vol. 44, No. 117
Friday, June 15, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

Rural Rental Housing Loan Policies, Procedures, and Authorizations; Memorandum of Understanding Between Farmers Home Administration and Administration on Aging

AGENCY: Farmers Home Administration, USDA.

ACTION: Notice.

SUMMARY: The Farmers Home Administration (FmHA), gave Notice on May 18, 1979, of the selection of the 10 counties for participation in the Joint FmHA and Administration on Aging (AOA) demonstration effort to provide congregate housing projects with adequate support services in rural areas. This Notice extends the timetable by seven days for submission in final form of all preapplication to the FmHA State Director and also extends by seven days the timetable for complete review and submission of the preapplication to the FmHA National Office by the FmHA State Director.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Conn, telephone: 202–447–7207.

SUPPLEMENTARY INFORMATION: On May 18, 1979, FmHA published in the Federal Register (44 FR 29181) a Notice of the selection of the 10 counties for participation in the Joint Farmers Home Administration and Administration on Aging's demonstration effort to provide congregate housing projects with adequate support services in rural areas. In an effort to provide additional time for the preparation of all applicant proposals and subsequent review by the FmHA and the AOA, the date for submission of all preapplciations in final form to the FmHA has been extended from June 15 until June 22, 1979, and the date for submission of all recomended preapplications to the National Office for review by FmHA and AOA has been extended from June 80 until July 6, 1979. These two changes reflect the only changes in the Notice of May 18, 1979.

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.279)

Dated: June 12, 1979.

Gordon Cavanaugh,
Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

Food and Nutrition Service

Child Nutrition Program; Income Poverty Guidelines for Determining Eligibility for Free and Reduced-Price Meals and Free Milk

Pursuant to sections 9 and 17 of the National School Lunch Act, as amended (42 U.S.C. 1785 and 42 U.S.C. 1766), and sections 3 and 4(e) of the Child Nutrition Act of 1966, as amended (42 U.S.C. 1772 and 1773(e)), the income poverty guidelines for determining eligibility of children for free and reduced-price meals in the National School Lunch Program (7 CFR Part 220), Child Care Food Program (7 CFR Part 226), and commodity only schools (7 CFR 210.15(a)) and for free milk in the Special Milk Program (7 CFR Part 215) during the period July 1, 1979–June 30, 1980 are prescribed by the Secretary in the following tables.

Under the legislation and applicable regulations, schools and institutions which charge for meals separately from other fees are required to serve free meals and free milk to all children from families whose incomes are at or below 25 percent above the applicable family size income level indicated by the Secretary's guidelines. Schools and institutions which charge for meals separately from other fees are required to serve reduced-price meals to all children from families whose incomes are at or below 95 percent above the applicable family size income level in the guidelines.

Each state agency is required to prescribe income guidelines for both free and reduced-price meals and free milk by family size for use by schools and institutions in the State. The State guidelines for free meals and for free milk must be 25 percent above the applicable family size income level prescribed by the Secretary. The State guidelines for reduced-price meals must be established at 95 percent in excess of the Secretary's guidelines.

For the convenience of State agencies, the tables also show the Secretary's income poverty guidelines when increased by 25 percent and when increased by 95 percent. The increased figures represent the levels to be prescribed by State agencies in determining eligibility for free meals and free milk, and the mandatory levels for reduced-price meals, respectively. The Secretary's guidelines, when increased by 25 percent, shall be the prescribed level for free meals and free milk. Guidelines for the Island of Guam are identical to those established for the State of Hawaii.

Income Poverty Guidelines July 1, 1979—June 30, 1980

8	13,550	16,940	26,420
Each additional family member	1,330	1,660	2,590

The Secretary's income poverty guidelines are determined by adjusting the nonfarm income poverty guidelines prescribed by the Office of Management and Budget to reflect the change between the 1978 average of the Consumer Price Index of March 1979. As specified in Section 8 of Public Law 95–627, the most current procedures of the office of Management and Budget are used to make this adjustment for price level changes and to make necessary adjustments to determine guidelines applicable to Hawaii, Guam, and Alaska.

"Income", as the term is used in this notice is similar to that defined in the Bureau of the Census report, "Characteristics of the Low-Income Population: 1971," Current Population Reports, series P–60, No. 86, December 1972. "Income" means income before deductions for income taxes, employees' social security taxes, insurance premiums, bonds, etc. It includes the following:

(1) Monetary compensation for services, including wages, salary, commissions, or fees; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) social security; (5) dividends or interest on savings or bonds, income from estates or trusts, or net rental income; (6) public assistance or welfare payments; (7) unemployment compensations; (8) Government civilian employee, or military retirement, or pensions or veterans' payments; (9) private pensions or annuities; (10) alimony or child support payments; (11) regular contributions from persons not living in the household; (12) net royalties; and (13) other cash income. Other cash income would include cash amounts received or withdrawn from any source including savings, investments, trust accounts, and other resources which would be available to pay the price of a child's meal.

"Income", as the term is used in this notice, does not include any income or benefits received under any Federal program which are excluded from consideration as income by any legislative prohibition, for example, income received by volunteers for services performed in the National Older Americans Volunteer Program as stipulated in the Domestic Volunteer Services Act of 1973, Public Law 93–113, Title IV, c 418 (87 Stat. 413, 42 U.S.C. 5058); nor does the term include income used for the following special hardship conditions which could not be reasonably anticipated or controlled by the household:

(1) Unusually high medical expenses; (2) shelter costs in excess of 30 percent of income as defined herein; (3) special education expenses due to the mental or physical condition of a child; and (4) disaster or casualty losses. Furthermore, the value of assistance to children or their families shall not be considered as income if prohibited by the authorizing legislation, e.g., the National School Lunch Act, the Child Nutrition Act of 1966, and the Food Stamp Act of 1964.

In applying guidelines, school food authorities may consider both the income of the family during the past 12 months and the family's current rate of income to determine which is the better indicator of the need for free and reduced-price meals; *Provided, however,* That children whose parents or guardians become unemployed shall be eligible for free or reduced-price meals or free milk during the period of unemployment, if the loss of income causes the current rate of family income to be within the eligibility criteria of the school food authority.

Effective date: This notice shall become effective July 1, 1979.

Dated: June 11, 1979.

Carol Tucker Foreman,

Assistant Secretary for Food and Consumer Services.

BILLING CODE 3410-30-M

Rural Electrification Administration

Development of Direct Buried Field Splice Closures for Buried Telephone Cables

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice.

SUMMARY: The Rural Electrification Administration (REA) is notifying interested parties that funds are available for the partial financing of a research and development project to develop and make available on the market a direct burial splice closure for buried telephone cable that will:

1. Eliminate damage from direct exposure to rain, snow, ice, storms, floods, temperature extremes, sunlight and minimize damage from other natural forces;

2. Be dependable and craftible; and

3. Eliminate much of the need for above-ground pedestals, which have high maintenance cost and are a form of visual pollution.

The notice outlines the type of proposal the REA is particularly interested in funding and sets forth the basic standards which will be used in determining which proposal if any, will ultimately be funded by the REA.

Dated: June 12, 1979.

Joseph Vellon,

Acting Administrator.

NOTICE: Notice is hereby given that, in accordance with all applicable laws and regulations, applications will be accepted from all interested and eligible parties for a grant to partially fund the development of a direct buried field splice closure system for buried telephone cable.

Background

The Rural Electrification Administration (REA) is a federal lending agency which finances electric and telephone facilities in rural areas. The REA was established on May 11, 1935, by Executive Order of the President as an emergency relief program. Statutory authority was provided by the Rural Electrification Act of 1936, which established REA as a lending agency with responsibility for developing a program for rural electrification. On October 28, 1949, amendment to the Act authorized REA to make loans to improve and extend telephone service in rural areas.

Telephone loans may be made to telephone companies, to public bodies and to cooperative nonprofit, limited-dividend or mutual associations. The agency also provides engineering and management assistance to its borrowers. Under Section 11 of the Rural Electrification Act and under the Federal Grant and Cooperative Agreement Act of 1977, the Administrator is authorized to make such expenditures as are appropriate and necessary to carry out the provisions of the Rural Electrification Act.

It has been determined by appropriate telephone program officials that there is a need to assist REA telephone borrowers by stimulating the industry in perfecting a buried telephone cable splice closure system. Although there have been significant advances made in the field of direct buried cable design and methods of construction, there has been no comparable advancement in the development of splice closures either above or below ground.

In recent years the public has been demanding a buried cable splice closure that would be more pleasing in appearance or, better yet, "out of sight." The ideal closure should reduce damage from exposure to the elements, resist damage from vandalism, and should not be a source of visual environmental

pollution. At the same time, it is important that these features be provided without a significant increase in cost.

Currently known direct burial splice cases are unreliable due primarily to craftibility problems. For this reason telephone companies have relied on using above ground pedestals for splice protection, regardless of their higher overall initial installation cost, unsightly appearance, high trouble rates and vulnerability to vandalism.

In an effort to assist its telephone borrowers in providing better service to their customers, REA needs to take a leadership role in the development of an improved direct burial splice closure that will be dependable and craftible. The availability of such an item would result in direct savings to REA borrowers since both initial installation cost and maintenance costs would be greatly reduced.

REA is unable to develop this splice closure "in-house" due to a lack of research personnel and the necessary research and development facilities.

Therefore, a total of $180,000 has been made available for a grant to an eligible and capable state or local agency, nonprofit institution, university, or other public or private organization to partially fund the cost of developing, testing and proving the craftibility and marketability of the buried splice case. Proposals submitted in response to this notice should include in the budget outline the amount and sources of funding to be made available by the prospective grantee in support of the project.

Objectives and Outline

The objective of this project is the design of an improved direct burial splice closure that will:

1. Eliminate damage from direct exposure to rain, snow, ice, steams, floods, temperature extremes and sunlight, and minimize damage from other natural forces;

2. Be dependable and craftible; and

3. Eliminate much of the need for above ground pedestals, which have high maintenance cost and are a form of visual pollution.

The design and development of the splice case shall be in conformance with the following requirements and performance specifications:

1. The completed closure shall meet all requirements in REA Specification PE-74 (copies available from REA on request). In addition, the closure should meet other listed requirements contained herein.

2. The closure series shall accept cables from 0.2" to 4" outside diameter.

3. The closures series shall allow for straight, branch and butt splice configurations. These are deined as follows:

Straight—An opening is provided for only one cable to enter each end of the closure.
Branch—Openings are provided for two cables to enter each end of the closure.
Butt—Openings are provided such that two or more cables enter one end of the closure and no cables enter the other end of the closure.

Note: All splice closure shall be capable of accommodating at least 4 buried service wires.

4. The closure shall have optional provisions to accommodate single or double jacketed cable or a mixture of both.

5. The closure must be fire retardant and not emit toxic fumes if scorched or burned.

6. The closure together with its filling compound shall exclude moisture from the splice bundle.

7. Assembly of the splice case shall be a one-man operation. Special training of over 2 hours shall not be required for a telco craftsperson to assemble the closure.

8. The splice closure kit shall contain all materials that will be needed to close the splice. This should include all tapes, mechanical strength bars, fasteners, etc. All materials called for in the installation instructions must be included in the kit, with the exception of telco standard shield bonding connectors and harnesses.

9. No external heat or power sources shall be needed for assembly.

10. The use of specialized tools or equipment not normally at the craftsperson's disposal should be avoided, unless justifiable by the overall cost of the system, or for protection from tampering.

11. The final closing of the closure shall use a minimal number of screws, bolts or locking devices. The tightening shall not be critical as to sequence and torque.

12. The completed closure must meet the corrosive test requirements in the specifications mentioned above.

. The closure must be rodent proof and resistant to environmental damage.

14. The splice case design shall permit the use of cable shield bonding clamps and harnesses of the types and conductivity complying with REA Specification PE-33.

15. The closure must be rigid. When a uniform distributed weight of 200 pounds is placed on the upper rigid surface of the closure for 15 minutes, the diameter of the closure must not deform more than 10 percent at both −18° C and +38° C. The encapsulant or filling compound shall not fracture.

16. If the closure design is based on the use of inside-out filling materials, it is desirable, but not essential, that it form a watertight seal with the cable jacket and with itself if split halves or screw on types are used. If it uses an outside—in filling material, then a watertight seal at the cable jacket is a requirement.

17. The filling material must be chemically compatible with all splicing connectors shown in the "REA List of Materials" as well as cable filling and floodent materials covered in REA Specifications PE-39 and PE-52.

18. The filling compound must also be chemically compatible with the cable conductor insulations and cable jackets of REA Specification PE-39.

19. Buried splice closures for use with feeder cable, distribution cable junctions, or service entrance junctions shall be re-enterable. Re-enterability shall not require solvents for the filling compound. Access to center pairs should not require a longer period of time than the original filling operation.

20. Except as outlined in Paragraph 18, the filling compound shall adhere to outer cable jackets covered in REA Specification PE-39.

21. The filling compound shall not be two or more parts, requiring field mixing. It should not become rigid and must be able to be applied between −18°C and 50°C use metric without external heat.

22. How well the cable filling compound has been cleaned from conductors shall not be critical to splice case performance.

23. A chart shall be set up relating closure size to recommended cable size. When using the largest size cable recommended for a closure, the complete conductor splice bundle (including splice locator if used) shall not occupy more than 75 percent of the splice closure working volume.

Note: A splice locator is not part of the closure design.

24. The splice closure shall be clearly marked as to the manufacturer, model number and date of manufacture.

25. Clear and concise installation instructions shall be included.

26. Methods of testing the completed splice, from wire connection to completed splice shall be included in the instructions.

27. A Material Safety Data Sheet regarding the filling compound must be submitted to REA for review and all packaging shall be properly labeled as

to any safety precautions required when using the compound.

Craftability Test

The splices closure must pass craftability testing as follows:

Ten splice are to be completed by ten different craftspersons selected by REA, using only the instruction sheets provided with the splice kits. Splice kits shall be forwarded by the Grantee to addresses provided by REA.

These completed closures shall then be tested in accordance with selected tests outlined specified in Item 20 above.

Upon passing the craftability test, the Grantee will be required to test the ten (10) completed closures against the design and development requirements and performance specifications outlined in above.

Application Procedures

An original and two copies of the application for a grant shall be submitted on Form AD-623, "Application for Federal Assistance (Non-Construction Programs)." Copies of this Form may be obtained from:

Contracting Officer, Rural Electrification Administration, U.S. Dept. of Agriculture, Room 4024 South Agri. Bldg., Washington, D.C. 20250, Phone (202) 447-8140.

The completed application must be received at the above address no later than 45 days after publication of this notice.

Applications should include:

1. Project Summary (See Below)
2. Project Description (See Below)
3. Location where project will be conducted
4. Time schedule for completion
5. Capability of the applicant to conduct the project, based on:
   a. Qualifications of staff;
   b. Availability of necessary facilities, staff and other resources; and
   c. Previous experience in similar projects.
6. Budget statement, in detail, for entire grant period, including funds to be used other than approved grant funds.
7. Provisions for submitting a final report to REA which:
   a. Outlines the results of the project;
   b. Explains how the objectives were met;
   c. Includes copies of printed materials and other by-products of the project; and
   d. Provides a financial statement showing amount actually expended under each budget heading listed in the original project plan.

Project Summary

The Project Summary should be one or two pages long and should focus on overall objectives and goals, relevance and significance of the project and the applicants approach to the project.

The Project Summary is not intended for publication, so it should be written in language which will be meaningful to others in the field of telecommunications.

Project Description

The project summary should be followed by a more detailed statement of the research to be undertaken and how it will relate to the program objectives. Such a statement should include:

objectives and expected significance; relation to the present state of knowledge in the field and to previous work done on this project and to related work in progress elsewhere; and a bibliography of pertinent literature. A description of experimental methods and procedures should be included. Brevity is desirable, but not at the sacrifice of important information needed for evaluation. To the extent possible, the project description should conform to the following outline:

1. *Introduction.* State the overall objectives, review the most significant previous work and describe the current status of research in the field of buried splice closures.

2. *Rationale.* Present concisely the rationale behind the proposed plan. Discuss any novel ideas or extra contributions expected, if any.

3. *Methodology.* Give details of the development plan, including a description of the experiments or other work proposed; methods and techniques to be employed; the kinds of results expected; and the means by which the data will be analyzed and interpreted. Include a discussion of problems that might be encountered. Point out any procedures, situations or materials that may be hazardous to personnel and the precautions to be exercised. Indicate a tentative schedule for the completion of the project.

4. *Facilities and Equipment.* Describe the facilities available for this project. List major items of instrumentation and equipment which will be made available for the necessary design, testing and other research and development activities.

5. *Collaborative Arrangements.* If the proposal requires collaboration with other organizations, describe the extent of collaboration and provide evidence to assure application reviewers that the organizations involved are in agreement.

Proposal Review and Evaluation

Proposals received as a result of this notice will be evaluated for technical excellence by an ad hoc committee in REA consisting of individuals who are considered expert in the field of telecommunications systems. Proposals will also be reviewed by members of the Management Services Division Staff to assure conformance with government-wide grant policies. Applicants who have not previously done so must furnish the basic organizational information and assurances prescribed in Appendix I.

Applications (proposals) will be evaluated under the following criteria:

1. Technical excellence of the proposal, including the suitability and feasibility of the proposed approaches and methodology
2. Probable effectiveness in achieving the project objectives
3. Qualifications of the project leader and other assigned personnel
4. Adequacy of available or obtainable facilities, equipment, instrumentation and technical support.

Grant Award and Administration

The proposal judged most meritorious under the above criteria will be awarded a grant not to exceed one hundred thousand dollars ($100,000). In order to provide optimum freedom for research and development activities, the grant will be awarded under terms and conditions which are as minimal and flexible as possible, consistent with the need to ensure that Federal funds are wisely spent for the intended purposes. The grant will be administered under the provisions of OMB Circular A-102 or A-110, with necessary modifications and additional general provisions as negotiated.

Patent Rights

The following patent provisions will apply to any grant awarded as a result of this notice:

The rights to any patentable items, processes or inventions resulting from this grant will accrue to the grantee. However, the Government shall reserve a royalty-free, non-exclusive license to such items, processes or inventions for Government purposes. Furthermore, since the primary purpose of this grant is to stimulate the industry for the benefit of REA borrowers, the Grantee, as holder of these patent rights, agrees to license other interested capable manufacturers, at a reasonable fee, to manufacture and market such patented

items required to assure the availability of the closure system on the open market.

The Rural Electrification Administration expects to announce the recipient and the amount of grant award, if any, within seventy-five (75) days after publication of this notice.

Appendix I

Organizational Information and Assurances

A. Federal Standards.

1. OMB standards. Although not specifically applicable to research support under grants, Subpart 1–1.12 of the Federal Procurement Regulations (FPR) establishes the policy that contracts shall be awarded only to responsible prospective contractors. It prescribes minimum standards and requires acceptable evidence of a contractor's ability to obtain equipment, facilities, and personnel. Comparable standards applicable to colleges and universities, hospitals, and other quasi-public and private nonprofit organizations are contained in three attachments to OMB Circular A–110. These are:

F—Standards for Financial Management Systems,
O—Procurement Standards, and,
N—Property Management Standards.

2. Title VI of the Civil Rights Act of 1964. Title VI of the Civil Rights Act of 1964 provides that no person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federeal financial assistance. A USDA regulation implementing this requirement is published at 7 CFR Part 15, Subpart A. Every submitting organization is required to have an Assurance of Compliance (see format below) on file with REA before a grant may be made to that organization.

Prospective grantees may reproduce the Assurance of Compliance format. The "applicant" referred to in the form is the organization itself whose Chief Executive Officer or comparable official should sign the Assurance. The name and title of the organization and of the official should be typed on the form. The signed original should be mailed as in 3, below. Once a properly executed form has been filed with REA, it will cover all future proposals to REA. Acceptance of a subsequent grant constitutes affirmation that the Assurance of Compliance will be fully applicable to the grant.

B. Prospective Grantee Organizational Information.

The following information is to be submitted: (a) The commonly-used name of the organization, together with the legal (registered) name, if different, and mailing address.

(b) Organization type. Indicate the organizational type, e.g., private university, etc. If a U.S. college or university, show the Federal Interagency Committee on Education (FICE) code and category of control or affiliation as shown in the most recent DHEW Education Directory of Colleges and Universities.

(c) Federal Employer Identification No. Employer identification number as assigned by Internal Revenue Service.

(d) Congressional District.

(e) Organization Affiliations. Describe relationship of the organization to a parent organization or to subsidiaries or other affiliates. If the organization is a successor in interest to a predecessor or if changes in organizational affiliation are anticipated, describe briefly.

(f) Statement of Purposes and Powers. Enclose an official or published statement of the major purposes of the organization and certify as required in C, below, as to the powers which have been granted to it to enter into contractual relationships and/or to accept grants (e.g., articles or incorporation, terms of reference, or by-laws).

(g) Key officials. List the name, title, address, and telephone number of the following officials and their alternates (if any):

(1) Chief Executive Officer;

(2) Authorized Organizational Representative; and

(3) Business Officer.

(h) Affiliations of Key Officials. If the organization is other than a college or university or a State of local government, indicate whether or not each official listed in (g) above is affiliated with any Federal, State, or local agency or with any college or university. If so, describe such affiliation.

(i) Whether or not the organization currently is a grantee or contractor of any component of the U.S. Department of Health, Education, and Welfare.

NOTE—This information will assist in implementing certain interagency procedures for which DHEW is the lead agency.

(j) A copy of the most recent indirect cost agreement negotiated between the organization and some Federal agency or, if lacking such an agreement, an indirect cost rate proposal.

(k) If other than a college or university or a State or local government, also submit the following:

(1) A certified statement of financial condition covering at least the preceding 2 years; and

(2) Bank or other references.

C. Required Certifications.

In addition to the basic information described above, REA requires that a prospective grantee organization submit a certification substantially as follows, signed by the Chief Executive Officer or authorized organizational representative:

(a) I certify that (name of institution or organization) has legal authority to accept grants as evidenced by the attached (describe document), and the requisite policies, procedure, and personnel to ensure stewardship of Federal funds and management of Federally supported projects, specifically including standards for financial management, procurement, and property management, which meet those described in Attachments F, O, and N to OMB Circular A–110 (Note: in the event this is not the case, list exceptions and provide a realistic estimate of when such standards might be met.)

(b) Each proposal will be consistent with the policies and goals of ———— and will be submitted in accordance with its procedure and pursuant to appropriate authority.

(c) In the event that a grant is awarded as a result of any such proposal, I agree that ———— will:

(1) Make available the necessary facilities, equipment, services, and personnel to conduct the project substantially as outlined in the proposal or such modifications thereof as may be mutually agreed;

(2) Conduct such project oversight as may be appropriate, manage the Federal funding with probity and prudence, and comply with the terms and conditions of the grant; and

(3) Comply with applicable laws and regulations.

(d) I further affirm that the "Assurance of Compliance with Department of Agriculture Regulations under Title VI of the Civil Rights Act of 1964," attached, will be fully applicable to any such grants.

_____
(Signature.)

_____
(Typed name and title.)

_____
(Date.)

Assurance of Compliance With the Department of Agriculture Regulations Under Title VI of the Civil Rights Act of 1964

_____ (hereinafter called the "Applicant") hereby agrees that it will comply with Title VI of the Civil Rights Act of 1964 and all requirements imposed by or pursuant to the Regulations of the Department of Agriculture, 7 CFR Part 15, Subpart A, issued pursuant thereto, to the end that, in accordance with Title VI of that Act and the regulations, no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the Applicant receives Federal financial assistance from the Department of Agriculture; and hereby gives assurance that it will immediately take any measures necessary to effectuate this agreement.

This assurance is given in consideration of and for the purpose of obtaining any and all Federal grants, loans, contracts, property, discounts or other Federal financial assistance extended after the date hereof to the Applicant by the Department, including installment payments after such date on account of applications for Federal financial assistance which were approved before such date. The Applicant recognizes and agrees that such Federal financial assistance will be extended in reliance on the representations and agreements made in the assurance, and that the United States shall have the right to seek judicial enforcement of this assurance. This assurance is binding on the Applicant, its successors, transferees, and assignees, and the person or persons whose signatures appear below are authorized to sign this assurance on behalf the Applicant.

BILLING CODE 3410-15-M

CIVIL AERONAUTICS BOARD

Compania de Aviacion "Faucett," S. A.; Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed under Subpart Q of the Board's Procedural Regulations

Notice is hereby given that, during the week ended CAB has received the applications listed below, which request the issuance, amendment, or renewal of certificates of public convenience and necessity or foreign air carrier permits under Subpart Q of 14 CFR Part 302.

Answers to foreign permit applications are due 28 days after the application is filed. Answers to certificate applications requesting restriction removal are due within 14 days of the filing of the application. Answers to conforming applications in a restriction removal proceeding are due 28 days after the filing of the original application. Answers to certificate applications (other than restriction removals) are due 28 days after the filing of the application. Answers to conforming applications or those filed in conjunction with a motion to modify scope are due within 42 days after the original application was filed. If you are in doubt as to the type of application which has been filed, contact the applicant, the Bureau of Pricing and Domestic Aviation (in interstate and overseas cases) or the Bureau of International Aviation (in foreign air transportation cases).

Subpart Q Applications

Date filed	Docket No.	Description
June 5, 1979	35755	Compania de Aviacion "Faucett," S. A., c/o John S. Lowe, Esq., Rhoads and Lowe, 1211 Connecticut Avenue, N.W., Washington, D. C. 20036. Application of Compania de Aviacion "Faucett," S.A. pursuant to section 402 of the Act for amendment of its foreign air carrier permit so as to: a. Add thereto authority: To engage in scheduled foreign air transportation with respect to persons between Iquitos (Peru), the intermediate point Panama City, Panama, and the terminal point Miami, Florida; b. Otherwise conform the permit to the terms of the aeronautical agreement between the Republic of Peru and the United States. Answers to the Application due on July 3, 1979.
June 6, 1979	35756	Ozark Air Lines, Inc., Lambert-St. Louis International Airport, St. Louis, Missouri 63145. Application of Ozark Air Lines, Inc. requests the Board pursuant to Section 401 of the Act for amendment of its certificate of public convenience and necessity for Route 107 so as to authorize it to engage in nonstop scheduled air transportation of persons, property, and mail in the following city-pair markets between: Boston — Miami, Fort Lauderdale New York — Miami, Fort Lauderdale, Orlando, Tampa, West Palm Beach Newark — Fort Lauderdale, Orlando, Tampa, Miami, West Palm Beach Philadelphia — Miami, Fort Lauderdale Pittsburgh — Miami, Fort Lauderdale Washington — Miami Indianapolis — Tampa, Fort Lauderdale Cincinnati — Miami Columbus — Fort Lauderdale, Tampa St. Louis — Sarasota, West Palm Beach, Jacksonville, Daytona Answers due on June 22, 1979.

Phyllis T. Kaylor,
Secretary.

BILLING CODE 6320-01-M

Federal Express Corp.; Application for Tariff-Filing Authority: Pickup and Delivery Zone

June 8, 1979.

In accordance with Part 222 (14 CFR Part 222) of the Board's Economic Regulations, notice is hereby given that the Civil Aeronautics Board has received an application, Docket 35758, from Federal Express Corporation to file tariffs for pickup and delivery service for points beyond 25 miles of the airport being served.

Under the provisions of § 222.3(c) of Part 222, interested persons may file an answer in opposition to this application on or before July 2, 1979. An executed original and nineteen copies of such answer shall be addressed to the Docket Section, Civil Aeronautics Board.

Washington, D.C. 20428. It shall set forth in detail the reasons for the position taken and include such economic data and facts as are relied upon. The answer shall be served upon the applicant and state the date of such service.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

Newark Show-Cause Proceeding

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order 79-6-79, Newark Show-Cause Proceeding.

SUMMARY: The Board is proposing, on its own initiative, to grant nonstop authority to any fit, willing and able applicant desiring to serve any domestic or overseas-Newark International Airport market that files an illustrative service proposal within 21 days and whose fitness can be established by officially noticeable data. The Board tentatively found that increased service to Newark is consistent with the public convenience and necessity since the concentration of schedules at other New York Airports has discouraged the use of the Newark Airport by passengers who would otherwise find this Airport comparably or more conveniently located. Further, the Board tentatively determined that this proposal would support the efforts of local and regional planning and airport authorities to promote the use of the underutilized Newark facility as a response to the overcrowding at LaGuardia and Kennedy Airports. Finally, the Board tentatively concluded on the basis of a concurrently published environmental assessment that its proposed action would not be a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the Environemtal Policy Act. The complete text of this order is available as noted below.

DATES: Applications: Any fit, willing and able carrier whose fitness can be established by officially noticeable data on file with the Board may file, and serve on all parties listed below, an application accompanied by an illustrative service proposal for any domestic or overseas-Newark market no later than July 5, 1979.

Objections: All interested persons having objections to the Board issuing the proposed authority shall file, and serve upon all parties listed below, and any affected applicant, no later than July 30, 1979, statements of objections, together with a summary of the testimony, statistical data, and other material expected to be relied upon to support the stated objections.

ADDRESSES: Applications, objections or additional data should be filed in Docket 35805, Docket Section, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: Susan B. Jollie, Trial Attorney, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; (202) 673-5010.

SUPPLEMENTAL INFORMATION: Applications and Objections should be served upon the Port Authority of New York and New Jersey, the Tri-State Regional Planning Commission, the Mayor of Mewark, New Jersey, and the governor of New Jersey.

The complete text of Order 79-6-79 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, NW., Washington, D.C. Persons outside the metropolitan Washington, D.C., area may send a postcard request for Order 79-6-79 to the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: June 11, 1979.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

Bureau of the Census

Special Censuses

The Bureau of the Census conducts a program whereby a local or State government can contract with the Bureau to conduct a special census of population. However, because of the need to avoid conflicts with activities involving the conduct of the 1980 census, no additional special censuses will be conducted during the period from August 1, 1979 to January 1, 1981. The Bureau is, therefore, not accepting requests for cost estimates for special censuses at this time. Beginning in the fall of 1980 the Bureau will resume accepting such requests.

The content of a special census is ordinarily limited to questions on household relationship, age, race, and sex, although additional items may be included at the request and expense of the sponsor. The enumeration in a special census is conducted under the same concepts which govern the decennial census.

Summary results of special censuses are published semiannually in the *Current Population Reports*—Series P-28, prepared by the Bureau of the Census. For each area which has a special census population of 50,000 or more, a separate publication showing data for that area by age, race, and sex is prepared. If the area has census tracts, these data are shown by tracts.

The data shown in the following table are the results of special censuses conducted since June 30, 1978, for which tabulations were completed between April 1, 1979 and April 30, 1979.

Dated: June 12, 1979.

Daniel B. Levine,

Acting Director, Bureau of the Census.

State/place special area	County	Date of census	Population
Alabama: Hamilton city	Marion	January 22	4,999

BILLING CODE 3510-07-M

1977 Census of Manufactures Supplemental Inquiry of Consumption of Materials, Parts, Containers, and Supplies; Determination

In conformity with title 13, United States Code, sections 193 and 225, and due notice having been published on March 29, 1979 (44 FR 18719), I have determined that the data received from this supplement will provide basic statistical data for use in preparing the input-output tables. These tables provide the benchmark for the regular gross national product estimates. The input-output tables also indicate the intermediate flows of goods and services among industry groups. Knowledge of the intermediate flows of goods and services facilitates the study of the impact of changes in the relative importance of the final markets on various industries and the labor forces. These data are also of importance in the computation of the net output per employee-hour indexes, prepared by the Bureau of Labor Statistics (BLS). (The numerator of these indexes is from the Bureau of Economic Analysis studies of net output and the denominator is from BLS studies of employee-hours.) Additionally, the data will be of use in the development of the new Producer Price Index (formerly the Wholesale Price Index). These data are not available from other governmental or nongovernmental sources.

This survey is a supplement to the 1977 Census of Manufactures and will request supplementary information on materials consumed. Data will be collected from a sample of manufacturing establishments and the selection of establishments will be determined on an industry-by-industry basis. This procedure insures that the reporting burden will not fall on the smaller establishments that generally consume a smaller portion of materials for production purposes.

Copies of the report forms are available upon request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed this supplement be conducted for the purpose of collecting the data hereinabove described.

Dated: June 12, 1979.

Daniel B. Levine,

Acting Director, Bureau of the Census.

[FR Doc. 79-18681 Filed 6-14-79; 8:45 am]

BILLING CODE 3510-07-M

1977 Census of Mineral Industries Supplemental Inquiry of Supplies Used; Determination

In conformity with title 13, United State Code, sections 193 and 225, and due notice having been published on March 23, 1979 (44 FR 17765), I have determined that the data received from this supplement will provide basic statistical data for use in preparing the input-output tables. These tables provide the benchmark for the regular gross national product estimates. The input-output tables also indicate the intermediate flows of goods and services among industry groups. Knowledge of the intermediate flows of goods and services facilitates the study of the impact of changes in the relative importance of the final markets on various industries and the labor forces. These data are also of importance in the computation of the net output per employee-hour indexes, prepared by the Bureau of Labor Statistics (BLS). (The numerator of these indexes is from the Bureau of Economic Analysis studies of net output and the denominator is from BLS studies of employee-hours.) Additionally, the data will be of use in the development of the new Producer Price Index (formerly the Wholesale Price Index). These data are not available from other governmental or nongovernmental sources.

This survey is a supplement to the 1977 Census of Mineral Industries and will request supplementary information on supplies used. Data will be collected from a sample of mineral establishments and the selection of establishments will be determined on an industry-by-industry basis. This procedure insures that the reporting burden will not fall on the smaller establishments that generally consume a smaller portion of supplies for production purposes.

Copies of the report forms are available upon request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed this supplement be conducted for the purpose of collecting the data hereinabove described.

Dated: June 12, 1979.

Daniel B. Levine,

Acting Director, Bureau of the Census.

BILLING CODE 3510-07-M

Economic Development Administration

Petitions by Ten Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions have been accepted for filing from ten firms: (1) H. Freeman & Son, Inc., 33rd & Arch Streets, Philadelphia, Pennsylvania 19104, a producer of men's suits and coats (accepted June 4, 1979); (2) Columbian Rope Company, 1 Columbian Drive, Auburn, New York 13021, a producer of rope (accepted June 5, 1979); (3) Alps Sportswear Manufacturing Company, Inc., 15 Union Street, Lawrence, Massachusetts 01840, a producer of men's sweaters (accepted June 5, 1979); (4) Renee Manufacturing Company, Inc., 6634 Woodland Avenue, Philadelphia, Pennsylvania 19142, a producer of women's tops, pants and skirts (accepted June 6, 1979); (5) Paterson Cloaks & Suit Company, Inc., 238 Lewis Street, Paterson, New Jersey 07503, a producer of women's coats (accepted June 6, 1979); (6) L. W. Foster Sportswear Company, Inc., Hancock & Westmoreland Streets, Philadelphia, Pennsylvania 19140, a producer of men's suits and sportcoats (accepted June 6, 1979); (7) David Witherspoon, Inc., 901 Old Maryville Pike, P.O. Box 800, Knoxville, Tennessee 37901, a recycler of scrap metal with an affiliate producing steel bars (accepted June 6, 1979); (8) Dante Jewels, Inc., 580 Fifth Avenue, New York, New York 10036, a producer of jewelry (accepted June 7, 1979); (9) Cody Knitting Mill, Inc., 1130 Wyckoff Avenue, Brooklyn, New York 11227, a producer of women's sweaters (accepted June 7, 1979); and (10) Reece Foods, Inc., 336 West Marion Street, Mt. Victory, Ohio 43340, a processor of mushrooms (accepted June 7, 1979).

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request

a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than June 25, 1979.

Jack W. Osburn, Jr.,

Chief, Trade Act Certification Division, Office of Eligibility and Industry Studies.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1979; Proposed Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Deletion from Procurement List.

SUMMARY: The Committee has received a proposal to delete from Procurement List 1979 a commodity produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: July 18, 1979.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

It is proposed to delete the following commodity from Procurement List 1979, November 15, 1978 (43 FR 53151):

Class 7520

Pencil, Mechanical, 7520-00-634-3475

C. W. Fletcher,

Executive Director.

BILLING CODE 6820-33-M

Procurement List 1979; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1979 commodities to be produced by and service to be provided by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: July 18, 1979.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and service listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and service to Procurement List 1979, November 15, 1978 (43 FR 53151):

NO NSN

Toothbrush, Aspiration

Class 8445

Belt, Trousers, Cotton Webbing with Clip
8445-01-068-8239
8445-01-068-8340

SIC 7399

Packaging—Canteen Water Disposable, 1-Quart (8465-01-082-6854)

BILLING CODE 6820-33-M

Procurement List 1979; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1979 commodities to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: June 15, 1979.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On March 2, 1979 and April 16, 1979 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (44 FR 11821 and 44 FR 22508) of proposed additions to Procurement List 1979, November 15, 1978 (43 FR 53151).

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

Accordingly, the following commodities are hereby added to Procurement List 1979:

Class 7530

Folder, File
7530-00-286-8571
7530-00-286-7286

Folder Set, File
7530-00-286-7080
7530-00-286-7244
7530-00-286-7253
7530-00-286-7287
7530-00-286-8570

Class 8530

Catheter, Male, External
8530-00-NIB-0001 A
8530-00-NIB-0001B
(Total requirements for Veterans Administration only)

Class 7930

Glass Cleaner, 7930-00-801-5910

Army Department

Intent To Prepare a Draft Environmental Impact Statement for a Proposed Bank Stabilization Permit, Colorado River, near Blythe, Calif.

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: 1. Permit applicant proposes to emplace 4,000 linear feet of rock riprap to stabilize the bank of a 144-acre parcel prior to residential development.

2. Alternatives include no project, or alternative methods of erosion protection such as bulkheading.

3. Scoping Process:

a. Affected Federal, State, and local agencies, affected Indian tribes, and other interested private organizations

and parties are invited to participate. A Draft Environmental Impact Statement will be sent or made available to all interested parties and all comments will be addressed in the Final Environmental Impact Statement.

b. Significant issues include shortage of adequate housing, public recreational access to the Colorado River, and wildlife habitat.

4. No scoping meeting will be held.

5. DEIS estimated to be available to the public 1 July 1979.

ADDRESS: Questions about the proposed action and DEIS can be answered by:

Glenn A. Emigh, Environmental Resources Branch, U.S. Army Corps of Engineers, Los Angeles District, P.O. Box 2711, Los Angeles, California 90053.

Dated: May 18, 1979.

Gwynn A. Teague,
Colonel, CE, District Engineer.

Office of the Secretary

Defense Science Board Task Force on Naval Surface Ship Vulnerability; Advisory Committee Meeting

The Defense Science Board Task Force on Naval Surface Ship Vulnerability will meet in closed session on 12 July 1979, The Pentagon, Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

A meeting of the Defense Science Board Task Force on Naval Surface Ship Vulnerability has been scheduled for 12 July 1979 to review, evaluate, and summarize the vulnerability of naval surface ships with consideration of their effectiveness in carrying out future naval missions.

In accordance with 5 U.S.C. App. I § 10(d) (1976), it has been determined that this Defense Science Board Task Force meeting concerns matters listed in 5 U.S.C. § 552b(c)(1) (1976), and that accordingly this meeting will be closed to the public.

H. E. Lofdahl,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

BILLING CODE 3810-70-M

Per Diem, Travel and Transportation Allowance Committee; Publication of Per Diem Rate Changes

AGENCY: Per Diem, Travel and Transportation Allowance Committee, DoD.

ACTION: Publication of Changes in Per Diem Rates.

SUMMARY: The Per Diem, Travel and Transportation Allowance Committee is publishing Civilian Personnel Per Diem Bulletin Number 86. This bulletin lists changes in per diem rates prescribed for U.S. Government employees for official travel in Alaska, Hawaii, Puerto Rico, the Canal Zone, and possessions of the United States. Bulletin Number 86 is being published in the Federal Register to assure that travelers are paid per diem at the most current rates.

EFFECTIVE DATE: June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Frederick W. Weiser, 325-9330.

SUPPLEMENTARY INFORMATION: This document gives notice of changes in per diem rates prescribed by the Per Diem, Travel and Transportation Allowance Committee for non-foreign areas outside the continental United States. Distribution of Civilian Per Diem Bulletins by mail was discontinued effective June 1, 1979. Per Diem Bulletins published periodically in the Federal Register now constitute the only notification of changes in per diem rates to agencies and establishments outside the Department of Defense.

The text of the Bulletin follows:

Civilian Personnel Per Diem Bulletin Number 86

To the Heads of Executive Departments and Establishments

Subject: Table of maximum per diem rates in lieu of subsistence for United States Government civilian officers and employees for official travel in Alaska, Hawaii, the Commonwealth of Puerto Rico, the Canal Zone, and possessions of the United States.

1. This bulletin is issued in accordance with Memorandum for Heads of Executive Departments and Establishments from the Deputy Secretary of Defense dated August 17, 1966, SUBJECT: Executive Order 11294, August 4, 1966, "Delegating Certain Authority of the President to Establish Maximum Per Diem Rates for Government Civilian Personnel in Travel Status" in which this Committee is directed to exercise the authority of

the President (5 U.S.C. 5702(a)(2)) delegated to the Secretary of Defense for Alaska, Hawaii, the Commonwealth of Puerto Rico, the Canal Zone, and possessions of the United States. When appropriate and in accordance with regulations issued by competent authority, lesser rates may be prescribed.

2. The maximum per diem rates shown in the following table are continued from the preceding Bulletin Number 85 except in the case identified by an asterisk which rate is effective on the date of this Bulletin. The date of this Bulletin shall be the date the last signature is affixed hereto.

3. Each Department or Establishment subject to these rates shall take appropriate action to disseminate the contents of this Bulletin to the appropriate headquarters and field agencies affected thereby.

4. The maximum per diem rates referred to in this Bulletin are:

Locality	Maximum rate
Alaska:	
Adak [1]	$0.65

BILLING CODE 3810-70-M

DEPARTMENT OF ENERGY

Requests for Interpretation Filed With the Office of General Counsel; Months of April and May 1979

Notice is hereby given that during the months of April and May 1979, the requests for interpretation listed in the Appendix to this notice were filed pursuant to 10 CFR Part 205, Subpart F with the Office of General Counsel, Department of Energy (DOE). Notice of subsequently received requests will be published at the end of each calendar month. Copies of the requests for interpretion listed herein are on file in and should be obtained from the DOE's Public Reading Room, Information Access Office, Room GA-152, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-5968.

The statement of issue that follows

each request for interpretation listed in the Appendix is not intended to be definitive or final. Rather, the issue statement should be regarded as the initial restatement by the DOE of the question that appears to have been presented for resolution. The issue may, of course, be refined and modified during the interpretative process.

Interested parties may submit written comments on the listed interpretation requests on or before July 16, 1979. Comments should be identified on the outside envelope and on documents submitted with the file number of the interpretation request and all comments should be filed with the Office of General Counsel, Department of Energy, Room 1111, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, Attention: Diane Stubbs. Aggrieved parties, as defined in 10 CFR 205.2, will continue to receive actual notice of pending interpretation requests in accordance with the current practice of the Office of General Counsel.

For further information contact Diane Stubbs, Office of General Counsel, 12th and Pennsylvania Avenue, NW., Room 1111, Washington, D.C. 20461, (202) 633-9070.

Everard A. Marseglia, Jr.,
Assistant General Counsel for Interpretations and Rulings.
June 11, 1979.

Appendix.—List of Requests for Interpretation Received by the Office of General Counsel

[Months of April and May 1979]

Dated Received	Name and location of requestor	File No.
April 2	Triad Oil Co., Gene A. Farber, Evans, Farber & Fransbergar, 249 Pacific Avenue, San Francisco, Calif. 94133. Issue: Does a wholesale purchaser-reseller qualify as a new purchaser entering into business in May 1978 within the meaning of Paragraph (h)(3) of Standby Regulations Activation Order No. 1 and 10 CFR 211.13[illegible] if it purchased certain assets from a commission agent that had gone out of business six months earlier?	A-398
April 3	Edmondson Oil, Harold Hancock, P.O. Box 818, South Boston, Va. [illegible]	A-399
	Issue: Does a wholesale purchaser-reseller's failure to meet the payment obligations of its predecessor constitute a breach of the normal business practice rule (10 CFR 210.62) for which the supplier may suspend deliveries of motor gasoline?	
April 13	Texaco, Inc., Stephen H. Bard, 2000 Westchester Ave., White Plains, N.Y. 10650.	A-400
	Issue: Where high sulfur crude oil is desulfurized in Caribbean or other foreign refineries, is such desulfurized crude regarded as "crude oil" for purposes of the entitlements program (10 CFR 211.67) if it is imported into the United States?	
April 13	The Gulf Companies, Karen M. Richardson, P.O. box 2725, Houston, Tex. 77001.	A-401
	Issue: Do the amendments to 10 CFR 212.93, 41 FR 54919 (December 16, 1976), effective December 1, 1976, give a refiner the option of calculating increased costs of purchased product in accordance with the amendments as of January 1976?	
April 13	Bert's Service and Dan's Service, Bert's Service, 1000 Washington Ave., So., Minneapolis, Minn. 55415.	A-402
	Issue: Are service station operators who purchase motor gasoline and resell it to end-users and pay substantially all operating expenses considered wholesale purchaser-resellers and retailers as those terms are defined in 10 CFR 211.51 and 212.31?	
April 13	Mobil Oil Corp., R. Bruce McLean, Edward L. Rubinoff, Akin, Gump, Hauer & Feld, 1333 New Hampshire Ave., NW., Washington, D.C. 20036.	A-404
	Issue: Is a refiner permitted by the Special Propane Rule of 10 CFR 212.83(2)(3) to pass through greater increased product costs to its retail and independent marketer classes of purchaser so long as it calculates its unrecouped increased costs in accordance with § 212.83(a)(1)?	
April 19	Amoco Oil Co., Gail Wickens, Eastern Region, P.O. Box 887, One North Charles Street, Baltimore, Md. 21203.	A-405
	Issue: Does the Standby Regulation Activation Order No. 1 apply to a non-branded independent marketer?	
April 26	Johnson Oil Co., Inc., Stephen G. Crockett, Robert G. Holt, Martineau, Rocker, Larsen & Kimball, 1600 Beneficial Life Tower, 36 South State Street, Salt Lake City, Utah 84111.	A-406
	Issue: May a reseller of crude oil terminate a supplier/purchaser relationship pursuant to 10 CFR 211.62 based upon the consent of both parties under the terms of a contract and a settlement agreement?	
April 27	Wilson A. Chase, Harvey E. Deutsch, Isaacson, Rosenbaum, Spiegleman & Friedman, P.C., Suite 2300, First of Denver Plaza Building, Denver, Colo. 80202.	A-407
	Issue: Is the right to an allocation transferred to a successor pursuant to 10 CFR 211.106(a) where a firm has established a new retail outlet on a site contiguous to the predecessor's and serves substantially the same market as the predecessor served?	
May 2	Hamilton Exxon Service Center, Terrence P. McMahon, Campbell, Warburton, Britton, Fitzsimmons & Smith, Eighth Floor, First National Bank building, Two West Santa Clara Street, San Jose, Calif. 95109.	A-408

Appendix.—List of Requests for Interpretation Received by the Office of General Counsel—Continued

[Months of April and May 1979]

Dated Received	Name and location of requestor	File No.
	Issue: Does a wholesale purchaser-reseller qualify as a new purchaser entitled to use the updated motor gasoline base period for product allocation specified under the Standby Regulation Activation Order No. 1, which amends 10 CFR 211.12(e)(2), if it purchased an existing service station which had been closed to the public during the preceding five months?.	
May 4	State of Alaska, Avrum M. Gross, Attorney General, Pouch K, State Capital, Juneau, Alaska 99811.	A–409
	Issue: (1) Is Cranke Point Field in Cook Inlet, Alaska, a "field" for the purposes of the Mandatory Petroleum Price Regulations so that all royalty oil in kind produced from that field would qualify for the highest posted price for that field regardless of the pipeline through which it was delivered for sale? (2) Whether the State has properly calculated lower tier ceiling prices for crude oil of 33° API gravity or less..	
May 11	Mobil Oil Corp., William C. Streets, 150 East 42nd Street, New York, N.Y. 10017.	A–410
	Issue: Does the fact that Mobil at one time lifted equity crude oil or otherwise received crude oil on a preferential basis in a particular country means that the disallowance provisions of 10 CFR 212.84 are applicable to arms-length transactions which occur after the termination of preferential treatment that had been extended to Mobil and its affiliated entities in that country?.	
May 11	Ethyl Corp., R. S. Silver, Research and Development Department, 1600 West Eighth Mile Road, Ferndale, Mich. 48220.	A–411
	Issue: Does a purchaser's use of motor gasoline used in fleet testing of a new "energy extending anti-knock mixture" constitute "energy production" as defined in 10 CFR 211.51 in order to qualify the purchaser for the allocation level of 100 percent of current requirements subject to an allocation fraction as specified in 10 CFR 211.103(c)(1)(i)?.	
May 15	LaJet, Inc., John Allen Chalk, P.O. Box 5186, Abilene, Tex. 79605	A–413
	Issue: Should payment received by a producer for the leasing of property to store domestic crude oil purchased from that producer in a first sale be considered in its ceiling price determinations under 10 CFR 212.31, 212.73 and 212.74?.	
May 18	Santa Clara County Service, Station Dealers Association, Paul R. Hay, 236 East California Drive, Sunnyvale, Calif. 94086.	A–414
	Issue: General interpretative questions regarding retail pricing of motor gasoline under Part 212, Subpart F..	
May 25	Siegel Oil Co., Larry Siegel, 1380 Zuni Street, Denver, Colo. 80204	A–415
	Issue: (1) Is a gasoline dealer that does not operate a service station entitled to increase its selling prices in sales of gasoline to wholesale-purchaser consumers to recover its vapor recovery system cost under 10 CFR 212.93(b)(1)(ii)(D)? (2) Is the cost for a spillage control system considered a vapor recovery system cost? (3) May such costs, if recoverable, be allocated between retail and non-retail sales of gasoline?.	
May 24	National Soft Drink Association, Thomas A. Daly, 1101 Sixteenth Street, NW., Washington, D.C. 20036..	A–416
	Issue: Are bottlers of soft drinks engaged exclusively in "agricultural production," as defined in 10 CFR 211.51, entitling them to 100 percent of current requirements for motor gasoline under 10 CFR 211.103(b), including gasoline used in distributing the soft drinks?.	
May 25	Energy Consumers and Producers Association, Patti Gibson, P.O. Box 1726, Seminole, Okla. 74868.	A–417
	Issue: May a crude oil producer redesignate a property subsequent to January 1, 1979, on a reservoir basis, where the property had previously been designated on a lease basis, in order to qualify the property for the additional price incentives for newly discovered crude oil under 10 CFR 212.78?.

BILLING CODE 6450-01-M

Voluntary Agreement and Plan of Action To Implement the International Energy Program; Meetings

In accordance with Section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act (42 U.S.C. 6201 *et seq.*) notice is hereby provided of the following meetings:

I. A meeting of the Industry Advisory Board (IAB) to the International Energy Agency to be held on June 25, 1979, at the offices of the IEA, 2 rue Andre Pascal, Paris, France, beginning at 9:00 a.m. The agenda is as follows:

1. Opening remarks.
2. Matters arising from record note of IAB meeting on May 10, 1979.
3. Report on SEQ/SOM meeting of May 18, 1979.
4. Position of Reporting Companies under EEC competition regulations and U.S. Voluntary Agreement, including:
A. Attendance of IAB representatives at SEQ/SOM meetings during discussion of oil market developments.
B. Status of U.S. legislation and Voluntary Agreement after June 30, 1979.
5. Report by IEA on worldwide supply outlook and current situation in IEA member countries.
6. ISAG manpower considerations if a general or selective trigger is activated in the near term, including:
A. Full or partial ISAG with U.S. company participation.
B. Full or partial ISAG without U.S. company participation.
7. Operation of emergency allocation system if U.S. companies cannot participate.
8. Review IEA proposed amendment to Emergency Management Manual to allow established seasonality patterns to be taken into account in reallocation of oil between countries.
9. Report on ISAG Training Seminar at Duesseldorf on June 5-7.
10. Dispute Settlement Center.
11. Future work program and meeting schedule.

II. A meeting of Industry Advisory Board (IAB) to the International Energy Agency (IEA) to be held on June 25 1979, at the headquarters of the IEA, 2 rue Andre Pascal, Paris, France, beginning at 2:30 p.m. The purpose of this meeting is to permit attendance by representatives of the IAB at a meeting of the IEA Standing Group on Emergency Questions (SEQ) which is being held at Paris beginning at 2:30 p.m. on June 25, and at a joint meeting of the SEQ and the IEA Standing Group on the Oil Market (SOM), which is being held at Paris beginning at 10:00 a.m. on June 26. The agendas for the meetings are under the control of the SEQ and the SOM. The agenda for the SEQ meeting is as follows:

1. Approval of draft agenda.
2. Summary record of twenty-sixth meeting.
3. Dispute Settlement Center (revised proposal by the IAB).
4. Emergency Reserves.
A. Treatment of consumer stocks in IEA reporting system.
B. Emergency reserves of Participating Countries on January 1, 1979.
5. Demand Restraint.
A. Countercseasonal adjustments and time shift of demand in crisis management.
—IAB comments.
—EMM amendments.
B. In-depth review of United Kingdom.
C. Dates for Sweden, Norway, Canada, U.S. reviews.
6. The EEC Emergency Management System (presentation by DG XVII of the European Commission).
7. Seasonalization of trigger and allocation calculations.
A. Seasonalization of triger calculations. (Reactions by Participating Countries.)
B. Comments by the IAB on special crisis situations.
C. Emergency Management Manual amendment to allow ISAC/Allocation Coordinator to take established seasonality patterns into account in reallocation of oil between countries.
8. IAB and ISAG.
A. Role of IAB in advising IEA on matters concerning harmonization of IEA and EEC emergency management systems.
B. Quarterly oil forecast contributions by Reporting Companies.
C. Framework for antitrust clearances.
D. Report on ISAG Training Seminar at Duesseldorf, Germany, June 5-6.
E. Mini-ISAG in case of a selective trigger situation.
9. Special section of the Information System.
A. Base period final consumption—1st Quarter 1978–4th Quarter 1978 and preliminary 2nd Quarter 1978–1st Quarter 1979.
B. Quarterly oil forecast.
C. Questionnaire "A" and "B" reporting instructions.
10. Preparation for the Third Allocation Systems Test (AST–3).
A. Optimum design of allocation tests.
B. Optimum date for test.
C. Joint preparation by SEQ and IAB for AST–3 (working group to be set up for November, 1979).
D. Delay of product imbalance workshop.
11. Future meeting dates.
12. Any other business.

III. The agenda for the June 26 meeting of the SEQ and the SOM is as follows:

1. Adoption of the preliminary agenda.
2. Record of the third joint meeting.
3. Developments in the international oil market:
—Current supply/demand/stock situation and scenario update.
—Oil market developments.
4. Monitoring of IEA response to oil supply/demand situation:
—Update of countries' assessments (Questionnaire results).
—Possibilities for acceleration of demand restraint program.
5. Progress report on study of spot cargo markets and their effects on the international oil market.
6. Report on the operation of the emergency data system during the first half of 1979 (based on governments' input).
7. Future meeting dates and arrangements for future Questionnaire "A" and "B" submissions.
8. Any other business.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public.

Issued in Washington, D.C., June 11, 1979.

Robert C. Goodwin, Jr.,
Assistant General Counsel, International Trade and Emergency Preparedness.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Freeport Minerals Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Action taken and opportunity for comment on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

DATES: Effective date: June 4, 1979. Comments by: July 16, 1979.

ADDRESS: Send comments to: Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, TX 75235.

FOR FURTHER INFORMATION CONTACT: Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, TX 75235 (Phone) 214/749-7838.

SUPPLEMENTARY INFORMATION: On June 4, 1979, the Office of Enforcement of the ERA executed a Consent Order with Freeport Minerals Company of New York, New York. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

Because the DOE and Freeport Minerals Company wish to expeditiously resolved this matter as agreed and to avoid delay in the

payment of refunds, the DOE has determined that it is in the public interest to make the Consent Order with Freeport Minerals Company effective as of the date of its execution by the DOE and Freeport Minerals Company.

I. Consent Order

Freeport Minerals Company, with its home office in New York, New York, is a firm engaged in the production and sale of crude oil and is subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211, 212. The Office of Enforcement of the Economic Regulatory Administration (ERA) and Freeport Minerals Company entered into a Consent Order to resolve certain civil actions which could be brought by ERA as a result of its audit of the crude oil sales by Freeport Minerals Company and Brock Exploration Corporation from the Wilbert Minerals lease, Iberville, Louisiana. This Consent Order only settles those matters relative to Freeport's interest in the crude oil sold from the Wilbert Minerals lease. Settlement between ERA and Brock Exploration Corporation is the subject of separate action.

The significant terms of the Consent Order with Freeport Minerals Company are as follows:

1. The period covered by the audit was September 1, 1973, through December 31, 1975.

2. Freeport Minerals Company and Brock Exploration Corporation improperly applied the provisions of 10 CFR 212.73 and its predecessor, 6 CFR 150.354 when determining the prices to be charged for the crude oil sold from the Wilbert Minerals lease.

3a. Freeport Minerals Company agrees to refund to the DOE the initial sum of $7,738.37, plus interest. This amount will be refunded within 30 days of the effective date of the Consent Order, June 4, 1979.

3b. Freeport also agrees to refund its proportionate share (attributable to its overriding royalty) of any remaining overpayments (plus interest) that are finally determined by ERA to be owed by Brock Exploration Corporation in this matter. The method and disposition of the refund will be established upon final settlement.

4. The provisions of 10 CFR 205.199J, including the publication of this Notice, are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

Refunded overcharges as described in I. 3a. above will be in the form of a certified check made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have either been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 CFR 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199l(a).

III. Submission of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the refund amount should provide written notification of the clain to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments.* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should sent your comments or written notification of a claim to Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, TX 75235. You may obtain a free copy of this Consent Order by writing to the same address or by calling 214/749-7628.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Freeport Minerals Company Consent Order." We will consider all comments we receive by 4:30 p.m., local time, on July 16, 1979. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Dallas, TX on the 5th day of June 1979.

Wayne I. Tucker,

District Manager of Enforcement, Southwest District Office, Economic Regulatory Administration.
